List of Passengers.

PASSENGERS INWARD.

By this mail, to Marseilles per Valetta, arrived Jan. 13.—From Hong Kong: Mr. Vana, Mrs. Vincent and infant, servant, and son of servant, Dr. Rutherford, Lieut.-Col. Stanley, Dr. Currie, C.B., Messrs. Brett, Boyle, Weyman, and Beard. From Point de Galle: Mr. Celegate. To Southampton, per Delta, expected to arrive 16 Jan.—From Hong Kong: Messrs. Lourenzen, Burns, Jones, Jeanette, and Ferrell.—From Singapore: Messrs. Warren, R.N., Sutton, and Pass. From Point de Galle: Miss Varley, Capt. De Butt, Mrs. Butts and infant, four children, and native female servant. To Suez.—From Point de Galle: Mr. Steifer. To Alexandria.—From Hong Kong: Messrs. Reinhart and Hughes. From Singapore: Mr. Van Bushom. To Malta.—From Hong Kong: Messrs. Torello and Tierz.

PASSENGERS OUTWARD.

By this mail, per Pera, from Southampton, Jan. 4th.—To Shanghai: Messrs. Wm. Thos. Oliver, Samuel Whiteway Cleave, L. Mathews, J. Deverill, W. W. Hyde, M. S. Townend and Cuningham. To Hong Kong: Mr. and Mrs. Booth, Capt. Ball, Messrs. D. Blackie and D. Illanger, Ensigns Greenham and Tosswell, Lieut.-Col. Youge, G. Tranter. To Singapore: Mr. J. Alphonso Huber, J. Banner, I Moody, Rev. A. D. Nicholson. To Penang: W. West. To Calcutta: Miss W. Dempter. Mr. Cronch, Capts. S. A. Hunter and McPherson, Messrs. C. Newmarsh, H. F. Brown, E. P. Ames. bury, G. W. Booker, and J. R. Moller; Mrs. S. Willock, E. Garside, Rev. Mr. Wade, Messrs. T. Brown, J. B. West, and J. Chapman; Miss Horan, Mrs. Fuller and son, Staff-surgeons R. Fitzgibbon and I. Darys, Wm. Williams, Messrs. Betsgh and H. Lundie, Staff-assistants Surgeon A. Home and ayah, Mrs. Home, Mr. H. R Scott. To Madras: Mr. and Mrs. C. O'Brien, Capt. J. B. Sherard, Mr. F. S. Evans, Mrs. Hutchinson and European female servant, Mr. E. H. Hogarth, P. I. Knight. To Ceylon: Army Sergt. Donelly and wife, H. Skeen. To Alexandria: Mrs. Laidlaw. From Gibraltar to Calcutta: Mr. R. F. Knowles. From Suez to Singapore: Mr. I. B. Lenschan. To Calcutta: Capt. T. E. Webster, Capt. and Mrs. Mounsey, and European female servant.

From Marseilles, per Euxine, to leave Jan. 19th.—To Hong Kong: Mr. Ewing. To Shanghai: Capt. G. G. Roberts. To Singapore: Mr. and Mrs. Wiggers, Von Kerchem, and two children, Mr. Gram. To Penang: Mr. J. B. Rogers. To Calcutta: Major and Mrs. Rose, Messrs. F. R. Cockerell and Griffith, Mr. and Mrs W. T. Tucker, Mrs. Tilton and child, Mr. A. C. Mangles, Rev. I. P. and Mrs. Harris, Mrs. R. C. Lawrence and infant, Miss Hutton, Master Kennedy, and female servant, Messrs. Pepper, J. S. Robertson, J. B. Tomkins, and C. Cumine, Mr. Moran and son, Lieut. Curtis, Capts. W. F. Segrave, and C. Armstrong, Messrs. Mair and Scanlan, Major McMullen, Mr. E. Wyttenbach. To Madras: Miss Taylor, Col. Chas. Denison.

Per P. & O. str. Ripon, 20th Jan., from Southampton.—To Shanghai: Mr. H. Smith, Dr. J. Parker. To Ceylon. Miss Jessie Burness, Mr. G. Elphinstone. To Singapore: Mr. Jas. Ramsay Mcarthur, Mr. Vogel, Mr. R. H. Beaver, Mr. W. Smith, Mr. Price, Mr. G. Shambler, Staff-Assist. Surg., J. H. Beath, M.D. To Hong Kong: G. F. Adams, and T. Murtgah. From Marseilles, Jan. 28. To Singapore: Mr. and Mrs. A. Van Delden and four children, Mr. J. Watson, Miss C. Doornick, Miss A. Van den Bergh, two Misses Van de Poel and governess, Mr. and Mrs. Gillillan. To Shanghai: Mr. C. B. Telge, Mr. Gunston, Mr. and Mrs. Lynell.

Per P. and O. str., Feb. 4, from Southampton. To Hong Kong: Mr. H. Wilkinson, Miss Rathborne, Mr. and Mrs. Hazeon, Mr. Charles Wilde, Mr. Ellis Gilman. To Shanghai: Mrs. Essex. To Penang: Miss Baynham. To Ceylon: Mr. and Mrs. Swan, Miss Swan. From Gibraltar.—To Hong Kong: Don Manuel Lynart, lady, and infant. From Marseilles, Feb. 12. To Shanghai: Mr. G. S. Morrison. To Ceylon: Mr. and Mrs. A. Stuart and two children, Mr. R. Ahlers, Mr. H. Harvey. To Singapore: Mr. Charles Stricker.

Per P. and O. str., Feb. 20, from Southampton.—To Hong Hong: Mr. Caldbeck and infant. From Marseilles, Feb. 28.—To Penang: Mr. and Mrs. Fokasterman.

Per P. and O. str., March 7, from Marseilles. To Singapore *via* Bombay: Mr. and Mrs. W. W. Cook.

Summary of News from the Far East.

JAPAN.

The Japanese seem resolved to effect their purpose of ousting foreigners by the most practical step which it was possible for them to take. If Yedo is denuded of population, or if by the departure of the Daimios it is deprived of all its greatness as a capital, it is evident we shall gain little by insisting on a residence in that city. The departure of the nobility and of their families still goes on, and many houses have not only been stripped of their furniture, but actually pulled down. Several steamers have been bought by the Government or by the Daimios, and these in case of any rupture would prove of good service to the Japanese, who are well able to manage them. The most important fact in relation to the progress of the revolution is, that official papers, which for three centuries have been issued in the name of the Tycoon, now bear that of the Emperor, while the Customs' duties at Yokuhama, hitherto collected for the Tycoon, have been ordered to be accounted for to the Treasury at Miako. Evidently a crisis is pending in our relations with Japan, and the Japanese seem to be provoking us to take the first aggressive step.

During the last three years, since the opening of Yokuhama as a port, there have taken place the following murders or attempts to murder:—Two Russians cut down almost in two in the street. Two Dutchmen similarly cut down. One Chinaman cut and stabbed. One Japanese American, servant of the Minister stabbed. The English Legation at Yedo attacked and several dead and wounded. A Frenchman attacked. The American Interpreter assassinated. The English Legation again attacked and two of the guard killed, and an English gentleman cut down in the open road.

Dr. Pompe van Meerderwort had left Nagasaki for Shanghai on his way to Holland. His departure is much regretted by the foreign community generally, amongst whom he has resided for nearly four years. He was in charge of the hospital established by the Japanese Government, where he has taught many natives the practice of medicine, several of whom have shown such aptitude for it that they can compare with good European practitioners. Before his departure the foreign community raised the sum of about $1,000 to purchase a piece of plate to be presented to him as a mark of their friendship and esteem. His countrymen among the Dutch residents have also raised a sum of about $600 for the same purpose. He is succeeded in his charge by Dr. Bauduin, who arrived by the *Columbia*.

CHINA.

PEKING.

Accounts from the capital report political affairs as satisfactory, and foreign relations progressing favourably. The naval movement which has been inaugurated by Prince Kung and the present Administration, to obtain the assistance of English volunteers in suppressing the rebellion as well as piracy, has been further extended to the native flotillas, and the Chinese Government have at last resolved upon flying a national ensign on their war junks. It is to be a triangular yellow flag, with the Imperial dragon on it in blue. This will be a beneficial arrangement, in distinguishing war vessels from pirates, which at present is a difficult matter to do.

TIEN-TSIN.

Mr. Mongan, who has been for some time Acting-Consul at Tien-tsin, proceeds to England by next mail. All communication with the North by sea is now closed for the winter. The annual races had just come off at Tien-tsin.

SHANGHAI.

An engagement with the rebels had occurred at Pao-kong, a large village about twelve miles north-east of Tsing-poo, on the road between that city and Kah-ding. Colonel Burgevine (Ward's successor), having been informed that a large force of rebels was encamped in that direction, proceeded with a force of 1,000 of his drilled Chinese, on the 12th November, to look out for the enemy. On reaching Pao-kong, it was found that about 10,000 Taipings had intrenched themselves strongly in a camp of fifteen stockades. Nothing was done that day, but on the following day four guns and two mortars were put in position, and the place was gallantly carried after an hour's firing. The storming party was led by a brave young Chinese officer named Wong-ee-poo, to whom Admiral Hope had presented a sword for gallantry. This young soldier, however, was mortally wounded. The Taiping Chief, Wo-wang, was also killed after he had rallied his men several times. The rebel loss is set down at 2,300 killed, and that of Colonel Burgevine at five killed and fifteen wounded. This looks like exaggeration. An English surgeon attended to the wounded men. This is the most effective display that has yet been made by unassisted Chinese troops.

Later news states that the large body of rebels which had been reported as marching on Naz iang, had been encountered at Szu-chiang-kou, a place beyond Wang-du, by a body of Honan Imperialists, and drilled Chinese, led in person by the Governor of the Province, who totally routed them. They are said to have retreated in great confusion to Kun-shan.

The following account of the expedition to Kahding has been communicated to the *China Mail*. It will form an interesting supplement to the news communicated in our last number :—

Burgevine and Kingsley's men had moved on some two miles in advance, and at six next morning everything was in motion on to Kahding, the Chinese musketeers leading the way. About two hours found the advance guard close to Kahding, and blazing away vaguely with two little howitzers, to let the rebels know that the barbarians were coming, and that it was in order that Kahding should fall. But their ardour is soon checked, and the work of the Staff begins. Already they had suffered, riding on ahead, without waiting for the bridges to be repaired. Every field had its adventure, and every bridge its triumph. Happily one only, a Chinese, was hurt, and the heads started to reconnoitre without delay. It is a question whether we are to have a fight. Flags are seen, but they prove nothing. On goes the General to a post of observation when a bang and a round shot over his head settles our misgivings; all doubts are satisfactorily settled, and a smile of grim satisfaction suffuses every face. No villagers are to be seen, and the country once so smiling is a desert, so all information required must be obtained by ourselves. Having ascertained that the rebels are standing to their guns, and by the practice they are making may give us some difficulty, the engineer goes off to see where to place our guns, and pickets and sentries are posted all around. Soon the boats come up, and beer and loafing become, for many, the order of the day. . . . . .

All night long come in reports that such a gun is in position; that the mortars are all right; that such a bridge is ready, and finally, ere the first streak of light has tinged the sky, innumerable men are turning out in the cold raw morning. Through the high dank grass a long line of men, all marching into the positions they are to occupy; careless of the fact that the ground they are traversing is swept by the rebel guns, if they would only fire, and merely anxious for a good place where they can see well, and be among the first at the assault. It is cold, and marching and counter-marching are monotonous. But patience is not tried too long: a streak of day-light appears, followed sharply by a streak of fire—a rocket rises over Kahding and falls like its guardian star, dimmer, dimmer, and is lost. The ball is opened, and the bombardment has commenced in earnest. Two coolies are borne by in doolies—one dead and severely wounded. A sailor walks up as jauntily as if he were preparing for a dance; his shoulder shattered, he says, by one of Ward's men's shells; for every one is blazing away for dear life, and Ward's men are somewhat wild. It is day-light now, and the wall is crumbling. A moorsom knocks half a bastion down; a look-out tower is crushed by an 8-inch shell, and Kahding is no longer in a safe state. The fire from the walls is less than we anticipated. An artilleryman is killed; another of Ward's shells burst among us, and wounds a Frenchman; but we make up our minds that it is to be as at Najao—a heavy fire when our big guns cease and not till then. But we shall soon know. Word has come that the assault will commence in a moment, and while we turn our guns to make the left assault secure, the shout on the right tells us the 31st are in and Kahding has been taken, according to the programme. Vain is the attempt to stop the assault on the left. Till the guns have swept the breach, the Admiral may manage to hold in his marines, eager for the fray, but prompt to obey. The French are off with a whoop, and Ward's men with them. There is a frantic rush across the field, through the stockade, and a Chinaman of the coolie corps has got first in. Unhappy man! for he is immediately shot; mistaken by an impulsive ally for one of the Changmaos. Chinese, French, English, all swarm in, and the butchery and loot commence. Butchery perhaps unavoidable, but deplorably sad; for it is not our real foes who suffer, but the unhappy victims of their oppressors, and there can be no excuse for shooting an unarmed man, who is not even flying from you, but humbly imploring your protection. It is a stain on these expeditions that precautions are not taken to restrain the whole force, as they are already done to restrain that portion the least prone to these atrocities. Sad enough are the effects of the bombardment—a heap of bodies in this court-yard, all sent to the next world by an eight-inch messenger; a child with its head off, lying in the doorway; a strong man hideously crushed by a fallen beam. These sights are pitiable enough, but it is a horrible sight to see a poor miserable grey-haired man have his brains blown out by a creature calling itself a soldier and a civilised being; and such sights are seen. Of loot there is little, the garrison was a fighting one, and the wealth and the great chiefs found on the first visit to Kahding were no longer there; and though Ward's men and the French, who alone were allowed to loot, were loaded with bundles, these were in the majority of cases old clothes or cloth only, not as before, sycee and silk. It did not take long to become satisfied that there was nothing to see; the Treasury was empty, the chief's houses so handsomely furnished before, were seedy and disreputable; and the fights for the little loot there was made the occupation more dangerous than the assault, and soon the town was left to its legitimate possessors, the Chinese—of whom an army had marched up, imperfect to our ideas as far as arms and equipment, but a fine set of men, and in a certain state of order; and it was a cause for congratulation that we should leave the place in better hands this time than when we took it before.

The races appear to have been held with great success. The Autumn Meeting came off on the 13th and 14th Nov. The principal race of the first day was the Autumn Vase, and the following is the account of it as given in the columns of the *North China Herald*:—

"The AUTUMN VASE, value 100 gs.; for all horses.—Arabs, 8 st. 7 lbs.; Stud Bred, 9 st. 7 lbs.; Colonial, 10 st.; English, 11 st.—Entrance Tls. 10 each.—One mile and a half. Professionals allowed to ride.

1.	Captain King's ..	b. e. h. ..	Eskdale.
2.	Mr. Percy's ..	b. e. g. ..	Robin Hood.
	Mr. Mackenzie's..	c. s. h. ..	Pons Asinorum.
	Mr. Fitz James'..	b. s. h. ..	Chatterbox.

"This was the race of the day, and the one on which was concentrated the chief interest; inasmuch as some of the best racers in Shanghai were pitted against each other, while a new feature of allowing professional jockeys to ride, was introduced for the first time. Of seven horses entered, four started, two of which, Pons Asinorum and Robin Hood, were ridden by professionals, one of whom has had fourteen years' experience as a jockey. Off they went at a moderate pace, Eskdale leading the way for the first quarter of a mile without much trouble, when Pons and Robin crept up to him in a ruck, leaving Chatterbox behind, as they reached half round the course. Turning the corner, homeward bound, the race was close, when Pons began to flag, and Robin Hood was pressing close on Eskdale. But it was of no avail, that fine horse showed that he possessed speed and stamina yet, and his gentleman rider knew how to handle his steed with coolness and judgment against professional experience, and he brought in Eskdale a winner, amidst the plaudits of the assembled throng; with Robin Hood a good second, and Pons Asinorum nowhere. Time 2 m. 58 sec."

On the second day The Bachelor's Cup, value 150 guineas, presented by the bachelors of Shanghai, was easily won by Captain King's Eskdale. This was the first race in Shanghai in which all were professionals. The Drawing Room Stakes, value 100 guineas, also presented by the bachelors, were won by Captain King's Forester so easily that he was literally pulled up by his rider and walked past the winning post. There was also a steeplechase, the first in Shanghai, the prize being the Garrison Cup value £100. It was won by Mr. Markham's Miss Mowbray.

The fictitious Windham, who arrived some time ago at Shanghai, and announced himself as of Felbrigge Hall, Norfolk, has decamped from the Settlement in debt. The following advertisement issued by Mr. Smith, the owner of the Astor-house, appears in the papers :—

"Two Hundred Dollars Reward,—Warning to shipmasters, pilots, or proprietors of small boats in Shanghai. The undersigned begs to inform the community that an individual, calling himself W. F. Windham, of Felbrigge Hall, Norfolk, England, has absconded from the Settlement largely indebted to him, and hereby offers the above reward for his apprehension, and will esteem it a great favour of any person giving such information as will lead to his recovery. The following is a description of his

Digitized by Google

person :—Height 5 feet; hair brown, and parted in the middle; eyes light blue; complexion pale; manner effeminate and eccentric, dressed generally in shooting jacket and tweed trowsers heavily braded, with Balmoral shooting boots. H. W. SMITH. Shanghai, 10th Nov., 1862."

The *Shanghai Recorder* writes :—"The *Juanpore* from London has just arrived bringing a large quantity of arms and ammunition for Ward's corps of disciplined Chinese. The cargo consists of twelve 12-pounder howitzers, ten thousand stand of arms, together with one million rounds of ammunition for the small arms, and a considerable quantity of shot and shell for the howitzers. These have been purchased from the English Government, and have been drawn from Woolwich, Purfleet, and Weedon."

Mr. M. Robinet, of the firm of Thomas Hunt and Co., met with a serious accident on the 14th November, that gentleman having fallen into the hold of a vessel a depth of fifteen feet. Little hope at first was entertained of his life, but he is now said to be progressing favourably.

Brigadier-General Staveley has issued an order that the left wing of the 5th Bombay N. L. I. is to remain in Shanghai until the spring, under command of Major Taylor, but the headquarters and band have returned by the *Dalhousie*. The detachment of the 22nd Bombay N. I., lately arrived by the *Hesper*, would relieve the detachment of H. M. 31st Regiment at Fawha. A field force that had left the Settlement for Nanzing, consisting of 200 of the 31st, 200 Beloochees, with two mountain howitzers and four mortars, under command of Colonel Hough, afterwards returned to Shanghai, leaving 500 French and a large body of Imperialists at that post—which has been strongly intrenched by the latter.

HANKOW.

The busy season is over. The rebuilding of the city continues, and, in a year, the whole will have been rebuilt. The sickness which had been so prevalent in Shanghai and elsewhere had not reached Hankow. The bands of robbers, which had appeared within thirty miles of the city, have since retreated, and are understood to be crossing the border into Honan, where the people are used to their constant presence. These banditti were not considered really dangerous, as, being badly armed, they always disappeared before the troops sent against them.

A fearful fire broke out at Hankow on the morning of the 2nd of Novembe, which swept away about 650 houses in one of the most thriving parts of the town on the Han River, The fire broke out in a tallow chandler's, the coolie watching the boiling tallow having fallen asleep and allowed it to boil over. The large hongs were principally filled with paper, oil, tallow, sugar, seaweed and hemp, and the property destroyed is estimated at about 750,000 taels. One old man and two children were burnt to death.

NINGPO.

A French contingent is in course of organisation. The country is quiet, but reports of the rebels being on the march for Ningpo are constantly circulated.

A newspaper correspondent writes :—"The Taoutai of Ningpo has deserted his Yamun and fled, nobody knowing his whereabouts. It appears that he was going through the city, when some of Ward's disciplined Chinese would not salute him as he passed ; but, on the contrary, were insolent. On this His Excellency ordered some of them to be seized and carried to his Yamun, where they were severely beaten. On being liberated they immediately repaired to their quarters, and having consulted with their comrades, a large number proceeded in arms to the Taoutai's Yumun, seized him, dragged him out, and beat him in return. The Taoutai immediately sent off to Capt. Dew for assistance, who landed with a party of men from the *Encounter*, and without attempting to arrest the perpetrators, shot down several ; some were afterwards secured, and, doubtless, will be beheaded. His Excellency the Taoutai has deserted the city, and Capt. Dew is in charge."

NANKING.

The long expected attempt of the Imperialists to capture Nanking is now likely to come off successfully with the assistance of the Russians. The Tarter General, Toh, of the garrison of Ching-chow, in the same province as Hankow, has been ordered by the Government to join the besieging force at Nanking ; he has just gained some victories over the Shen-si rebels. The Imperial Government has chartered several steamers for the conveyance of troops and stores. General Burgevine commands the Imperialists.

HONG KONG.

Mr. Charles Wirgman, who has for the last five years and more resided or travelled in China and Japan as artist for the *Illustrated London News*, was at Hong Kong, *en route* for England. He will long (says the *China Mail*) be pleasingly remembered in this part of the East, not only for distinguished ability in his profession, but for his amiable and obliging disposition.

A fire had occurred which destroyed the Chinese houses on each side of the way between Messrs. Bourjau, Hubener & Co's. and the Military Hospital. The origin of the fire is unknown, but it broke out in one of the newly-erected Chinese houses, and led to the destruction of twenty-five, including one of the police stations. The military, navy, and police exerted themselves to check the progress of the flames, which at one time threatened the destruction of the neighbouring European premises, filled with valuable goods. One of the Medical Staff Corps was killed by the falling down of a wall, and one if not more Chinese were burnt to death.

Captain Thomsett, the harbour master, having gone home on sick leave, his duties have been undertaken by Captain McMurdo.

A member of the Volunteer Corps havs given an impetus to the movement in favour of a full brass band for the corps, by pledging himself to give $1,000 so soon as other $2,000 were subscribed. A public meeting was about to be held on the subject.

On the departure of Admiral Hope, the *China Mail* writes :—

"To him it is due that we have not a vast Taiping camp in our neighbourhood at Shanghai. To him we owe it that that vast city has not exchanged its industrious population for a horde of rebel soldiers. The allied commanders have saved the Consular ports from virtual annihilation, by retaining them in Imperial authority. The residents, instead of that continual anxiety for their persons and property which must have arisen from the proximity of a rebel camp, with its numerous uncontrolled marauders, feel their present position to be both safe and dignified. The Consuls are at present on official relations with men whose authority is generally effective ; in the other case they would correspond with men who cannot undertake to be responsible—or pretend so—for the loose bands that hang about their camps. We know only too dreadfully well that the functions which pertain to those loose bands are those of alarmists, incendiaries, spies, robbers, and murderers, in advance of the general Taiping horde. Those ruthless pioneers would, when the moment arrived, make short work of a Consular port with one gunboat protecting it. But were even the exchange of tea and silk for arms and ammunition to save the ports in the Taipings' eyes, the position of the Consul and residents would be a very sorry one—disputes, defiances, threats, alarms, would be of daily occurrence ; and the supply of arms to men whom the Chinese abhor the idea of being governed by, would be a policy at once criminal and inhuman. By Admiral Hope's action, all this has been saved us. Either way, we are inconvenienced and put to trouble ; but it was easy to choose between the two. It was fortunate that we had in Sir James a man who not only chose wisely, but made his choice good with the sword, in two campaigns, of the most troublesome kind, with such a foe, of a not very glorious character."

Rustomjee Burjorjee, the chief hero of the great opium swindle, has been sentenced to ten years' penal servitude.

Mr. John W. Maclellan, having resigned the management of the "Chartered Bank of India, Australia, and China," the following address had been forwarded to that gentleman :—

"Hong Kong, 21st November, 1862.

"John W. Maclellan, Esq., Hong Kong.

"Dear Sir,—We have heard with much regret of the resignation by you of the management here of the 'Chartered Bank of India, Australia, and China.' Permit us, on your so retiring, to express our sense of the invariable courtesy towards the public which has characterised your period of management, and which has only, we believe, been equalled by your zeal for the interests of your establishment.

"Wishing you every future success in life,—We are, dear Sir, yours faithfully."

Then follow the signatures of Jardine, Matheson, and Co., Dent and Co., and all the principal firms in Hong Kong.

CANTON.

The Viceroy, Laou, has been degraded in consequence of the charges urged against him at Peking. He is succeeded in office by Liu-chang-yew, formerly Governor of Kwang-si ; but, for some months, Laou will remain in charge. The new Viceroy is unknown to foreigners.

THE PHILIPPINES.

MANILA.

On the 6th Nov. a violent storm of wind, said to be a typhoon, was experienced in the Northern provinces, and was felt, with more or less intensity, in various districts. Much damage has been done to houses, roads, bridges, and to the crops. The shipwrecks reported are those of the Spanish

Digitized by Google

barques *Amistad* and *Manuelita*, and the brigs *Estrella* and *San José*; various coasting crafts have also been lost. But the most deplorable wreck was that of the American ship *Nabob*, of Boston, Baxter master, bound for Shanghai with coals. She was wrecked on the coast near to Aparri, Cagayan; seventeen men and one woman (the Steward's wife) were drowned; and fourteen saved themselves by swimming. Among the latter were the captain, first mate, assistant mate, carpenter and steward. The weather was still hot in Manila, and the barometer low.

MALACCA STRAITS.

SINGAPORE.

Our correspondent writes:—

"The Tringanu affair attracts public attention to the exclusion of all others; our newspapers abound with party views on the subject. Intelligence has reached us that the bombardment of the place caused far more damage than was supposed by the commanders of the men-of-war engaged. Twenty men it is said were killed, many houses destroyed, and the first shell burst in the principal mosque. From a description of the place, it appears clear that the fort and Rajah's palace could not have been shelled without injury to private property; for they are both built close to the sea shore in a straight line with the houses of the town, so that the missiles that missed the former must have struck the latter. A very large section of the European community condemn the proceedings of the Government in opposition to the local press, which upholds its acts in toto. In my last letter I said that Tringanu was subject to Siam, but it appears that it is not so to the extent I supposed. The chief of the former, only acknowledges his inferiority by transmitting periodically the Bunjah Mas, or Golden Flower, to the Court of Bangkok. The act is not recognised as one of vassalage, and the British Government has always treated with the Rajahs of Tringanu as independent Princes, and no objection has been offered to the procedure by the Kings of Siam. In this instance, it appears the Governor of these Settlements only requested the Siamese monarch to interfere with the ex-Sultan of Singah in a friendly spirit on account of the relationship existing between them, and did not do so because Tringanu was considered a feudatory of Siam. The reference withal was made some months ago, and the King had had ample time to exert his influence; but up to the present moment he has not moved in the matter. Under these circumstances, our Governor had no alternative left but to take a decisive step with the Rajah of Tringanu, especially when he knew that the north-eastern monsoon which is setting in, would cut off all communication with the coast for several months. I have, after a careful consideration of the subject, arrived at the conclusion that Colonel Cavanagh acted rightly in the affair, and that the lesson, though severe, will have a salutary effect on the chiefs of the Peninsula. Under previous Governors conciliatory measures were usually adopted, and the prestige of our name suffered much; but with decisive acts, like the bombardment of Tringanu, it is certain we shall regain our influence. The late catastrophe will put a stop to any further attempts on Pahang by Wan Ahmet or the ex-Sultan of Singah. The latter fled from Tringanu, and has probably proceeded northwards to the Siamese territory. We are all now anxious to hear from Siam; it is more than probable that the King will presume upon Colonel Cavanagh's reference to him to take umbrage at the proceedings before Tringanu.

"I regret nothing more than that the latter should have thought it necessary to refer at all to Siam, for to Asiatics such a step is an acknowledgment of their superiority and our weakness. After the step was resorted to, our proceedings at first sight appear rude, and courtesy alone demanded delay; but, as we are kept in ignorance of some of the facts of the case under the bureaucratic system that prevails, I am only able to write on those that are before me. When the Supreme Government permits the publication of the correspondence relative to the affair, we shall be better able to form an opinion.

The Government notification extending the Stamp Act to the Straits Settlements reached us by the last Calcutta steamer—as usual, too late to carry it into effect on the day fixed for its introduction, the 1st of November. Colonel Cavanagh has fixed on the 10th inst., so that it becomes necessary for the Legislative Council to pass a short Act legalising all documents that should have been stamped between the 1st of November and 10th of December; as at present they are illegal, and subject the parties making or uttering them to severe penalties. Here is another instance of the folly of maintaining the present connection between us and India. With a Legislative Council of our own, no such bungling could possibly have occurred."

On the subject of the alleged encroachments of the Dutch in Sumatra, the *Singapore Free Press* writes:—"Information had recently been received in Penang of the intention of the Dutch to station controleurs at some or all of these ports. The last intelligence on the subject which had reached Penang, was to the effect that the Dutch were preparing an expedition to start from Siak northward, with the intention, it was asserted, of planting the Dutch flag in the ports along the coast from Siak as far as Lankat. It was also reported that the Dutch officials, in presence of the natives, profess their contempt for any of the treaties between the British Government and the chiefs along the coast, and not only forbid all intercourse by letter or otherwise with the Straits Settlements, but have obliged some of the Rajahs to take a solemn oath under the Koran not to communicate with the British authorities. If these statements are correct, the Dutch would appear determined to bring matters to a crisis without delay. The Government of the Straits Settlement has done all that the very limited power entrusted to it in regard to external affairs will permit. It has deputed the Resident at Penang to visit the different ports, and inform the chiefs that the British Government considers the engagements formerly entered into with them as still binding. It has made representations on the subject to the Supreme Government, which we trust will secure immediate attention, and lead to the local Government being authorised to take more active measures to preserve matters in *statu quo* until the question has been discussed between the British and Netherland Governments in Europe . . . . . .

"If the Netherland Government will give sufficient guarantees that in bringing the ports on the East Coast of Sumatra under its direct control it will not interfere in any way to restrict the intercourse of British subjects with these ports, or of the natives of these ports with the British Settlements; that the existing rates of duties will not be altered with the view of making them more heavy on British commerce; and that no monopoly or forced delivery of the pepper or other produce will be established; we have no doubt all objections to its proceedings will be withdrawn. But if the Netherland Government is not prepared to do this, we trust the British Government will take effectual means for supporting the rights of its subjects which are now threatened with such serious injury."

His Imperial Majesty's steamer *Semiramis*, arrived at Singapore on the 25th of November, having on board his Excellency Admiral F. Jauris, and sailed for Saigon.

PENANG.

It appears that a movement is being made for the appointment of Bishop Macdougal as diocesan of the Straits Settlements. The *Penang Argus*, of Nov. 20, writes:—

"A printed circular, oddly enough marked 'private,' is now passing from hand to hand here and at Singapore, setting forth the advantages of appointing Bishop Macdougal, of Labuan, to be diocesan of the Straits Settlements, and some efforts have been made to obtain signatures to a petition to the Home authorities in favour of the scheme. It will be gratifying to the chaplains to learn that their salaries are to be cut down sufficiently to raise the missionary bishop's income to *twelve hundred pounds sterling* per annum. Some will think it a singular circumstance that the printed circular is not signed by any one, and that part of a private letter from the Lord Bishop of Calcutta is appended to it, seemingly without the writer's permission. If the chaplains in the Straits are overpaid, it may be proper to reduce their salaries; but it does not appear to be necessary to appoint a bishop to keep two quiet gentlemen in order; especially as the arrangement would distract the right reverend prelate's attention from his proper missionary work in Borneo, a diocese larger than Great Britain and Ireland. Officious persons have no right to be thrusting temporal greatness, with its cares and temptations, on the spiritual father of an interesting mission, for the sake of which he publicly abjured even ecclesiastical pomps and vanities. Dr. Macdougal is a good man, a genial companion, and an excellent shot; but we take leave to doubt whether he is exactly adapted to fill the Bishopric of the Straits Settlements, even if it were intended to create such an office."

CEYLON.

A Bill was passing through Council to enable the Government to raise a million sterling for the purposes of the railways, in £100 debentures.

The weather had been very stormy, so that no produce could be shipped from Colombo by this mail, and the captains were kept prisoners on board their ships.

A curious legal point had been raised in the Supreme Court, touching the disposal of a condemned criminal, who had managed to escape from prison on the day previous to that on which he was to have been hung. The time prescribed for

Digitized by Google

carrying out this last penalty of the law having expired, the double question arose of whether he could be hung on any other day, and if so had the Supreme Court sitting collectively in Colombo, the power under the Charter of re-sentencing a convict originally condemed at the Batticaloa Sessions. The Judges ruled that they had this power, ruling at the same time that the date of the execution was of little account, and that the Fiscal might have hung the prisoner at any time after his capture upon the original warrant. They contented themselves, however, with sentencing him to transportation for life.

The sum of £19 has been forwarded by this mail from Colombo for the Lancashire Distress, £208 having been previously remitted.

The following programme of a journey to be made this month by the Governor appears in the *Ceylon Times* :—"The Governor will leave Colombo for Galle on the 12th January, accompanied by his Aide-de-Camp. After remaining at the Southern capital for a day or two, His Excellency will proceed, *via* Matura, to Orobokka, which he will probably reach about the 19th. Thence, after inspecting the Irrigation Works and the adjacent cultivation, Sir Charles MacCarthy will proceed, *viâ* Rakwane to Balangodde, where he may be expected about the 23rd. The new road, as well as a portion of the trace onwards to Kalupahane, will be inspected, and his Excellency will finally return to Colombo by way of Ratnapoora and Avishawella."

The same journal says :—"It is now definitely settled that Captain Gorman will act as Deputy Commissary General during the absence of Mr. Bernard, and that Mr. Arrowsmith, of the Ceylon Rifles, will act as Acting Assistant Deputy Commissary, an arrangement, which though exceedingly judicious, is not at all likely to prove acceptable to the members of the Civil Service. We had certainly understood that this appointment was to be bestowed on a civilian in future, and that this was the reason of the retirement of Captain Gorman from the army."

Another discovery with regard to small-pox appears to have been made by Mr. John Loftus, of the Ceylon Medical Establishment, who is in charge of the Small-pox Hospital of Galle. This gentleman thought he discovered in an apparently worthless weed, very common all over the island, a specie of the *Sarracenia purpurea*,, which has long been used as a specific against small-pox in North America; and tried, it is said, a strong diffusion or decoction of its roots in small-pox cases with decided success.

From a statement of the total revenue of the island from Customs, for nine months of the past year, it appears that to the 30th of September there was a decrease of £21,688 on the collection of 1861. The last quarter, however, would, it is said, show a different state of things. The increase at the port of Colombo alone during October and November, amounted to £18,000, and it was expected a further increase of £5000 would be shown in December. This would raise the total Customs' revenue above the £241,000 collected in 1861—the amount estimated for 1862 by the Colonial Secretary being £213,500.

Early closing on Saturday afternoons is now common at Colombo, and a clerk writing from Kandy hopes that the firms there will follow so good an example.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANOLDA—On the 13th ult., at Maliban-street, Colombo, the wife of Mr. T. Anolda, of a daughter.

ARMSTRONG—On the 1st Nov., at Shanghai, the wife of Wm. Armstrong, Master of the steamer *Shantung*, of a daughter.

AUCHINCLOSS—On the 10th Nov., at Bangkok, Mrs. Auchincloss, of a daughter.

CAINE—On the 23rd Nov., at H.M.'s Consulate, Swatow, the wife of G. W. Caine, of a son.

CAVE—On the 3rd ult., the wife of Wilmot Browne Cave, Esq., of a daughter.

CONDIT—On the 17th Nov., at Canton, the wife of the Rev. J. M. Condit, Presbyterian Missionary, of a daughter.

DE ZILVA—On the 24th ult., at Ella Cottage, Negombo, the wife of John Edgar De Zilva, Sub.-Assist Surveyor, of a daughter.

EALES—On the 17th Nov., at Shanghai, the wife of Captain George D. Eales, H.M.'s 29th or 2nd Belooch Regiment, of a daughter.

KERR—On the 17th Nov., at Canton, the wife of Dr. J. G. Kerr, Presbyterian Missionary, of a daughter.

HERBERT—On the 14th ult., at Colombo, Mrs. William Herbert, of a daughter.

MATHESON—On the 17th Nov., the wife of C. S. Matheson, of a son.

MINTO—On the 28th Nov., at Hong Kong, the wife of George N. Minto, of Whampoa, of a daughter.

NOWLAN—On the 9th ult., at Colombo, the wife of Captain Nowlan, 50th Regiment, of a daughter.

THOMPSON On the 2nd ult., at Rose Cottage, Kandy, Mrs. W. M. Thompson, of Alma Estate, Maturatta, of a son.

MARRIAGES.

AUSTIN—WOOD.—On the 26th November, at Point de Galle, by the Rev. Edward Mooyaart, Benjamin Austin, Esq., to Miss Ellen Mary, third daughter of the late E. J. Wood, Esq.

CAREY—HOWELL.—On the 6th inst., at St. Martin's-in-the Fields, by the Rev. R. K. Arbuthnot, Henry William Carey, of China, third son of James Carey, Esq., of Oak Hall, Wanstead, Essex, and Mincing-lane, London, to Marian, elder daughter of William May Howell, Esq., of New South Wales, late of Cheam, Surrey. No cards.

MCDONALD—BASKERVILLE —On the 1st inst., at Plympton Maurice, by the Rev. Henry Willoughby Taylor, Chaplain Royal Navy, assisted by the Rev. H. A. Gilbert, of Clare Portion, Tiverton, T. W. McDonald, Esq., Deputy-Inspector-General of Hospitals and Fleets, to Louisa, relict of Charles B. Baskerville, Esq. Lieut. R.N.

DEATHS.

BENKER—On the 13th November, at Shanghai, Abraham Benker, chief officer of the American barque *Emily Banning*.

BUTLER—On the 11th Nov., at the General Hospital, Hong Kong, Lawrence Butler, Private, 99th Regiment, aged 25 years.

COOPER—At Hong Kong, on board H.M.S. *Hercules*, Joseph Cooper, Private, 31st Regiment, aged 22 years.

COSTERTON—On the 27th ult, at Croydon, Annie Mary Caroline, youngest child of the late John Costerton, of Hong Kong, aged five months.

CARTER—At Fuhchau of dysentery, — Carter, master of the British ship *Polmaise*.

DAWSON—At her residence in Colpetty, of disease of the heart, Miss Margaret Dawson, aged 34.

FERGUSON—On the 16th Nov., at the General Hospital, Hong Kong, John Ferguson, Sergeant, 21st Regiment aged 39 years.

FLYNN—On the 26th November, at the General Hospital, Hong Kong, James Flynn, Private H.M. 67th Regiment, aged 29 years.

GARRACK—On the 19th Nov., at the Seamen's Hospital, Hong Kong, J. Garrack, seaman belonging to the ship *Maria Lucia*.

GRIBBLE.—On the 18th Oct., at Foochow, Charles William Langley, eldest son of the Rev. Charles B. Gribble, Chaplain to the British Embassy, Constantinople, in the 24th year of his age

HUXTABLE—On the 23rd November, at Hong Kong, on board H.M.S. *Sanspareil*, Samuel Huxtable, armourer.

LENNON—On the 25th November, at Hong Kong, on board H.M.S. *Hercules*, Michael Lennon, drummer, 31st Regiment, aged 26 years.

MACKENZIE.—On the 28th ult., at the residence of her mother, 5, Warwick-gardens, Kensington, most deeply lamented, Ricarda Catherine Mackenzie, the beloved wife of Donald William Mackenzie, Esq., of Hong Kong, China, the youngest daughter of the late Capt. Richard Croker, R.N., in the 25th yea of her age.

O'BRIEN—At Hong Kong, on board H.M.S. *Hercules*, Hugh O'Brien, Private 31st Regiment, aged 29 years.

PICKWOAD—On the 16th November, at Shanghai, at the residence of his brother, Alfred Pickwoad, aged 45 years.

PATERSON—On the 25th ult., at Singapore, Alice Graham, aged 10½ months, only daughter of William Paterson, Esq.

SLACK—On the 16th Nov., at Hong Kong, on board H.M.S. *Melville*, —. Slack, Assistant Engineer, H.M.S. *Renard*.

SPROLES—On the 15th Nov, at the Government Civil Hospital, Hong Kong, Henry Sproles, late Constable to H.M. Consul, Canton.

SULLIVAN—On the 16th Nov., at the Seaman's Hospital, Hong Kong, John Sullivan, late of the British barque *Alicia*.

SCHOKMAN—On the 28th November, at Colombo, Mr. L. H. Schokman, aged 59 years.

TIDZER—On the 16th Nov., at Hong Kong, an board H.M.S. *Melville*, Thos. Tidzer, seaman. H.M.S. *Imp rieuse*.

VERHOEVEN—On the 3rd December, at Hill-street, Colombo, Jane Agnes, infant daughter of Mr. J. G. Verhoeven, aged 1 year and 2 months.

WARNER—On the 13th Nov., at the Seaman's Hospital, Richard Warner, of the American ship *Southern Cross*.

WEATHERLEY.—On the 4th Nov. last, of dysentery, James K. C. Weatherley, Engineer of H.M.'s G.B. *Snap*, off Swatow, China, in his 24th year, beloved, respected, and lamented.

COMMERCIAL REPORT.

CHINA—EXPORTS.

TEA.—Canton.—There has been a fair business done in Congous during the fortnight, the firmness of the teamen enabling them partly to recover the fall lately established. Teas worth 26 taels and upwards have advanced 1 tael, the market closing with firmness. It is said that 15 to 20 chops more only are expected this season. A very moderate business only has been transacted in Scented Teas, Canton Greens, and Canton packed Congous. In Country Greens no business is reported—700 pakgs. Moyune have come to hand since last mail. The following are the transactions reported for the fortnight :—Congous : 15 chops Houchows at 20 to 25¾ taels, 2 chops Monings at 27 to 29 taels, 1 chop Chong-sow-kyes at 22½ taels, and 6 chops Woopacks at 28 to 34 taels. In all 24 chops, besides Canton packed 1,000 hf-ch. common at 15 to 20 taels, and 250 ditto fine at 26 to 27 taels. Scented Teas, 1,500 boxes Caper at 19 to 20 taels for fair, and 22 to 23 taels for mid. to good. 8,000 boxes Orange Pekoe at 28 taels for fair, 25 to 27 taels for mid. to good; and 28 to 38 taels for fine to finest. Canton Greens : Gunpowder, 4,000 boxes, at 17½ to 20 taels for mid. to good; Imperial, 400 half-chests, at 19½ to 20 taels for middling to good; Young Hyson, 600 half-chests, at 13½ taels for com. The total settlements of Congous this season amount to 166 chops, besides 6 chops contract teas.

SHANGHAI.—Black : There has been very little demand during the past fortnight, but no decline on previous rates can be quoted, The stock that is on offer is considerably diminished, and holders are unwilling to sell at a reduction, as very little more Tea is expected to arrive from Hankow this season. Settlement and re-shipments during the fortnight 13,000 chests Black Tea, making a total to date of 228,936 chests, against 118,927 chests same time last year. Stock 9,000 chests Congou, and 1,000 chests Flowery Pekoe. The quotations are as follow :—Hohow, Tls. 22 to 24 common to good; Oonhams, Tls. 24 to 28 second and third crop; Ningchow, Tls. 25 to 27 second and third crop; and Oopack, Tls. 28 to 30 third crop. Green : There continues a steady demand for all good country teas, and prices are fully maintained. Considerable arrivals have come forward from Kiukiang, but have for the most part been re-shipped on owners' account. This market is now quite cleared of all fine Moyunes, and the remaining stock of country tea principally consists of old and new leaf mixed. A few chops of Pingsuey are on offer, but Teamen are asking exorbitant prices. Hoochow and Japan teas are almost entirely neglected, rates may be quoted easier. Settlement and re-shipments during the fortnight 12,000 half-chests China and 300 half chests Japan, making a total to date of 114,840 half-chests and 14,445 half-chests respectively, against 83,946 half chests and 11,842 half-chests same time last year. Stocks 8,000 half-chests Hoochow and Pingsuey, 7,200 half-chests Moyune and Fychow, and 1,000 half-chests Japan.

FOO-CHOW-FOO.—A steady business has been done during the greater part of the fortnight at about previous rates. Of the settlements, about 9,000 chests are low and dusty, partly for India and partly for England—these were taken at full rates. The settlements of the better kinds have been at irregular prices. Since the receipt of the mail of the 26th Sept. no transactions have been reported. The following is the report of the business of the fortnight :—Congous, 16,812 chests, and 16,316 hf-do. at

Digitized by Google

6 to 16 taels for ordinary, to brkn. lf.; 16½ to 24 taels for good com. to flo'ry; and 24½ to 26 taels for the better kinds. Souching, 900 chests at 24 to 30 taels for fair to good. Flowery Pekoe, 234 chests, at 20 to 33 taels for com. to good. Oolong, 8,100 hf.-ch. at 17½ to 24 taels for com. cargo to supr. Scented Teas, 4,648 boxes at 14½ to 26½ for com. to good. The stock for sale upon the market is thus estimated, Congou 100,000 chests (say 40,000 ord.; 58,000 good com. to flo'ry; and 2,000 better kinds), Souchong, 2,150 chests. Flowery Pekoe 1,200 do. Oolong 50,300 hf.-do., and Scented Teas 8,000 boxes. The total arrivals of Congous from the country to date, including contract Teas, amount to 537,700 chests, against 457,400 chests corresponding period last season.

AMOY.—Settlements have continued in this Tea market to some extent, for shipment to the United States, and prices for most descriptions continue very firm. Congou: The demand is quite stagnant, buyers are holding off, chiefly on account of the exorbitant rates demanded by teamen; settlements 167 half-chests at $16.50, stock 2,800 half chests. Oolongs: In this class a good business has been done, principally for loading the *St. Paul.* Towards the close of the fortnight some parcels of objectionable flavour have been settled, at rates somewhat below the former demands of the teamen; for desirable parcels, however, prices are fully supported, and teamen continue indisposed to realise these, except at very full prices. Settlements 15,790 half-chests at $17 to $25.25, stock 30,000 half-chests. Ankoy: Those of clean burnt quality have again been in demand, and this class is now becoming rather scarce. The commonest kinds continue to attract no attention, and the stock of these is in excess. Settlements 2,360 half-chests at $10 to $16.75, stock 9,200 half-chests. Orange Pekoe: A few chops have been settled at very full rates. Settlements 590 half-chests at $11.25 to $18.75, stock 2,330 half-chests. Caper: No change. Stock 10,300 boxes.

HANKOW.—The settlements of the fortnight are reported at 15 chops Congou at 17 to 22½ taels at rates previously current. The market is steady; holders though firm are willing to sell at current quotations. The total supplies of the present season to date exceed 430 chops. The stock on the market is stated at 32 chops.

KEWIANG.—A good business continues to be done in Green, which, however, is much restricted by the paucity of fine teas. The supplies from the country were scant until about the 10th instant, when fully 12,000 pkgs. arrived. These have not yet been placed upon the market, but the Teamen are extremely firm in their demands, especially for the better kinds, for which there is an active competition. The settlements for the fortnight amount to 15,000 pkgs. Prices have tended upwards till the present standard of weights is two taels above that ruling at date of last report. Fair to good Moyunes have fetched 25½ to 31½ taels, one chop bringing 33½ taels. Some fair to good Fychows have been taken at 25 to 30 taels. Kewkiang packed and mixed old leaf have fetched 21 to 24 taels. The total arrivals on the market for the present season to date amount to 110,000 hf. ch., 40,000 of which have been settled, 20,000 were contract teas, 20,000 have been sent to Shanghai for sale on native acct., and the remainder, or 30,000 from the stock, upon the market. In Congous the transactions of the fortnight are confined to the sale of one chop at 15 taels, and to the shipment of another to Shanghai on native account. There is no stock for sale upon the market, but two chops of contract teas have arrived down within the last few days, and will, of course, be forwarded on to Shanghai. The total supplies this season reach 85 chops.

YOKUHAMA.—There is no particular change to note in this article during the week; owing to the extreme rates asked by the Teamen, buyers still continue to buy sparingly.

RAW SILK.—SHANGHAI: Since last report about 2,000 bales have been settled without any material alteration in prices. The dealers throughout the fortnight have remained firm, and notwithstanding the decline in Europe announced by the 26th September mail, they will not at present entertain any corresponding reduction. The scarcity of silk up country and the very high cost, strengthen the position of holders in this market, and some of the Chinese prefer shipping to England rather than submit to any decline. The receipts from the producing districts have been confined to a few hundred bales, and all reports agree that there stocks are very small. The supply from Japan has been nearly 1,800 bales, and by last advices, is likely to continue to arrive freely. The transactions of the fortnight are reported at 3,800 bales, against 5,000 bales in the corresponding fortnight of last season, and 5,000 bales the season previous. The total settlements for the season to date amount to 41,700 bales, against 32,000 bales in the corresponding period last season, and 44,750 bales the season before. The present unsold stock is estimated at 9,000 bales against 20,000 bales in the corresponding period last season, and 8,000 bales the season before. The following are the latest quotations:—Tsatlees—No. 1, taels 470 to 485 per picul; 2, 450 to 465; 3, 420 to 435; Market, 3, 405 to 415; 4, 380 to 400; 5 and com., 360 to 370. Taysaams—No. 1, 375 to 385; 2, 340 to 355; 3, 315 to 330; 4, 5, and com., 280 to 305. Yuenfa—No. 1, 405 to 425; 2, 380 to 400; 3, 355 to 375; 4, and com., 340 to 350. Hainings, 350 to 415. Hangchow Tsatlees, 360 to 380. Sewhing's, fair to good, 310 to 330; mid. to inferior, 260 to 300. Leayongs, 260 to 280. Throwns, 315 to 420.

YOKUHAMA.—Grey shirtings, 5½ catty per piece, $2.60 to $2 70; ditto, 6 catty, 2.70 to 2.80; ditto, 6½ catty, 2.20; T-cloths, 2 to 2.10; white shirtings, 2.60 to 3; white spots, 3; dyed, ditto, 3.50 to 3.75; brocades, white, 3; ditto, coloured, 3.50 to 3.75; ditto, purple, 3.50 to 3.75; chintzes, assorted, 2 to 2 25; camlets, BBB good colours, 22 to 23; ditto, assorted, 21 to 22; ditto S, good assortment, 21.50 to 22.35; SS, 20.50 to 22.35; long ells, 7.50 to 8; lastings, 13.50 to 14.50; velvets, black, 35 yards, 10.50 to 11; ditto, blue, 27 yards, 8.50 to 9; ditto, indigo, 8.50 to 10; lead, 9 to 10; tin, block, common, per picul, 41 to 42; ditto, plate, 7 to 7.50.

CANTON.—The article is scarce and wanted. The supplies are scant, the rates demanded high, and consequently no business is reported.

YOKUHAMA.—Prices for Dye Pots are from $5 to $10 easier, while others, Koshus and other descriptions, have fully maintained rates last quoted, and a rise of $10 has been established in Hutchogees. The market has been mainly supplied with the medium and lower classes of Dye Pots—few parcels of No. 1 have come forward. Settlements are estimated at 500 bales, and unsold stock at 250:—Mybash best parcels, $480 to 490; do. medium, $465 to 475; do. inferior $440 to 460; Sodai, 1, 2, $400 to 450; Oshu best parcels, $440 to 460; do. medium, $380 to 400; do. inferior, $320 to 350; Coshu 1 and 2, $390 to 400; do. 2, 3, 4, $370 to 385; do. 3, 4, 5, $345 to 360; Hatchogee, $330.

DRUGS, &c.—The following is the report upon the Canton market:—Cassia Lignea, 500 pls. sold at $15.75 to $16.50, stock 500 pls. Cassia Oil nominal $200, no sales and no stock. Cassia Buds scarce and wanted at $45. Star Anniseed, scarce and wanted at $22.50 to $25. Rhubarb, 100 pls. only in stock, $50 to $60 demanded. China Root no sales—quotation $3.50. Stock 500 pls. Galangal Root no sales, quotation $3.50 to $4, stock 400 to 500 pls. Vermillion, sales 25 boxes, quotation $36 to $37. Galls, no sales, stock 100 to 200 pls., $12 to $13 demanded.

MANILA.—The arrivals of produce from the provinces have been of little consideration during the fortnight, but prices have risen to rates unexpected three months ago, which, though bearing a flattering appearance at present, must be regarded with a certain caution by collectors of produce, so as not to contract engagements for long periods counting upon present quotations; nevertheless, we believe, they will remain steady during some fortnightly periods, and they partly make up for the losses sustained by the prostrate situation of the market twelve months ago. The following figures compared with those of our former reports will give an exact idea of the situation of the market:—Hemp—Quilot, 235 piculs, unfixed; Sorsogon, 1,941 piculs, $6.50; Current, 6.524 piculs, $5.50 at $6. Sugar—Current, $4.50; Tanduay, $4.50 at $6.50, nominal; Iloili, 18,023 piculs, $3.25, packed: Cebu, 14,193 piculs, $3; Taal, 1,834 piculs, $3.

CHINA IMPORTS.

KIUKIANG.—There has been less doing in imports owing to the high rates at which Cotton Goods are now held, the quotation for 6½ catty Grey Shirtings is tls. 2.4 and for 7 lbs. T.-Cloths tls. 1.8 at which some trifling sales have been made.

HANKOW.—Imported manufactures have been held firmly. The sales effected are trifling and confined to local consumption only.

SHANGHAI.—Importers continue firm, and a moderate business only has been the consequence. Grey shirtings are about the same as last quoted, but white are 1 to 2 mace higher and wanted. T-Cloths have advanced a little and so have Chintz and Damaoks. Coloured Brocades are 3 to 4 mace dearer. Long Ells have advanced 2 to 3 mace. American goods are held at a figure which the dealers cannot give. The above quotations are nominal. The stock is reported at 112,000 pieces. Drills, 5,500 pcs. Sheetings, and 1,500 pcs. Jeans. Other piece goods are unchanged. Sapan Wood is saleable. Glass has advanced to 2 mace, and is wanted. Tin tends down a little. Coals are in full stock and good demand.

FOO-CHOW-FOO.—The following are the sales reported for the fortnight:—Grey Shiritings, 8.6lbs. 1,000 pieces at $3.38 per piece. T-Cloths, 7 lb. 8,900 pieces at $2.60 to 2.65 per piece. American Drills, 40 pieces at $6 per piece. Dyed Brocades, assorted 250 pieces at $4 per piece. Spanish Stripes, common, 200 pieces at 84 cents per yard. Lead, 1,800 piculs at $8.50 to 9 per picul.

AMOY.—Cotton Yarn: About 50 bales Nos. 16 to 24 have passed back into the hands of foreigners at $61 to $62 per picul, which is to-day's quotation. Stock 280 bales. Manufactured Goods are in but limited inquiry. Grey Shirtings: Small sales of 63¾ catty goods have been reported at $3.60. Quotations are: 5¼ catty, $2.90; 6¼ catty, $3.40; 7 catty, $3.70 per piece. Stock, 16,350 pieces. T-cloths: No sales reported. Quotations: 4½ catties, $2; 5½ catties, $2.40; 6¾ catties, $2.50 per piece. Stock, 3,500 pieces. White shirtings: No sales reported. Quotations: 54 reed, $2.85; 64 reed, $3.60; 74 reed, $4.50; 80 reed, $4.80 per piece. Stock, 1,500 pieces. Turkey red cloths: No sales reported. Quotations: $3.20 to $3.50 per piece. Stock, 1,000 pieces. American drills: $5.30 per piece. Spanish stripes: 80 cents. to $1 per yard. Stock, 620 pieces. Metals: Lead, $9, nominal. Tin, Malacca: $22; Banca, $36 Quicksilver: $62 per picul. Window glass: $4.25 per box.

CANTON.—Transactions in Cotton manufactures have been very limited, and were sales attempted a reduction in price must take place. The present, however, is the harvest time, when business in imports is usually dull. An improvement may be expected before the new year. Woollens are in fair inquiry, but holders ask a little more than dealers are at present willing to give. Metals continue in good demand, Iron having advanced a little.

HONG KONG.—In cotton manufactures the dealers do not appear to be able to do business at the present enhanced value, and the tendency is downwards, holders, however, being still firm. Woollens are dull, and metals have not moved off as was expected. The gathering of the harvest operates more directly upon Hong Kong than elsewhere, which accounts for the dulness.

IMPORTS.—CHINA AND JAPAN.

TIENTSIN.—There has been an improved demand for imported manufactures. Foreigners, however, instead of selling have been buying, and dealers hesitate to operate at the advance established. A good business is expected shortly as supplies will be cut off by the ice which has set in early this season.

EXCHANGES IN LONDON.

[For dates, see first page.]

		Bank.	Private.
At Shanghai (per Tael.)	6 months sight.	6s. 1d.	6s. 1½d. to 6s. 2d.
At Foo-Chow-Foo (per dol.)	6 ditto	...	...
At Canton, At Hong Kong, At Macao	6 ditto	4s. 8d.	4s. 8½d. to 4s. 9d.
At Singapore	6 ditto	4s. 8½d.	4s. 9d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Newcastle: Nov. 6, Iris; 8, Rubicon; 11, Blackburn. From Glasgow: Nov. 7, Radnagore. From London: Nov. 8, Juanpore. From Cardiff: Nov. 11, Monarchy. From New York: Nov. 17, Benefactress.

At HONG KONG.—From London: Nov. 18, Red Riding Hood. From Cardiff: Nov. 14, Fredrick VII.; 28, Verbena. From Newcastle, Nov. 14, Cividale. From Aberdeen: Nov. 15, Continent.

SAILED.

From SHANGHAI.—For London: Nov. 13, Mallard; 17, Ann Adamson, Meggie Atkinson.

From HONG KONG.—For London: Nov. 18, Mirage; 24, Endora; 25, Blenheim; 26, Millbrook. For Liverpool: Nov. 18, Spirit of the Deep, Banda, Khimjee, Oodowjee. For New York: 28, Eureka.

From FOO-CHOW.—Nov. 13, Britannia; 18, Chapman.

FREIGHTS AND CHARTERS.

HONG KONG.

Business in freights has continued very dull during the past fortnight. Very little has been done for the Rice Ports, and that little with small vessels at very low figures. Little or no freight for the coast. At Amoy rates continue good for small craft. At Foochow rates have advanced slightly, but no increased demand for tonnage. At Manila we hear of no improvement. Very many vessels have been circulated for Singapore, but there is no freight of any consequence offering for that port, and what there is is taken at any prices shippers choose to offer. For Calcutta many vessels have departed in ballast—the high rates ruling there at last advices having induced masters to leave for that port seeking. At Shanghai several vessels have been taken up to load Cotton for England at medium figures. We quote as settlements:—

GREAT BRITAIN.—Speedwell, Haw, barque, 555 tons, on the berth hence to London, £3 to £3. 5s. Victory, Br. ship, 595 tons, on the berth from Whampoa to London, £3 to £3. 5s. Bahia, Br. barque, 566 tons, on the berth from Whampoa to London, £3 to £3. 5s. Berwickshire, Br. ship, 1,111 tons, on the berth from Whampoa to London, £3. to £3. 5s. Rauma, Norw. brig, 254 tons, on the berth from Whampoa to London, £3. 5s. Genii, Br. ship, 974 tons, hence to Liverpool with cotton, £3.

AMERICA.—Nubia, Am. barque, 510 tons, on the berth from Whampoa to New York, at $12 per ton general, $25 for silk. Romance of the Sea, Am. ship, 1,500 tons, on the berth hence to San Francisco, at $8 per ton. Henry Brigham, Am. ship, 1,068 tons, hence to San Francisco (chartered there for the round voyage at $14,000). Ardville, Br. barque, 424 tons, hence to Vancouver's Island and back here to Amoy, $8,500 in full. Westward Ho, Peruv. ship, 1,409 tons, Macaoto Callao, with Coolies, on owner's account.

SHANGHAI.

Rates have advanced, the amount of shipping in harbour has materially diminished, and the tendency of quotations is upwards. The supply of cotton from the country having been large, a considerable quantity of the staple is under shipment to the Southern ports as well as for England. Timber for building and shipwright purposes is wanted, and ships adapted to that trade are sought after. The approach of winter has stopped shipments to Newchwang and Tientsin. To Japan there is little doing. To Hankow rates have advanced owing to the wants of the Chinese and Japanese Governments having taken off a number of steamers. To Foochow a good business is doing in vessels capable of carrying timber. To Great Britain a good business is also being done. To New York very little. The following are some of the settlements of the fortnight, and may be taken as indicative of the nature of the transactions which have occurred:—

FOR LIVERPOOL.—The Palmerston, Heroes of Alma, Gorilla, Lebanon and Crest of the Wave have been taken up to load Cotton at £2. 15s. to £3 per 50 feet.

FOR LONDON.—Harwood, Orissa, Excelsoir, Empress of India, Cissy, and Queen of Nations, are loading at £2. 15s. to £3 for Tea, and £1 more for Raw Silk, per 50 feet.

FOR NEW YORK.—The rate is $12.50 for Tea, and $17.50 for Silk per ton of 40 feet. At these rates the Game Cock has filled, the Penguin and and Oneida are laid on, and the Mermaid is engaged full of Raw Cotton.

CASUALTIES.

HONG KONG.

The Spanish barque *Manuelita*, hitherto a regular trader between this port and Manila, has been totally lost near the latter port during the late gales. The *Amistad Estrella* and *San Jose* are also total wrecks. The American ship *Nabob*, from New York, was lost on the coast. Seventeen lives lost.

The steamer Viscount Canning has been thirty-six days on her passage from Bangkok to this port. It appears she was supplied with very bad coal, and not enough of that even, and morever she was certainly laden too deeply to come up the sea at this time of the year. It came on to blow fresh when the vessel was about one hundred and fifty miles to the northward of Saigon. Put into How-e-tow Bay and remained there nine days, having during that time laid in a supply of wood. Upon the weather moderating put to sea, experienced very heavy weather, lost nearly all the canvas, but managed to get into a port in Luzon (a place we hear which has just been surveyed and declared a fit spot to build an arsenal, docks, &c.); here more wood was procured, and after laying there five days, put to sea and succeeded in reaching Manila. Encountered very heavy weather between Manila and this port. The steamer sustained no damage further than the loss of sails.

TREATY WITH BURMAH.

We are glad to announce that Lieutenant-Colonel Phayre has succeeded in forming an important treaty with the King of Burmah, the value of which, especially as regards the opening of Western China to English enterprise and commerce, it will be difficult to over-estimate. In our next number we hope to give our readers full particulars of the treaty.

THE REVOLUTION IN JAPAN.

DAILY NEWS.

Even if this country had openly employed force in opening up Japan, that would by no means require it, in order to be consistent, to employ further force for the sake of creating commerce, when it finds that commerce does not follow in the natural course of events. The circumstances of Japan were very peculiar, for foreigners were so entirely excluded that it was difficult to say what might happen were that outer barrier broken down; but the case is very different now that the experiment has been tried, and the breach made has disclosed only more serious barriers behind. At this date we actually find ourselves further off from intercourse with the Japanese than when Lord Elgin landed at Yedo, and those who are most urgent for what is called an "energetic" policy confess that nothing will create commerce in Japan except the destruction of the power of the feudal chiefs—that is to say, of the whole existing political and social organisation of the country. If everything seems to point to Sir Rutherford Alcock's opinion, that commerce with Japan can only be established by violent means, it is well worth our while to inquire what amount of effort will probably be required for that end. Setting aside at present the serious political and moral questions thus raised, it is obvious that we shall have to deal with a brave people, more indifferent to death than almost any other in the world, in a state of very high organisation, if not of civilisation, completely under the command of their chiefs, fond of fighting, and well armed. It is long since the retainers of the principal Daimios have been furnished with Sharp's rifles, bayonets, and Colt's revolvers; and these weapons are even manufactured in the country itself. Their missions to America and Europe have been busily engaged in studying the latest improvements in warfare, having been allowed to do so on the supposition that that would tend to frighten them. Their country is as hilly and well wooded as Virginia, while it is more mountainous. Almost every step made upon it might be contested by very ordinary troops or by guerillas, and no security for an invading army could be obtained against men so reckless as the Japanese are. It is in these circumstances, against twenty millions of a courageous, proud, and organised nation, that some people talk of using force, as they would of punishing a few Borneo pirates or Papuan cannibals. The last China expedition would be nothing compared with a Japanese war. Instead of the rusty jingalls, bows and arrows, and swords apparently made out of iron hoops which were scattered so plentifully about the Taku Forts, we should meet arms scarcely, if anything, inferior to those employed by our own soldiers. Instead of a population regulated by its own immediate local interests, unwarlike in its habits, and ready to trade with the invader, we should find one vast camp of men, among whom fortitude is the highest virtue, who visit the craven in their ranks with a swift doom, and who would effectually prevent trade by driving back all the inhabitants from spots occupied by the foreigner. Certainly it is very objectionable that the Japanese should refuse to enter the comity of nations; but it is no new thing for them to resist the demand. Early in the seventeenth century the English were the first to

Digitized by Google

withdraw from Japan, and so avoided the disasters which there soon after befel the Dutch and Portuguese. If our present position can only be maintained by force of arms it is more than likely that England will do as it has done before, and retire in a dignified manner, leaving to more impulsive nations the task of going to war for a most dubious prospective trade, and perhaps of finally retiring for more cogent reasons. At the same time it is worthy of consideration whether the footing we have already obtained in Japan might not be turned to good account in a quiet way. Why should Englishmen there be on a footing different from that on which they stand in other countries? It is worth while trying whether Japan might not be slowly but really "opened up" by foreigners, who would learn the language of the nation, adapt themselves to its manners, and not set themselves more above its laws than they do over those of many other nations which are not a whit superior to it.

PRESS.

We have no doubt, whatever may be the political aspirations of individual Japanese nobles for power, that one of the chief objects which was held in view in these changes was to thwart the demands which we have lately had to make upon the Tycoon for the recent outrage and assassination of our countrymen at Yokuhama. Yedo is at the mercy of our ships of war, and to that city the Daimios have hitherto been obliged to bring their wives and children to reside, though they must have estimated our character by their own if they ever contemplated that we should be guilty of the sacrifice of their families to avenge even the foul assassinations in which they are so often concerned. Such, at all events, seems a not unreasonable motive, though there may be many others to account for this sudden migration. As far as the Emperor at Miako is concerned, it is believed that he will in every respect be as great a puppet in the hands of the Daimios as the Tycoon. Both are represented as being utterly dissolute and effete, and sunk in the most degrading pleasures. It is therefore probable that unless a man of energy and ability should spring up, something like one of the ancient Japanese Mayors of the Palace, to rule the country in his own name, or else under the Emperor as a new Tycoon, we shall soon hear of Japan being split up, as it was in the middle of the sixteenth century, into as many principalities or kingdoms as there are powerful Daimios to seize upon *disjecta membra* of the Empire. Viewing the revolution in this light, it becomes a serious question for our consideration. The Daimios are our worst enemies, and the prospects we now entertain of extending our intercourse with the country, if their influence should become supreme, will be utterly blank and hopeless. Meanwhile, our Minister at Yedo is unaccredited to any power in the country. The Tycoon is devoid of power, if by this time the unhappy youth who held that rank has not been deposed and beheaded. The only Court that remains is that at Miako, where the spiritual Emperor resides. Even at Yedo our Minister often remained for weeks a prisoner in his own house; will he not tempt new and greater dangers by taking up his residence at Miako? If the new power is to be established there, there too he must go; and doubtless he will be accompanied by a sufficient escort to demand a fitting compensation for the gross outrages and the foul assassination which still remain unredressed.

SATURDAY REVIEW.

The mystery which for centuries has hung over everything Japanese does not seem to have been dissipated by a nearer view of their institutions. There never was anything more hopelessly obscure than the description of the so-called revolution which has been extracted from the columns of a local newspaper (*Japan Herald*) by *The Times*. It appears to have been made by nobody in particular, to have consisted of no remarkable event, and not to be likely to produce any result worth noticing. The rulers have issued no proclamation; there has been no rising among the people; and according to the first account no blood has been shed. But still we are told there has been a revolution; and the brilliant and successful Constitution of Iyeyas, which has lasted in peace for two hundred and sixty years, has been destroyed. The only event which is definitively recorded is that, by the action of some person or persons unknown, the law which requires the Daimios or nobles to visit Yedo frequently, and to leave their wives and families there permanently, has been relaxed. Happy the nation whose revolutions consist in their nobility going out of town. There is a curious juxtaposition of cruelty and gentleness in the steps by which this political change has been accompanied. The Regent, who has only been suspected of a share in a victorious movement, has been murdered. The Tycoon, against whom it was levelled, and whose power it has broken, is entirely spared. Successful conspirators usually find a dethroned potentate very inconvenient to dispose of, and a prison murder is the ordinary solution of their perplexity. But the Daimios have settled the difficulty, and provided for their own safety in a manner which is, no doubt, satisfactory to themselves, but wholly strange to European experience. They have forced him to marry three wives, and sent him to visit the Spiritual Emperor. Which of these two punishments is to restrain him from effecting a counter-revolution, or otherwise doing harm to the dominant party, is not explained. The journalist from whom all the information that has reached England is derived, appears to think that it is the wives that will be the most effective. The Japanese substitute for regicide is nearly as quaint as the Japanese idea of a revolution.

STANDARD.

It appears that the European Powers have been recognising as the head of the State, sending plenipotentiaries to, and entering into a treaty with, a man who has about as much right to represent the foreign policy of the country as has the Lord Mayor of London. The diplomatic fraud which has been practised is now indeed evident. The Japanese Government, it is believed by good authorities, never had any intention to carry out the treaty. Having first tried resistance on the spot, they, as a last resource, sent the ambassadors to Europe, and it is to the reports of those functionaries, leaving no doubt of the determination of the European Powers to persist in their object, that the revolution is ascribed. The duplicity which has characterised the entire proceedings of the Japanese is beyond all example in our intercourse even with eastern nations. Up to the last moment the Gorogio beguiled the English and French Ministers into the belief that ample reparation would be made for the outrage at Yokohama. With tears in their eyes they deplored the wrong that had been done, and so impressed the Ministers with their sincerity as to induce those hardened officials to partake of the friendly symbol of tea—which, it may be remembered, Lord Elgin refused when exacting reparation from the Chinese Government for the murder of Brabazon and Bowlby. The position of the Ministers and merchants is now one of the utmost embarrassment, not to say danger; and what action should be taken to relieve them involves a very delicate question. The difficulty is this. We may have every assurance of the fraud practised upon us, but we have no proof of the fact; and if the Japanese Government say that they never entered into the treaty the violation of that treaty can scarcely be considered a *casus belli*. Moreover, our object being peaceful intercourse and commerce, an appeal to arms does not seem to be the best way to success. At the same time it is difficult to see how two civilised nations of Europe can honourably submit to the treatment they have received from their semi barbarous ally.

THE ADMINISTRATION OF CHINA.

DAILY NEWS.

Pending the immense revolution and reformation which is to be produced in China by Captain Sherard Osborn and his naval Gospel, it is still necessary to note what is going on at Shanghai in connection with the Taipings. The new attempt to impress European civilisation upon the Celestials must be left to the test of time, for it is impossible at present to make anything of the grounds on which it is advocated by its leaders. Mr. Lay, who occupies the proud position of being a philanthropist on five thousand a year, informed us the other night at the Geographical Society that the great cause of the suffering of China was its over-population, "which the productive power of the soil was not sufficient to maintain." If emigration, about which there has been some vague talk, is to be the remedy, it is not quite apparent how it can be forwarded by Armstrong guns; and if China is suffering chiefly because the productive power of the soil is not sufficient to maintain the native population, it is not easy to understand how that evil is to be remedied by making the soil maintain, in addition, a number of very expensive foreign officers, soldiers, and sailors. The gallant naval head of the expedition is quite as puzzling as his civilian superior, for he tells us that his first duty in China will be to bear in mind that he is a member of the Geographical Society; and though this may be very advantageous for Burlington House, it affords an inadequate explanation of the way China is to benefit by his vaunted advent. Perhaps, however, it may be accepted as a proof of his being a philanthropical adventurer, that his first care will be to look after, not the interests of the Chinese Government, which pays him £3,000 a year, but those of a society to whose funds he is called on to contribute. As these gentlemen seem to have the power of carrying on their scheme for the present, they will doubtless do so; but it is a mistake for them to depart from the policy of reserve which they have hitherto followed. It does not seem, however, that Mr. Lay and his friends are to have undisputed possession of the field. Other birds are flocking to the supposed carcase. Not to speak of the American filibusters who have set the example, there comes a report from Shanghai that a Russian fleet with 10,000 soldiers are to rendezvous at Nagasaki previous to going over to China to act as a contingent to the Chinese troops. This is quite possible, and so is the statement that they are to do so in consideration of further territorial concessions. Russia is always wanting and getting more territory south of the Amoor, and she must appear to do something in return, as she did when she pretended that her representations saved Peking from the allied troops. If the Russians send 10,000 men, it is not at all likely that the French Emperor will neglect such an opportunity of finding remunerative employment for a regiment or two—of extending the glory of France and the reign of ideas. The Chinese hitherto have suffered from their enemies, but now they are in still more danger of being oppressed by their friends. As in all probability the Chinese authorities will soon get tired or afraid of their European auxiliaries, it must be distinctly understood that these latter take office entirely at their own risk, and are not to be allowed to drag this country into a war in order to support any pecuniary claims which they may afterwards have. Let them try to regenerate China by any means at their disposal, but let them not be permitted to involve others in the case of their failure.

SPECTATOR.

There is a revenue of two millions, controlled by a British officer, and as secure, when pledged, as the revenue of any European Power. A draft upon Mr. Lay, once sanctioned by the Regent, though it be for the price of a fleet, is almost as good as cash; and the Regent intends to use this power for the reorganisation of the empire through English hands. Already he has set aside a sum for the maintenance of a fleet, to be commanded by Europeans. Already he speaks of assigning another to secure an internal police. Already Mr. Lay declares himself an "intermediate" power between the Chinese Empire and Europe, and already the Indian Government has despatched two regiments of Beloochees, the best light troops in India, to uphold European influence. The one difficulty in the way of aggrandisement has been at last removed. There is a great fund, sufficient at Asiatic rates to maintain a small but highly organised power, exempt from party revision and Parliamentary control. That fund, too, is an increasing one, and before long the whole will be assigned for the maintenance of the European allies. For it must be remembered—and this is the true source of danger—the first steps in this process always relieve, and therefore gratify, the central native authority. The Europeans produce order, though at high cost, and every new inspector means so much more money rolling into Peking. Every regiment of Chinese sepoys implies a province restored to order, and to its tax-paying power; and till they awake to find authority departed, the Chinese Court will revel in an unaccustomed wealth and security. Few statesmen, and no Asiatics, can resist the temptation of enormous revenue and security; and the Chinese, when the system is complete, will be one of the wealthiest and most powerless Courts in the world. Its European agents, highly paid, and therefore untempted to plunder, will have introduced order and regularity, a sound system of finance, an honest though tardy system of justice, and an expensive but terribly efficient system of military police. Those are all advantages for China—advantages which may even compensate for the extinction of national life and the slow closing of all native careers; but they involve, to

Digitized by Google

the simplest understanding, a British protectorate in the empire. Is this undertaking, so vast that our readers will in its very vastness scarcely credit the statements submitted, to be begun without a Parliamentary debate, or an expression of the national will? Are the English people to be once more cajoled into empire?

SIR R. ALCOCK ON JAPAN.

The second general meeting of the members of the Leeds Philosophical and Literary Society was held on the 30th ult., when a lecture on Japan was delivered by Sir R. Alcock, K.C.B.

Sir RUTHERFORD having given a brief geographical description of the Japanese empire and of its discovery, remarked that, unfortunately for the prospect of foreign commerce, the soil of Japan was of such excessive fertility, and the people were so industrious and ingenious, that they might be said literally to want nothing. They desired nothing so much as to be left alone, which was precisely the thing Europeans did not believe in. They wanted commercial intercourse with them; for it was a question how far any nation so favoured by Providence as Japan, was entitled to keep herself isolated, and to exclude the rest of the earth from intercourse. The Government of Japan had come of late years to the conclusion that the time had arrived when it could no longer carry out its traditional policy, or, at all events, it felt that if it did attempt it there would be a force and power brought to bear upon it much too strong to resist. A large portion of the ruling classes in Japan had never reconciled themselves to this change, and whether the struggle of civilisation with opposing principles would end during this generation was a very serious question. The decree had gone forth that this isolation should not be, and it was for them to endeavour to ascertain the facts which would enable them to arrive at a conclusion as to what were the future destinies of Japan and the prospects of foreign trade and commerce with the people. Sir Rutherford then traced the events which followed the first introduction of Europeans —Portuguese and Spaniards—in the 16th or 17th century, the readiness and hospitality with which they were received, the introduction of Christianity, the erection of churches, schools, monasteries, &c., followed, however, by the utter expulsion of foreigners, from the fear that they would subvert the power of the sovereigns of the empire. Now that foreigners were again admitted they must hope it would be with better result—that, warned by the past, they would avoid its errors, and seek through commerce and civilisation to bring good and not evil. The similarity of the geographical distribution of the Japanese empire and the British islands suggested a striking view of similarity and of contrast in the development of the industrial arts and manufactures of the two peoples. In pure workmanship, in beauty of design, in command over the powers of nature, and in many other respects, the Japanese were able to rival the best productions of Europe, and yet side by side with this they had a feudalism exactly corresponding with that of our Anglo-Saxon and early Norman forefathers. Having entered at some length into a comparison of the points in which the Japanese resembled the Anglo-Saxons, he gave an amusing description of the dual character of the government of the empire. There were two sovereigns, one to look after the temporal affairs, and the other after affairs spiritual; two foreign ministers, two councils of state, and, indeed, every man had his shadow, producing a most complex administration, which it was surprising could be made to work. The Japanese were not intolerant or bigoted on religious subjects; indeed, they cared too little upon the subject to trouble themselves about it. He could not say much for their veracity, for the last thing he hoped to hear from them was the truth. He believed there was very little corruption amongst the judges, and, what was most extraordinary, there were no lawyers. He could not say much for the temperance of the Japanese; they were very quarrelsome over their cups, and as they always wore swords (which had the reputation of being equal to Damascus blades), and as life was regarded as of little value, frequent fatal encounters occurred. The Japanese boasted of their valour, and death was always accepted in preference to disgrace. If a noble were convicted of any offence, his property was confiscated and his family degraded, and therefore, to avoid this, a man charged with crime assembled his friends, and in their presence made away with himself. Turning to the progress of civilisation, tested by the industrial arts, he observed that notwithstanding the existence of feudalism, the people had advanced in material civilisation to an extent scarcely inferior to our own. In the applied sciences, in steam machinery, &c., they were far behind Europeans, but some of the results of skilled labour, in silk and textile fabrics, in lacquer, metals, porcelain, &c., would bear comparison with those of any other nation. Sir Rutherford exhibited a large variety of specimens of Japanese art, illustrating the ingenuity, the graceful design, and the marvellous workmanship expended in their production. The Japanese were thus able to supply all their wants, and though this was highly honourable to them, it was little favourable to foreign commerce. It was the upper class, the nobles, who were most hostile to trade and foreign intercourse; they remembered the designs of the first foreigners admitted into the empire, and they regarded the introduction of commerce as being the precursor of social disorder and revolution and as certain to lead to their impoverishment. As to the chances of admission for English cottons and woollens, &c., he said that the Japanese having been self-satisfied for many years, it was clear they must wait until there had been time to create new wants. At present any wants Europeans could supply, they (the Japanese) could supply better and cheaper. We must wait until new wants were created. It was possible, with time and patience, and if the necessary force were maintained, that the opposition to foreign intercourse would greatly diminish, and even finally disappear; but it was impossible to conceal that life was insecure, and at any moment the people might determine to risk everything upon the hazard of war with foreign powers, rather than allow them to establish friendly and peaceful relations. They could only hope for the best, and resort to no means which would bring about any such calamity as he had referred to, if they could avoid it. They had forced themselves upon the Japanese; they had begun by force, and if they wished for commerce they must establish it by force. If they did not wish for commerce at that price, then they should be consistent, and withdraw from the Japanese empire. A vote of thanks was then passed by acclamation, and the audience separated after inspecting the beautiful objects of Japanese art displayed by the lecturer.

THE FOREIGN INSPECTORATE OF CHINESE CUSTOMS.

(FROM "BLACKWOOD'S MAGAZINE.")

"The history of the introduction of the Foreign Inspectorate of Chinese Customs is one so little understood, and yet forms so important an episode of Europeans relations with the Empire of China, that we must describe its institution and progress. Upon it at present pivots our intercourse with the Government of three hundred millions of people. By it we have at last succeeded in making the officials of Peking recognise the value of our commerce as a source of prosperity to the empire; for the Imperial revenue from Shanghai, which did not exceed £266,000 in 1853, will amount in 1862 to one million sterling; and upon the Foreign Inspectorate must be based all farther reforms and civilisation, the steamship, the railway, and the telegraph.

"By the summer of 1854 the accumulated vice and misery of sixty years of imbecile Government rushed like an avalanche over the learning, wealth, and respectability of the fairest portion of China. A native ruffian—a strange mixture of Asiatic cunning, improved upon by having learned enough of Christianity to parody the Old Testament, and blaspheme the tenets of the Protestant faith—led a horde through blood, fire, and rape, into Nanking, the second city of the empire, intrenched himself there, and at once gave a nucleus and *point d'appui* to the discontented and dishonest of a population as numerous as that of all Europe put together. The flood rose on every side, and it was only the inherent viciousness of the plunderers that saved the Manchow dynasty; the Taipings drove the better classes into the arms of a bad Government, for they preferred injustice to anarchy. The city of Shanghai fell in turn into the hands of a local banditti, composed of vagabonds. They were headed by a scamp from Singapore, and a groom who was in the employ of an English firm. The foreign community did not at first regret the expulsion of the Imperial authorities; they already fancied that the millennium of the trader had been reached—'No Customs dues, a cheap foreign market, and large profits at home;' a Quaker's paradise! The gang of miscreants in Nanking pretended that the teachings of Gutzlaff and Hamberg had touched their souls; they had slain or done worse to the thousands of Roman Catholic converts they found in that city; but as they proclaimed the Divine Presence in Nanking, and promulgated the Ten Commandments, there were people weak enough to believe them. It tickled the vanity of the Protestant missionary, as well as the residents, and the rogues, anxious to secure British sympathy, and, what was equally important, plenty of powder and weapons, promised fair.

"The Imperialists naturally claimed the duties on exports and imports. Our consciences would not allow us to pay either party; and, although we had a Treaty with the Emperor of China, a step was taken which was one only of the many acts of injustice perpetrated by Europeans. Our merchants would pay neither party, but gave in to their own Consuls bills made payable to the Government at some future day; but each merchant made a proviso with his Consul that he was not to be called upon to pay until everybody else paid. Imagine, for example, foreigners trading with the United States refusing, because the South was in rebellion, to pay their Customs dues, and merely giving bills, to be paid to the victorious belligerent, provided the merchants of all European States met their engagements, and not otherwise! This pleasant state of things at Shanghai was, however, too good to last long; and one day the Imperialists, aided by the French, recovered the city, and trade returned into its old courses.

"Now, it so happened that the Taoutai, or intendant of circuit, in Shanghai, in addition to enormous pickings and stealings from the Customs revenue, had gone into partnership with two of the leading foreign firms. Every one smuggled, but this coalition had advantages against which no smuggler could compete. The less influential and wealthy merchants learned that smuggling was not so profitable as they had anticipated, inasmuch as the coalition could smuggle ten times as much as they could, and undersell them in both markets inflicting often actual loss, and at all times grievous uncertainty as to the issue of their consignments. There was a general outcry; and in June, 1854, the European Consuls were forced to apply a remedy to this system of wholesale smuggling. The intendant of circuit, Woo, then entered into a convention with Mr. Rutherford Alcock, and the French and American Consuls, by which Europeans were to be introduced, '*to secure an honest and efficient Custom-house administration.*' Each Consul was to nominate one gentleman; they were to be paid and to be treated as inspectors of foreign Customs. His Excellency Woo, with charming candour, allowed that it was 'impossible for him to obtain Custom-house officials possessing the qualifications of probity, vigilance, and knowledge of foreign languages required for the close observance of Treaty and Custom-house regulations.' Mr. Wade, now Secretary of Legation at Peking, was selected by Sir Rutherford Alcock as the British nominee, and a Mr. Carr and a Mr. Smith were nominated respectively on the part of the United States and France. A healthy tone was soon imparted to the Customs administration of Shanghai. The native and foreign community were a little startled, and some of them, like the fisherman who let the great genius of knowledge out of the bottle, were anxious to get him corked down again and cast into the depths of the ocean. But to the credit, be it said, of our Minister of Foreign Affairs, the Home Government recognised the importance of the step that had been taken. They could not have initiated it, but they frankly supported the institution; and when Mr. Wade surrended the post in 1855, Lord Clarendon approved of the appointment of Mr. Horatio Lay in his place. Mr. Lay was then Vice-Consul of Shanghai, and an application had been made for his nomination through Sir John Bowring, by Keih, Governor-General of Keang-soo Province. Of course, our Minister of Foreign Affairs was careful to let it be understood that the British Government would hold itself in no way responsible for the conduct of those lent as advisers to the Chinese Government. The European reactionists, however, became alarmed, and the Americans took steps to isolate the English representative, and endeavoured to bring back the Customs to the old condition of peculation, smuggling, and confusion. It only required a due amount of management, in the lobbies of the Capitol of Washington, to secure the introduction into a Consular Bill, then before the Senate, of a claus

Digitized by Google

which forbade any citizen being recommended for employment under a foreign Government. Mr. Lay soon found himself alone—a target for all the abuse it was possible to heap upon him, and upon the system of Customs administration he was teaching the native authorities to introduce. Trade was declared by some to be falling off; but the returns of imports and exports, published half-yearly by the Foreign Inspectorate, triumphantly refuted such a fallacy. Against this opposition, and the covert hostility of natives as well as foreigners, the Inspectorate struggled on, until, by 1856, the Chinese authorities—having watched and tested the system in every possible way—recognised cordially its value. They then willingly assented to Mr. Lay's suggestions, and supported all the alterations that he advised; and one of the many beneficial results of the influence and guidance of the Foreign Inspectorate of Customs at Shanghai was shown, in 1857, in peaceful relations and a flourishing trade being maintained there, while at Canton, where there was no adviser to whom the Chinese could look, Governor-General Yeh floundered into a war with Great Britain, in his own unaided and stupid efforts to combat the piracy and smuggling fostered by Europeans.

"Astonished at the result of the experiment, the Governor-General and other authorities of Keang-soo, in 1859, 'placed the entire control of the Shanghai Customs in Mr. Lay's hands, intrusted him with the selection of all European subordinates for the service, and pledged themselves not to remove any one without his sanction.' This confidence upon the part of the Chinese Government, secured by the tact and high probity of our Europoan representative, was maintained in spite of the loud outcries of the Europeans. They already foresaw that a just observance of Treaty engagements would eventually extend itself throughout China, and affect their illicit profits. 'The new system' was attacked with a virulence known only in the outposts of civilisation, and its required all the temper, perseverance, and tact, which Mr. Lay eminently possesses, to bear up against the outcry; and what that ordeal was few can appreciate who have not shared in colonial questions."

Continental Intelligence.

FRANCE.

Count Bertimi, who succeeds M. Bourboulon as ambassador *ad interim* at the Court of Peking, is expected to leave Paris shortly.

A letter from Toulon explains the cause of the delay of the sailing of the screw transport *Seine*, with troops and military stores, for Cochin China. The captain had received instructions from the Minister of Marine to make the necessary preparations to take on board, on his arrival at Alexandria, a battalion of 1,000 men, composed of negroes of Darfour, which Said Pasha of Egypt offered the Emperor for his expedition to Mexico. They are old, well-trained troops, sufficiently brave, and not liable to be affected by hot weather or fever, which qualities will give them an immense advantage over the Mexican guerillas.

A letter from the same port of the 28th ult. states that the *Christophe Colomb*, *Sansonet*, *Alexandre*, and *Etoile*, four merchant ships chartered by the Minister of Marine, are embarking in the dockyard of Castigneau in that port the eight gunboats taken to pieces for the purpose of being sent out to Cochin China. Advantage is being taken at the same time of all the vacant space to fill it with several hundred casks of provisions and military stores.

"The last advices from Cochin China," says *Le Nation*, "state that some parties of Annamites had attempted to resume hostilities against the French in the province of Gaconda. Letters from Saigon of the 1st December announce that the *Mitraille* gunboat, having been sent to that part of the territory, was fired at, and two men wounded. In addition, a French battery, defended by eighteen men only, was surprised, and remained in the hands of the insurgents until the French soldiers, recovering from their first astonishment, charged them with the bayonet, and forced them into the water. Admiral Bonnard being informed of those facts, addressed a proclamation to the inhabitants of Gaconda, advising them to return to their duty, if they did not want to see their junks confiscated, and severe reprisals executed against them. Since then the insurgents had remained quiet, the mass of the population seconding the French in maintaining tranquillity."

In opening the Legislature on the 12th inst. the Emperor, in allusion to China and Cochin-China, said that "There are not any countries, no matter how far distant, where any attempt against the honour of France remains unpunished."

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 6th.

I am sorry to communicate the unpleasant fact that the First Chamber of the States General has thrown overboard the Colonial Budget by an overwhelming majority, in consequence of which Mr. Uhlenbeck, the Minister for the Colonies, tendered his resignation, which was accepted by the King, and the duties of the Colonial Office are confided to Mr. Betz, the Minister of Finance, till a definite arrangement can be made by the appointment of his successor in office. It was on the 29th of December that the First Chamber, whilst debating on the whole Budget for 1863, as passed in its details by the Second Chamber and sent up to them for their sanction, showed a very marked reluctance to confirm the ninth article (Colonial Department) of the Budget, which was vehemently attacked by several members, among whom may be mentioned Messrs. Boreel van Hoogelanden, Cremers, Schimmelpenninck van der Aye, Hartsen, and Baron van der Heim van Duyvendyke. In vain did the Colonial Minister defend the measure, and equally in vain did the Prime Minister come to his assistance. Other members got up and supported the attack, among whom were van Nispen and Viruly. When the division came on the Colonial Budget was negatived by thirty votes to four, the latter being Van Swinderen, Hartevelt, Cost Jordens, and Sassen. Five members (Rysterborgh, van Meeuwen, van den Dries, van Eysinga, and van Weel) were absent, and all the other members voted in the majority. The other sections of the Budget were all passed without any opposition. The Colonial Minister immediately had an audience of the King to communicate to His Majesty the result and to tender his resignation. In consequence of this lamentable failure, the Second Chamber, which had adjoured for a fortnight's Christmas holidays, is again convoked and meets to-morrow for the purpose of passing a provisional law voting temporary supplies for carrying on, the business of the Colonial Department, to prevent any inconvenience or interruption in the regular routine of that office.

Information has been received in this country that the Governor-General of Netherlands India has granted a general amnesty to all the native princes and chieftains on the South and East coast of Borneo, who either directly or indirectly took part in the late hostilities to the Dutch at Banjermassing and in other districts of the island. The only persons excluded from the amnesty are Antassari and his sons, Demang Lehman, Amin Oellah, Soero Patti and his sons, Kiai Djaja Lalana, and Goesti Kassan and his sons.

Royal permission is granted to the Chartered Bank of Java to increase their joint-stock capital of four millions of florins by a further emission of two millions in shares of 500 florins, thus making their working capital six million florins.

The official *Staats-Courant* contains the names of two hundred and twenty-seven new Burgomasters nominated by the King to different communes for the present year.

As there appears to have existed some misapprehension on the subject of the duty on pepper in the new tariff, an official interpretation has been published by the Finance Department in the shape of a Ministerial Resolution dated 21st December, 1862, No. 82, ordaining that white, black, and long pepper, as well as cayenne and Spanish pepper, are all included in the category of "Pepper," and as such are liable to the import duty of 1½ fl. per 100 kilogr., whilst cubebs or tailed pepper, being used exclusively for medicinal purposes, are to be classed under the head of "Drugs," which may be imported duty free. On the other hand, curry powder, as being composed of a mixture of several aromatic ingredients and used only in cookery and as a condiment for made dishes, is to be considered as an article of luxury, and placed under the head of "Spices," which are subject to an import duty of 5 per cent. *ad valorem*

A contract for the further delivery of 100 kil. of sulphate of quinine (*sulphas chinicus basicus*) for the use of the army medical service, has been awarded to Messrs. J. Mouton and Son, of the Hague, their offer of 117½ fl. per pond being the lowest of six tenders sent in.

Contracts for the furnishing 70,000 kilogr. of smoked bacon and 60,000 kilogr. of salt meat, in eleven lots, for the use of the army and navy in Netherlands India have been entered into by the Netherlands Trading Company on behalf of the Colonial Department. The successful competitors were W. H. Korts for five lots, L. van Winkel two lots, C. van der Straaten two lots, the remaining two lots being awarded to W. Kranenborg and Co.

During the month of December the number of vessels that arrived in this country from the Far East was 14 (against 10 in November and 48 in October), of which 5 discharged at Amsterdam and 9 at Rotterdam. Eight brought cargoes for the Company and six for the private trade. Five came from Batavia, three from Tjilatjap, two from Passaroeang, one from Samarang, one from Sourabaya, one from Macassar, and one from Padang.

Another work has appeared in India, called "Sketches of Military Life in Netherlands India," by Major A. W. Weitzel (published by J. Noorduyn and Son, of Gorinchem), giving a description of the expedition to the Lampongs in 1856. But it is not confined to accounts of strategical evolutions, though principally intended for military readers, as it contains a lively and amusing description of the country and people against which the expedition was directed, of the vicissitudes to which the author and his companions were subjected, of the manner of conducting military operations in the Dutch colonies, and of the dangers and difficulties to which the troops are continually exposed. This work, which is written in an easy and fluent style, will no doubt be read by many with satisfaction, and must contribute to increase at home the knowledge of the Dutch East India possessions, and enhance the respect and gratitude of the country to her brave defenders in the Far East.

A letter from Nieuwe Deep states that on New Year's Day a small howitzer, weighing about 100 lbs., was found on the coast. It was very much honey-combed and corroded by the action of the salt water. The general impression seems to be that it must have fallen into the sea at the landing of the British troops there in the year 1799.

At Dordrecht a committee has been formed for the purpose of collecting contributions towards erecting a monumental statue in that town in memory of the late Duke Bernhard of Saxe-Weimar.

From official tables just issued concerning the trade and navigation of Java and Madura in 1861, it appears that the value of goods imported there by the private trade amounted to 46,806,060 fl., and goods for Government account 29,838,080 fl., making a total of 76,644,140 fl., being 7,302,728 fl. more than in 1860. The exports by the private trade in the same year were to the value of 52,998,583 fl., and those of the Government 56,080,769 fl., showing a total of 109,079,352 fl., being 4,622,873 fl. in excess of the exports of the preceding year.

Considerable activity prevails in the royal dockyards of the kingdom in consequence of orders being received to fit out for immediate service several war-steamers to reinforce the Dutch squadrons in the East and West Indies. Among the ships ordered to be put into commission are the steam-corvette *Princess Amalia*, the screw-steamer *Metalen Kruis*, the paddlewheel-steamer *Ardjoeno*, and five smaller screw-steamers. Your readers interested in the Dutch navy will be glad to hear that the Egyptian eye disease that was last year so prevalent among both officers and sailors, and which at one period baffled all the scientific treatment of the medical faculty, has now very nearly ceased, there not being more than twenty persons in the naval hospitals suffering from that mysterious complaint.

Contracts are invited by the Naval Minister for the construction, together with the materials, of floating docks in Netherlands India, for the use of His Majesty's ships. Preference will be given to a Dutch establishment. Further particulars to be obtained on application to the Naval Department at the Hague.

Lieut. Yaunker E. P. de Stuers, R.N., is appointed flag-lieutenant to Rear-Admiral H. Wipf, Director and Commander of the naval forces at Vliessingen, *vice* J. Kroef, whose period of service in that capacity has expired.

PERSONAL.—Mr. A. F. H. de Pina has been recognised as Consul for H.I.M. the Emperor of the French, at Padang, in Sumatra.

Captain A. Struiken, of the East India Army, now in this country on leave of absence, has at his own request been permitted to retire from the service with a pension for life.

The following young gentlemen have been appointed naval cadets:—G. J. Guichard, A. de Leef, J. W. Groeneyk, W P. Bakhoven, J. F. de Vries, J. L. Kroeze, J. Vasseur, D. J. van Oosterzee, G. P. Ryk, and E. Fabius.

Lieutenant E. B. Bonn, R.N., is appointed to the guardship *Rhine*, at Helvoetsluys, *vice* Lieutenant Count van Limburg-Stirum, whose period of service has expired.

First Lieutenant G. M. Hermanni, of the Colonial Recruiting Establishment, at Harderwyk, is transferred to the 44th Regiment of Infantry in garrison at Woerden.

The King has been pleased to appoint the following gentlemen to be officers in the Second-Class in the East India Civil Service:—W. L. Harloff, C. M. Ketting-Olivier, O. A. Burnaby-Lautier and Younker H. A. de Geer.

Mr. H. A. Blume, of the E.I. Civil Service, lately Controller of the Third-Class in the Department of Revenue and Cultures in Java, now in this country on leave of absence, has been permitted to retire from the service.

Colonel G. F. Mauta, of the E.I. Infantry, is appointed to the command of the troops in garrison at Surinam.

Pensioned Brevet-Major A. W. van Haeften, of the E.I. Artillery, is appointed member of the Board of Directors for administering the affairs of the Widow and Orphan Fund of the officers of the army in Netherlands India, *vice* A. Buternig, retired.

Mr. V. P. G. de Serière, resident of Cheribon, is permitted to retire from the service.

Two years' sick leave is granted to Mr. J. A. W. van Ophuyzen, resident of Patembang, and the same to J. Kappers, of the Government Telegraph Department in Java.

First Lieutenant C. L. von Freytag van Overstraten, of the Home Infantry, doing duty with the army in Netherlands India, has been permitted at his request to return to Holland.

PASSENGERS ARRIVED.

Per *Burgomeester van Reenen*, Capt. Zwaneveld, at Amsterdam, from Samarang; Mr. and Mrs. Goedhardt.

Per *Gebroeders Houtman*, Capt. Withof, at Rotterdam, from Batavia; Mr. and Mrs. S. E. Harthorn and five children.

COMMERCIAL.

COFFEE.—Since the departure of the last mail this article has not only remained firm, but the tone of the market has undergone a decided improvement; and purchasers who had been deterred by the present high prices from operating to any extent, see now that it is hopeless to wait any longer, and thus orders to buy are coming in from all quarters, which has further tended to strengthen the market. Company's goods, such as No. 9, 21, and 22 of last sale, are in most request, but as they are scarce, higher rates must be paid to obtain them. Amongst the sales for the fortnight are 2,000 bags of Java ex *Kykduin*, 780 bags of Macassar ex *Maria Catharina*, and 1,300 bags of do. per same ship at different prices, together with 3,730 bags of Java ex *Vyf Frienden*, at from 46 to 50 cents, according to quality, but in all cases at values that could not be obtained previously. The company's statistical tables of the deliveries of Java coffee, show for 1862 a total of 870,082 bags, against 980,093 in 1861, 955,887 bags in 1860, 874,108 bags in 1859, 1,199,590 bags in 1858, and 812,028 bags in 1857. The stock of E. I. coffee on company's warrants is now 121,494 bags, and this must last till the spring sale. Unsold coffee in the company's warehouses, 257,630 bags, but several cargoes have arrived during the last few days, and are now being landed.

SUGAR.—Inactivity continues to prevail in the raw market, and prices are still drooping. A slight improvement is perceptible in refined goods, and refiners are by no means anxious to sell for delivery at present rates. It is likely that as the spring advances the market will further improve.

RICE.—Market firm, but without animation. Java table much sought after, and full prices paid; but as there have been no fresh supplies of late, stocks nearly run out, and fine qualities difficult to pick up.

SPICES.—Partly owing to the Christmas holidays the dealings are extremely limited, and the market on the whole is remarkably quiet Java cinnamon No. 3, is the only article in good demand, but there is scarcely any to be had. Pepper well supported at 21½ cents. The deliveries of spices in 1862 and present stocks are as follows:—

	Present Stock.	Deliveries in 1862.
Nutmegs	5,937 casks	2,188 casks
Mace	2,080 „	660 „
Cloves	3,089 „	866 „
Java cinnamon	2,436 bales	3,313 bales
Ceylon do.	105 „	26 „
Black pepper	716 bags	6,343 bags

TIN.—There are sellers of Banca at 68½ fl., but the transactions to report are few and insignificant. The deliveries in 1862 were 139,424 blocks, against 160,431 in 1861, 144,360 in 1860, 136,482 in 1859, 196,956 in 1858, and 161,387 in 1857.

Present stock on warrants 71,740 blocks, against 55,971 in 1862, 65,214 in 1861, and 58,061 in 1860.

SALES OF SHIPS IN HOLLAND.

DENMARK.

The former Minister for the Affairs of Holstein, Privy Councillor Raasloeff, has been sent on a mission to China, where the Danish commercial interests require some protection and support. He has already started for Trieste, where he will embark in the Austrian Lloyd's postal steamer for Alexandria, to proceed by the overland route to Hong Kong.

SPAIN.

In the Cortes, on the 10th inst., Senor Olozaga stated that he considered that Spain had not obtained a sufficient indemnity for the expenses of the expedition to Cochin-China.

LONDON, THURSDAY, JAN. 15, 1863.

OUR POSITION IN JAPAN.

THE Japanese are a wonderful people. They have proved more than once that they possess that invincible energy, and that power of sacrificing self-interest for what they consider the common good—which mark the seeds of greatness in a nation. The revolution just accomplished, is one of the most extraordinary in the annals of history. Yedo is not a nominal capital, employed as such for purposes of official convenience. It does not exist simply as the seat of the Government of the TYCOON. On the contrary, it is a vast city, rich in all the appliances of life—a city containing within its boundaries the residences of more than three hundred feudal princes, each of whom boasts a large number of retainers. What Paris is to France, Yedo is to Japan. No wonder, therefore, that we have been anxious from the first to have our interests protected by a British Minister at the capital; and no wonder, too, considering the opposition always shown by the Conservative party to intercourse with foreigners, that this advantage has been so often covertly resisted. Again and again measures have been taken to make the place too hot for us; but we venture to say that no man, however versed in Eastern politics, could ever have predicted that the Japanese would depopulate Yedo, and deprive it of all its glory, in order to thwart the aims of the foreigners. This great and bloodless revolution only proves more clearly than ever, what indeed has been obvious for some time, that the power possessed by the Government of the TYCOON has long been waning, and that it is now virtually extinct. Our treaty with Japan has been a blunder. We have been fairly out-witted, and the concessions we have recently made will be regarded by Japanese politicians as unquestionable proofs of our weakness.

Meanwhile, the excitement caused by this revolution has served as an admirable pretext for doing nothing to avenge the death of poor RICHARDSON. The TYCOON, it is said, has confessed his inability to punish the offenders, and if, as is rumoured, he is requested to abdicate, his successor entering upon office with diminished powers and without the responsibilities attaching to the present TYCOON, will not be likely to afford us any assistance or compensation. We take it for granted that our Government will make the most ample demands for the punishment of SHINADZOO SABURO, and that if these demands are not complied with, we shall show by some vigorous act that every Englishman who, on the strength of treaty rights, visits the open ports of Japan, goes thither protected by his country. It would be easy to punish SATSUMA, and we might do this without involving ourselves in a war with Japan. We sincerely trust that we may escape that alternative; although Sir RUTHERFORD ALCOCK thinks that it is a necessity, unless we withdraw from the country altogether. There still remains, however, one course open to us. We must carry our claims to the Court of the MIKADO and have our treaty ratified by the EMPEROR in person. If this cannot be accomplished, our position in Japan will continue to be one beset with difficulties and dangers. Our countrymen at Yokuhama are evidently alive to the peril of their position. Recent events have proved in the plainest possible way how insecure that position is. Yet English pluck and resolution are equal to almost any emergency; and we are glad to see that a Rifle Corps has been formed for the defence of property and life. We have no doubt that "the Yokuhama Volunteer Corps" will speedily attain efficiency, for the members of it, having an immediate purpose to accomplish, will be inclined to throw a double energy into their drill.

British policy in the present day has changed with the spirit of the age. The energetic and warlike measures which delighted our grandfathers cannot be resorted to by the Government of Lord PALMERSTON. There is no doubt that if the circumstances which have recently occurred in Japan had taken place during the rule of the elder PITT a fleet would have been forthwith despatched from England to inflict condign punishment on the offenders. In those days, too, supposing the position of other Powers in the Far East to be what it now is, we should have become rapidly convinced of the necessity of establishing a counterpoise to the progress of France in Cochin-China, and to the stealthy advances of Russia; the islands of Japan would then have been regarded as a magnificent prize, to which, after the manifold provocations received, we were honestly entitled. The difficulties of the undertaking would have been over-looked; the justice of the cause would not have been questioned; no Manchester politician would have opposed the votes of Parliament, and thus for the sake in the first place of revenge, and in the second place of territorial aggrandisement, this country would have plunged into an uncertain struggle with a brave and independent nation. We have turned over a new leaf in politics. Instead of wishing to annex territories, we are rather disposed to give up some of our old acquisitions. We have just now refused the gift of a kingdom, and so modest and sensitive are we becoming that the right of the mother country over her own colonies has been seriously questioned. *Tempora mutantur et nos mutamur in illis;* but though we are changed, the policy of Russia and of France in this respect is the same as it ever was, and it is impossible to blind ourselves to the difficulties which may crop up in the future, should France obtain command of the valley of the Cambodia, and Russia establish a naval footing in the Japanese waters.

THE BISHOP OF LABUAN AND MR. SPENSER ST. JOHN.

IN the last chapter of "Life in the Forests of the Far East," Mr. ST. JOHN wrote in a very depreciatory tone with regard to missionary labours in Borneo. His whole statements in that chapter were intended to implicate the head of the Mission, and we can scarcely wonder that the BISHOP has endeavoured, in a reply, to defend his official and personal character. This reply, addressed to the Rev. ERNEST HAWKINS, is now before us, together with "A Vindication" of his statement by Mr. ST. JOHN, published in the form of a pamphlet. Mr. ST. JOHN is a clever writer and a most enterprising traveller, but his qualifications for judging of the success or non-success of a Mission may well be questioned. Many points on which he touches must be regarded as matters of opinion, and it is enough to say of them that the Bishop of LABUAN takes one view, while his critic takes another. The controversy proves indeed that the Mission has not been so outwardly prosperous as its friends in England might wish, but Mr. ST. JOHN'S attempts to point out the causes of failure are by no means satisfactory. One of Mr. ST. JOHN'S complaints was that the Mission should have been established at Kuching instead of at San Pro or Siniawan, to which the BISHOP replies, and in this statement he is corroborated by the Rajah Muda, that the position was fixed upon by Sir J. BROOKE himself; and adds, as his own opinion, that "there is no other position in the territory of Sarawak which "would serve as a centre for the Society's Missions." Mr. ST. JOHN answers in this instance, as in many others, by a flat contradiction, saying, "Sir JAMES BROOKE recommended an- "other and a better position for the Mission," the present site having been chosen and fixed upon by the BISHOP himself. A reference to the RAJAH will decide this point. "The head "Mission at Kuching," says Mr. ST. JOHN, "does not much "influence the missionary work. Kuching is a town almost ex- "clusively composed of Mahommedan Malays and Buddhist "Chinese; and the only effect of establishing the Mission "among the former is to have rendered them more zealous Ma- "hommedans. Before the arrival of the clergy the Mosque "was nearly deserted, now it is crowded." The BISHOP answers that the Mission has several pupils, Chinese, Malay, and Dyak, entirely removed from heathen influence, and that these could not have been obtained in any other place. He might have said, too, that the reviving zeal of the Mahommedans was in itself a proof that the Mission was exercising "much influence," since the honest inculcation of truth almost invariably produces a temporary revival of error.

Digitized by Google

A serious charge is brought against the BISHOP with regard to the secession of Missionaries, for which Mr. ST. JOHN accounts as follows:—"Too often men, otherwise estimable, when they are placed in authority become "overbearing, coarse in their manner towards subordinates, "hasty in temper, uncertain in arrangement, and ungenerous "to the foibles of their associates; and if to these unfortunate "qualities be added a systematic disparagement of the work "done by others, unwarranted expressions about their neighbours, and continued and unnecessary absence from their posts "on trifling pretexts, much injury must be done to the Missions "placed under their care, and would account for the "failure of many." In making this charge Mr. ST. JOHN does not mention the Bishop of LABUAN, yet, it is perfectly obvious that it is directed against him. He has therefore replied to it *seriatim*. It will scarcely be credited that in his "Vindication" Mr. ST. JOHN falls foul of the BISHOP for having "recognised "the likeness, and so placed its fidelity beyond dispute;" and adds, "he resented what he might have despised, and applied "to himself what he need not have acknowledged." This is simply ridiculous. The BISHOP would not have possesed common sense if he had not seen that Mr. ST. JOHN's statements were directed against himself, and none can blame him for at once coming forward to meet them openly. Let us see how he does this. That several Missionaries have left their post is certain, and this may well be regarded as a most unfavourable circumstance; but, Mr. ST. JOHN having seen very little of the Mission of late years, is, says the BISHOP, "equally unjust and "incorrect" when he imputes this defection to his treatment of them. He then mentions each case in which a Missionary has withdrawn from the mission and endeavours to explain the cause. There is only one of these cases to which it is necessary for us to refer. Speaking of Mr. COX, a Catechist, the BISHOP writes:—"His leaving the Mission was owing to Mr. ST. JOHN himself, "whose evil influence over the young man while I was in England, in 1853, so shook him, both in faith and morals, that "when I returned in 1854, looking forward to ordain him "with pleasure (for I had a great love for him), he told me, to "my grief and surprise, that as he could no longer believe in "the Divinity of our LORD, and doubted the Scriptures; he had "made up his mind to leave the Mission and take an appointment in the RAJAH'S service, which was open to him. He "was one of the victims of the Malay conspiracy in 1859; but "before his death he confessed to me, and others, the deepest "sorrow for the step he had taken, and expressed his great dislike to Mr. ST. JOHN for having caused him to do so." Mr. ST. JOHN extracts this passage in his "Vindication," and adds, "If it can be proved to be true, I should be unfit for the company of honest men?" He then states in refutation of the assertion—"I conversed with Mr. FOX frequently, as one man "talks with another, upon a variety of subjects. I listened to "his religious views, and I spoke of my own; but that I ever "influenced him for evil I deny; and if I ever influenced him "*at all* it was by the force of reason and truth." We all know the story of the man who defined orthodoxy as his "doxy" and heterodoxy as his opponent's "doxy," and we are reminded of it by this charge on the part of the BISHOP and by Mr. ST. JOHN's indignant denial. We may safely acquit Mr. ST. JOHN of having corrupted his friend's morals, but if he did influence him, as he says is possible, "by the force of reason and truth," and thus led him to renounce his faith in the Divinity of our LORD and in the Scriptures, we can quite understand how the BISHOP regarded his influence as "evil." The letters which in defence of his conduct Mr. ST. JOHN produces from Sir JAMES BROOKE, from Mr. CHARLES JOHNSON, and from Mr. CHARLES T. C. GRANT, do not greatly affect the real point at issue. Sir JAMES BROOKE says he could not condemn Mr. ST. JOHN's morals without condemning his own, that he is sure he would not influence any one for evil, and that Mr. FOX's morals were quite on a par with those of other gentlemen; Mr. JOHNSON is equally sure that Mr. ST. JOHN "never had any demoralising influence" over Mr. FOX, who was "strictly an honourable, amiable, and good man to the last;" and Mr. GRANT is also "quite sure that there is no foundation for the charge that you corrupted FOX, and were the means of his leaving the Mission." Sir JAMES BROOKE and Mr. GRANT add, and their statements are certainly in favour of Mr. ST. JOHN, that Mr. FOX had doubts on certain points of doctrine before entering on the Mission, and that whatever doubts he had on matters of religion were entirely his own; while Mr. JOHNSON is certain that such an idea as wishing to return to, or repenting of having left the Mission, never entered his mind. With regard to this last mentioned circumstance it is clear that either the BISHOP or Mr. JOHNSON must be in error. The likelihood is that the BISHOP is correct, as his statement is more definite than that of Mr. JOHNSON; but it is probable that we shall hear more on the subject, which will set the matter at rest.

The obnoxious charge which Mr. ST. JOHN brings against the BISHOP, of having by his own overbearing conduct alienated the Missionaries, is one to which the best, and indeed the only satisfactory reply would be a denial on the part of the Missionaries themselves. Two of these, "the oldest Missionaries, except the Bishop in Borneo," have repudiated in the strongest terms Mr. ST. JOHN's statement on this point. The Rev. W. H. GOMEZ says:—"The defection of Missionaries is a fact to be "deeply deplored, and well worthy of inquiry. Out of all those "who have, during my time, resigned their connection with the "Mission, I do not know of one who was led to take this step "from any quarrel with you, or interference on your part with "them." And the Rev. W. CHAMBERS writes:—"I can assure "you your clergy, and all others under your authority, will rise "as one man to deny his (Mr. ST. JOHN'S) insinuations as to "your conduct with respect to them, and our brethren who have "left us." The gentlemen who have written thus happen to be spoken of in high terms by Mr. ST. JOHN, who stated in his work that the Borneo Mission had been fortunate in securing their services. Now, however, the only reason he can assign for their writing as they have done is "that from the habit of education and obedience, a clergyman is averse to condemn his "Bishop, or to carry a disagrement with him as his testimonial to a new diocese;" and he then proceeds to rake up one or two silly stories worthy of a female gossip rather than of a clever man and an able writer, of how the BISHOP annoyed Mr. GOMEZ in 1858, by removing a few children from his school to Sarawak, and how he insulted him "on the tenderest point" in 1856. Mr. ST. JOHN evidently thinks that it would have been wiser in the BISHOP not to have recognised the portrait he had drawn; the public, on the contrary, will, we suspect, consider that Mr. ST. JOHN would have been wiser if he had not attempted to defend his statements on the Bornean Mission by a "Vindication." We have no wish to act as the panegyrists of the Bishop of LABUAN; on the contrary, we are quite ready to own that, occupying as he does an onerous and exceedingly difficult position, it is very possible he may have been led sometimes astray by errors of judgment, or by the failings of natural temperament. Bishop MACDOUGAL claims no infallibility; and none of his friends would care to claim it for him. Mr. SPENSER ST. JOHN'S attack, however, instead of doing the BISHOP harm will, we believe, be of service to his reputation. The last chapter of "Life in the Forests of the Far East" contains a violent comment on the Borneo Mission, written by a man who confesses that he "has no practical experience of the management or working of religious societies;" the "Vindication" is written by a man who is evidently so out of temper that he mistakes abuse for argument. The first act was a blunder, the second shows the writer in a still more unfavourable light. Happily, however, for Mr. ST. JOHN'S fair fame there are few people who will care to expend a shilling upon his pamphlet.

A BRITISH PROTECTORATE IN CHINA.

IT is impossible to over-estimate the importance of the changes which have recently taken place in our relations with China. We have been gradually, but surely, gaining power in that empire; first of all, by the establishment of the Customs Inspectorate, and now by the permission to English officers and seamen to serve under the Government of Prince KUNG. If we administer the finances of the kingdom, and fight its battles, it seems easy to foresee that China must ere long sacrifice her independence to her safety. But in that strange country things often go by contraries, and in judging of it we must not be guided by any parallel that may occur to us in European history. Certain it is, we have undertaken to fulfil sundry duties towards China which may well give rise to much speculation with regard to our future intercourse with that country. Other nations, too, following our good example, are showing their solicitude for the prosperity of the Celestials, and Russia has volunteered to give such aid as may be required for the reduction of Nanking. Who shall say again that adversity is unfavourable to friendship? China is in adversity, and yet Russia, France, and England, the three most powerful nations in the world, are all standing round the bedside of the sick man, and offering their professional assistance. Capt. OSBORN will, we have no doubt, do his part vigorously and well, leaving it to statesmen and

Digitized by Google

politicians to discuss the possibility of China, by his assistance and the aid of others, falling gradually under British protection, and losing whatever independence it at present possesses. It is cause however for much surprise that the Anglo-Chinese fleet and its commander are still in this country. Not only does this dilatoriness inflict an injury on the Government of China, but it is at the same time injurious to our own interests in that country. Without doubt, in a case of this nature, promptness may be regarded as a cardinal virtue. The following, according to the *Army and Navy Gazette*, are the terms upon which the seamen, mariners, and boys, forming Captain OSBORN's force, will sail under him for the East :—

"A very fine body of short-service men-of-war's men are entering, all with 'very good' in every column of their certificates. They will, we doubt not, prove an excellent nucleus, upon which we understand Captain OSBORN hopes to graft native levies of Chinese seamen. The compensation for wounds is based upon the pension for wounds given to our own men; but the grant to widows, mothers, and children, in the event of any man being killed in action, is quite a novelty, and we congratulate the force upon it. Wages paid weekly while in England, but, when abroad, will be paid monthly; the dollar at the same rate as in Her MAJESTY'S navy. Once every quarter men can be furnished with bankers' cheques for any sum they may wish to remit out of their wages. Three months' advance will be paid by advance notes, on the same conditions as in the merchant service. Provisions on the same scale as in Her MAJESTY'S navy, but no savings allowed. Prize-money will be granted on a more liberal scale than that of Her MAJESTY'S navy, but will only be paid on discharge from the force and arrival in England. Men invalided will be paid three months' wages, and provided with a passage to England, compensation for wounds, &c. The widow, child, or mother of men and boys killed in action will receive the sum of £500. Men or boys losing two limbs on service will receive the sum of £500; men or boys losing one limb on service, will receive the sum of £300; other injuries in proportion. The laws and customs of Her MAJESTY'S navy will be enforced, with the exception of 'corporal punishment,' for which 'discharge from the force' will be substituted. Clothing: Men will be expected to provide themselves with the established kit previous to receiving their advance, and when abroad can supply themselves from the clothing which will be kept in store, paying cost price for the same out of their monthly wages."

THE POSTAL ROUTE THROUGH SIBERIA AND MONGOLIA.

We published an account in our late numbers of the journey made by Mr. CHARLES MITCHELL GRANT from Peking to St. Petersburg, and we have now to announce that Mr. GRANT has proceeded to St. Petersburg and Kiachta to organise a courier route, to be conducted fortnightly, connecting London and Shanghai. The estimated time between these two places Mr. GRANT gives at 25 days. The telegraph from London to Omsk is already in working order, and from Omsk a pony courier is to run to Kiachta and Peking, using the post-houses which are already in existence all along the line. The distance from Omsk to Peking is 4,380 verstes, or 3,000 miles. From Peking the despatch bag will be forwarded on to Tientsin, thence to Shanghai by steamer. The expense of this service it is proposed to raise from the merchants and the various European Governments interested in the China trade. Several of the merchants have already subscribed to the undertaking, and with their usual liberality have also contributed £500 towards the preliminary expenses. Mr. GRANT expects to have his arrangements completed next March, and to maintain a regular fortnightly service to and fro between London and Shanghai. The Russian Government, we believe, intend to push the telegraph wires on to Kiachta, and every step they make in this direction will shorten the time of Mr. GRANT'S messages. There is also a scheme hatching in Paris for running a railway from St. Petersburg to Kiachta (it is already completed for a portion of the distance), and from Kiachta it is to strike off through the Amoor possessions to Port Constantine, in the sea of Japan. From Port Constantine lines of steamers are to connect the ports in Australia, California, Japan, China, and India. The time of transit from London to China is estimated at eighteen days, and twenty-three to Australia. This looks at present rather romantic, but not more so than the present route by the Red Sea did when proposed by WAGHORN. The promoter of this scheme is Colonel SLEIGH, a retired officer in the English army As an illustration of the feats now accomplished by the telegraph to Omsk, we quote from a contemporary the following account :—

"ANOTHER FEAT IN TELEGRAPHY.

"On the occasion of the departure of Mr. CYRUS FIELD, in the *Persia*, for New York, the Submarine Telegraph Company despatched a message to their agent at Berlin, desiring him to make arrangements for the transmission of any item of news from the most distant available station in the Russian possessions, in time to meet the *Persia* at Queenstown. The understanding was that such news would, on the arrival of Mr. FIELD at New York, be telegraphed to California, so that, by this means, it would be ascertained in what period of time our present telegraphic system would allow of a message being transmitted from one to the other extremity of the habitable globe. The following despatch, transmitted from Omsk by the Agent of Colonel ROMANOFF, at eight A.M. on the 21st Dec., was received at the central station of the Submarine Telegraph Company, at Threadneedle-street, at 9.59 A.M.

"'Omsk, 21st Dec., 1862, 8 A.M.

"'To-day, Sunday, a portion of the materials have arrived for the construction of the line to Lake Baikal.'

"This message, the transmission of which, it will be seen, occupied less than two hours, was immediately forwarded to Queenstown, and was duly received before the departure of the steamer."

MR. JOHN DENT FOR TOTNES.

We are glad to say that Mr. John Dent has once more come forward as the Conservative candidate for the representation of Totnes, a vacancy having occurred owing to the death of Lord Gifford. Had it not been for undue influence Mr. Dent would not have retired before, and he has now come forward again at the request of very nearly one-half the constituency. The following is Mr. Dent's address "To the Independent Electors of the Borough of Totnes":—

Gentlemen,—Another vacancy having occurred in the representation of your borough, through the lamented decease of Lord Gifford, I beg leave a second time to offer myself as a candidate for your suffrages.

The cause of my abrupt retirement on the last occasion is thoroughly known to you. Since that event, however, and within the last three days, I have been enabled to place myself in a position to afford protection on the spot to any voter who may feel disposed to exercise his franchise in my favour; and when I add that I reappear before you upon the written requisition of very nearly one-half the constituency, embracing several of its most influential names, I trust I have said enough to justify my reappearance.

Having so recently laid before you my political creed, any reiteration of it becomes unnecessary.

I regret very much that the state of my health does not permit me to present myself personally among you immediately, and to recommence my canvass. I can only promise to do so at the earliest moment I shall be permitted to leave London; and, meantime, must confide the advocacy of my cause to those kind friends among yourselves, to whom I am already so deeply indebted.

I have the honour to be, Gentlemen,
Your most obedient servant,
London, Dec. 29, 1862. JOHN DENT.

LATER NEWS FROM JAPAN VIA SAN FRANCISCO.

We have repeatedly called attention to the practicability of receiving early news from Japan viâ San Francisco, and have more than once mentioned the reception of such intelligence. Last week we were in receipt of news, by steamer, from Japan up to the 22nd November, a month later than that brought by the last Overland Mail.

Literature.

It is stated that from the commencement of December, 1861, to the end of November, 1862, the press of this country produced no less than 4,828 new books, including reprints and new editions. The highest number, 942, were religious works, the lowest number, 60, represents the books devoted to commerce; of works of fiction, 925 appeared, of poetry and general literature, 673. It is interesting to remark the class of books most in demand by the reading public. Thus we find that Mr. Murray sold last year 30,000 copies of "Dr. Livingstone's Travels" at a guinea a-piece, and 10,000 more at six shillings. Messrs. Longman and Co. sold 4,000 copies of Sir J. Emerson Tennent's "Ceylon," at 50s. each copy. Messrs. Trubner and Co. disposed of 800 copies of Ravenstein's "Russians on the Amoor." Of religious works it is noteworthy that 5,000 copies of Roundell Palmer's "Book of Praise" were disposed of in little more than a month. Of the "Essays and Reviews" 20,000 copies were sold, while of the reply published by Mr. Murray, entitled "Aids to Faith," 7,000 copies were purchased by the public. The same publisher disposed of 6,500 copies of Dr. William Smith's large and expensive work 'The Dictionary of the Bible." The sale of works of fiction was very extensive during the year. Messrs. Chapman and Hall sold more than 100,000 copies of "Nicholas Nickleby," and 140,000 of "Pickwick;" 28,000 copies of "Tom Brown's School Days," and 9,000 of Kingsley's "Westward Ho!" were sold by Messrs. Macmillan and Co. Historical and biographical works had also a large sale. Of Motley's "History of the United Netherlands," 4,000 copies were sold, 3,000 of Earl Stanhope's "Life of Pitt," 2,000 copies of Rawlinson's "History of Herodotus," and 55,000 copies of Mr. Smiles's "Self-Help." Finally, of Macaulay's "History of England," Messrs. Longman and Co. sold the amazing number of 267,000 volumes.

Digitized by Google

Blackwood's Magazine for January contains a most able and apparently official article, entitled "Progress in China." It is written with considerable clearness and tact, and the writer manages to say a great deal in a comparatively small compass. An extract from the essay will appear in another column of our journal. The third and concluding volume of the "Voyage of the Novara," has reached us, and we shall notice it in our next issue. From Mr. Bohn we have received Part VIII. of "The Bibliographer's Manual of English Literature," by Wm. Thomas Lowndes, a work in high repute among all book lovers. The present edition is revised, corrected, and enlarged by Mr. Bohn himself. *The Dublin University Magazine*, for this month contains an article on the "The Yang-tse River and the Taipings in China." Earl Stanhope has a volume of "Miscellanies" just ready, which will be published by Mr. Murray. "The Chronicles of Carlingford," a novel by Mrs. Oliphant, which has been appearing in monthly numbers in *Blackwood*, is announced for separate publication by Messrs. W. Blackwood and Sons, on the 20th of this month.

London Gazettes.

The Queen has been graciously pleased to appoint Francis Howard Vyse, Esq., now Her Majesty's Consul at Kanagawa, to be Her Majesty's Consul at Hakodadi; and Charles Alexander Winchester, Esq., now Her Majesty's Consul at Hakodadi, to be Her Majesty's Consul at Kanagawa.

THE SERVICE OF THE EMPEROR OF CHINA.

Her Majesty has ordered that from and after the 16th of December, 1862, it shall be lawful for all military officers in Her Majesty's service to enter into the military service of the Emperor of China, and to accept any commission.

THE TELEGRAPH TO INDIA.

The India Board have intrusted the entire superintendence and control of the whole plan to Colonel Patrick Stewart, R.E., as well known for his services during the Indian mutiny as for his labours in connection with telegraphs throughout India. This gentleman has chosen Sir Charles Bright and Mr. Latimer Clark, electrical engineers, for the undertaking and for submerging the line. Every detail is now arranged, and the work begun, and before this day twelvemonth we shall have our news every morning from India. Colonel Stewart has himself during the last two years travelled through and examined the various overland routes which have been from time to time suggested for a part of this line across the Turkish portions of Asia Minor. One of these has been selected from the greater ease with which land lines are erected and kept in repair as compared with submarine wires, and also because along at least three-fourths of the route the Turkish Government have already established and keep in admirable working order a telegraph from Constantinople to Bagdad. This land line runs from Scutari on the Bosphorus across Asia Minor to Diarbekir, thence to Mossul (the ancient Nineveh), and thence to Bagdad. It happens, however, that over the broad tract of country which intervenes between Bagdad and the head of the Persian Gulf, along which the submarine cable to India is to be laid, various predatory tribes of Arabs claim a sovereignty, and fight for it with more or less success, and over these lawless vagabonds of the desert the Porte has about the same control as Sir Joshua Jebb enjoys over his ticket-of-leave men. Always quarrelling among themselves, they agree only on the one point of disobeying and defying their nominal lord the Sultan. These people will require skilful handling, and the land line from Bagdad will most probably be taken along the frontiers of Arabia, through the territories of the most powerful of the tribes, who are able to protect it against all comers, and whom a subsidy of £1,000 a-year will at once render most willing. By this route, for a length of some 300 miles, it will pass to the head of the Persian Gulf at the broad estuary which marks the junction of the Tigress and Euphrates—an eastern township called Shatel Arab.

It is not intended however, to rely solely upon this route. Another land line will most probably be taken from Bagdad over the frontier of Persia to Teheran, thence to Ispahan, and so on by Shiraz down to the shore of the Persian Gulf at Bushire. Thus, even in case of the Arabs ever proving refractory, there will always be the land line through Persia to Bagdad, and so on to Constantinople and England. From the estuary at Shat-el-Arab the submarine portion of the line is to be laid in three sections; for, though the length of the whole is only 1,010 miles, yet the Government have most wisely determined to avoid the dangers which always beset telegraphy through long deep-sea routes by making no less than three breaks at the stations at which the cable will be landed. The first length will be from the head of the Persian Gulf at Shat-el-Arab to Bushire, a distance of 170 miles, along which the cable will be submerged in from 20 to 25 fathoms of water. The next length will be from Bushire to Mussendom, a bold, desolate, stony headland on the coast of Arabia. This section will be 440 miles long, and submerged in from 30 to 35 fathoms of water. The third length will be from Mussendom to Guaddel, a small city on the Mekran coast, on the frontier of the Kelat territory. This portion will be 400 miles long, and laid in from 40 to 50 fathoms of water. From Guaddel, a short length of land line is now almost complete along the coast, giving direct communication with Kurrachee, and thence all over India.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN THE TABLE.—Jan. 6, at Texel, from Batavia; Kalimaas; 8, at London, from Canton, Canadian; 5, at Bremerhaven, from Singapore, Garland; from Nagasaki, Heloise; 6, at Brouwershaven, from Patjitan Zes Gezusters; 8, off Dungeness, from Batavia, Herman de Ruyter; 6, Aldebaran; 7, off the Wight, from Colombo, Starbeam; 6, at Brouwershaven, from Batavia, Bulgersteyn; 7, J. C. Schotel; Dec. 26, at New York, from Foo-chow-Foo, Magenta; Jan. 5, at Zierikzee, from Batavia, Kosmopoliet; 10, at London, from Foo-chow-Foo, Dumphail Castle. Jan. 7, at Texel, from Padang, Paul Johann; 10, at Deal, from Maulmain, Aspasia; 12, off Torbay, from Shanghai, Finzel; 11, at Liverpool, from Rangoon, Old England, from Maulmain, Seaflower; 9, at Texel, from Batavia, Cornelia. Dec. 30, at New York, from Penang, Sonora; 12, from Canton, John Nicholson; 13, at Deal, from Hakodadi, Sea Witch; 9, at Zierik-zee, from Batavia, Haamstede; 4, at Cadiz, from Manila, Alavesa; 13, at London, from Galle and Colombo, Jane Anna; 12, at Texel, from Samarang, Waalstroom. Dec. 6, at St. Helena, from Bombay and Trincomalee, Star of the South.

The William Carey, from Singapore, did not arrive at Deal 30 Dec., as reported.

DEPARTURES.—Jan. 8, from Dartmouth for Colombo, Excelsior; 7, from Cardiff for Hong Hong, Shakespeare; for Singapore, Carl; Aug. 8, from Holyhead to Batavia, Ronald; Jan. 10, from London for Shanghai, Chaa Sze; 8, from off Dover for Shanghai, Catharina; from Holyhead for Batavia, Record; 8, from Penarth for Manila, Frederick; 10, from Portsmouth for Shanghai, Ravensbourne; 9, from Cardiff for Manila, Java; 12, from Deal for Shanghai, Edinburgh; from Sunderland for Galle, The Cedars; from off Dover for Batavia, Nagasaki; from Cardiff for Shanghai, Merrington; 14, from Liverpool for Hong Kong, Valdivia.

SPOKEN.—Willem III. (Dutch), Amsterdam to Batavia, Sept. 17; Hamburg barque, 3rd d.p., 7,504, Cardiff to Singapore, Sept. 20, 40 S., 63 E.; Patna, Canton to Liverpool, Nov. 26, 34 S., 17 E.; Zephir, Batavia to Rotterdam, Dec. 3, 20 S., 2 W.; Cornelis, Anthony, Rotterdam to Batavia, Dec. 24, 44 N., 13 W.; Vesta, Batavia to Rotterdam, Nov. 3, 35 S., 20 E.; Gitana, Colombo to London, Nov. 10, 18 S., 3 W.; Laurel (ship), Shanghai to London, Sept. 11; Sodore, Shanghai to London, Nov. 3, 21 S., 68 E.; Royal Albert, Canton to Liverpool, Oct. 10, off Island of Gasper; Star of the North, Batavia to Amsterdam, Nov. 17, 34 S., 26 E., Amsterdam ship; Newcastle to Sourabaya, Dec. 4, 2 N., 24 W. Sarah Newman, Boston to Shanghai, Aug. 23, 23 S., 46 W. Francis, London to Colombo, Dec. 4, 3 N., 25 W. Glename, Amoy to New York, Oct. 20, 4 S., 107 E. Dewa Gungadhui, Macao to London, Dec. 2, 21 S. Acasters, Newcastle to Galle, Dec. 31, 43 N., 15 W.

LAID ON.—At London for Shanghai, Sir W. F. Williams, Havelock Woodville; for Singapore and Penang, Daylight: for Algoa Bay and Ceylon, West Indian; at Liverpool for Singapore, Tigris; for Hong Kong, Valdivia.

ROCHESTER, 13 Jan.—The Johannes Christian Obelt, from London, for Batavia, &c., which put in here, 8th Jan., after collision; reports that, while in the Downs on the 5th, the Lady of the Lake (barque), also at anchor, came across her, by which serious damage was caused.

The Admiralty have engaged freight for Government stores in the Maiden Queen for Hong Kong, and have offered the following for tender, viz. :—86 tons navy provisions and medical stores from the river Thames to Hong Kong.

Monetary and Commercial.

CITY, WEDNESDAY, JAN. 14, 1863.

The reconstruction of the firm of Frith, Sands, and Co., in the East India trade, has been announced. The Messrs. Wallace continue business in London under the firm of "Wallace Brothers," in connection with Wallace and Co., of Bombay, and Messrs. Frith and Sands also continue business together under the firm of Frith, Sands, and Co.

The second ordinary general meeting of the East India and London Shipping Company (Limited) was held at the offices, 9, Mincing-lane, on the 29th December; Captain Pelly, R.N., presiding. The report of the directors, which entered fully into the transactions of the company, and dwelt particularly on the excellent passages their ships had been making and were still maintaining, together with the encouraging future prospects of the company, was read and unanimously adopted. The retiring directors, T. Brassey, jun., Esq., and C. Capper, Esq., were re-elected, as were also the retiring auditors, F. H. Gordon, Esq., and C. F. Kemp, Esq. The meeting then became special, in accordance with the notice to that effect, when a resolution extending the borrowing powers of the directors and sanctioning the borrowing of a sum not exceeding two-thirds of the nominal capital was unanimously adopted.

The subscription list of the Western Neilgherry Coffee, Tea, and Cinchona Plantation Company will be closed on the 12th inst. Out of 10,000 shares to be allotted, 8,650 have already been taken up by the public. The report of Dr. Hassall, the analytical chemist, who undertook to test a sample of the cinchona (quinine) grown on the company's estate, is stated to be of a very favourable character.

The biddings for 60,00,000 rupees in bills on India took place on the 7th inst. at the Bank of England. The proportions allotted were to Calcutta, 35,90,000 rupees; to Bombay, 20,50,000 rupees; and to Madras, 3,60,000 rupees. The declared minimum price was as before, viz., 1s. 11¾d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for 180 lacs. Tenders on Calcutta at 1s. 11¾d. will receive about 45 per cent., and above that price

Digitized by Google

n full; on Bombay all above 2s., and on Madras all at and bove 2s. will receive in full

An advertisement has appeared in *The Times* announcing that tenders will be received for the surrender of San Francisco Fire and School Bonds of 1854, 1860, and 1861. Holders of bonds in Europe may forward their bids through Messrs. Wm. T. Coleman and Co., New York, agents of the city of San Francisco.

Another Marine Insurance Company has been announced, styled the British and Foreign (Limited). Capital £1,000,000, in 50,000 shares of £20. The directors are numerous and influential. Amongst the number is Mr. George Lyall, of the firm of Lyall, Still, and Co., China.

The demand for bar silver and Mexican Dollars, coupled with the short supplies in the market, have caused a rise in the rates. Bar silver has been done at 61½d. to 62d., and Mexican Dollars 63d. to 63½d.

The Board of Trade returns for the month and eleven months ended November 30, have been issued. The total declared value of the exports of British and Irish produce, &c., in this time, as compared with the corresponding periods in the two preceding years, was as follows:—

	November.	Eleven Months.
1860	£10,757,749	£123,714,276
1861	9,874,762	115,355,004
1862	9,761,510	113,280,779

The value of the exports for November fell short of that of the same month of last year by £113,252, and of November, 1860, by 996,239; on the eleven months there is a decrease of £2,074,225, as compared with the corresponding period of 1861, and of £10,433,497, as compared with the value of the exports for the first eleven months of 1860.

To CHINA.—No exports of cotton yarn have taken place during the month; the value of the amount exported in November, 1861, was £6,303, and in November, 1860, £28,358; for the first eleven months of 1862, the value of the cotton yarn exported was £183,963, against £275,945 in the first eleven months of 1861, and £324,639 in the corresponding period of 1860. Cotton goods: £37,015 in November, 1862, against £87,776 in November of 1861, and £212,250 in November of 1860; for the eleven months of 1862, £1,219,777; of 1861, £3,022,501; of 1860, £2,700,585. Lead: £17,186 in November, 1862, against £4,300 in November, 1861, and £15,692 in November, 1860; for the eleven months of last year £176,351, against £109,461 in 1861, and £85,316 in 1860. Woollen and worsted manufactures: £31,181 in November, 1862, against £18,483 in November, 1861, and £15,978 in November 1860; for the first eleven months of last year, the value of these exports were £239,812 against £346,880 in the corresponding period of 1861, and £384,720 in that of 1860. Worsted stuffs: £46,695 in November, 1862, against £25,786 in November, 1861, and £13,630 in the same month of 1860; for the first eleven months of 1862, £374,212 against 330,725 for the same period in 1861, and £414,878 in the first eleven months of 1860.

To PHILIPPINE ISLANDS.—No exports in November.

To JAVA.—Cotton Goods: £34,864 in November, 1862, against £35,669 in November, 1861, and £79,018 in November, 1860; for the first eleven months of last year £489,925 against 697,252 in the same period of 1861, and £911,352 in the first eleven months of 1860. There were no other exports.

To SINGAPORE.—Cotton goods: £5,441 in November, 1862, against £60,543 in 1861; value of exports for the first eleven months of 1862, £541,941, against £611,007 in the corresponding period of 1861. Cotton yarn: Value of exports for last November, £3,250, against £5,190 in November of 1861; for the first eleven months of last year, £96,949, against £96,798 in 1861.

To CEYLON.—Cotton goods: £3,511 in November of last year, against £36,306 in November of 1861; for the first eleven months of last year, £261,230, against £300,304 in the corresponding period of 1861. No export of cotton yarn in November.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 4th inst., was—in gold: To Alexandria, £65,600. To Ceylon, £20,000. To Madras, £6,907. In silver: To Madras, £5,000. To Calcutta, £63,100. To Penang, £750. To Singapore, £1,545. To Hong Kong, £18,515. To Foo-chow-Foo, £300. To Shanghai, £800. Total in gold, £92,507; in silver, £90,010.

ARTICLES OF IMPORT.

TEA.—In glancing at the results of the past year, the foremost in importance has been the "Cotton Famine," which has so materially affected the well-being of the manufacturing population. But even this has had its compensating features, by enabling the large accumulated stocks of manufactured goods to be worked off in the different markets at prices which have saved very heavy losses to those concerned, whilst it has added immensely to the wealth of India and other countries, whence increased supplies of the raw material have been drawn. The Treaty with France has given a great impetus to general trade, whilst our exports to other countries have also been enlarged to a degree sufficient in a great measure to make up for the decline in the export of cotton goods, the total amount for 1862 being expected scarcely to fall short of that of 1861. In the import trade the profits on cotton have been enormous, but other branches have, on the whole, been unremunerative. The home trade has been dull throughout. The harvest was only a moderate one, but any deficiency has been more than made up by the very large supplies of breadstuffs from America and other countries. Money has ruled low the whole year. 3 per cent. was the rate at the opening, and after declining to 2½ and 2 per cent., it has again risen to 3 per cent., and with a moderate demand. As regards tea, the great feature this year has been the opening of the Russian market to supplies from this country, and with the exception of Flowery Pekoe, at a lower rate of duty than by the overland route. The duty has been so moderate as to enable the dealers to make a very great reduction in price; thus the demand has been very large, whilst the teas have generally given satisfaction. The total quantity sent we estimate at about 12,000,000 lbs., and we think the trade will continue on a large scale. All classes of Congous and Souchongs have been taken, chiefly, however, fine to finest, and common, also Tayshan kinds. The demand for tea seems on the increase generally, and our export has reached a total of 27,567,000 lbs., which has given great support to our market, and enabled us to work off an otherwise excessive supply. The growth of tea in India continues steadily to increase, and the supplies find a ready sale at full prices. As the cultivation becomes better understood, and the different sorts arrive in larger and more generally marketable quantities, we think the tea will assume a high position, as it is very suitable for home consumption for purposes of admixture. From Japan also our supplies are on the increase, but these descriptions are not appreciated for home consumption. During the early part of the year the great scarcity of Green Teas made them readily saleable, especially for export to America; but latterly the uncoloured kinds have been only in moderate demand, whilst the Green Teas, especially Young Hyson, of which our supplies are considerable, are almost unsaleable, the leaf being generally much broken and dusty. We would again point out that the uncoloured sorts require briskness and strength to render them suitable for home use, whilst the Green Teas will require to be assimilated to the China kinds to bring them into favour. The market opened with a large general demand both for home consumption and export, Green Teas and Oolongs being taken largely for America, whilst the anticipated opening of the Russian markets also tended to impart confidence, thus the whole of the large arrivals at the beginning of the year were absorbed at very full prices. It continued very firm with but few fluctuations in Black Teas until about the middle of March, when prices gave way for medium Teas about 1d. to 2d. per lb., which brought in buyers; the prices of Green Tea varying from time to time according to the extent of the export demand. The opening of the Russian market, in April, led to large transactions in fine Monings and Wopaks at an advance of about 2d. per lb., and strengthening the market for second class grades of these descriptions, whilst on the other hand the lowest qualities, under 1s. 8d. per lb., were heavy of sale at lower prices. The market remained very firm up to to the end of June, the very large deliveries for export helping to sustain prices. During the latter half of the year there was much less activity, owing to the comparatively small selection of good to fine Teas for export, whilst the distress in the North began to affect general trade, and prices for all common to medium kinds continued to decline. At the end of September the first ships with the new Kaisows arrived, but the quality, with but few exceptions, was generally disappointing, whilst the prices asked were so high as to check business, only a few finding buyers from 2s. 3d. to 2s. 10d. per lb., but further arrivals coming to hand sales were made at a decline of about 3d. per lb., which has only been recovered in the very finest kinds. The following month the new Monings and Wopaks arrived, and the first sales made were from 2s. 1d. to 2s. 7d. per lb., from which there was a decline of 2d. to 3d. per lb. on those ranging from 2s. 1d. to 2s. 4d. per lb., which was recovered to some extent. Teas of old import during the last two months have become almost unsaleable, whilst the new arrivals of Scented Teas and Oolongs were large, and have been pressed to sale to such an extent as to cause them to rule lower than almost ever known at this period of the year. Green Teas were fairly supported, except for common to fair Young Hysons, of which our supplies are excessive, and which are only saleable at very low rates. The market closed with a dull appearance, the quantity afloat being very heavy, amounting to 50,977,000 lbs. against 30,400,000 lbs. last year. It will be seen on reference to our tables that the year has been one of great development in the tea trade, the increase in imports and deliveries being very marked. In the latter the increase is almost entirely in exports, that for home consumption being about 1,000,000 lbs. The imports are 106,268,000 lbs. against 92,726,000 lbs. last year. The deliveries, 106,287,000 lbs. against 91,550,000 lbs. last year, and the stock we estimate at 68,360,000 lbs. against 65,384,000 lbs. last year, but this is exclusive of several million lbs arrived but not taken into stock. Black Teas: Dusty and broken lea

Digitized by Google

kinds of Congou have been, with few exceptions, difficult of sale throughout, and prices have ranged from 7d. to 11d. per lb. according to quality. Low to fair common with leaf have been in fair request, owing to a sustained demand for export, and prices have fluctuated with those for good common. This kind opened at 1s. 1½d., and from large purchases for the Halifax market in the spring advanced to 1s. 2d. per lb., but on these ceasing the price gradually declined to 1s. per lb., but in the autumn advanced to 1s. 1d. per lb. upon a few purchases, but has since become in very limited demand, and the price nominally 1s. 0½d. per lb. Fair to good Sinchune Kais and fair Kaisows were early in the year sold freely at full prices, but as further supplies came to hand prices gave way about 1d. to 1½d. per lb. There was some improvement about the month of July, owing to an export demand, and they continued in fair request until about the end of September, since when they have been very unsaleable even at a reduction of 1d. to 1½d. per lb. Common to fair Ho-Hows and Ning-Chows have been generally difficult of sale, although at one time, owing to the dearness of the better qualities, they were in some request; during the year a decline of 1½d. to 2d. per lb. has been established. Good Ning-Chows and second-class Monings and Woppaks have been in fair demand, the high prices ruling for fine to finest for Export having brought them into consumption more freely than before. Prices have fluctuated to the extent of 2d. to 3d. per lb., the lowest point being in May and June, whence they recovered from 1d. to 1½d. per lb., but have since declined fully 1d. per lb. This season's opened at 2s. 1d. to 2s. 3d. per lb., but soon declined to 1s. 10d. to 2s., from which there was a rally to 1s. 11d. to 2s. 2d., which were the closing quotations. Fine to finest Monings and Wopaks up to the month of April remained in steady demand without fluctuation in prices. The Export demand then caused a rapid advance of 3d. to 4d. per lb., which was maintained until the arrival of the new season's Teas. These were not equal to those of the previous year, but they opened at 2s. 4d. to 2s. 7d. per lb., which latter price has been maintained for a few favourite Chops, but others are difficult of sale. Good to fine Kaisows have met with a steady demand, the early absorption of the finest qualities having strengthened their position. The new season's opened at 2s. 3d. to 2s. 5d., but sales were quickly made at 2s. to 2s. 2d. per lb., from which there was a rally of 1d. to 1½d. per lb., but which was subsequently lost. Finest during the year maintained a high rate, 2s. 5d. to 2s. 8d. per lb. being freely paid as the year advanced. The quality of the new season's was very disappointing, yet a few were sold from 2s. 6d to 2s. 10d., but except for very superior quality, of which there is but little, the latter price is not to be got, and the bulk of the finest are selling at 2s. 4d. to 2s. 6d. per lb. Tayshans early in the year were saleable at very full prices, but as further arrivals came to hand prices gave way materially, and notwithstanding considerable shipments to Russia, they close with a heavy appearance, fair quality ruling at about 11d. per lb., and good 1s. to 1s. 1d. per lb. Oolongs, common to fair descriptions, were eagerly taken early in the year for export to America at an advance of 3d. to 4d. per lb., and all the arrivals of good to fine were freely saleable for home consumption during the first three months at from 1s. 11d. to 2s. 1d. per lb., but this was followed by a decline of 2d. to 3d. per lb. in all descriptions, at which the demand was limited. The first of the new season's were sold at from 1s. 9d. to 2s. 4d. per lb., but large arrivals having come to hand they have given way 3d. to 4d. per lb., and at this are difficult of sale. There was a steady demand for fair and good Souchongs for export early in the year at full prices, but fine remained without much inquiry until the month of June, when a speculative demand arose, and prices advanced 2d. to 3d. per lb., at which they remained very firm until the new ones arrived. These were sold from 2s. 8d. to 3s. per lb. for fine to finest, and they continued in demand for Russia until the close of the year, The Flowery Pekoe market has been a great disappointment, the opening of the Russian market having failed to give the relief to our heavy stock which had been expected, but the differential duty of nearly 1s. per lb. upon them has operated against them. Prices have fluctuated considerably, but they show a very heavy reduction on the year. The new arrivals were at one time saleable in small parcels at full prices, but latterly the demand has been very limited. The demand for low and common Scented Capers has been generally dull, and prices have ruled from 8½d. to 10d. per lb. For the first six months fair to good and fine were in great request at very full prices, but they have latterly in a great measure gone out of demand, and the new season's have been very difficult of sale at even 4d. per lb. below last year's opening prices. The Lancashire distress has had much to do with this. Foo-chow kinds are equally difficult of sale. Scented Orange Pekoes: The common to fair qualities have been scarce, and sold generally at fair to full prices. Good to fine have been more difficult of sale, and prices ruled from 1s. 6d. to 1s. 8d. for fair to good kinds. The new season's supply has been very large, and although the quality has been good, they have been very difficult of sale, and the prices ruling are about 4d. to 6d. per lb. below those of last season, good to fine selling from 1s. 6d. to 2s. Foo-chow kinds opened at 1s. 9d. to 2s. 8d. per lb., but have since declined 2d. to 3d. per lb. Uncoloured Japans early in the year were taken for export at very high prices, say 1s. 8d. to 1s. 11d. per lb., but subsequently declined, and at one time showed a decline of 4d. to 6d. per lb., but latterly they have been rather more in demand. Assam and Cachar Teas have sold steadily all the year at full prices, except for the very common qualities. Green Teas: Our supplies this year have been very large, especially of Young Hysons, but the deliveries show a considerable increase, the demand for export for the first six months of the year having been heavy, owing to the short supplies and high prices ruling in New York. Low Twankays and Hyson Skins, which in January were saleable at 10d. to 1s. 2d. per lb., have since become unsaleable at any price, there being no demand for export. Fair to good qualities, free from dust, have been wanted, but prices for these have declined 4d. to 5d. per lb. Hysons have fluctuated from time to time according to the extent of the export demand, but they have ruled high throughout; those in double cases have been wanted for the Brazil markets, and they close at the highest point of the year. Young Hysons at the early part of the year were very saleable, even the Japan kinds, the export demand for Canada and New York taking off all the available supplies, and the lowest price for fair qualities was about 2s. 1d. per lb. for Japan, and 2s. 4d. per lb. for Shanghai Teas, but under heavy supplies prices have gradually declined, and on common to fair kinds of Shanghai the fall may now be quoted at 8d. to 9d. per lb., whilst Japan kinds are almost unsaleable even at a greater reduction. Good to fine Moyune kinds have been better supported, but in these a decline must be quoted of 3d. to 4d. per lb., as also in the Fychow descriptions. Imperials have been in fair demand for export throughout, but prices show a decline of about 3d. per lb. on the highest point of the year. Gunpowders have met a ready sale throughout. The prices of these were less influenced by the export demand, and the reaction has been less in consequence, still they show a fall of about 3d. per lb. on the fine to finest Moyunes, also on the good Fychow qualities The Ping Suey kinds have not come to hand as usual at the end of the year. All kinds of Japan are much out of favour with the trade, and are very difficult of sale. Canton-made Gunpowders and Young Hysons early in the year were saleable at very extreme rates, the former at from 1s. 6d. to 2s., and the latter at 1s. 2d. to 1s. 6d., but as the supplies of country teas became larger, the demand became more limited, and with a pressure to sell, prices for Gunpowders have given way about 6d. per lb., and Young Hysons 7d. to 8d. per lb. from the highest point, and there is not much inquiry even at these prices. During the greater part of the fortnight, our market was quiet, though a few ships coming to hand have a better assortment of teas, which were taken to some extent by the trade at fully previous prices for Monings and Kaisow kinds of Congou; old import teas remaining very unsaleable. Oolongs and Scented teas have been very difficult of sale at lower prices. Souchongs have sold very readily at extreme rates. Green teas maintained former value. Since the turn of the year, the arrivals have been extremely heavy, amounting to no less than twenty-five ships. The bulk of these supplies are not yet on offer, but the trade buy very cautiously. Moning and Wopak kinds are fairly maintained, but medium Kaisow kinds, Oolong, and Scented teas have given way fully 1d. per lb. Green teas have been taken, but prices have ruled in favour of the buyers.

SILK.—The annual report is as follows:—In China Silk, an increased import of 5,200 bales, and an increased delivery of 8,300 bales; Japan Silk, 1,800, and 1,400; Canton Silk, 1,450, and 430; Chinese Thrown Silk, a diminished import of 850 bales, and an increased delivery of 1,230 bales; Bengal Silk, 180, and 600; Persian Silk, an increased import of 3,200 ballots, and an increased delivery of 2,820 ballots; Italian Silk, 150, and 570; Brutia Silk, imports and deliveries remain nearly the same as last year. Thus showing an aggregate increase as compared with last year of fully ten per cent. in the weight of silk both of the imports and deliveries. The aggregate stock remaining in the warehouses is the same as last year, a high average, especially as 5,000 bales of China and Japan silk are now in course of landing, and prices close twenty per cent. above the quotations of last year—still the new year opens with a buoyant appearance. The extent of business done and the amount of the deliveries in the year 1862 has been very large, almost on a par with our largest years—but we fear the result has not been satisfactory; certainly it has not been so to our home manufacturers and throwsters. All hope of a return to profitable trade vanished very early, and the high range of prices and the sluggish nature of the demand for goods made it one long continued struggle for them. Importers have, upon the whole, done fairly well, but to speculators and dealers it has been a year of great opportunities. Starting with moderate prices, the downward movement commenced in April and continued till the beginning of May – it had then reached 7½ to 10 per cent.—about the second week matters began to mend, and when news arrived from America that for a day or two induced the belief, or rather hope, of modification, if not arrangement of the difficulties, we had recovered the fall of 7½ to 10 per cent. which had been established, and for a few days the idea was entertained of a further advance, but as the favourable expectations passed away so prices began to recede, and the close of June found us again 7½ to 10 per cent. under the highest point. This tendency continued till the arrival of the new China Silk in August, and the first transactions were upon that parity; but upon receipt of the China telegram early in September of very large settlements and large shipments for the overland route, a further fall of 5 per cent. was established. This extreme depression was short lived; early in October, an opinion began to gain ground that the large settlements, twice, indeed three times repeated, must be the consequence of a well-founded belief in the shortness of the crop, and that the large quantity brought down from the interior was to be looked upon as a measure of precaution, and arising from the altered mode of business in China rather than a proof of the existence of increased quantity; very large business was done, the deliveries of the month reached almost the highest figure known, except in the month of March and in November we again reached the highest figures of March, and May, and with them we commence the year, notwithstanding the quiet trade and small deliveries of December. The arrivals of January, we expect, will be heavy, probably 12,000 to 14,000 bales China and Japan silk, but after that there is a strong belief that they will be light for the remainder of the season as two-thirds of the supposed total will then have come forward. The importation of foreign manufactured goods has been again very large, exceeding even the enormously increased quantity of the preceding year, frequently coming in large parcels and frequently at prices considerably under cost, making us the consumers of the produce of those looms which would ordinarily have been working for America. In China silk the supply has not been of a satisfactory character, the better classes both of Tsatlee and Taysaan always very scarce, and the quality and size of thread of the medium and lower classes leaving much to be desired. The proportion of Haineen and Yuun-fa has been scarcely maintained - this class is still appreciated for the size of thread and the unfortunate position of our Throwsters continues to induce them to put up with its comparatively bad working qualities, but it has scarcely supported its proportionate price. Chinese thrown silk remains entirely out of favour, although it has shared to some extent in the improved prices from the extreme depression. The deliveries show an increase upon last year and the stock a considerable reduction, still it ranks far below its former position in the scale of prices. Canton silk shows a considerable increase in the importations and deliveries, but it has only been in the last five months that we have received the bulk of

Digitized by Google

the supply, and throughout the year the prices have been depressed below their usual relative standard. In Japan silk the supply continues to increase—this silk does not progress in favour, so that although it has always been taken more or less freely, there have been frequent periods when it has been sold comparatively cheap. The quality does not improve, and speaking generally, it denotes materially less care in the reeling—a greater mixture and greater variation in size of thread in the same skein than formerly—the strings too had increased to an extent to put it a good deal out of favour, but an arrangement has been made which sets this matter right. The present quotations are :—

SUGAR.—Market dull: transactions effected at drooping prices. There have been sold 70 tons Bengal; good yellow Gurpattah Date 36s. 6d., low middling and good middling white Benares 40s. 6d. to 41s. 6d. 230 tons Madras, middling yellow, 37s. 6d., good to fine, fine yellow, 40s. to 42s. 6d.; Native 30s. to 31s.; and 370 tons Penang from 31s. to 39s. 6d.; 80 tons clayed Manila at 33s., and 550 tons Manila, floating cargo, at 20s. for Liverpool. Total amount of imports for the past year of sugar from all quarters was 457,630 tons. In looking to the causes of depression in the sugar market in that period, the American war must be considered as chief; plentiful crops of beet root on the continent have also interfered with its consumption. Mainly owing to the distress in Lancashire present quotations show a marked decline on the reduced rates of last year.

COFFEE.—Parcels of Ceylon offering have been taken at an advance of fully 1s. per cwt., the limited supply prevents any large transactions at current quotations. The business for the month comprises—1,200 casks, 1,300 barrels and bags Plantation Ceylon, fine fine ordinary to low middling, 22s. 6d. to 86s.; middling, 87s. to 88s. 6d.; 450 casks, 3,000 bags Native, fine ord. to superior, 73s. to 74s. 6d.; a few very fine, 75s. to 76s.; black and red garblings from 34s. 6d. to 66s. 6d.; 200 packages Mocha, middling to good yellow long berry, 97s. to 104s.; and 500 packages other East India, chiefly greyish Neilgherry, 80s. to 83s.; good and fine ordinary, Malabar, 75s. to 76s. In reviewing operations for the past year we have to note the influence of a deficient supply of Brazil and Java in stimulating prices, the quotations in many instances having exceeded those of previous years. Colonial and Ceylon descriptions proved to be the first to advance; the supply of Ceylon in 1862 varied slightly from preceding years: of Mocha the imports have been larger, and the clearances for home purposes less. Quotations in Coffee are from 3s. to 11s. per cwt. above those at this time in 1862. Present high prices will not probably undergo abatement in the course of this year.

RUM.—Latest sales of Penang have been at 1s. 4¼d. to 1s. 5d.; but quotations may be taken at 1s. 5d. to 1s. 5¼d. The imports of 1862 were almost the same in quantity to those of 1861. The last six months' prices have advanced 1d. to 2d. higher than during the previous portion of the year.

RICE.—We quote Bengal white, 10s. to 16s.; cargo, 7s. 9d. to 9s.; Madras, 10s. to 12s.; Arracan, Rangoon, &c., 7s. 6d. to 11s. 6d.; Java, 9s. to 21s. All these quotations are above those of this period last year, with the exception of Java. A great want of animation characterised this market in the early part of last year; subsequently it experienced considerable fluctuation. Latterly the market has been very dull, and the amount of business limited. Principal feature in floating cargoes has been the gradual decline in the value of Nakrenzie, attributable to the inferior character of the arrivals of this season's crop. During the past year the arrivals have been 88,800 tons, against 72,000 tons in 1861; the deliveries 75,000 tons, against 76,500 tons, and the stock at the close was 35,200 tons, against 25,860 tons in the preceding year.

PEPPER.—Owing to demands of shippers, value of Eastern sorts continue, as during the greater part of last year, to maintain good prices. Good and fine qualities Singapore range from 5¾d. to 6¼d.; common to good Penang, 5⅛d. to 5½d. per lb. Imports of 1862 were 1,300 tons more than in 1861.

SAGO.—We quote Pearl at 16s. to 25s. below the prices realised this this time last year, when our quotations were 19s. to 26s. This is attributable to the increase of imports in 1862, which more than doubled those of 1861. Less depression is observable in the fine qualities. Sago flour, the stock of which is quadruple that at the close of 1861 rules, as low as 14s. to 14s. 6d.

SPICES.—Cinamon: Ceylon, 1, 2, 3, is quoted at 11d. to 2s. 6d.; Malabar and Tellicherry, 7d. to 1s.; Parcels maintain the rise they experienced last October. Cloves: Amboyna and Bencoolen are 4⅛d. to 1s. 4d. per lb. Imports for the present year have been light; Penang especially, has been scarcer; Zanzibar has slowly and steadily advanced. Ginger: Cochin and Calicut, 60s. to 120s. per cwt.—a great advance on quotations at this period last year, when prices were 46s. to 114s. Landings of East India have been lighter, and deliveries heavier than in 1861. Scarcity of Bengal has benefited common sorts of Cochin and Calicut. Mace is 6d. to 2s. per lb.; Ordinary to good Bright Red brings 8d. to 1s. 1d. Stock still returns a surplus over 1861. Nutmegs range from 7d. to 4s. per lb. Quotations of all but the fine qualities now rate below those of 1861. Clearances, the past year fell off rather materially. Arrivals for 1862 were barely equal those of 1861. The market the past year exhibited its greatest activity during the first three months. Cassia Lignea: The quotations are 95s. to 102s. per cwt., whilst at this period last year they were 84s. to 92s. There has been some increase in the supply, but without producing an important excess in the stock. The year opened with an active inquiry from speculators, and prices rose 4s. to 5s. per cwt., but this was of short duration, and for some time after business was very limited at declining rates, middling to good quality in July being disposed of at 86s. to 91s.; subsequently, the article was more in request, and with the firmness of holders since, present quotations are about 10s. per cwt. higher. Cubebs maintain the same quotations; no transactions of any importance have transpired. GALANGAL ROOT.—Little ammation, prices aange from 25s. to 30s.; no public auctions. Musk: No public sales, and the transactions that have taken place had been of a most limited character. We quote, 1st quality, 27s. to 33s.; lower quality, 12s. to 15s.

SALTPETRE.—We quote Bengal at 37s. 0d. to 39s. 6d.; Bombay and Madras at 35s. to 36s.; English (refined), at 42s. to 43s. 0d. The landings have been 6,000 tons heavier than in 1861, but as the deliveries have also largely increased, the quantity on hand is only 700 tons in excess. The fluctuations in the year now brought to a close have been of greater importance than in the previous one, and extend to about 10s. per cwt. In January the removal of the prohibition to export led to some revival of animation, more particularly for the common qualities, which, however, soon subsided. Bombay has likewise experienced some variation in price, the best sales being in October, when 36s. 6d. to 38s. were paid for 61 to 27 per cent. refraction, but in November at 32s. to 33s. 6d. for similar quality, from which there has since been a rally of about 2s. per cwt. The Madras which has arrived during the year has been taken off at 36s. to 37s. 6d. for common to good.

COTTON.—We quote Madras at 1s. 1d. to 1s. 5¼d., and Surat 1s. 1d. to 1s. 8d. per lb. Owing to the somewhat changed aspect of the American war, the quotations are by no means firm, and a series of fluctuations, influenced by the prospect of supply from the Southern States may be looked for.

JAPAN WAX.—£3. 10s. to £4. 5s. Last year's same time quotations were £2. 18s. to £3. 15s. The market is quiet but firm. No sales are reported since opening the market this year.

HEMP.—The market continues to maintain its improvement, though operations have been extremely limited. £22 to £27 has been realised in private transactions for middling to good. Arrivals of Manila have been barely equal to those of 1861, being 4,100 tons, against 4,320 tons, and as the clearances have been 4,600 tons, against 3,410 tons, the stock is lighter than last year's viz., 5,150 tons, against 5,700 tons. As to jute, the imports in the past year have been 26,300 tons, against 22,400 tons in 1861; the deliveries 25,670 tons, against 22,640 tons; and the stock at the end of December was 8,840 tons. Manila, current quality, £23 to £27; Sunn, £15 to £32.

TIN.—Transactions are limited. Banca, £119 to £120; Straits, £117 to £118.

MISCELLANEOUS.—India-rubber: Batavia, fine at 1s. 5¼d. per lb.; Singapore, at 1s. 4¼d. Aloes: £3. 10s. to £24 per cwt. Castor Oil: None here, 5d. to 5⅞d. per lb. Coculus Indicus: 9s. to 12s. per lb. Bees' Wax: £9 to £9. 10s. for bleached; £7 to £8 for unbleached per cwt. Castor-oil: 6d. to 6⅞d. per lb. for straw to very good second quality. Cowries, fresh: 34s. to 34s. 6d. per cwt. for fair to small, and 6s. to 18s., large and medium. Dragons' Blood, in reeds: £15 per cwt. Black Lead; 7s. to 23s., quiet; 19s. 6d. per cwt. for good lump, and 9s. 6d. dust. Camphor, China and Japan: £9 to £9. 10s. Gum Benjamin: 1st quality, £16 to £18. Sumatra: 2nd quality, £14 to £16; 3rd, £7 to £12; 4th, £1 to £5. Damer: 35s. to 52s.: flat, and nothing of any consequence doing. Gamboge: picked, £9 to £11; in sorts, £5 to £8, to £9. 10s. per cwt. for middling pipe. Gutta Percha: 1s. 4d. to 2s. 6d.; nothing of consequence doing. Sapanwood: Bemah, £5 to £8 per ton; Siam, £8 to £11 per ton; at £10. 5s. to £10. 10s. per ton. Shells: Mother-o'-pearl, Singapore, 125s. to 150s. per cwt.; Manila, 80s. to 100s. per cwt.; firm, with little offering. Soy: 2s. 6d. to 2s. 8d.; in steady demand. Star Anniseeds: 95s. to 105s. per cwt. Sticklac: Siam, 70s. to 95s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 15s. to £7; nail rods, £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £9. 5s. to £9. 10s.; Staffordshire bars, £7. 15s. to £8; rails, £5. 15s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £105 per ton; yellow metal, 9¼d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I.C. 29s. to 30s. per box.

LEAD, &c.—English pig, £21 to £21. 5s.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £18.; zinc, English sheet, £23. 10s. to £24; quicksilver, £7 per bottle.

The export of metals to China for 1862 stand as follows :—Rail iron, 133 tons; pig, 454; bar and nail rod, 7,155; hoops and sheet, 515, steel, 173; copper in sheets and nails, 220; yellow metal, 548; pig lead, 8,277; sheets, 450; spelter, 50; zinc, 19; tin plates, 10,081 boxes; quicksilver, 630 bottles.

The following is from the circular of Messrs. French and Smith :—The course of trade in metals during the past year, 1862, has been healthy,

Digitized by Google

and, on the whole, an improvement on that of the year previous. There has been no very great activity at any period of the year, but the demand has been steady both for home consumption and export. The price of Scotch pig iron was maintained at 3s. to 4s. per ton above the average price of 1861, principally owing to continued speculative purchases. It is estimated the stock is increased during the year 100,000 tons. Welsh iron was in very fair demand during the whole of the year, and the price slowly improved about 10s. per ton. For Staffordshire also there has been very good inquiry. The trade in copper has been very dull during the whole of the year. We had some improvement in August, and the early past of September, which was checked by the combined smelters declaring in advance, far beyond what the current of trade warranted, since which business has been very quiet, and transactions now are generally under quoted rates. Foreign is dull. Burra, £98; Kapunda, £99; Spanish Rio Tinto, about £89. Tin has fluctuated much less during the year past than usual. Common English was 120s. at the commencement, and in August was sold as low as 111s., but has since recovered, and is now firm at 115s. Foreign also has been unusually steady. The lowest price at which straits was sold was 110s., but at this price there were numerous buyers and the price quickly rose; the present price is 117s. to 118s., and appears firm. In Banca there is but little doing. The stocks of foreign tin, here and in Holland, for three years, are given below:—

	31st December, 1862.		1861.		1860.	
	Slabs.	Tons.	Slabs.	Tons.	Slabs.	Tons.
Foreign in London, estimated at.....		2350		1585		380
In Holland	69740	2136	53971	1652	65214	1997
		4486		3237		2377
In Holland towards next sale	61928	1896	73236	2242	78678	2409
		6382		5479		4786

The quantity of Straits tin afloat for Europe is 620 tons, against 1263 tons in 1861 and 995 in 1860.

TIN PLATES.—The exports of this manufacture greatly increased in 1862 over the year preceding. The shipments last month, December, were 46,5000 boxes, against 47,000 boxes, December, 1861. The value of the tin plates exported in 1862 is £1,230,000; in 1861, £900,000; in 1860, £1,498,000. Lead has been steadily improving during the whole of the year, and at present prices is very firm, with an improving tendency. The shipments in 1862 show an increase of 14,000 tons over those of 1861. Spelter is without activity. The stock on 31st ult. was 5,530 tons, against 6,040 tons 31st December, 1861.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers.

FREIGHTS AND CHARTERS.

The amount of tonnage loading on the berth for India, China, and the Cape of Good Hope, is 40,600 tons. There have been heavy arrivals of shipping lately, but the demand is equal to the supply, and outward freights continues firm without reduction in rates. Coal freights are steady at somewhat increased rates.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £36 and £1. 17s. 6d. For Shanghai: £50 and £2. 7s. 6d. For Manila, £1. 5s. For the Philippine Islands, Penay, or Zebu, £1. 17s. 6d. For Singapore, £26 to £1. 6s. For Penang, £24. For Galle, £26. and £1. 10s. to £1. 17s. 6d. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have offered the following Government stores for tender:—From the River Thames to Hong Kong: Two tons iron targets, twelve tons light measurement stores, and 500 hogsheads porter. To Colombo: Eight tons heavy shells, and four tons light measurement.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Kong Kong, 45s. to 55s.; Shanghai, 55s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

CASUALTIES.

NOTICE of CALL.—BANK of HINDUSTAN, CHINA, and JAPAN (Limited), 16, Cornhill, London, 5th Jan., 1863.

NOTICE IS HEREBY GIVEN, that a CALL of £5 per share is this day made by the Directors upon all the shares of this Company, PAYABLE, on or before the 6th day of February next, at the Alliance Bank of London and Liverpool, 5 Lothbury, London; the Albany, Old Hall-street, Liverpool; or at the Company's offices, 16, Cornhill, London.

By order of the Board,

R. SWIRE TOMLIN, Secretary.

INDIAN TRAMWAY COMPANY (Limited).—At a Special Meeting of the Indian Tramway Company (Limited), held at the London Tavern, Bishopsgate-street, on Tuesday, the 30th December, 1862, the following Resolutions were unanimously passed:—

Resolved—"That the Shareholders approve the course suggested of undertaking the Contract for the road from Palej to Jumbooseer, being a short line, capable of easy and early construction, at a fixed contract cost, and forming an important link between the cotton districts and the trunk line to Bombay, on the understanding that the Board will not enter upon the execution of any more lines until the Government of India shall have conceded such terms as in the judgment of a Special General Meeting to be convened for the purpose, shall be considered satisfactory."

Resolved—"That this Meeting desire to impress upon the Governments the policy of encouraging, by every means in their power, the construction of Light Railways or Tramways throughout India, in connection with the Trunk Lines of Railways now approaching completion, with a view as well to the earliest development of the resources of India in connection with these Railways, as to rendering productive, at as early a period as possible, the Capital embarked in them."

They desire also to express their opinion that the terms hitherto offered do not hold forth sufficient advantages to attract Capital on a scale commensurate with the object.

MACDONALD STEPHENSON, Chairman.

Sir Charles M'Grigor, Bart. (C. R. and W. M'Grigor.)

SECRETARY—A. P. Fletcher.

VICE-SECRETARY—Edward Fuch.

LIFE DEPARTMENT.

(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world not chargeable with an extra premium.

According to this method the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying a fixed rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.

(Payable during the entire currency of the Policy.)

Age.	Without Profits.	With Profits.	Age.	Without Profits.	With Profits.
	£ s. d.	£ s. d.		£ s. d.	£ s. d.
18	2 3 3	2 8 9	33	3 2 0	3 9 11

PERFUMERY, PATRONISED BY
HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM. — A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1863.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

Cholera, Dysentery, Diarrhœa, Ague, Fevers &c
BEWARE of SPURIOUS and DANGEROUS COMPOUNDS, Sold in Imitation of

Certain dishonest and unprincipled Chemists piratically apply this name to worthless compounds—a name invented and applied by Dr. J. C. Browne, M.R.C.S. (on Army Medical Staff), to his great discovery, which is so extraordinarily curative in the above diseases.

As a proof of its efficacy, a few extracts from numerous testimonials by physicians and surgeons are given:—

From A. MONTGOMERY, Esq., late Inspector of Hospitals, Bombay.

Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed.

DR. JAS. CAMPBELL,
Surgeon, R.N., H.B.M. Consulate.
Bangkok, Siam.

"Make up for me 400 half-ounce bottles of Dr. J Collis Browne's Chlorodyne. You will be surprised at such an extensive order from this part of the world, but much experience in its employment has led me to entertain a high opinion of its curative properties in various diseases."

Sold only in bottles, at 2s. 9d. and 4s. 6d., by the Sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; and professional testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp.

HOLLOWAY'S OINTMENT.—Bad Legs, Wounds, Ulcers, and all descriptions of sores are cured by the proper and diligent use of this inestimable preparation. To attempt to cure bad legs by plastering the edges of the wound together is a folly, for should the skin unite, a boggy diseased condition remains underneath to break out with tenfold fury in a few days. The only rational and permanent treatment as indicated by nature, is to reduce the inflammation in and about the wound, to soothe the neighbouring nerves to cool the heated blood as it courses along its vessels, and to render the thin watery ichorous discharge consistent and healthy Holloway's Pills should be taken to purify the blood and expel the obnoxious humours

List of Passengers.

PASSENGERS INWARD.

By this Mail to Marseilles per Euxine, arrived Jan. 25.—From Hong Kong: M. de la Cavara, Lady Bollie. From Singapore: Mr. and Mrs. Paterson, child, and servant.

To Southampton per Pera, expected to arrive Feb. 1.—From Hong Kong: Capt. Parkin, R.N., and man servant, Messrs. Mongan, Millett, McGregor, and Stubbs. From Ceylon: Mr. and Mrs. Carson and two children. To Malta.—From Hong Kong: Mr. Parry.

By last Bombay Mail to Marseilles per Vectis, arrived Jan. 19.—From Hong Kong: Lieut.-col. Stanley.

PASSENGERS OUTWARD.

By this Mail, per Ripon, 20th Jan., from Southampton.—To Ceylon: Miss Jessie Burness, Mr. G. Elphinstone. To Singapore: Mr. Jas. Ramsay McArthur, Mr. Vogél, Mr. W. B. Smith. To Kong Kong: Mr. Price, Mr. G. Shambler, Staff-Assist. Surgs. J. H. Beath, M.D., G. F. Adams, and T. Murtagh. To Shanghai: Mr. H. Smith, Dr J. Parker. From Marseilles, Jan. 28. To Singapore: Mr. and Mrs. A. Van Delden and our children, Mr. J. Watson, Miss C. Doornick, Miss A. Van den Bergh and native female servant, two Misses Van de Poel and governess, Mr. and Mrs. Gilfillan. To Shanghai: Mr. C. B. Telge, Mr. Gunston, Mr. and Mrs. Lynell, Dr. Barton. To Hong Kong: Mr. Wilkinson, Capt. A. Wolrige, R.M. To Singapore: D. Ridge, Mr. D. Almeidas and native male servant. To Calcutta: Mrs. McLean, infant, and native female servant, Mr. and Mrs. J. Christian and infant, two daughters, and son, four children, and English female servant, Mr. D. R. Ratcliff, Mrs. Birch, Miss Stevenson, Messrs. Cowley and Thackray, Capt. R. Richardson, A. Blackiston, Rev. W. Pryse, Messrs. G. Mackilligan and Hills, Mr. and Mrs. Spear, Miss Steel, Miss E. Richards, Mr. Safe, Mrs. Sneyd, Mr. Ewing, Mr. G. M. Barnes, Mrs. Fraser's native female servant, Mr. Thornton and native male and female servants, J. Carpenter, Messrs. Lloyd, R. D. Francis, and Lawrence. To Madras: Professor A. A. Gordon, Mrs. G. Phillips. Mr. and Mrs. A. Cameron, Dr. D. T. Morton, R. Shortland. To Ceylon: Mr. and Mrs. Greenaway, daughter, and son. To Alexandria: Mr. W. Wrench, Mr. P. Smith. From Alexandria. To Calcutta: Messrs. Lathbury and Ross.

From Marseilles, per Vectis, to leave Jan. 23.—To Calcutta: Mr. A. Hope, Capt. and Mrs. G. Sun, Messrs. Stephenson and S. Hartwell, Maj. Dawson, Messrs. Levinge, Mirfield, and Schiller, Mrs. Lawrence, infant., and European female servant, Miss Hutton, Messrs. C. H. Kerr, Muir, and Scanlan, Lieut. E. T. and Mrs. Thackeray, Messrs. A. and E. Wienholt. To Madras: Mrs. C. B. Taylor, Lieut. and Mrs. Tyler. To Ceylon: Messrs. A. Nicol and Mitchell.

Per P. and O. str., Feb. 4, from Southampton.—To Ceylon. Asst. surg. Ramsay. To Singapore: Mr. H. R. Beaver. To Hong Kong: Mr. Williams, Mr. Fenwick. To Shanghai: Mr. Joshua Le Mare, Mr. Geognogan. From Marseilles, Feb. 12.—To Ceylon: Mr. J. F. White. To Singapore: Mr. J. Wilson.

Per P. and O. str., Feb. 20, from Southampton.—To Ceylon: Mr. and Mrs. Wise and child, Mr. J. S. Alsten. To Hong Kong: Messrs. Galton and Stronach. From Marseilles, Feb. 28.—To Ceylon: Mr. R. A. McGounes, Mr. J. A. and Mrs. Simpson, Miss Simpson, Dr. Van der Straaten. To Hong Kong: Mr. M. P. Jukes. To Shanghai: Mr. and Mrs. R. Reid.

Per P. and O. str., Feb. 4, from Southampton. To Hong Kong: Mr. H. Wilkinson, Miss Rathborne, Mr. and Mrs. Hanson, Mr. Charles Wilde, Mr. Ellis Gilman. To Shanghai: Mrs. Esser. To Penang: Miss Bayaham. To Ceylon: Mr. and Mrs. Swan, Miss Swan. From Gibraltar.—To Hong Kong: Don Manuel Ivuart, lady, and infant From Marseilles, Feb. 12.—To Shanghai: Mr. G. S. Morrison. To Ceylon: Mr. and Mrs. A Stuart and two children, Mr. R. Ahlers, Mr. H. Harvey. To Singapore: Mr. Charles Stricker.

Per P. and O. str., Feb. 20, from Southampton.—To Hong Hong: Mrs. Caldbeck and infant. From Marseilles, Feb. 28.—To Penang: Mr. and Mrs. F. Kusterman.

Per P. and O. str, March 4, from Southampton. To Singapore: Mr. and Mrs. W. W. Cook.

Per French mail str., Jan. 19, from Marseilles.—To Singapore: Sir James Brooke and servant, Mr. Charles Brooke, Mr. C. B. Latouche and servant. To Calcutta: Dr. Mountjoy, Messrs. J. Hutton, Wilson, Harwan, and Prestwich.

Summary of News from the Far East.

JAPAN.

Beyond the items of news contained in the letter of our Shanghai correspondent there is nothing of importance to communicate. Dates from Yokuhama and Nagasaki are to the 15th Nov. At the former port a disputed case of salvage from the wreck of the *Guinea*, laden with silk and tea, of which a large portion was saved, occupied the consular authorities, but was not settled at the above date.

CHINA.

PEKING.

The foreign population in the capital is on the increase, one Legation (the U.S.) and its members having taken up their residence since last year. Taking the members of the Legations, with their military escort, foreign body-servants and attendants, there are in all upwards of eighty foreigners in the capital.

An expedition has just returned from Yehol, promoted by Mr. Bruce chiefly, to visit the coal mines in that neighbourhood. The members of the expedition were throughout treated with courtesy and kindness. The results of the journey will most probably be published before long.

Public attention in the capital had been chiefly occupied with the ceremonies attending the removal of the late Emperor's coffin from the Imperial city towards its final resting-place, about eighty miles distant. The following narrative of the event is from the *Shanghai Recorder* of Nov. 27th :—

"The procession left the palace about five o'clock in the morning. The Emperor having accompanied the coffin to the back of Prospect Hill on foot, proceeded in his chair to Ching-An, leaving the city by the Chi-Hua gate (southern gate on the east wall of the Tartar city), while the coffin went out by the Tung-Chi gate (northern gate on the east wall). At Ching-An the procession was joined by the coffin of the Empress, and after some ceremonies had been performed proceeded on its way to Tung-Ling, but the Emperor returned to the Palace accompanied by Prince Kung and a few Ministers of State.

"It was impossible to obtain a view of the procession until it passed Ching-An, as those parts of the city and suburbs through which it was intended to pass were prohibited to foreigners. Beyond Ching-An it moved in the following order :—

DETACHMENT OF TARTAR CAVALRY.

Men on foot bearing ornamental banners.

Camels carrying the sacrificial vessels.

The tablets of the six buried Emperors of the present Dynasty, borne by men on foot.

IMPERIAL CARRIAGES.

Another detachment of cavalry.

Another company of men bearing banners.

THE EMPEROR'S BIER.

Officers of the household on horseback carrying spears.

THE EMPRESS'S BIER.

Mandarins in carts and on horseback.

"The bier was similar in form to that ordinarily used among the Chinese, but of larger dimensions, built in the following manner :—Two large beams were placed parallel to each other, about eight feet apart, and connected by two smaller cross beams. Upon the rectangle so formed was placed a framework on which the coffin rested. Over the coffin and

Digitized by Google

framework was erected a canopy about eight feet high, with a gorgeous covering of embroidered silk, the figures upon which were principally red and blue dragons on a light straw coloured ground. The whole was surmounted by a large gilt ball of simple construction. To the projecting portions of the large beams was attached a system of small poles, by means of which this weight, necessarily great, was carried by upwards of sixty men at a time. The beams and poles were firmly secured to each other by cords, which, as well as the entire woodwork of the bier, were of a bright red colour. The bier of the Empress differed in no respect from that which conveyed the Imperial remains. The bearers had evidently been well chosen and well trained to their work; indeed every day for some time previously they had practised carrying the massive framework and relieving each other quickly and without confusion, under the superintendence of specially appointed officers. The result of this care appeared in the absence of any perceptible unsteadiness of motion in the bier as the procession moved along.

"Relays of bearers were stationed at intervals along the road; they were uniformly dressed in long red garments, the tawdriness and faded condition of which were not in keeping with the neat and fresh appearance of the bier, and served more than anything else to dissipate the idea that a foreigner would entertain, of the magnificence that would be likely to attend the funeral of an Emperor of China. The procession moved along at the rate of about two and a half miles per hour, which speed was rendered the more attainable by the fact of the road having been specially prepared.

"The high officers who accompanied the funeral returned to Peking on the 7th Nov., not having, however, actually deposited the 'Cedar Palace' in its final resting place, but having merely placed it in a temple in the neighbourhood of Tung-Ling, there to remain until the Mausoleum be completed; the completion of which has been retarded by the want of funds.

"As usual in such cases His Majesty has promoted all the officers who have been engaged in the ceremonies of the funeral, presents have been conferred on the men who prepared the road for the passage of the Imperial coffin, and upon the troops who accompanied it; two thousand taels have been distributed amongst the bearers.

"On 1st November the remains of three concubines of the late Emperor were also conveyed to Tung-Ting for burial. These, as well as the Empress, had died some time before the Emperor, but in accordance with the custom observed in the Imperial family, they could not receive sepulture until the Emperor himself had been conveyed to the tombs of his ancestors."

SHANGHAI.

Our correspondent writes:—"The past fortnight has not been quite devoid of excitement. The river regulations have brought on a little discussion, but do not appear to have made such an impression on the mercantile community as might have been expected. The rebels have left the neighbourhood o Hankow, and a large body of braves has been sent in pursuit. The weather up the Yang-tse has become wintry rather suddenly, there having been a heavy fall of snow on the evening of Nov. 24th. The fate of the black soldiers seized at or near Kah-ding has been cleared up. A man who came out as fireman to an American steamer was taken prisoner about two months ago, and carried to Sou-chow. He escaped, however, and came down here. He reports that about the 3rd of November he and four soldiers of the Bengal Native Infantry were marched to Nanking, where he saw, and was forced to work, the brass howitzer belonging to the *Impérieuse*, captured at Kah ding at the time when the native soldiers were taken. The other three soldiers who were captured, being severely wounded, and rendered incapable of work, were put to death at Kah-ding.

"By the latest news from Japan, we hear that a party, including R. Eusden, Esq., of H.B.M. Legation, and Captain Montgomerie, of H.M.S. *Centaur*, fell in with an immense procession, consisting of the retainers of Arima Nagasaka-no-kami, who was on his way from Yedo to his own dominions; but no attempt at annoyance was made. The Prince of Kanja, and another daimio of great power, rejoicing in the name or title of Matzdaira Mootoz-no-kami, have also left Yedo. In fact, the temporal capital is fast becoming deserted, and everything seems to point towards the removal of the Tycoon's court from Yedo. The report of the Prince Regent's death turns out to have been false.

"The much disliked, much talked about Taoutai has resigned. His successor is the former Yuen of Shanghai, Huang-ta-lao-ye. Wu-ta-jen, the ex-Taoutai, is supposed to have received orders to go up to Nanking and expel the rebels. Of course he will do it. The new Taoutai is not in the least like a Chinaman; he displays a glossy black beard, moustache, and whiskers, and if dressed in European clothes would really excite attention as a fine, handsome fellow. It is said that the rebels are evacuating Nanking, but it is hard to imagine that they would be fools enough to throw away the only position which gives them any *prestige* in the eyes of their fellow countrymen. If, however, the rumour be true, it would account for the Taoutai's flourish of trumpets about exterminating the 'hairy devils.'

"An account has just come in, but has not as yet been published, of an attack made by pirates in the neighbourhood of Sung-kiang. An unfortunate American storekeeper, named Boynton, went up with a cargo boat, and anchored close to Sung-kiang, and within hail of the *Bopeep*, a Chinese man-of-war steamer. In the middle of the night, however, Boynton was awakened by a spear thrust between his ribs, and was immediately made cognisant of the fact that eight or ten Chinamen had taken possession of his boat. He and a man named Curtis, although both wounded, at last succeeded in driving off the intruders, but not before Boyntou was wounded so desperately as to make his chances of life extremely problematical. Sung-kiang and its neighbourhood has, nevertheless, greatly improved since it has been placed under martial law, but much remains to be done."

We subjoin an extract with reference to the present state of the city, taken from the *Shanghai Recorder*:—

"The reports from Sung-kiang are most satisfactory. The rebels appear to have left the country round in a state of comparative immunity, and all the industrious pursuits of the natives are seduously carried on. Preparations for defence have also been made, and Sung-kiang, as it at present stands, is perhaps the strongest native stronghold of Imperalism in China. A military road from the city to the river is now in course of completion, four miles of it being already finished. At the river end of this road there will be a pier, alongside which steamers can load and unload, and from which troops can be marched on board directly, without the delay and confusion, involved in conveying men in boats, from the shore to a ship. The comforts of the men will also be enhanced, as many things must be overlooked, or purposely left behind when a hurried passage in small and inconvenient boats is necessary. Moreover, this road, running parallel to the creek which formerly was the only entrance to Sung-kiang from the river, commands it, and renders it impossible for the rebels to block up the water communication to and from the city. Our readers will remember that Sung-kiang was attacked before this creek or canal was seized, and the garrison was consequently in danger of starvation. As to the road itself, it will be commanded by two thirty-two pounders at the city end, and by a steamer at the river end. Fortifications have also been thrown up, the walls are being strengthened, and the city placed in every way in a state fit for defence against any force which the insurgents can bring against it. Parade grounds are being rapidly formed, so extensive as to allow of brigade and battalion drill. In every way, then, are preparations being made both for offensive and defensive warfare, and in a manner which is not likely to destroy the spirit or extinguish the nationality of the Chinese."

The river regulations to which our correspondent refers in his letter have been officially published. They were to come into operation on the 1st Jan., and thus to supersede the provisional regulations of the 5th December, 1861. The regulations are as follows:—

REVISED REGULATIONS OF TRADE ON THE YANG-TSE-KIANG.

Article I. British vessels are authorised to trade on the Yang-tse-kiang at three ports only, viz., Chin-kiang, Kiu-kiang, and Hankow. Shipment or discharge of cargo at any other port on the river is prohibited, and violation of the prohibition renders ship and cargo liable to confiscation.

Native produce when exported from any of these three ports, or Foreign imports not covered by Exemption Certificate, or Native produce that has not paid Coast Trade Duty, shall, when imported into any of these three ports, pay duty as at the Treaty Ports.

Art. II. British merchant vessels trading on the river are to be divided into two classes, namely:—

1st Class. Sea-going vessels, that is, merchantmen trading for the voyage up the river above Chin-kiang, lorchas, and sailing vessels generally.

2nd Class. Steamers running regularly between Shanghai and the river ports.

These two classes of vessels will be dealt with according to Treaty, or the rules affecting the river ports to which they may be trading.

All vessels, to whichever of the two classes they may belong, if about to proceed up the river, must first report to the customs the arms or other munitions of war they may have on board, and the numbers and quantities of these will be entered by the customs on the vessel's river pass. Permission to trade on the river will be withdrawn from any vessel detected carrying arms or munitions of war in excess of those reported to the customs, and any vessel detected trading in arms or munitions of war, will be liable to confiscation.

Any vessel falling in with a revenue cruiser of the Chinese Government will, if examination of them be required, produce her papers for inspection.

Art. III. Sea-going vessels, British merchantmen, lorchas and sailing vessels generally, if trading at Chin-Kiang, will pay their duties and tonnage dues at Chin-Kiang.

If a vessel of this class is proceeding further than Chin-kiang, that is, either to Kiu-kiang or Hankow, her master must deposit her papers with the Consul at Chin-kiang, and must hand in her manifest to be examined by the Chin-kiang customs; the superintendent of which, on receipt of an official application from the Consul, will issue a certificate, to be called the Chin-kiang pass, to the vessel. The Chin-kiang pass will have entered upon it the number and quantities of arms, muskets, guns, swords, powder, &c., on board the vessel; also the number of her crew, her tonnage, and the flag she sails under.

The Customs will be at liberty to seal her hatches, and to put a Customs employé on board her. On her arrival at Kiu-kiang, whether going up or coming down, her master must present her pass to the customs for inspection.

The duties on cargo landed or shipped at Kiu-kiang or Hankow must all be paid in the manner prescribed by the regulations, of whichever of

Digitized by Google

the two ports she may be trading at, and on her return to Chin-kiang she must surrender her Chin-kiang pass to the customs at Chin-kiang, and the Customs having ascertained that her duties and dues have been all paid, and that every other condition is satisfied, the grand chop will be issued to the vessel to enable her to obtain her papers and proceed to sea.

The Customs will be at liberty to put an employé on board the vessel to accompany her as far as Lang-shan.

Any British vessel of this class found above Chin-kiang without a Chin-kiang pass will be confiscated. Any junk without Chinese papers will similarly be confiscated.

Art. IV. River Steamers. Any British steamer trading regularly on the river will deposit her papers at the British Consulate at Shanghai, and the customs, on application of the British Consul, will issue a special river pass (or steamer's pass), that shall be valid for the term of six months. Steamers trading on the river under this pass will be enabled to load and discharge, and will pay duties according to the rule affecting river steamers.

On arriving off Chin-kiang, or Kiu-kiang, the steamer, whether proceeding up the river or down, will exhibit her pass to the Customs.

The tonnage dues leviable on any steamer holding a river pass shall be paid alternately at Chin-Kiang, Kiu-kiang, and Hankow.

The Customs are at liberty to put a tidewaiter on board a steamer at any of these ports, to accompany her up or down the stream, as the case may be.

Infringement of river port regulations will be punished by the infliction of the penalties in force at the ports open by treaty; for a second offence the steamer's river pass will also be cancelled and she will be refused permission to trade thenceforward above Chin-kiang.

Any steamer not provided with a river pass, if her master propose proceeding above Chin-kiang, will come under the rules affecting sea-going vessels laid down in Art. III., and will be treated accordingly.

Art. V. River steamer's cargoes:—

1st. Where native produce is shipped at a river port, on board a steamer provided with a river pass, the shipper must pay both export and coast trade duty, before he ships it. If it be for export to a foreign port, this should be stated when the produce arrives at Shanghai, and if it be exported from Shanghai within the three months allowed, the shipper will obtain from the Shanghai customs a certificate of its re-exportation; on production of which at the river port of shipment, whether Chin-kiang, Kiu-kiang, or Han-kow, the customs of that port will issue a drawback for the amount of coast trade duty paid.

2nd. Where import cargo is transhipped on board a river steamer at Shanghai it must first be cleared of all duties. The transhipment will not be authorised until the customs are satisfied that the import duties have been paid.

Art. VI. Native craft, owned or chartered by British merchants, will pay duty on their cargo at the rates leviable on such cargo under the treaty tariff. All such craft will further have to be secured by bond, in the manner laid down in the provisional rules, published on the 5th Dec., 1861, and on entry into any port will pay port dues according to Chinese tariff. If the cargoes of native craft so employed do not agree with their cargo certificate the amount specified in their bonds will be forfeited to the Chinese Government. This provision is only valid until tranquillity is restored along the river.

Art. VII. British vessels of all classes, as well as junks owned or chartered by British merchants, must apply to the customs at the port of departure for a cargo certificate (*tsungtau*), which, on the vessel or junk's arrival at the port of destination, must be handed in to the Customs before permission to discharge can be given.

The above regulations are provisional, and open to revision, if necessary.

The following proposal for a general hospital is from the *North China Herald*:—"There are, it is true, already existing in Shanghai the 'Shanghai Hospital and Dispensary' and the 'Marine Hospital' (the former being of very long standing), presided over, and under the personal care and superintendence of skilful and attentive medical practitioners; and the community ought to feel grateful to them for what they have done and still continue to do for the relief of their fellow-men. But neither of these hospitals is large enough for the existing requirements of the settlement, and they are wanting in that which is believed to be the great desideratum in cases of sickness, namely, good and efficient nurses. It is, therefore, proposed to establish a general hospital on the largest scale, under the management and superintendence of Sisters of Charity, and to be erected on an elevated spot between the west gate of the city and the Ningpo Joss-house, where a piece of ground containing 100 mow has already been secured for the purpose. It will be of easy access both by land and water, and will be provided with private rooms, general wards, bath-rooms, wash-houses, pleasure grounds, and poultry yard."

NINGPO.

It is stated that Shang-yu, a city in the Ningpo district, has been recaptured from the rebels by a combined expedition of 700 disciplined Chinese of Ward's Corps under Major Wood; 100 French drilled Chinese under General Le Brithon; and a Corps of Artillery, with three howitzers and two 32 pounders, under M. Giquel, the Customs' agent at Ningpo. After driving in the enemy by artillery practice from a dozen stockades outside the city, the attacking force were preparing to charge them outside of the gates, where they made a stand. Without waiting to act with the others, however, M. Giquel himself gave the word to charge, which he at once obeyed with about thirty men. Giquel was shot through the arm, his men repulsed, and the city re-entered by the Taipings. Fires during the night showed that the place was being evacuated, and when morning came it was found that the Taipings had withdrawn. The loot was very large; 7,000 non-combatants were found in the place, and allowed to go unmolested.

A proclamation is stated to have been issued to the authorities calling on the people to give a friendly reception to 2,000 Russian soldiers who were shortly expected.

SWATOW.

The disputed question as to a new site for the foreign settlement has at last been definitively settled, the Kai-lut situation being fixed upon. The lots were being sold by auction; and as Mr. Bruce has decided that none but British subjects can become landowners within the limits of the acquired site, there cannot be more than three firms to compete for the land.

HANKOW.

In our last number we mentioned that an extensive fire had broken out among the Chinese houses; it now appears that a second conflagration had occurred, when three foreign hongs were destroyed, and altogether about 400 native buildings. It is impossible to state what amount of property was sacrificed, but it must have been considerable. Fortunately the rebels, who had threatened to come down on the city, have disappeared, and all is again tranquil, so that the dealers are resuming their business operations, and the foreign merchants are sanguine of doing a larger business this month than they have done for some time past.

An agent of the Foreign Customs Collectorate has been established at this port as well as at Kiu-kiang and Chin-kiang. Provisions are made for the effective operation of a revenue service, whose officers may board every foreign vessel and remain on board to the end of her trip, anywhere between Hankow and the Lang-shan crossing. A large and lucrative trade in smuggled goods will thus, it is said, be destroyed.

HONG KONG.

The following notification had been issued on the 29th Nov. with regard to postage stamps:—

1. It is hereby notified that colonial postage stamps will be issued from the Treasury and General Post-office of this colony on and after the 8th December next.

2. These stamps represent the following amounts in value:—

Two cents	or One-penny.
Eight cents	Fourpence.
Twelve cents	Sixpence.
Eighteen cents	Ninepence.
Twenty-four cents	One shilling.
Forty-eight cents	Two shillings.
Ninety-six cents	Four shillings.

3. They will be issued in exchange for the current dollars of the colony.

4. It must be understood that the postage labels of this colony are alone available for the payment of postage on correspondence posted at the General Post-office in Hong Kong, or the agencies thereof at Whampoa, Canton, Macao, Swatow, Amoy, Foo-chow-Foo, Shanghai, Ningpo, Nagasaki, and Yedo; and that, except in the case of correspondence sent by officers and seamen serving on board Her Majesty's ships, British or Imperial postage stamps are not available for the payment of letters, &c., addressed to the United Kingdom.

5. Their use will for the present be optional.

6. They may be used on correspondence to places to which the prepayment of postage is either compulsory or optional; *i.e.*, no credit will be given to these stamps on correspondence addressed to places to which the postage cannot be prepaid in Hong Kong.

7. Correspondence insufficiently stamped will be returned to the writers with an indication of the amount insufficient,—except in the case of letters, &c., originating at any of the agencies of the Hong Kong Post-office, which will, if addressed to the United Kingdom, be sent on charged with the deficient amount of postage and a fine of 1s.

8. The labels are to be placed on the upper right hand corner of the correspondence,—except in cases where they may be used in payment of "late fees," when the stamp representing the late fee is to be placed on the lower left hand corner of the correspondence.

By Order,
W. H. ALEXANDER.
Acting Colonial Secretary.

Another notification is as follows:—"His Excellency the Acting-Governor has been pleased to recognise E. Francis Parker, Esq., as Acting Vice-Consul for Russia at this port, during the absence of John Heard, Esq., in Europe, and subject to the pleasure of Her Majesty's Government.

"W. H. ALEXANDER,
Acting Colonial Secretary."

The Hong Kong police have been actively engaged in the detection of gambling-houses; several convictions had been obtained against those engaged in the unlawful pursuits carried on in those places of resort.

His Imperial Majesty's ship *Semiramis*, with the flag of Rear-Admiral Juarès, was to leave Hong Kong for Shanghai on the 15th December.

Digitized by Google

CANTON.

Nothing of importance has occurred. The military examinations are just concluded, having been witnessed by a large concourse of people. No rudeness was shown to the few foreigners who joined in witnessing the spectacle; this is a change for the better.

The notorious Cheng-shun, the kidnapper of Mr. Couper, of Whampoa, and the perpetrator of other atrocities, has been decapitated at Canton by orders from Peking.

JAVA.

On the 9th Dec. the steamer *Palembang* arrived at Batavia, from Muntok, bringing part of the passengers and crew of the Dutch ship *Calypso*, Capt. Poolman, which was wrecked on the 27th November, on a reef near Pulo Liat, in Gasper Strait. Part of the cargo had been landed on Billiton, where the captain and three of the crew remained. The chief mate, four seamen, and passengers for Holland remained at Lepar, having reached too late to be brought by the *Palembang*. Amongst the passengers were the fifteen Japanese who are proceeding to Holland to receive instruction in arts, sciences, and manufactures. Nine of them are officers and six mechanics.

A commission of engineers had been appointed by the Governor-General to report on the best means of improving the depth of the large river at Batavia, great complaints being at present made of the obstacles offered to the landing and shipping of goods owing to its shallowness.

In Banjermassing means are still being used to restore order throughout the country, and a large expedition, consisting of three steamers with boats in tow, and 300 soldiers, was about to ascend the Montallet river, and operate in the interior. Numbers of persons who had been engaged in the rebellion were from time to time coming in and making their submission; but Antasari (whose death from small-pox was erroneously reported), Demang Lehman, and other leaders still hold out.

An English resident at Batavia writes as follows to the editor of the *Straits Times*:—

"DEAR SIR,—I don't know whether it may serve much good for Englishmen to complain of the customs of this place. I am inclined to think that any remonstrance made by us will be termed unreasonable, and that we are expected, if we wish to continue our residence here, to accept the laws as they exist without murmur and without comment. I must, however, risk being considered ungrateful to the patriarchal Government of the Dutch, and speak out my disapproval of at least one of the institutions here. I make use of your columns, as my object is to address Englishmen as well as Dutchmen; besides, it is just possible that my remarks might be unpalatable to the journals of this place, and be refused insertion. About twelve years ago, a gentleman here died, and his affairs were administered by his son in law. As is customary by law, all persons having claims upon the deceased were to send them in, and have them settled within three months, that the estate might be wound up under the supervision of the Orphan Chamber. In due course the estate was wound up, and the son-in-law, about eleven years ago, came into peaceful possession of the remaining property as residuary legatee. During the time that has since elapsed, nothing whatever had occurred to disturb that possession; indeed, the legacy and the circumstances had entirely passed into oblivion. Two months ago, however, to the astonishment of the son-in-law, a demand is made upon him to refund a sum of money, for which his father-in-law had twenty years previous become security, on behalf of a trader. Having refused compliance with the demand, immediate proceedings were taken; and, on consulting counsel on the subject, the son-in-law was advised to pay—as it was stated according to law, obligations of this kind remain in force for thirty years. Now the injustice of such a law as this must be apparent to all Englishmen, if not to Dutchmen. According to it no man can for a moment calculate what his financial position may be, as twenty such obligations as this may be hanging over his head, and he in total ignorance of them. Surely, when all claims were called up by advertisement in the official *Gazette*, some notification of this conditional liability should have been made. One circumstance that, to my thinking, renders the case I have related still more aggravating is, that the obligation or security was held by the president of the Weiskamer, or Orphan Chamber, who had every opportunity to notify the existence of the obligation before the estate passed out of the hands of the Chamber. As I stated at starting, my object is not to effect any reform in the law here; I wish to show to my fellow-countrymen—who not unfrequently make comparisons between the Government of Java and that of our own Eastern possessions, which are entirely in favour of the former—that laws and customs are imposed and tolerated here, which in any British colony could not exist for a moment. Let Englishmen reflect well before they seek to hold forth Java as a mode of good government.—Yours faithfully,

"AN ENGLISHMAN."

The *Batavia Handelsblad* of the 6th Dec. contains the following relative to M. Troplong, recently appointed Consul for France at Singapore:—

"We learn from Padang that M. H. du Chesne, Acting Consul for France at that place, has been appointed Chancellor of the French Embassy at Peking, but that M. Troplong, formerly consul at Padang, will not return there, having been definitively named as Consul at Singapore. A gentleman attached to the Consulate at Naples will fill the office at Padang.

"The departure of the Troplong family is, we are informed, much regretted at Padang, especially by the naval officers on the station there who always met a warm reception from M. Troplong, who himself formerly belonged to the navy. But now that M. Troplong has gone, it would have been preferable had the French Government appointed some merchant, resident at Padang, as Consul, as is the case with all the other powers that have consuls in the Netherlands colonies.

"The French Consuls certainly find themselves in an isolated position in our colonies. They belong to a regular service, having thus an official rank, and must therefore be desirous, in their intercourse with the authorities, to be considered and treated on this footing. But according to the treaties existing with France and other powers, foreign consuls in these colonies can only be viewed as permitted, for the promotion of the interests of the trade of their nations, and not in an official quality. It is thus unimportant whether they enjoy in their own country the rank of general, higher or lower; here they have, however designated, according to the letter of treaties, no higher rank or quality than the Dutch merchants who are appointed Consuls for foreign powers.

"M. Troplong, it is true, was able by his tact to avoid all disagreeable collision, and his departure is therefore regretted, with whatever pleasure his promotion has been learned. But when a Consul comes here (Padang) who is accustomed to the manner in which Consuls, invested with an official rank, are treated in other countries, then it is feared that there may occur difficulties on the points of etiquette, &c., in which the Netherland Indian officials, bound by the treaty, naturally cannot give way.

"It is considered very desirable that the French Government should withdraw the Consulate established at Padang for the whole of Sumatra—place the consulates in Sumatra under the Consul-General at Batavia, and that to these, merchants should be appointed as Vice-Consuls, as at Samarang and Sourabaya. It is thought that this arrangement would have a more favourable effect upon the expansion of trade with France, because a merchant vice-consul is more likely through his direct efforts to open up new commercial relations with foreign countries, than a consul limited to official representations."

MALACCA STRAITS.

SINGAPORE.

Our correspondent writes on the 20th December:—"I have very little news to communicate. The introduction of the Stamp Act was postponed by his Honour the Governor from the 10th inst. to the 1st proximo, on a representation made by the Chamber of Commerce that sufficient time was not allowed to enable us to provide ourselves with stamps.

"We observe with pleasure that the transfer question has again been brought on the *tapis*. The immense increase to our revenue that must follow the imposition of the new tax removes the only obstacle, we believe, in the way of the Imperial Treasury, and it is the only consideration that reconciles us to the burden.

"The election for municipal commissioners for the ensuing year has taken place, and three popular gentlemen have been returned. Dr. Little and Messrs. M. F. Davidson and H. M. Simons were the fortunate individuals.

"From Siam we learn that the king has despatched the steamer *Alligator* to Tringanu for the ex Sultan of Lingal. It is a pity that his Highness did not do so before, as we learn now that ample time was afforded him to avert the awful lesson inflicted on Tringanu, he is therefore much to blame for the delay. We have every reason to believe that Colonel Cavanagh took every precaution to prevent hostilities before he ordered the bombardment of the place. As I said before, however, the truth cannot be known until the Blue Book is published.

"In the way of amusements, we have had a splendid performance of the Savage Club. "Plot and Passion," and the burlesque of "Fra Diavolo," were most ably represented, and afforded us great pleasure. I understand that the Club intend performing in future at the Theatre Royal instead of confining their displays to a private residence. The Christmas performance of the Corps Dramatique is to come off on the 23rd.

"We have also had a Circus here, which was crowded during its stay, as such sights are uncommon in Singapore, and the natives take as much interest in such exhibitions as Europeans.

"The wreck of the *Colombo* caused us some anxiety, but we were glad to learn that the passengers and most of the mails were forwarded so soon after the accident. The mails leaving England on the 4th of December should not be delayed at all.

"The Java papers are waxing warm on the movement in the Straits against Dutch aggression, and declare that we have no right to interfere with Sumatra. Our statesmen have enunciated different views successfully on several occasions, and they are not likely to permit injury to British interests at this juncture without a remonstrance. We are anxiously looking out for the action of our Government on the arrival of the news at home.

"The French mail steamer has not arrived yet, which has disappointed us, as we were in great hopes that it would at least be punctual."

CEYLON.

The Legislative Council was closed on the 29th December The following address was delivered on the occasion by the Governor :—

"Gentlemen of the Legislative Council,

"I have now to relieve you from the labours of another Session, during which the Colony has been indebted to you for various measures of a useful and practical character.

"In proposing them to you, I have been guided by the one desire of meeting, as far as legislation can meet, the felt and proved wants of all classes of the community, and providing to the best of my power for the protection and improvement of the divers interests of all. And I have to thank you for the cordial and ready co-operation with which you have helped me to attain the same end, generally by the same means.

"The sanitary, social, and financial position of the Island offers me a subject of hearty congratulation to you, and of grave thankfulness to the Providence under which the elements of its prosperity have been so steadily and progressively developed. And the important resolution to which you have lately come of accepting a tender for the construction of a railway which presents every apparant guarantee for the speedy accomplishment of that great work, will, I trust, develope them still further."

"Gentlemen of the Legislative Council,

"I thank you in the name of our Gracious Queen for the liberal sums which you have voted for Her Majesty's Service in the Colony during the same year. As usual, I have proposed to you the appropriation of nearly the whole available balance of Revenue, after deducting the sum agreed to be reserved as a fund towards railway liabilities, for the construction and maintenance of useful public works. My best attention shall be turned to the judicious and effective outlay of the sums so appropriated, and my utmost exertions have been, and will be, made to keep up that supply of labour on which public and private interests are so dependent.

"May the result of our united efforts be still to promote the common weal of all classes of Her Majesty's subjects in Ceylon, attached as I know them to be to her gentle and beneficent rule, and conspicuous for their tried loyalty to her Crown.

"C. J. MACCARTHY."

At Kandy a meeting had been held with reference to the Ward Memorial. The following resolutions were agreed to :—

"I. That Messrs. Darley and Gavin, and a third gentleman to be named by Lady Ward, be requested to accept full powers to act as a committee in England.

"II. That the proposed statue be sent out with pedestal, railings, &c., complete.

"III. That the inscriptions for the pedestal be decided on by the committee.

"IV. That the attitude and dress be referred to the committee in England, with the understanding that the first object shall be to call to mind our late Governor as he was.

"V. That a circulaar, embodying the resolutions now passed, be sent to each of the subscribers, and published in the newspapers, with a request that suggestions for the guidance of the committee, in the points left for their discretion, be forwarded to the secretary without delay.

"6. That a letter of thanks be sent to Mr. Darley, enclosing copies of the resolutions now passed, and of any letters containing suggestions for the guidance of the committee."

The accompanying Inscription has been proposed for the face of the pedestal :—

"Sir Henry George Ward, G.C.M.G., Governor of Ceylon, from May, 1855, to June, 1860."

"In semi-civilized countries. it is with material improvement that all other improvements begin."

"My conscience tells me that, to the best of my judgment and abilities I have tried to do my duty by you, and it is my hope that you will think of me, hereafter, as a man whose whole heart has been in his work."—June, 1860.

From Jaffna we learn that cholera has again broken out in the surrounding districts, and that small-pox prevails.

Considerable excitement prevails among the people of Jaffna, in consequence of a report gaining ground that a police force is shortly to be established there. A public meeting had accordingly been held in the house of S. Ascerwatha Modliar, Esq., at which resolntions were proposed and passed to the effect, that a police force is altogether unnecessary for the town of Jaffna. A memorial was therefore sent to the Governor and the Executive Council, praying "to save them from the burden of a police establishment and its attendant evils."

It is rumoured that another newspaper, called the *Ceylon Patriot*, is shortly to be issued in Jaffna.

The following address to Her Majesty, from the Legislative Council of Ceylon, is published in the *Colombo Observer* of December 30 :—

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

The Humble Address of the Legislative Council of Ceylon,

Showeth,—That this Council have learnt with great apprehension that a suggestion has been made for transferring this colony to the Government of India; and being convinced that the change would be productive of much evil, they beg most respectfully to lay the following reasons before Your Majesty against the proposed measure. There is no point of community between Ceylon and India, beyond what may be supposed to arise from their mere geographical proximity. The inhabitants of the two countries differ in race, in language, and in feeling. Their laws and usages are different. The constitution of this colony, as established by royal charter, has secured to it higher privileges and more material benefits than are enjoyed under the Indian government. The political and administrative institutions of Ceylon, the judicial establishments throughout the island, the local agencies of government and generally all its fiscal arrangements, are better adapted to the circumstances of the colony, and to the wants and feelings of the people than those of India would be. They have existed for more than half a century unaltered, save in their improvement and extension, and are well understood and appreciated. Any change, therefore, by which they might be circumscribed or altered in character, would impede the progress of the colony, and seriously disturb the peace and prosperity which have hitherto prevailed. The people of Ceylon are well satisfied with the existing form of government, which has secured to them a fair representation of their various interests, and which it is hoped would not be altered, except with a view to the further development of its representative character. Since the cession of the maritime provinces in 1796, and within less than half a century after the conquest of the Kandian territories, the marked progress which the colony has made in material prosperity, and the peace and good order which contrasts so strongly with its previous troubled state, can be attributed only to the wise and liberal measures of your Majesty's Government, zealously carried out by local authorities, who have well comprehended the wants of its inhabitants and have supplied them by prompt and judicious measures. Under the fostering influences of good laws, and the encouraging aid of a local administration, enterprise has been stimulated and a vast commerce established, by which Ceylon has been raised to the rank of one of your Majesty's most important colonies. This council would respectfully suggest that no sufficient reasons have been urged for so important a change, nor would that change offer any compensation for the many advantages which are secured to this island under its present form of government; and they would submit that it would hardly be just towards a loyal and prosperous colony, possessing a constitution which has been tried and found suitable to its wants, to amalgamate it with a country whose constitution has but recently undergone a radical change, forced upon it by the admitted defects of its previous administration. This council therefore pray that your Majesty will be graciously pleased to refuse your sanction to the proposed annexation.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

EMMERSON—On the 9th Dec., at Beach-road, Singapore, the wife of Mr. C. Emmerson Veterinary Surgeon, of a daughter.

MARTIN—On the 17th Nov., at Foo-chow, the wife of the Rev. C. Roscoe Martin, of the American Methodist Episcopal Mission, of a son.

SOUZA—On the 12th Dec., the wife of Mr. Benjamin T. de Souza, of a daughter.

MARRIAGES.

CANROBERT—MACDONALD.—On the 20th inst., at the Chapel of the British Embassy, in Paris, by the Rev. J. H. Swale, and afterwards at the Chapel of the Senate, in the Palace of the Luxembourg, Francois Marcellin Certain de Canrobert, Marshal of France, Senator of the Empire, Knight Grand Cross of the Legion of Honour, Knight Grand Cross of the Bath, Chevalier of the Supreme Order of the Annonciada, &c., to Leila Flora, only daughter of the late Allen Ronald Macdonald, Captain in H.M.'s Indian Army.

DEATHS.

AUSTIN—On the 30th Nov., at East Point, Hong Kong, C. W. Austin, of the Firm of Jardine, Matheson and Co.

BING—On the 17th Dec., at Barganny Cottage, Johanna Catharine, wife of Captain A Bing.

CLAFFERY On the 3rd Dec., at Hong Kong, on board H.M.S. *Hercules*, Patrick Claffery, Private. 67th Regiment, aged 29 years.

COOPER—On the 20th Nov., at Hong Kong, on board H.M.S. *Hercules*, Joseph Cooper, Private, 31st Regiment, aged 22 years.

CROKER—On the 4th Dec., at the General Hospital, Hong Kong, John Croker Colour Sergeant, 99th Regiment, aged 38 years.

FLYNN—On the 26th Nov., at the General Hospital, Hong Hong. James Flynn, Private, H.M. 67th Regiment, aged 29 years.

GARNER—On the 16th inst., at Nice, in the 69th year of her age, Dora Louisa Taylor, widow of Capt. F. W. U. Gladwin, and subsequently of Col. James Garner, both of the Hon. the East India Company's Service.

MASON—On the 2nd Dec., at the Civil Hospital, Hong Kong, P. C. R. S. Mason.

MAY—On the 14th Dec., at Singapore, Samuel T. May, Chronometer Maker, aged 28 years.

MYLREH—On the 10th Dec., at Hong Kong, on board H.M.S. *Melville*, Thomas Mylreh, seaman.

O'BRIEN—At Hong Kong, on board H.M.S. *Hercules*, Hugh O'Brien, 31st Regiment, aged 29 years.

PATERSON.—On the 25th Nov, at Singapore, Alice Graham, infant daughter of William Paterson, Esq., aged 10 months.

PICKWOAD.—On the 16th Nov., at Shanghai, from typhoid fever, Alfred Patrick Leith Maxwell, youngest son of the late Robert William Pickwoad, Esq., Chief Justice in the Island of St. Christopher.

SKUES—On the 2nd Dec., at the Seaman's Hospital, Hong Kong, Joseph Skues, late Master of the brig *James Marshall*.

COMMERCIAL REPORT.

CHINA—EXPORTS.

CANTON.—The Market has been very quiet during the fortnight. The purchases of Congous have been trifling, at rather easier rates than those previously ruling. The teamen continue firm, notwithstanding the disinclination of buyers to come forward. The arrivals from up-country have been five chops Congou. Of country Greens the receipts from the interior have amounted to 1,800 packages. The transactions generally have

Digitized by Google

been too insignificant to indicate a true market. The settlements of the fortnight are reported as under:—Congous: 8 chops Houchows, at 22½ to 24 taels; 1 chop Chong-sow-kyes, at 27½ taels; and 1 chop Woo-pack, at 35½ taels; Canton packed, 700 half-chests, at 17 to 20 taels; and 480 half-chests Taysham, at 17½ to 18½ taels. Scented Teas: 1,500 boxes Orange Pekoe at 26 to 36 taels. Caper, no sales reported. Canton Greens: 300 boxes Gunpowder, good, at 22 taels. 400 boxes Imperial, mid. at 18½ taels. 200 half-chests Hyson Skin at 14 taels. The total settlements of country Congous for the season amount to 171 chops, besides 6 chops under contract. The stock for sale on the market stands thus:—Congous, 95 chops. Canton packed do., 5,000 half-chests. Tayshaun do., 2,000 half-chests. Scented Orange Pekoe, 10,000 boxes. Scented Caper, 20,000 boxes. Country Greens, 1,900 half-chests old; and 4,000 do. new. Canton Greens, uncertain. Flowery Pekoe, 150 chests. Oolong, 4,000 half-chests. Plain Orange Pekoe, 1,000 half-chests.

MACAO.—Black Tyshan Congou, sales 6,000 packages at taels 14.5 to 16.5, comprising settlements for shipment under advance 2,000 packages, sales delivered at Hong Kong 2,000 and the balance delivered on the spot. Stock remaining in course of preparation 4,000 packages. Some 1,500 packages contract Teas have also been delivered, price reported taels 19 5.

SHANGHAI.—Black Since last report transactions have been very limited, and only 6 chops have been settled at a decline of about one tael on previous rates. The news brought by last mail of the dull demand for the arrivals of the new crop Kaisows has had a very depressing effect on this market, and although stocks are small holders would submit to a further reduction. Quotations, Hohows, 22 to 24 tls; Oonhams, 23 to 27 tls, 2nd and 3rd crop; Oopacks, 27 to 28 tls., 3rd crop. The receipts from Hankow are small, the advanced rates of freight having tended to check them. The transactions of the fortnight are reported at 3,000 chests on the market and reshipments on owner's account 5,500 do.—together 8,500 chests; making a total of the season to date of 237,500 chests, against 133,700 do. corresponding period last season. Stock 7,000 ch. Congou and 1,500 ditto Flowery Pekoe. Greens: We still continue a steady demand, and country teas have further advanced; the stock of fine tea is nearly exhausted, and the bulk on offer is composed of very common descriptions. A few chops of Pingsuey have been settled at full rates. Japans and Hoochows remain unaltered. Quotations, Japans, tls. 19 to 25; Hoochows, tls. 27 to 33; Fychows, tls. 31 to 35; Moyunes, tls. 37 to 40; Pingsueys, tls. 36 to 40. Settlements during the fortnight 20,000 half-chests China; 750 half-chests Japan; making a total to date of 134,840 half-chests, and 15,195 half-chests respectively, against 91,305 half-chests and 17,194 half chests same time last year. Stock 15,000 packages.

FOO-CHOW-FOO.—The market has been very quiet during the fortnight, and the settlements of Congou have been small. The range of rates has receded from one to two taels, and, in some instances, needy holders have submitted to a greater reduction even than this. The settlements of the fortnight are reported as under. Congou—5,100 chests and 5,100 half-chests at 15 to 15½ taels for ord. and brkn. lf.; 15 to 17 taels for good com. to flory.; 17½ to 20 taels for good flory.; 18 to 23 taels for Souchong kinds. Souchong—374 chests at 20½ to 36 taels for fair to good. Flowery Pekoe—158 chests at 32 taels for good. Oolong—9,300 half chests at 17 to 20½ taels for fair to good cargo. Scented Teas—no sales. The stock for sale upon the market is thus estimated: Congou—105,900 ch. (say 40,000 ord., 55,000 good com. to 2d. better, and 10,900 good flory. to Kysows). Souchong—1,100 ch. Flowery Pekoe, 1,000 ch. Oolong—47,700 hf. ch. Scented Teas—11,000 boxes. The total supplies of the season to date amount to 551,200 chests, against 470,300 do. at corresponding period of last season.

AMOY.—Since the date of the last circular we have to advise the departure of the American ship St. Paul for New York, on the 6th inst. Previous to the despatch of this vessel settlements continued on an extended scale, but since the completion of her cargo they have entirely fallen off. Congou.—There is no change to notice in this kind; no settlements are reported, the teamen still persisting in their previous demands. Stock, 3,200 half chests. Oolong.—These have been settled to some extent for the American market, but at irregular prices. In some instances rather easier rates were acceded to, but no decline in prices has been established. The arrivals of these kinds have materially fallen off during the past week or two. Settlements 3,500 half-chests at $18 to $21, mixed kinds. Stock 25,000 half-chests. Ankoi.—Settlements of this description have taken place in but limited quotations at prices on a par with previous quotations, say 630 half-chests at $12.26 to $16.50. Stock, 8,500 half-chests, chiefly consisting of the lowest qualities. Orange Pekoes are quite neglected, and no transactions have been reported. Stock, 1,800 half-chests. Caper: No settlements reported. Stock, 10,300 boxes. Green: Japan Teas prepared on foreign account. 1,000 packages and another 1,000 sold on the market at 15.5 to 17 taels.

HANKOW.—During the past fortnight 14 chops of Congous have been settled at prices varying from 17½ to 23½ taels. Four chops of Congou have been shipped on China account to Shanghai. The total settlements of the season approach 380 chops, exclusive of contract Teas. The stock on offer is 20 chops, all of which are inferior.

YOKUHAMA.—Business in this staple has been very small, owing to the continued high rates demanded, settlements for the week only amounting to 150 piculs.

RAW SILK.—SHANGHAI.—Early in the fortnight there was less inquiry, and the dealers were induced to submit to rather easier prices, at which a few purchases were made. The subsequent arrival of the 10th October mail announcing a slight improvement in the European markets, as well as the belief in a short supply, now becoming more apparent, by the further reduction of the stock, caused an active market, and prices quickly recovered the decline, and in some cases an advance on last mail's quotations has been paid. The Chinese still continue firm believers in a short crop, and several parcels have been withdrawn from the market, whilst purchases to some extent have also been made by the dealers both for shipment to Europe and to hold for an advance on this side. The supply from the interior has been very limited, and from Japan only some 37 bales have been received, but a considerable arrival is daily expected, and the crop there will be large. The transactions of the fortnight are reported at 3,000 bales, against 4,000 bales during the corresponding fortnight of last season. The total settlements of the present season to date are 48,300 bales, against 41,600 bales during the corresponding period of last season and 55,000 bales the season before. The comparative unsold stock stands thus, 7,000 bales now, 20,000 bales last season, and 8,000 bales the season before. The following are the latest quotations:—Filatees: Nos. 1, 470 to 480 taels per picul; 2, 450 to 460; 3, 425 to 435; market, Nos. 3, 410 to 420; 4, 390 to 405; 5, and com., 370 to 385; Taysaams, No. 1, 375 to 385; 2, 350 to 360; 3, 320 to 335; 4, 5, and common, 285 to 315: Yuenfa, No. 1, 415 to 430; 2, 380 to 410; 3, 355 to 375: 4 and common, 340 to 350; Hainings, 350 to 420; Hangchow Tsatlees, 335 to 385; do. Taysaams, none; Hong Tsatlees, none; Sewings, fair to good, 310 to 330; middling to inferior, 270 to 300; Laeyongs, 260 to 290; Throwns, 315 to 420.

CANTON.—The article is scarce and wanted. There have been no transactions, and quotations are nominally as last given.

MACAO.—Cumchook from the 6th crop, stock amounts to 50 piculs held at $390 for the inferior kind; no sales.

YOKUHAMA.—There is no feature of importance to notice during the week. The article has come forward very freely and met with ready purchasers at our last quotations. Settlements are estimated 500 bales and unsold stock at 300 bales.

DRUGS, &c.—Cassia Lignea: Sales, 1,000 piculs, at $15.50 to $15.75. Stock, 2,500 piculs, for which easier rates will be accepted. Cassia Buds: Only 6 piculs arrived, and were taken at once at $45. Cassia Oil: Sales, 40 piculs, at $210; stock, 30 piculs. Anniseed Oil: No sales; stock, 100 piculs, held at $165 to $170. Star Aniseed: No sales; a few piculs offering at $27. Galangal Root: No sales; stock, 700 piculs, nominally $3.20. China Root: No sale; nominally $3.10; small stock. Gall Nuts: Sales, 37 piculs, at $10.50; no stock. Ginger Preserves: Best, $2 70. Vermillion, $34.

The Canton market is thus reported on. Cassia Lignea, $16.50 to $16.75. No sales; stock 1,000 piculs. Cassia Oil, $210, neither sales nor stock. Cassia Buds, stock 15 pls., no sales, $50 asked. Star Anniseed is worth $22.50 to $25, but there is none to be had. Rhubarb, 50 piculs are on the market, for which $50 to $55 are asked. Gamboge, $30 to $40, scarce. China Root, $3.50 to $3.75, no sales, stock 500 piculs. Galangal Root. $3.75 to $4, no sales, stock 400 piculs. Galls, $12.50 per picul, stock 100 piculs. Vermillion, $37.50 to $38, no stock, no sales. Camphor.—Hong Kong—$34 per picul packed. Sales 150 piculs. 1,300 piculs expected.

COTTON.—CANTON.—The market continues rather languid. Sales during the fortnight have been 715 bales Bombay and 1,050 ditto Shanghai. The imports since last report amount to only 1,150 bales Shanghai, and yet the tendency of rates seems downward. The following are the market quotations:—Bombay, new, 14t. 9m. to 16t. 2m.; old, 14t. to 15t. 6m.; Madras, 14t. 9m. to 16t. 2m.; Bengal, 14t. 4m. to 15t. 8m.: Shanghai, 14t. to 14t. 4m. The stock in the packhouses is thus estimated:—Bombay, 2,720 bales; Madras, 290 ditto; Bengal, 285 ditto; Shanghai, 2,160 ditto. HONG KONG.—The sales to foreigners for shipment are reported at 600 bales Bengals at $20¼ to $21, and 2,000 ditto Shanghai $18.75 to $19.25 per picul.

SHANGHAI.—The settlements continue large, being reported for the fortnight at 50,000 bales, 20,000 of which are for shipment to England, and the remainder to the Southern China ports. Rates are a little easier than last reported, the quotations being 11 t. 5 m. to 11 t. 8 m. for common, up to 12t. to 12t. 5m. for mid to good. Small shipments are being prepared for New York, whither it is reasonably expected considerable quantities will be sent. Screwing is being practised to some extent upon rather primitive principles. The quantity compressed does not yet, however, meet the demand, although it probably will should the present state of affairs continue for another year. The opinion is gaining ground that the article can be obtained *ad libitum*. At present, at all events, the supply is equal to the demand. The advance in freights will tend to check shipments, and the practice of wetting it to make it weigh will naturally be prejudicial to the trade in the article. Ningpo: The article had been arriving freely from the country, and met with ready purchasers at $18.50 per bale of 118 catties. The *Meacius* had been taken up to load for Liverpool with the article.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—The only sale reported to have taken place in Hong Kong during the fortnight is one of 32 bales; in Canton there has been nothing doing; while at Amoy the nominal quotations are $60 to $62 for Nos. 16 to 24, but importers have withdrawn their stocks for the time.

GREY SHIRTINGS.—These goods have remained without any inquiry, both at this port and Canton, and there are not any sales reported in the Amoy market.

WHITE SHIRTINGS.—1,000 pieces have changed hands in Hong Kong at $2.65. In Canton nothing doing.

T-CLOTHS.—The annexed quotations must be regarded as quite nominal in the absence of any transaction.

AMERICAN GOODS.—A sale of 1,500 pieces 40 yards American drills has been effected at this port at the annexed quotation.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES WHITE, AND COLOURED.—With the exception of 250 pieces of brocades sold in Canton, these fabrics have been without inquiry; and although the quotations given are similar to those stated in the last report, sales could not be readily effected, except at a reduction in rates. Chintzes and handkerchiefs remain uninquired for.

RAW COTTON.—In Hong Kong the sales effected during the fortnight are put at 3,900 bales of Shanghai staple, principally intended for reshipment to England. In Canton 550 bales of Bombay and 1,050 of Shanghai Cotton have been sold—the former, it is reported, go forward to America. At Amoy fair arrivals of Shanghai growth have taken place, and the sales effected there on native account have prevented any advance

Digitized by Google

in prices. The only sale reported on foreign account is one of 429 bales at $19.10.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths.—The sales of Spanish stripes in Hong Kong are placed at 504 pieces assorted, at prices ranging from $0.77 to $1.03 per yard; and 125 pieces of habit cloths, at $1.65. In Canton there have not been any transactions, nor are any settlements reported from Amoy.

LONG ELLS.—500 pieces of long ells have changed hands in this market during the fortnight. At Canton the sales are put at 180 pieces.

CAMLETS have been in fair request, and 1,170 pieces have found buyers in Hong Kong during the fortnight. In Canton nothing has been done.

LASTINGS remain as previously quoted, with sales of 536 pieces effected in Hong Kong. In Canton no inquiry exists for these goods.

METALS.—Iron, Flat, &c.—There are no sales to report from Hong Kong; but at Canton a fair demand for nail rod exists, and the quantity which has changed hands is put at 1,700 piculs. About 250 piculs of wire have also found buyers at the latter port.

LEAD has been purchased in Hong Kong to the extent of 470 piculs, and prices remain much as formerly quoted. In Canton the sales of the fortnight are put at 1,200 piculs, and rates show a slight advance on those previously ruling. At Amoy the quotation is $9 to $9.50; at the latter price about 70 piculs had changed hands in barter.

TIN.—1,000 slabs reported to have changed hands in this market. In Canton nothing doing. At Amoy the quotations given are $35 to $36, 50 slabs having been sold at the latter figure.

TIN PLATES.—A sale of 100 boxes are reported in Hong Kong.

STEEL.—200 tubs sold here.

EXCHANGES IN LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 1½d. to 6s. 2d.	6s. 2d. to 6s. 3d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SINGAPORE.—From England: Nov. 23, E. Thornton, from London; Dec. 6, Nile, from Liverpool; 8, Spanker, from Glasgow; 8, Edward and Jube, from Glasgow; 11, Frederick, from Hamburg; 19, Frederica, from Liverpool.

At BATAVIA.—From England: Nov. 12, Clara, from London; 16, Scheveningen, from Newcastle; 24, Maria Elizabeth, from London; Dec. 7, Willie, from London: 10, Humboldt, from Newcastle.

At SHANGHAI.—Nov. 24, Martaban; 27, Volunteer and Foam; 28th, Fairlie, from London; 30th, Pudsey Dawson, from Liverpool; Dec. 1, Dannebrog, from Cardiff; Friar Tuck, from Liverpool; 5th, Appeline, from Cardiff.

At HONG KONG.—Dec. 2, steamer Elgin, from Liverpool; 6th, King Lear, from Cardiff; 14, Anglo-danian, from Sunderland.

SAILED.

From BATAVIA.—Nov. 15, L'Oriental, to Liverpool; 16, Anna, to Holland; 13, Prinses Amelia, to Holland; 14, Walcheren, to Holland; 18, Jacobus Martinus, to Holland; 21, Susannah Elizabeth, to Holland; 23, La Bretagne, to France; 27, Peking, to Holland; 29, Alphonse le Cezard, to France; 30, Balie, to Holland; Dec. 4, Batavier, to Holland; 7, Scumbing, to Holland.

From SINGAPORE.—Nov. 25, H.M.S. Vulcan, to England; 27, Forerunner, to London; 27, Lincluden, to Liverpool; Dec. 6, John Paul, to Liverpool; Bride, for London; 13, Rewely, for London.

From SHANGHAI.—Nov. 28, Queen of Nations, for London; Dec. 1, Anglo-Saxon, for London; Havering, for Liverpool; 5, the Helenslee, for London.

From FOO-CHOW.—Dec. 9, Preston, for London.

From HONG KONG.—Dec. 14, Rowena, for London; 1, Isles of the South (from Macao), for London.

FREIGHTS AND CHARTERS.

HONG KONG.

Business in tonnage has materially increased during the past fortnight. The increased value of rice at the north has caused a demand for vessels to carry it, and consequently raised the price of charters hence to the rice ports. At present there are few unchartered vessels in this harbour, and those have refused the business offered. Some charters have been made from the rice ports to Europe at fair rates. At Foo-chow ships are filling up slowly for Great Britain at £3. Nominal rate to New York $12; little or no freight offering. At Amoy little doing for foreign ports, but small vessels for coast business are scarce and wanted. At Manila tonnage is plenty, and not wanted. At Shanghai rates still continue good for coast business, but the large fleet of ships keep down the rates. We quote as settlements:—Continent, Am. ship. 1,092 tons, hence to England, *via* Akyab, 4 per ton; Sourabaya, Dn. ship, 626 tons, hence to England, *via* Akyab, £4 per ton—if to the continent £4. 10s.; Wilhelm Ludwig, Ham. barque, 336 tons, to England or continent, *via* Akyab, £4 per ton; Lucy and Harriet, Ras. ship, 800 tons, Foo-chow to London, £3; Zingra, Br. ship, 500 tons, Foo-chow to Liverpool, £3; Storm King, Br. ship, 790 tons, hence to Liverpool, £3 for compressed cotton; Hotspur, Am. ship, 863 tons, on the berth, from Whampoa to New York, at $15 per ton; Imperial, Am. ship, 1,181 tons, hence to San Francisco, $14,000 in full; Ringleader, Am. ship, 800 tons, on the berth, from Foo-chow to New York, at $12 per ton.

SALES.—Viola, Br. steamer, 678 tons, 110-horse power, $85,000; Union, Br. steamer, 300 tons, private terms.

SHANGHAI.

Employment continuing abundant, and the North monsoon causing arrivals to fall off, the amount of shipping in harbour has sensibly decreased. The improvement in the market for rice, and the continued large export of cotton, combined with a fair coast trade, to furnish ample employment for vessels of all sizes, and prospects may be said to be encouraging. The following list of settlements will best indicate the nature of the business transacted:—For Liverpool, with cotton: Monsoon, Juandore, W. Fairburn, Gorilla, Express, and Zealandia, at £3 to £3. 5s. For London, the R. Henderson, and Napoleon III. have been laid on at current rates for tea and silk. For New York, the Oneida, Golden West, Mermaid, and Akmena are loading at current rates, but proceed very slowly. To London, tea £3, silk £8. 15s.; to Liverpool: tea and cotton, £3 to £3. 5s.; to New York: Tea $14, Silk $18; to Kanagawa: $5 per ton, 25 cents per picul; to Nagasaki, $4 per ton, 25 cents per picul; to Tientsin: 8 taels per ton—season over; Hankow: 8 taels per ton each way; to Foochow: $4 per ton, 15 cents per picul; to Amoy: Cotton, one dollar per bale; to Hong Kong: $1,10 per bale cotton, measurement $4 per ton.

HANKOW.

Steamers, taels 9 to 12 per ton.

NAGASAKI.

Improving to Shanghai, for silk $3.50 per ton. To Hong Kong, $5 per ton. To London, £2. 10s. nominal.

YOKUHAMA.

To Shanghai, for silk, $2½ to $3 per picul; measurement, $4½; to London, for silk, £4. 10s.; measurement, $5.10 per ton.

MANILA.

Continues abundant; we have no further charters to advise; the British ship Shand takes sugar and hemp for London or Liverpool; rate for the sugar has not transpired, for hemp £3. 10s. per ton. The French ship Anna Chatarine, which put back leaky, has completed her repairs, and will get away in about ten days. Last rates paid for United States $9 per ton of sugar, and $12 per 4 bales of hemp.

SINGAPORE.—There has been only a moderate supply of seeking tonnage placed on the market during the past fortnight, and rates of freight have undergone no change. For American vessels it is, however, very difficult to get any fair offers, as they are at present avoided. The Bride and Revely have sailed for London, leaving that berth empty. The Dora has been laid on for Liverpool and has greater part of her cargo engaged. She gets previous rates, say at £3 per ton for Gambier, Sago Flour and other dead weight, and £3. 10s. per ton for Pepper, Pearl Sago and similar light freight. At these rates the Spanker is loading for Glasgow and the Alchymist for London. The Eliza Thornton loads for London on owners' account. The Dannevirke (250 tons) has been chartered to load hence to Channel for orders, at £3. 15s. per ton for Hamburg, £4 per ton United Kingdom or Copenhagen, and £5 per ton if sent to the Mediterranean. The Odin (280 tons) loads for Gibraltar and a port in the Mediterranean at £2. 15s. per ton for Tin, and £4 per ton for Gambier, Pepper, &c. These two vessels take considerable supplies of Coffee. There has been a good demand for vessels to load at the rice ports, and £4 per ton, or even a trifle higher, would readily be given for neutral vessels to United Kingdom and Continent. American vessels, however, are only offered £3 per ton. The fol-

Digitized by Google

lowing are recent charters: - Dutch, Guertje and Marie (711 tons), to load at one port, at £4 per ton, open charter: Bremen, A. H. Wills (997 tons), £3. 15s; American. Anna Sise (1.000 tons), £3 10s.

BATAVIA.

Continued arrivals of seeking vessels have caused freights to decline still further. For vessels to load at the rice ports, however, there is some inquiry and several have been chartered.

CASUALTIES, HONG KONG.

The British brig Layard had arrived from Tamsui, and reports the loss of the American barque Lucky Star, Captain Nelson, on the 30th November, from Shanghai November 20. bound to Manilla; thick weather had prevailed from the date of leaving Shanghai, and no sights had been taken; all hands were saved, but, as usual, as soon as they reached the shore, they were all stripped naked. The chief officer and four men arrived in Tamsui before the Layard left, and the brig was detained twenty-four hours in order to bring the whole of the crew away should they arrive The Layard was in the bad weather experienced on the 5th and 6th of November, and lost her jibboom and foretopgallant mast. Has made the run here from Tamsui in forty-eight hours, pilot to pilot. The following vessels are some of those laying in Tamsui:—Bonito, Pathfinder, Roska, Emilie, Gemini, and gun boat Snap. The Snake (despatch vessel) had arrived and sailed from Tamsui the day before the Layard arrived. Yjate Liong sailed in comapny.

The American barque Lillie arrived here this morning in a sad plight, having been in collision with the American ship Aurora last Tuesday morning. The Lillie has been very unfortunate; she is from New York, bound to Shanghai, but falling in with the gale of 5th and 6th November, had to put into Hong Kong, in consequence of her cargo of coals having shifted. She left as soon as refitted, and had just been out a fortnight when the collision took place, rendering it necessary for her to come back again. The Lillie was on the starboard tack, close hauled, heading N. ½ W. at about 8 A.M. on Tuesday morning in lat. 22.00, long 121.50. The Aurora was observed when about five miles off, coming away before the wind. The latter vessel does not appear to have attempted to alter her course, and when she came so close to the Lillie that collision was inevitable, the latter vessel's helm was put hard up, which caused the blow to be lessened. The damage to the Lillie is, loss of bowsprit, jibboom, foretopsail and topgallant yard, head rails, and everything loosened forward. The Aurora is not yet in the harbour, but we hear that she has not sustained any damage—certainly has not lost any spars.

PASSED STRAITS OF SUNDA.

From England and Continent to China: Nov. 13, Van der Palm, from Newcastle to Shanghai; 19, Albuera, London to Shanghai; 20, Cathay, Cardiff to Shanghai; Dec. 3, Race Horse, Plymouth to Hong Kong. From China to England: Nov. 10, Garrawalt, Shanghai to London; 13, Queen of the Ocean, Foo-chow to London; Chalmers, Foo-chow to London; 13, Portland, Foo-chow to London; 16, Langdale, Foo-chow to London. From Singapore to England: Nov 8, Eleanor Dixon, for Liverpool; 19, Ascendant, for London; 28, Walvisch, for London; Dec. 5, Forerunner, for London.

THE BISHOP OF LABUAN AND THE BORNEO PIRATES.

We have given in another part of our paper a letter written by the Bishop of Durham, animadverting on the conduct of the Bishop of Labuan for taking a part in the fight with the pirates in the month of May last. We hope shortly to give the letter which the Archbishop of Canterbury has written on the subject. Meanwhile it may interest those of our readers who are not fully acquainted with all the circumstances of the case to read the following narrative, written in defence of Dr. Macdougal. It is condensed from a pamphlet signed "C. J. B.," which we received some time since from the office of the Society for the Propagation of the Gospel. After describing the combat, an account of which appeared in our columns when the news was first received in England, the writer goes on to say:—

"The Bishop has openly avowed the part that he took in this matter. He remained on deck and shared in the fight until the sinking of the first of the three pirate vessels gave a moral assurance of victory to his friends. He then betook himself to the care of the wounded. If the propriety of his conduct is to be questioned, it is to be remembered that when he embarked on board the *Rainbow*, it was without the remotest expectation of what afterwards happened—that he was in the line of duty, and his mission wholly a peaceful one - that once on board the ship he had no option but to return with her—that he could not have left her—and that, even had he been able to do so, he would not have been justified in leaving his friends when going into action, without that assistance which he, as an experienced surgeon, was alone of the party competent to give—that the conflict in the second engagement was between eight Europeans with fifteen natives, and three prahus, each carrying three long brass swivel cannon, called lelahs, and each containing between forty and fifty fighting men, well armed with rifles and muskets, and sixty or seventy captives—that the release and rescue of these captives from their oppressors was a sacred duty incumbent upon the crew of the ship in which the Bishop was a passenger,—that he had no choice but either to go below, and so diminish the chance of overcoming the common enemy, or join his fellow voyagers against them. When he chose the latter alternative, it must be left to the impartial judgment of all men whether he was justified in shedding blood by the most cogent plea which can justify it, that of self-defence. His letter to *The Times* is dated May 27th, while the engagement took place on the 23rd, and was written at the request of the Rajah Muda, and in his stead, in haste to save the mail. It describes a naval engagement in naval terms, and was intended to induce the Government of this country to make some effort to put down piracy on the coast of Borneo, and in that object may be considered to have been successful. Had more time been allowed him, he would, no doubt have been more guarded in his language; but, after the calmest consideration, he is satisfied that the course he took was the only one which was open to him."

On the 11th of September, in reply to a letter of a friend on the subject, he writes:—

"I had no choice. It became my stern, unmistakeable duty as a man, and a Christian, to do what I did. I believe that the Archbishop of Canterbury would have felt and done the same had he been in my place. I grieve indeed heartily at the necessity imposed upon me then, but I am sure that the good Lord, whose providence brought me into such a position, will not lay to my charge any blood that I may have shed. Sure I am, too, that those saved by me far outnumbered those I hurt—by curing the wounded, and by preventing others from firing at helpless men in the water, as well as by directing my attention, when I did use my rifle, solely to keeping down the fire of their brass guns, which was what we had to fear - for had they shaken us by their fire, and succeeded in their plan of boarding, not a soul of us would have lived to tell the tale."

And, again, in a letter of the 12th of September, addressed to the Bishop of London, and with an extract from which the compiler of this paper has been favoured, after regretting 'that he had incautiously given offence to tender and scrupulous minds by the part that he had to take in the pirate's action,' he writes:—

"I certainly should not have been the chronicler of the affair, but that my poor friend Brooke, who had lost his wife a few days before, was not in a state of body or mind to write it for himself, and I could hardly refuse to write it for him, which I did hastily to save the mail. It is a mistake for people to say that I was voluntarily there. I was not. I had no choice but to go in the steamer, which was on her way back to Sarawak, when I was thus brought into this position There was no help for it but to fight for my life, and to set as good an example as I could to others . . . for the slightest failure or wavering on our parts would have cost us all our lives without doubt. Indeed, so confident were the pirates of taking us, that they were actually quarrelling among themselves about the division of the spoil they expected to get from us. . . . My own conscience does not condemn me, though I have deeply grieved, and am sincerely sorry, that I was obliged to do as I did."

There can be but little fear that the example set by the Bishop should be too often followed, for the circumstances were so exceptional that it would seem almost impossible that they should be repeated. But should any other clergyman, whether a Bishop or Presbyter, find himself thus situated—compelled to fight for the lives of himself and his companions, as well as for the rescue of captives thus oppressed and ready to perish; should he thus play a manly part, and, when the fight is over, with unshaken hand and nerve devote himself for hours, with practised skill, to heal the wounded, friend and foe alike—he might well look for the admiration of his countrymen as well as for the approval of his own conscience. Should he further, while under the excitement of such an action, which men who live peaceful lives at home can hardly estimate, and writing at the request of those on whom the duty would in the first place fall, describe in terms somewhat more terse and racy than would be suggested to persons whose experience had been wholly clerical, the varied and stirring incidents of the fight, he might expect that even for this he should not be hardly judged by the rules of conventionalism, and might say, as has said the Bishop of Labuan—"People in England cannot judge for us in these cases, and we must be content to act according to our duty and our conscience, and leave the issue in God's hands."

DR. GORDON ON TIEN-TSIN.

The new literary journal "The Reader," has the following graphic piece of criticism on Dr. Gordon's work, "China from a Medical Point of View," lately reviewed in our columns:—

"The special value of the book is, that it is, for the most part, an exhaustive account of one spot in China, Tien-tsin, and the vast alluvial garden which surrounds it. And to have seen one place, and drawn it accurately and completely, is to have done far better work toward opening up our knowledge of China than if Dr. Gordon had done what the title proclaims him, most unfairly, to have done—added another work to the many general sketches of a country of which no one knows more than a few isolated points—all written, save Mr. Fortune's excellent book, on the principle of the man who knew all about George the Third, because the king had once spoken to him, and told him to get out of the way. Advice to get out of the way has been as yet the chief information which Europeans have obtained from the Chinese; and the peculiarity of Dr. Gordon's book is, that he has—one cannot say enjoyed, but—used, the rare opportunity of a residence of many months in one spot of that vast North-eastern province of China, utterly unknown to us till the successful expedition to Peking. Here he is at home, and here his drawing of facts is admirable. Without striving after smart writing or dashing generalizations, he is picturesque, and even poetical, from mere accuracy, as he draws the boundless brown winter flats, over which dust and frost exterminate, for several months, the faintest trace of vegetation; almost the only living animal being the flocks of sand-grouse whirring to and fro over the desert; the complete hybernation of the people; the curious stores of roots and fruit packed in subterranean ice-chambers; the actually

Digitized by Google

curious stores of flowering bulbs and plants, and dwarf trees, packed in subterranean hot-houses; the sudden return of spring, the fields swarming with labourers—poor enough indeed, from the extreme cheapness of labour, but for that very reason cultivating the ground with a minute care unknown in England,—and shaming the English agriculturist in one particular at least, that, however miserable, their misery has not yet tempted them to brutalise their wives and daughters by employing them in the drudgery of the farm. Dr. Gordon's account of the return of vegetation; of the sudden filling of the markets with flowers; of the strange succession of crops, at first suited to our own temperate climate, and then, as the summer heat comes rapidly on, of a class altogether tropical; and his observations on the geology and botany, and climate of the district—in fact, the three chapters, vi., vii., and viii. (the first of which is oddly entitled the 'topography,' instead of the 'agriculture,' of Tien-tsin) form the most instructive and satisfactory bit of fresh nature-painting which our travellers have sent us home for several years past. His remarks and statistics on hospitals, and on diseases in general—more especially on those incident to our troops—are, no doubt, as valuable to the medical man as his non-medical remarks are to the general reader."

THE TREATY WITH THE KING OF BURMAH.

The *Phœnix*, an Indian paper, of December 11, says:—"So many contradictory statements have recently appeared in the local journals of the result of Colonel Phayre's mission to Ava, that we have been sadly at a loss for grounds for a conclusion on the somewhat important question—Has or has not the King of Ava signed a treaty of commerce? Our contemporary, a few days back, published a telegram from Akyab, to the purport that Colonel Phayre was at that port, on his way up to Calcutta, with the coveted treaty in his pocket. A day or two later there appeared a Burmah letter in another journal, stating that the King had, instead of signing, told Colonel Phayre to go back and look at the moon, and remember Ava when that luminary was full! Yesterday, however, a Rangoon journal that reached us positively announced that a treaty had been signed, and we suppose we must believe that it has been so. . . . .

A treaty of this character is likely to bring about a war with the native state in less than three years. Traders will penetrate into the country, and some, because they will not be allowed to have things their own way, will get up a case against the native court, and then, as happened in Lord Dalhousie's time, a hot-headed officer at the head of a flotilla, or some other description of force, will be deputed to demand explanations, and without waiting for explanations of any character, will take fresh umbrage, mayhap because too small a state umbrella had been sent for his use, and—will fire 'the first shot in anger,' and then there will be another Burmese war, and more annexation. And to an Empire already too large to be compact, will be added another province not worth a tithe of the money its conquest will have cost—money which should have been expended, for the benefit of trade, and the good of the people generally in opening up India Proper, by means of roads, tramroads, canals and railways. There is to be no British resident at the Court of Ava, only a Consul. No official valuing his own peace of mind and comfort should accept the appointment, even though the salary attached prove something very grand. He will not be at his post very long before most newspapers at this side of India—not to mention those of Rangoon—will ring with complaints of his 'imbecility,' his 'obstructiveness,' and his 'subservience' to the native Court. It will be his duty to see the provisions of the treaty respected by his own countrymen, and true Briton-like he will do his duty, and—get abused and held up to public obloquy, as Mr. Alcock at Japan has been, and as every Consul too conscientious not to do his duty has ever been."

In the *Friend of India* of Dec. 22nd we read:—

"Colonel Phayre's success in obtaining a commercial treaty from the King of Burmah is a most important fact. There is only one serious drawback to the treaty, that the King declines to surrender his frontier duties. This, however, will doubtless be conceded in time, and as true free-traders we at once abolish ours. The treaty was signed at Mandalay on the 10th November by our Envoy and by the Maghway Woongyee, the Prime Minister of the King. Colonel Phayre was decorated with the highest Burmese honour, the Order of the Golden Chain, and the Catholic Bishop Bgandet, who was present, with, strange to say, a golden cross. A consular agent will be established in Mandalay the moment the ratified treaties are exchanged."

On this subject the *Standard* writes:—

"The commercial treaty with Burmah is the first important act of Lord Elgin in India. Hitherto the King of Burmah has taken the foreign trade of that country entirely to himself. For the future the trade will be thrown open, under certain conditions, to all comers. Hitherto foreigners have been excluded from all those parts of the empire not in British possession. For the future foreigners will be permitted to come and go as they do elsewhere. The change will be productive of benefits, in more ways than one, both to Britain and Burmah. The 'Golden Foot' will find itself planted more firmly on the soil than it has ever been before, and reaping from free commerce profits far more considerable than it had ever derived from the monopoly. The British power will gain a new field for trade and a new security in politics. Our relations with the Burmese have never been of a satisfactory character. We have fought with them and taken whole provinces from them; and however justifiable may have been our wars, however necessary our annexations, it is difficult to teach a people with whom you deal in this manner that you have the best possible intentions and are acting for their good. It is greatly to the credit, therefore, of the Burmese monarch, that he has consented to sink old jealousies, and inaugurate a liberal policy towards his former foes; and it is equally honourable to Colonel Phayre, who has had the conduct of the negociations, that he has brought them to so successful an issue. It must be confessed that the conditions of the treaty are not altogether satisfactory. Indeed, in India we find that the feeling among our countrymen is by no means in favour of Colonel Phayre's diplomacy, and all kinds of difficulties and disasters are freely foretold. Not only is the treaty condemned as giving undue advantages to Burmah, but its utter impracticability is confidently maintained, and one writer goes so far as to declare that its natural effect will be to produce another war with Burmah in three years. With regard to the balance of advantage being on the side of Burmah, we may safely conclude that but for this concession there would have been no treaty at all; and the question remains whether it was not wise to effect an arrangement of the kind upon almost any terms, trusting to future endeavours to render them more satisfactory. The next objection has more force. In order to carry out the conditions of the treaty we are told it will be necessary for the King of Burmah to establish an effective cordon of preventives, not so much to prevent smuggling into his dominions, which he would undoubtedly prevent and punish as far as he could, but to prevent smuggling out of his dominions, which he would have no particular object in preventing, and could not prevent if he had, and which we should have no power to prevent ourselves. Considering that as goods which are exported into Pegu or British Burmah will pay a duty as heretofore of ten per cent., and as the same goods on entering British Burmah will be subject to a duty of only one per cent., it is obvious that there will be an advantage of nine per cent. in smuggling the goods in question back from Burmah Proper for sale to our own subjects. The temptation given to fraud is thus very great, and it is certainly unfortunate that the Burmese Government has not the same object as the British in repressing its effects.

* * * * * * * * * * * *

That there are difficulties to be surmounted in cementing our new relations with Burmah is beyond a doubt. The smuggling difficulty is very likely to be a very serious one. Then, if we agree with the King, it is by no means so clear that the King will agree with certain parties in the State. Like the Tycoon in Japan, he is far more advanced in his policy than most of the principal persons in his kingdom. The war party, led by the Prince of Ava, is directly opposed to all intercourse with foreigners, and therefore to all the objects of the treaty; and from this quarter it is more than likely that danger will arise. Fortunately, however, the King of Burmah has no 'spiritual' monarch over him like the Tycoon in Japan, and he has entered into the treaty of his own free will, assured of the soundness of the policy which he has adopted. If he meets with any serious opposition he will probably call upon his British allies for assistance, of which he may also be glad to avail himself against several warlike neighbours, who are just now giving him a great deal of trouble. Co-operation of this kind cannot fail to give us a firmer footing in the country, and enable us to make better terms for our commerce. There is no reason for any aggressive measures; but this is certain—that our position in India renders it imperative that we should be upon friendly terms with all native States, unless we wish to take the responsibility of quarrelling with them, and being forced into embarrassing annexations. Against these evils a commercial alliance is the surest guarantee. There is a class of politicians in this country whose main principle seems to be that of letting everything alone. This is very easy in theory but very difficult in practice, especially as regards our intercourse with Eastern nations. Our empire in India is looked upon with a jealouseye by more than one power on the Continent; and while Russia is making slow but sure advances towards us in the North, France is prosecuting an unremitting course of intrigue with the same object in the East. It is probable that our future difficulties will be with our European rivals rather than our Asiatic subjects. It behoves us, therefore, to cultivate the most cordial relations with the native States, and this work, we believe, has been not inadequately begun in Burmah."

Continental Intelligence.

FRANCE.

The Emperor of the French opened the Session in person on Monday, the 12th inst. His Majesty commenced a long and temperate speech by remarking that, "to have anticipated the time for dissolution, fixed by the Constitution, would have been an act of ingratitude." In allusion to China and Cochin-China he said that in five years he, with their assistance, had proved "that there was no country, however distant, where an attempt against the honour of France could remain unpunished." Two new provinces had been secured, a vast territory had been thrown open in the Far East, "and, what was better than conquests, they had acquired claims to the sympathy of the people without losing the confidence of the Governments." He had held interviews with many sovereigns, had "tried to obliterate the remembrance of civil discords," had "increased the importance of the great bodies of the State," and had given up a valuable prerogative. It would be necessary to vote a grant for the people distressed by the cotton famine, for the Maritime Powers had not acceded to his proposal for mediation; and he would remind them to tell their fellow citizens to avoid conflicts. "They must send to the Chamber men who, like the present deputies, accept the present system without reserve, and prefer serious deliberations to sterile discussions." The speech was little applauded in the Chamber, and was coldly received in Paris.

The French Government, it is said, has resolved to appoint a commission to inquire into the laws affecting the succession to landed property. At present, by an entail stricter than in Scotland, every child inherits, and the consequent sub-division is killing agriculture. The pauper *ouvrier* cannot keep cattle or purchase guano, and sometimes finds ploughing impossible from the small size of his fields. The councils of the Departments have formally condemned the system, which, however, it will be exceedingly difficult to reform.

Notwithstanding the disease which has affected the silk-worm in France for the last ten years, the value of the silk goods exported last year exceeded the exports of the year 1861 by 18 per cent. The Government, being aware of the importance of the silk trade, and of the necessity of counteracting the disease among silkworms, have made a grant to a special envoy to proceed to China and Cochin-China to procure fresh seed. The silk-growers have addressed a vote of thanks to M. Drouyn de Lhuys for the interest he has taken in their welfare.

Mgr. Darboy, Bishop of Nancy, is appointed to the archiepiscopal see of Paris, vacant by the decease of Cardinal Morlot.

The effective force of the army for the present year is reported to be as follows:—Interior, 338,562; Algeria, 55,285; Italy, 16,950; China, 915; Cochin-China, 1,179; Mexico, 27,945; total, 440,836. By deducting 20,000 men of the classes of 1856, 1857, and 1858, inscribed in the reserve by an order issued on December 19, 1862, the total effective force is reduced to 420,836 men.

Captain Tricault, of the Imperial navy, aide-de-camp of the Minister of Marine, is about to leave Paris to convey the ratification of the treaty of peace to Cochin-China.

La France makes the following announcement:—"We are informed that France is about to take possession of Obok, a point on the Red Sea, in proximity to the Straits of Babel Mandeb. The steam frigate *Hermione* has, it is said, been charged to carry this into effect. Obok is admirably situate for a coal station, and the necessary works will shortly be commenced there."

The distressed state of the labouring classes in France seems at length to have engaged public attention, and the *Moniteur* announces that, independently of the subscriptions opened for the workmen of the Seine Inferieure, the Emperor has contributed 100,000f. to be distributed among the different manufacturing towns.

The new Prussian Ambassador to the Court of the Tuileries, Count Goltz, had a private audience of the Emperor on the 17th, to deliver his credentials. In reply to the friendly expressions of Count Goltz, on the part of his Government, the Emperor said that ever since his interview with the King of Prussia he had always desired that their relations should become more friendly.

The death of Said Pasha has occasioned a great fall at Paris in the securities of the Suez Canal Company, in consequence of the belief generally entertained that his successor is less inclined to favour French than English interests.

The Naval Department advertises for tenders to convey an iron floating-dock from Glasgow to Saigon in Cochin-China. The basin, which will be shipped in separate sections, will weigh about 2,500 tons, including the pumps, chains, anchors, steam-engines, and other parts. The vessels to be tendered must be A 1 at Lloyd's. Further information may be obtained of the French Consul at Glasgow, but the tenders must be sent in to the Imperial Ministry for the Navy and Colonies at Paris on or before the 5th of February next.

Admiral Bonard, the Commander-in-Chief at Saigon, has addressed the following circular to Go-Cong:—

"Instead of pacifically executing the treaty, the people of Go-Cong appear desirous of exhausting my patience. Whilst I abstain from committing any acts of hostility against them and their partisans, hoping that they will return to reason, they, on the contrary, excite to disobedience to the Emperor of Hué and to revolt against the Emperor of the French. So soon as the pacific overtures attempted by the viceroy Phan-tan-Giang, and those of my envoy Ba-thnom, shall have been without visible result, recourse will be had to arms, and the coercive blockade will commence with energy against the whole of Go-Cong which has not submitted. All communication will be interdicted. All the boats which shall fall into our power will be destroyed. All the men taken in arms and in open rebellion will be summarily punished, and the rice crops seized. In a word, the vessels charged with the coercive blockade will do all the injury possible to the implacable enemy, without entering on any expeditions into the interior. So soon as I shall be informed that the aggressive conduct of that people is not at an end, in spite of all the concessions made out of commiseration for the peaceable part of the people, the different commanders of the partial blockade will be ordered to resort to coercion on all the space blockaded without going beyond the province of Mytho. If those means do not suffice to restore order before the end of the year the prefecture of Go-Cong will be a desert. Make known my will to the insurgents. "BONARD."

RUSSIA.

(FROM AN OCCASIONAL CORRESPONDENT.)

ST. PETERSBURG, Jan. 18.

A letter from Orenburg says that during the last winter and summer the quantity of cotton that arrived there from Bockhara in Central Asia amounted to 416,000 poods of 40 lbs each, loaded upon 26,000 camels. The importation this year will be probably much more considerable, as no less than 50,000 camels loaded with 100,000 bales, with about 800,000 poods of cotton, had arrived at Kazala, the frontier station. A part of this quantity had already been transferred to wagons, the arrival of which may be expected early in the spring. No sales had, at the date of the letter, been effected, so that it was impossible to quote prices; nor was it known what quantity of cotton might be expected to arrive from China by the land frontier.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Jan. 22nd.

Hitherto the appointment of the new Colonial Minister has not been made, and Mr. Betz, the Finance Minister, continues to hold the office provisionally. Of course there is no end of rumours and conjectures on the subject, amongst which the most probable combination is, that Mr. Betz will become definitively the Minister for the Colonies, and be succeeded in the Finance Department by Mynheer Bachiene, hitherto Member of the Council of State. But this uncertainty is productive of great inconvenience in carrying on the public service, and was rather severely commented on in the Report of the Commissioners for examining the Bill before the Second Chamber for granting a provisional credit for the Colonial Department, which was proposed to be taken for six months, but in consequence of the above-mentioned feeling, was reduced by the Chamber to three. Many important measures are shelved for the present; for instance, the disposal of the Colonial Surplus Revenue, and the Bill for sanctioning the concession granted for the construction of railroads in Java, cannot be proceeded with in the absence of a responsible Minister for the Colonies. In the meantime the First Chamber, which had adjourned after its successful effort to negative the Colonial Budget, has been convened to meet again this week to deliberate on the other Bills sent up from the Lower Chamber.

The last number of the *Staatsblad*, No. 198, contains a Royal Decree ordering the publication of the Treaty of Amity, Commerce, and Navigation concluded between this country and the kingdom of Siam.

Mr. Gevers Deynoot, Member of the Second Chamber of the States General, was a passenger in the ill-fated *Colombo* wrecked on the island of Minicoy, in consequence of which he has lost all his valuable papers, as well as a large number of presents intended for his numerous friends in this country.

Intelligence has been received here that sixteen of the young Japanese expected here, as already announced in a former letter, have left Decima on board the Dutch ship *Calypso*, Captain G. Poolman, and will touch at Java. Among them are some officers of the Japanese artillery, infantry, and navy, who will prosecute their studies at the University of Leyden, but there are also several young men of intelligence but inferior rank of life, who will learn practically in Holland the trade of tailors, shoemakers, bookbinders, carpenters, &c. It was mentioned in the letters from Decima that trade was improving, probably in consequence of its being known for a certainty that the other new ports were not to be opened for the present to foreign commerce.

Among the papers lately presented to the States-General by the Government, is a despatch from the Acting Governor-General of Netherlands India, dated October 12th, 1861, with several annexes concerning the farming of the opium trade in Java. In the accompanying missive of the Colonial Minister, he states that the prohibition against importing and possessing opium is declared applicable to a part of Bantam, to the so-called mountain districts in Tagal, to the districts of Dayaloekoer, Madjenang, and Pegadingan, in the Regency of Tjilatjap (Residency of Banjoemaas), and to the whole of the Assistant Residency of Banjoewangie, as the most simple and practical way of putting an end to the demoralising effects on the moral and physical constitution of the natives by the use and consumption of this poisonous drug. But notwithstanding all the efforts of the Dutch authorities in Java, it is no secret that a considerable quantity of opium is grown there, and still more smuggled in, and it is to prevent this in future that the above prohibition is now enforced in the most stringent manner.

The late Duke Bernhard of Saxe-Weimar, who had spent his whole life in the military service of this country, appears to have been very popular everywhere, for the movement commenced at the Hague for the purpose of erecting a monument

Digitized by Google

to his memory has not only extended to this city, as well as Rotterdam, Utrecht, and other large places, but in many little towns with only a few thousand inhabitants. Committees have been formed with great success, and considerable donations are pouring in from all quarters. To facilitate the movement, the King has granted exemption of postage on all correspondence between the several district committees and the Central Board at the Hague.

In confirming the intelligence communicated in my last letter that orders have been given to shut up the recruiting office, under Colonel Strakker, at Altona, for enlisting Norwegians, Danes, and Swedes for military service in the East Indies, I have to add that the reason given for that measure is that enlisting in the United States Army appears to be more popular at present, and hard knocks and active campaigning in America have greater charms for enterprising young men than the comparatively more quiet life in Netherlands India. Another consideration is the expense, for it is calculated that each recruit sent out to India costs, with his equipment, passage, and bounty, at least 1,500 florins.

Amongst the latest acquisitions at the Zoological Gardens of the Society *Natura ars Magistra* in this city are two tigers and two wild cats, landed from the *Cortgene* from Padang, and a variegated tiger brought over in the *Aldebaran*, Captain Meyboom, from Java. There was a second one shipped, but it died on the passage when entering our cold Northern latitudes.

The Netherlands Trading Company (for the Colonial Department) advertises for tenders for the delivery of 1,500 iron bedsteads and various other objects for the use of the troops in Netherlands India. The conditions may be seen at the company's offices in this city, and agencies at the outposts. The contracts will be awarded on the 30th inst.

Colonel von Siebold, the celebrated author of many valuable works on the Natural History of Japan, and who has again been travelling for the last two years in that interesting and imperfectly-known country, arrived last week at the Hague, and has now proceeded to join his family, who are residing at the University of Bonn, on the Rhine.

Amongst the late arrivals in this city is the Rev. Mr. Spurgeon. He has not yet preached here, and I am not able to say if he intends to do so.

A telegram has been received at the Colonial Office dated Buitenzorg, December 13, announcing that the public sales advertised had been held, the coffee realising 42fl. 56 cents, and the sugar fetching 15fl. 37 cents on the average.

A letter from Helvoetsluys states that the steam-frigate *Ardjoena*, which was employed last summer to bring over from England the Japanese Ambassadors, is undergoing thorough repairs at that port, preparatory to being commissioned in the month of May for foreign service. It is not yet known to what destination she will be sent, nor who will be appointed to the command.

The three screw-steamers, *Dommel*, *Delfzyl*, and *Stavoren*, are to be commissioned on the 1st of April at the same port; the two former for the East Indies, and the third probably for Surinam.

H.N.M. steam-frigate *Zeeland* is under orders to leave Vlissingen at the end of this month. She will first proceed to the Mediterranean to carry out the portrait of the King as a present to the Bey of Tunis, after which she will probably be ordered to Netherlands India.

At the royal dockyard of Nieuwe Deep great activity is also perceptible. The screw-steamer *Metalem Kruis* is to be commissioned in the month of May, and the screw-corvetee *Princess Amelia* in June; whilst the fourth-class screw-steamers *Bommelerwaard* and *Maas and Waal*, expected at that port from Amsterdam, are to be sent round to Helvoetsluys to be commissioned there.

Despatches have been received from the *Djambi*, Capt.-Lieut. van Rees, from this country to Netherlands India (*vid* Australia) dated the 22nd ult., at sea. All well on board. She had picked up the English ship *Orlando*, from St. Michaels to Hull, dismasted at sea, and carried her into the nearest port.

PERSONAL.—Major J. B. Auffmorth, of the E.I. infantry, now on leave of absence in this country, has been permitted, at his own request, to retire from the service with a pension for life.

Mr. H. W. Balzar, officer in the Forest Department in Netherlands India, now in this country on leave of absence, has been permitted to retire from the service on a pension.

Second Lieut. J. J. de Hart, R.N., is promoted to the rank of first lieutenant.

Mr. P. L. de Munnick, for many years agent in this city for the Colonial Department, has been permitted to resign his appointment with a life pension of 1,293 florins per annum.

The under-mentioned lieutenants in the E.I. Artillery are under orders to embark at Nieuwe Deep at the end of this month on board the chartered ship *New Holland*:—Capt. J. E. Tuk, for Java; B. Lamberts, L. C. Dugies, M. B. van Slee, and W. Broese van Groenau.

Lieut. D. M. de Laat de Kanter, and Sub.-Lieut. J. A. de Gelder, both R.N., employed in Netherlands India, have received the King's permission to retire from the naval service.

Lieut. D. H. Pluym Mentz, of the E.I. Artillery, is under orders to embark at Rotterdam at the end of this month on board the chartered ship *Grange Nassau*, Captain Strang van Hees, for Batavia.

Lieut. W. L. Gericke, R.N., of H.M. steam frigate *Zeeland*, is placed on the non-activity list, and succeeded by Lieut. A. Baron van Collet d'Escury, R.N.

APPOINTMENTS CONFIRMED.—P. M. van Laren, to be Assistant-Resident at the disposal of the Resident of Soerakarta; G. Hoven, to be secretary of the Java Bank; H. E. de Vogel, to be Resident of Japara; P. F. Couperus, non-activity list C.S., to be Resident of Bezoeki; C. G. Hullman, to be member of the Court of Justice at Sourabaya; P. A. Gysbers, to be secretary of the Residency in the Lampong districts.

PERMITTED TO RETIRE FROM THE SERVICE.—A. Robertson, magistrate in the Residency of Banca; A. C. Andreas, Controller of Revenues and Cultures; H. Rochussen, secretary of the Java Bank; Captain H. Hubeck, E.I. Infantry, with claim to a pension.

Colonel E. C. F. Happe, commandant of the First Military Division of Java, is placed at the disposal of the military department.

PASSENGERS ARRIVED.

Per *Kosmopoliet*, Capt. Bauten, at Amsterdam, from Batavia: Mr. and Mrs. Rooyaris and four children, Mr. and Mrs. Overdyk and six children, Mr. and Mrs. Rochemont, three children and servant; Messrs Decker, De Perpoucher, and Blom; twenty passported soldiers.

Per *Haamstede*, Capt. van Zaamen, at Zieriksee, from Batavia: Mr. Keuchenius; six passported soldiers.

PASSENGERS OUTWARDS.

Per *Louise Kronprincess van Zweden*, Capt. van der Linden, from Amsterdam to Batavia: Messrs. G. H. Boelhouwer, F. H. Froester, and H. Kok.

Per *Oceaan*, Capt. Doekzen, from Amsterdam to Batavia: Messrs. Huet, Bergsma, Canneman, Kielstra, and Rombouts.

Per *Mathilde*, Capt. Fekkes, to Samarang: Mr. A. Ferzenaar and Mr. H. le Jolle.

Per *Emergans*, Capt. Smit, from Rotterdam to Sourabaya: Mr. H. J. ten Have, Miss P. Offers.

COMMERCIAL.

COFFEE.—A sale of 10,000 bags of Sumatra, ex *Paul Johan*, from Padang, at 44½ cents, in a lump to one house, has made a great sensation here, as it is but seldom that transactions of such magnitude should occur among our private merchants. This sale in conjunction with the favourite accounts of the markets in the East Indies and at Rio Janeiro has had a favourite influence on all descriptions of coffee here, the market is firmer, and prices have a tendency to rise. Good ordinary Java of favourite numbers easily finds purchasers at an advance on the company's sale prices.

TEA.—Firm, but dealings limited. Next week 220 chests of Finest Souchong, and 100 do. of Finest Flowery Pekoe will be brought to the hammer; the former is estimated by the brokers to be worth 175 cents, and the Pekoe 225 cents.

SUGAR.—There have been some considerable sales of Java, but at depressed prices, which may be taken at 1 to 1½ fl. below the November sale. Amongst the transactions are 282 kranjangs, No. 11½, half good and half soft quality at 28½ fl.; 394 krs., No. 15, fine, at 33½ fl.; 635 krs. No. 11, soft and damp, at 27½ fl.; 530 krs. ex *Kosmopoliet*, No. 14, at 32 fl.; 716 krs., ex *L. A. Bang*, No. 18, fine, at 37½ fl., to be received on board; 178 krs. of Sourabaya, No. 15, soft at 32½ fl.; 201 krs. of do., No. 10½, at 26 fl., to be received on board, and 1,200 krs. ex *Bulgersteyn*, at secret prices.

The refined market is quite inanimate and prices nominal.

RICE.—Is looking up. The finer descriptions of cleaned grain are in good request and command high prices. The attention of dealers is now fixed on a cargo of 13,600 bags of Java table rice just arrived at Rotterdam per *Wave Queen*, and of which 1,500 bags have already been sold, realising the figure of 17½ fl., at which price importers are reluctant to sell any more, as the quality is remarkably good, and the high rate does not appear to frighten purchasers.

SPICES.—There is less demand for cinnamon, but No. 3 quality being scarce, still finds eager purchasers. Nutmegs No. 1 of 1862 crop are offered at easier rates. Pepper steady; in a few days 250 bags of Sumatra will be sold by auction.

TIN.—About 10,000 blocks of Banca have found purchasers at 69 fl. at which price there are still sellers.

HIDES.—2,000 Java ox ex *Broedertrouw*, and 1,000 Java buffalo ex *Catharina* have been sold by importers at full prices. Arrivals: 4,500 ex *L. A. Bang* from Samarang, 452 ex *Frans and Elise* from Batavia, 7,000 ex *Lady Egidia* from Samarang, and 698 ox and 301 buffalo ex *Paul Johan* from Padang.

INDIGO.—In fair request, but there is no alteration in the values.

The London & China Telegraph.

LONDON, TUESDAY, JAN. 27, 1863.

THE FRENCH IN COCHIN-CHINA.

THE progress of the French in Cochin China has all along been regarded with indifference by the leading journal of Europe. "We are not much interested," says *The Times*, "in "the occupation of three provinces and an island in Cochin-"China. If France establishes a flourishing colony in Eastern "Asia, we shall be as much benefited by her energy as we "should be harmed by a forcible extension of her limits in "Europe." We differ altogether from this opinion. The aim of the French is, and ever has been, occupation, and not colonisation. The former they understand, of the latter they are entirely ignorant. It is not probable that Cochin-China will ever be of great value to France in a commercial point of view, but in forming military settlements in that important country she secures for herself a commanding position in the Far East, and would be able, in case of war, to strike a deadly blow at our commerce in the China seas. For such a purpose as this the geographical position of Cochin-China affords every possible advantage, and within its magnificent harbours a large navy would find space and safety. France has always been fully alive to the importance of the position, but, in spite of many former efforts, has only now succeeded, on a most frivolous pretext, in gaining, by force of arms, what she could not secure by treaty. Many years ago Mr. CRAWFURD said he had reason to believe that Cochin-China would fall an easier prey to the attack of a European Power than any other considerable kingdom of Asia, and that a force of five thousand European troops and a squadron of a few sloops-of-war would be quite sufficient for the conquest, and even for the permanent maintenance of the whole empire. Mr. CRAWFURD added, with what we fear future events will prove to be a singular pre science:—

"Were Cochin-China and the countries dependent upon it "placed under the skilful rule of a European Government, "according to the scheme which the French appear to have "had in view, I am led to think, judging from the docile cha-"racter of the people, the fertility and resources of many parts "of the kingdom, the numerous fine harbours belonging to "other parts, and the centrical and favourable position of the "whole, that in time a power might be established in that "country more troublesome and dangerous to our Indian com-"merce and empire than it is easy to imagine could arise in "any other situation, or under any other circumstances."

The immediate aim of the French is to obtain command of the entire valley of the Cambodia. That river is one of the largest and finest in Asia, and is said to be navigable for a distance of several hundred miles. Running up into the centre of South-West China, it commands Cochin-China, Siam, and Burmah. Already the whole trade of the Cambodia is placed under the control of France by the occupation of Mitho, and if the French understood how to improve their commercial advantages, they would no doubt gain immensely as purveyors to the markets of India and China. Through this channel the commerce of Western China lies open to French enterprise. We have often pointed out this before, and urged the importance of gaining direct intercourse with Yun-nan and Se-chuen by way of Pegu, before the trade with those rich and thickly-populated provinces was monopolised by France. We do not, however, much anticipate such a brilliant and peaceable result from the occupation of Cochin-China. We expect rather to hear, as we already have heard, of naval and military stations, of subjugation and annexation. The extract given in another portion of our columns from the "Yellow-book," states that the expedition to Cochin-China was for the purpose of vindicating the rights of humanity and religion, but it is perfectly clear from the same document that the present aims of France in that region have but little connection either with religion or humanity. In this official statement we read that Admiral BONARD is actively engaged in the organisation of the country, that the lighthouse of Cape St. Jaques "looks like a brilliant sign of a definite possession" of Cochin-China on the part of France; and in another place we are told of the facilities which exist for dominating over a people "whose institutions have more than one analogy with those of France." It matters little to the French EMPEROR or people, at what loss of life the war is carried on, or how much it will cost to become the sole rulers of the country. To become a power in the Far East, to possess a voice equal to our own in Eastern politics, to find a field of action for the army, to satisfy in some degree that martial glory so dear to the heart of the Gaul, these and other obvious motives account for the interest manifested in France, at the successes of the French arms in Cochin-China.

THE TREATY WITH BURMAH.

THE importance of opening up trade with Western China has been again and again brought before to our readers in the columns of this journal. We have dwelt upon the subject so frequently because we have felt that to gain access to those vast inland provinces of the Chinese Empire, which are at present debarred from our commerce, would prove a magnificent success, and that when accomplished, as eventually it must be, our perseverance, or as some may term it, our pertinacity, will be amply rewarded. At length a great obstruction has been removed, a difficulty which the opposers of the scheme were ever prone to magnify, has been completely overcome. We long ago stated that the King of BURMAH was anxious to form a commercial alliance with this country, and that if a suitable Envoy were sent to his capital on a political mission, the KING would himself be gratified, and we should reap considerable advantage. It was, therefore, with no small interest that we received the news last November of the Chief Commissioner of British Burmah having himself left for Mandalay.

Colonel PHAYRE has been long well known in the East for his great administrative ability. Whatever posts he has filled have been occupied with advantage to the country. After our first war with Burmah, Colonel PHAYRE was made Governor of the then uncultivated province of Arracan, which Burmah ceded to us; and to him is due the credit of having transformed that neglected province into a grain-growing and exporting territory. Colonel PHAYRE's successful government of Arracan led the Earl of DALHOUSIE to select him for the still more difficult and important post of Governor of Pegu, which, it will be remembered, became a portion of British India in 1852. A ten years' able administration of that province has proved the wisdom of the choice. The "Annual Reports" show, in statements that cannot be questioned, how steady and yet considerable a progress has been made during Colonel PHAYRE's administration. We need not wonder therefore at the choice made by Lord ELGIN when he decided on consolidating the five provinces ceded or annexed from Burmah, nor are we surprised to learn that, with such a Governor as Colonel PHAYRE, British Burmah is "the most progressive of "our recent acquisitions," and that it may be said to be self-supporting. We need not dwell more particularly on the separate achievements of Colonel PHAYRE, either as Governor or Envoy, but we may add that the manner in which he conducted the mission of 1855 proved that he possessed ability as a diplomatist which was scarcely excelled by his high administrative power. Such is the man who was wisely chosen by Lord ELGIN to form a commercial treaty with the King of BURMAH, and the articles of the Treaty show that it has been successfully accomplished. These articles have not yet been officially published, but as far as is known at present they are as follows:—

"1. Desiring to promote the interests of peace and friendship, between the British and Burmese Governments, the high contracting parties agree that there shall be free and unrestricted trade between their respective territories.

"2. The British Government agrees to remove its Custom-house from the frontier, and to allow all goods and merchandise to be imported and exported free of the payment of all transit duty.

"3. For the present, the Burmese Government, owing to the limited amount of its territorial revenue, shall levy an export duty on products of the country, according to a tariff to be agreed upon and hereafter published; and a transit duty of one per cent. only to be levied by His Majesty on all merchandise passing through his country.

"4. The Burmese Government agrees to receive and recognise a British Commercial Agent at the capital."

Such are the main points embraced in the Treaty, which includes also the free navigation of the Irrawaddy. Before long we shall receive additional particulars, and shall dwell more fully

Digitized by Google

on the assistance we shall derive from it in gaining access to Western China by the only practicable route.

We have alluded to the former services of Colonel PHAYRE, we have described his latest achievement, and now we may well ask what reward the Government of this country will bestow on a servant who has served her so faithfully and so well? Colonel PHAYRE has twice represented his Sovereign at the Court of the King of BURMAH; as the governor of an important dependency, he has won golden opinions from his countrymen at home and abroad, but, as yet, he has not even received one of the distinctions which are sometimes lavishly bestowed on men who have yet to win their spurs, and even on the subordinates of our Foreign Office. There are few Englishmen at home—we venture to say there is not one in the East—who would not be pleased to hear that some distinction worthy of Colonel PHAYRE had been bestowed upon him by the Government. Men who, in distant lands, uphold the honour of England; who, by their ability, extend her privileges, and by their integrity and firmness cause her to be honoured as well as feared, deserve something better than cold thanks for their labours. True it is that Colonel PHAYRE, in thus serving his country, has only done his duty, but in doing this his ability has been conspicuous, and it is an evil sign for a Government when such services are passed over unheeded. We cannot conclude without congratulating Captain and Mr. SPRYE on having so far succeeded in their efforts by the accomplishment of this Treaty. They have all along maintained that the King of BURMAH was ready to grant every commercial facility that could be required of him, to promote a trade with Western China through his territory. So far back as 1844 Captain SPRYE, in a letter to the Prime Minister, Sir ROBERT PEEL, predicted the result which was attained at the close of last year; and since then he has not ceased to urge upon the Government the advantages of a Treaty with Burmah as a preliminary to trade with Western China, and has, at the same time, brought the subject before all our Chambers of Commerce. In these efforts Captain SPRYE has been ably assisted by his son, and to the energy and indomitable perseverance of these gentlemen—an energy exerted in the face of strong opposition, and with little co-operation from the mercantile classes—the movement may be in great measure attributed which, after so many years of labour and discouragement, has resulted in a Treaty with Burmah.

Literature.

Hadyn's "Dictionary of Dates," published by Messrs. Moxon and Co., has reached its eleventh edition. No one who knows the worth of the book will be surprised at this success. This dictionary satisfies in the most admirable manner a universal want, and the man who has once tested its value will not willingly part with it from his shelves. The variety of occurences embraced in the volume renders it worthy of the character claimed for it by the present editor, Mr. Vincent, who has done much towards making it the valuable work it is—as being "not a mere Dictionary of Dates, but a Dated Encyclopædia—a digested Summary of every Department of the History of the World, brought down to the very eve of the publication of each edition." To show with what thoroughness the work is done, we may mention that the dates under the head "China" comprise every event which is of real interest to Englishmen, down to the permission afforded to Captain Sherard Osborn, last July, to organise a fleet of gunboats for the Imperial Government. The same publishers have been producing, month by month, "A Complete Re-issue of the Works of Thomas Hood." The seven volumes which complete the work have now appeared; and we need not say that they are brimful of wit and fun, of genius, and poetry. For our own part, we greatly prefer Hood's serious poems to his comic effusions, delicious as the latter are; and there can be little doubt that, in the years to come, he will be more loved and honoured as a true English poet than as a great humourist and the prince of punsters. Two volumes of Mr. Kinglake's "Invasion of the Crimea" are at length published by Messrs. W. Blackwood and Sons. Goodly volumes they are, yet, although comprising more than one thousand pages, they only carry the narrative to the battle of Alma. The work, we suspect, will be, when it is finished, not only weighty in matter, but ponderous in bulk. But the author of "Eothen" is a master in composition, and his forcible and picturesque style will enable him to carry his reader pleasantly along, no matter how protracted, the journey.

The last volume of State Papers (Colonial series) has been lately published by Messrs. Longman and Co. It is entitled "Calendar of State Papers (Colonial Series), East Indies, China, and Japan, 1513-1616, preserved in Her Majesty's Public Record-office and elsewhere. Edited by W. Noel Sainsbury, Esq., &c." The book contains a narrative of the manner in which the foundations of our trade were laid in China, Japan, and the East Indies, and describes the adventures and perils which the first voyagers underwent in those unknown regions. The volume is so full of interest that we shall endeavour in the next number of our journal to give a full yet concise epitome of its contents.

Mr. G. Lawrance, the author of "Guy Livingstone," &c., has left England for the Southern States of America. It is reported that he intends taking service under "Stonewall" Jackson. The records of his observations are to be published in *Once a Week*.

A Scotch newspaper says:—"Of the four magazines which have started on their career during the last two or three years, but one retains its original editor. Mr. Thackeray seceded from the directorate of the *Cornhill*, because he could not be bored by reading other people's MSS., and because the tenderness of his nature prevented his 'giving No for an answer' when would-be contributors were importunate. Mrs. S. C. Hall soon threw up the *St. James's*, and went to law with its proprietor; and now George Augustus Sala has severed his connexion with *Temple Bar*. Professor Masson alone remains, as at first, the editor of *Macmillan's Magazine*, and rumour has not yet even whispered of a change."

Narrative of the Circumnavigation of the Globe by the Austrian Frigate "Novara." By Dr. Karl Scherzer. Vol. 3: Saunders, Otley, and Co.

THE present volume concludes the narrative, with which, as far at least as the main outlines are concerned, our readers are already familiar. It opens with a description of Sydney, and is especially noteworthy as containing the impressions made upon a well-educated German by English colonial enterprise. Dr. Scherzer seems indeed to think that the real greatness of England is more visible in her dependencies than in the mother country, and the hearty praise which he deals out so ungrudgingly whenever a fitting opportunity occurs cannot but be gratifying to Englishmen. It is curious at the present time, when the question of transportation as a punishment for our criminals is exciting such general attention, to have the subject brought before us from a German stand-point. The writer discusses the topic at considerable length, points out the evils with which it has been associated in the British colonies, "with the exception, perhaps, of the pattern convict settlement at Singapore," and comes to the conclusion that, with important modifications, the system of transportation which formerly existed in the British colonies would be of great value to Austria. He adds, however, that until the maritime power of Austria is more developed, the foundation of penal colonies over-sea is almost impracticable. The writer adds:—"In the Indian Ocean, as well as the Pacific, there are numbers of island groups, which, by their hypsometric conditions, geographical position, and fertility of soil, are admirably suited for settlement by white labour. The prejudice against the climatic adaptability of the majority of these falls to the ground when we recollect what entirely altered conditions in that respect have been brought about by the industry and energy of the colonists of Singapore and Penang, on islands which, from being in the worst possible repute for their deadly climate and dreaded forest malaria, are now favourite invalid resorts of the wealthy white residents of the islands of Eastern Asia."

We have read with great interest Dr. Scherzer's description of New Zealand, and his account of Tahiti, but this volume takes us into regions so entirely apart from our field that we are reluctantly compelled to treat it in a very summary manner. Yet there is one passage on the prospects of Tahiti under a French protectorate, which so chimes in with the views we have continually expressed, that we gladly transfer it to our columns. We need scarcely say how much its value as an independent testimony is enhanced since it comes from the pen of an Austrian:—

"The French, in a word, have no success in their attempts anywhere at colonisation; they are not practical colonists. The absence of this faculty, if one may call it so, is doubly apparent in the Southern hemisphere, where they are surrounded on all hands by English colonies. True it is, the English also have usually acquired by the strong hand their possessions in Oceania, in Australia, in Asia, &c., and from the stand-point of humanity it is impossible always to defend the means by which they have made themselves masters of the fairest and most fertile countries on the globe. But what have been the results directly springing from these high-handed acts, these political *faits accomplis*? England has thrown open to the unrestricted enterprise of all trading and seafaring nations those islands and continents so highly favoured by nature, with their feckless fast-disappearing aboriginal races; she has striven, by giving free

Digitized by Google

institutions, to attract diligent colonists, to develope the natural wealth of these countries by means of scientific exploration, for the benefit of all; she has wafted to the remotest corners of the earth the seeds of Christian civilisation, and by her energy, her capacity for labour, and her earnestness of purpose, has impressed all, even the most savage races, with a feeling of envy and astonishment at the intellectual superiority, the power, and the greatness of the white man!

"Under the influence of liberal but more morally stringent laws, Tahiti might speedily be raised to the position of a great emporium of the Southern seas, the Singapore of Oceania. Under the French Protectorate, on the contrary, the island, with its population long since renowned for indolence and sensuality, has become, in fact, what a French captain once jocularly termed it, 'La Nouvelle Cythère!'"

Legal.

COURT OF QUEEN'S BENCH.

IN THE MATTER OF AN ARBITRATION BETWEEN LARCHEN AND ELLIS.

In this case Ellis, the master of a ship, had a dispute with Larchen, the owner, and the accounts between them were referred to two arbitrators, one chosen by each of them, and who (it is a remarkable fact), agreed together, without resorting to an umpire. They awarded £56 to Ellis, the master, and it was now sought by the owner to upset the award on the ground that the arbitrators had not considered all the matters in dispute between the parties, and had not waited for a witness upon one of the matters. This matter was a claim by the owner for damages, by reason of the master not having put the ship into the hands of a Mr. Pustau, at Shanghai, by which neglect, as the owner alleged, he had been damnified; and his complaint against the arbitrators was that he having desired them to wait the arrival of Pustau as a witness on that matter. The answer in effect was, that the facts were admitted, so that there was no necessity for Pustau's evidence (especially as a letter from him had been read), and that the arbitrators had considered the matter, and had determined it in their award, and had, moreover, after reading Pustau's letter, decided that it would be of no use to examine him. Mr. T Jones showed cause against the rule to rescind the award. Mr. Herschel appeared on behalf of the master in support of it, but the Court held that as the arbitrators had considered the necessity for examining the proposed witness, and had seen his letter, and formed their judgment upon it, that his evidence would not advance the case, the award could not be disturbed. Such a matter was for the arbitrators to determine; and, if they determined it honestly, even though erroneously, the Court could not interfere.—The rule was discharged with costs.

COURT OF EXCHEQUER.

(Sittings in Banco, before Lord Chief Baron POLLOCK, Barons MARTIN, BRAMWELL, and WILDE.)

LUTTREL V. THE CHINA AND JAPAN COASTING RIVER STEAM NAVIGATION COMPANY.

This was a rule calling upon the plaintiff to show cause why the verdict in this case should not be set aside and entered for the defendants, on the ground that there was no evidence to go to the jury. The case was tried in the Lord Mayor's Court. The plaintiff's evidence was that he was shipped by Captain Beal, who was in the defendant's service, to act as steward on board the *Nargos*, one of the company's vessels, and that he performed his duties for several weeks whilst she was being fitted out in the Thames. He was, however, suddenly dismissed, and he brought his action for a wrongful dismissal. He went to the defendant's offices, but he could get no redress. The defence was that the ship was to be purchased of Messrs. Mare and Co. conditionally on her performing a certain rate of speed. She, however, failed, and was not purchased, and further that Captain Beal had no authority to hire the plaintiff, and that he never was in their employ.

Mr. Murray showed cause against the rule; Mr. H. James supported it.

The Court discharged the rule.

London Gazettes.

APPOINTMENTS.

Mr. T. J. Fallon, Assistant-Commissioner, first class, British Burmah, has been deputed to Moulmein on special duty.

Mr. J. Massie has been appointed an extra assistant at Colombo to the Government agent for the Western Province of Ceylon, and Mr. R. C. Childers an extra assistant at Kandy to the Government agent for the Central Province.

Naval and Military.

Rear-Admiral Sir James Hope, K.C.B., has arrived in England from China, and it is to be hoped that the Service will not long be deprived of his experience and talents. In the event of Sir Frederick Grey, says the *Army and Navy Gazette*, relieving Sir W. F. Martin in command of the Mediterranean fleet, he could scarcely be better replaced at the Admiralty than by Sir James Hope.

His Royal Highness Prince Alfred, having passed his examination for seamenship on board the *St. George*, has received an acting order as a Lieutenant. The Prince will not, however, be confirmed in the rank until he passes at the Royal Naval College at Portsmouth.

The probable successor to Rear-Admiral Sir Alexander Milne, K.C.B., as Commander-in-Chief on the North American and West India station, will be Rear-Admiral John Elphinstone Erskine, and in that case Captain James E. Katon (1856) will very likely be selected as Flag-Captain.

Mr. Isaac Watts, C.B., Chief Constructor of the Navy, has, after an honourable service of upwards of forty-nine years, resolved to resign his appointment.

M. Leopold Pallu, lieutenant in the French navy, has been charged by his Government to make a report on the operations of the allied forces in China during the last war.

The command of the 2nd Brigade at Aldershot is rendered vacant by the appointment of Brigadier General Brown to China.

Brigadier-General Staveley, C.B., has resigned the China command, in which he will be succeeded by Brigadier-General W. G. Brown, now commanding the 2nd Brigade at Aldershot.

The following complimentary letter has been addressed to Colonel Sargent, C.B., of the 3rd Buffs, formerly Lieutenant in the 18th Royal Irish, stationed at Hong Kong:—

"The Tower, Jan. 6.

"With the full concurrence of Field-Marshal Lord Cumbermere, Constable of the Tower, Lieutenant-Governor Lord de Ros has the honour to request Colonel Sargent will convey to the officers, non-commissioned officers, and soldiers of the Buffs, before they leave this garrison, his admiration of the exemplary and soldier-like behaviour of all ranks of this fine regiment during their occupation of the Tower.

"It is easy to see that the fine order and discipline of the Buffs is maintained by the earnest desire of the Lieut.-Colonel, fully supported by his officers, to uphold the high character of this old and renowned regiment; and that they possess that respect and confidence of the non-commissioned officers and soldiers which causes the duty to be carried on with a spirit and cheerfulness only to be found where all ranks take equal pride in the credit and character of their regiment.

"In leaving their quarters in the Tower, the Buffs take with them the thanks, the respect, and the best wishes of the Constable and his officers, which Lieut.-Colonel Sargent is requested to express to them in the strongest terms.

"DE ROS, Lieutenant-Governor of the Tower."

"Mansion-house, Jan. 5.

"Sir,—Having heard that your distinguished regiment, the Buffs, are about to leave the Tower, I cannot as chief magistrate of the city allow them to depart without expressing my sense of their admirable conduct in relation to the civil authorities.

"The report of the Commissioner of the City Police testifies to the remarkable and honourable fact that, so far as their behaviour has come under the notice of the civil powers, the Buffs, instead of yielding to the temptations of an unusually protracted stay in a very trying locality, have merited the highest praise during the last five months of their service within our jurisdiction.

"I can only ascribe this and the present satisfactory relations existing between your regiment, the inhabitants, and the police to the exercise on your part of a high moral influence over your men, and in bidding both you and them farewell I must be permitted to express my warmest wishes that they may under all circumstances prove worthy of their time-honoured reputation.

"I have the honour to be, Sir, your most obedient humble servant,

"W. A. ROSE, Lord Mayor of London.

"To Lieut.-Col. Sargent, C.B., commanding the
1st battalion of 3rd Buffs, Tower of London."

The Prince of Wales' paddle yacht *Osborne*, in the steam basin at Portsmouth, is having her wheels fitted with common floats preparatory to her voyage to Antwerp. On the conclusion of her duties in conveying distinguished Royal visitors, on the occasion of the marriage of His Royal Highness the Prince of Wales, to and from the Continent and the Thames, the *Osborne* will return to Portsmouth, and will there be fitted with new feathering float paddlewheels by Messrs. Maudslay and Field. It is a somewhat remarkable fact that the *Osborne*, although a Royal yacht, was never fitted with the wheels originally designed for her, but, instead, had a pair intended for the *Firebrand* patched and fitted to suit her shaft and different form of side of hull.

Letters dated the 13th of December, received at Plymouth, state that the screw steam corvette *Charybdis*, Capt. the Hon. George D. Keane, from the Pacific Ocean, arrived on the 10th of December, all well, at Callao, where she will probably remain until March. She was rather short of hands. Rear-Admiral Sir Thomas Maitland Knight, K.C.B., in the screw frigate *Bacchante*, 39, Capt. Donale M'L. Mackenzie, was expected to arrive at Callao about Christmas-day.

Vice-Admiral Grenfell, of the Brazilian service, Consul-General for Brazil in the United Kingdom, has been promoted to the rank of Admiral in Brazil.

The deaths of Generals Murray, Belshes, and Dutton will cause no promotions, neither of those officers having been on the fixed establishment.

Sir William F. Martin's time as naval Commander-in-Chief expires in April, and club gossip points to Vice-Admiral the Hon. Sir F. W. Grey as his probable successor.

REDUCTION OF THE NAVY.

An examination of the *Navy List* would seem to justify the conclusion that the Admiralty intend to make a considerable diminution in the estimate of expenses for sea-going ships. No less than sixteen vessels have been paid out of commission during the past quarter, including five line-of-battle ships. These comprise:—

The Agamemnon, 89 guns, 600 horse-power, Captain T. Hope, from North America and West Indies.

The Algiers, 89, 600 horse-power, Captain E. B. Rice, from the Mediterranean.

The Amphion, 36, 300 horse-power, Captain A. C. Gordon, from the Mediterranean.

Digitized by Google

The Arrogant, 47, 360 horse-power, Commodore Edmonstone, from West Coast of Africa.

The Beagle, 4, 80 horse-power, Commander E. Hay, from China.

The Doris, 32, 800 horse-power, Captain Sir F. L. M'Clintock, from the Mediterranean.

The Exmouth, 86, 400 horse-power, Captain J. A. Paynter, from the Mediterranean.

The Flying Fish, 6, 350 horse-power, Captain W. H. Anderson, from the West Coast of Africa.

The Hero, 89, 600 horse-power, Captain A. P. Ryder, from North America and the West Indies.

The Neptune, 86, 500 horse-power, Captain G. T. B. Hornby, from the Mediterranean.

The Oberon, 3,260 horse-power, Lieut. G. Morris, from the south-east coast of America.

The Pelorus, 21, 400 horse-power, Commodore F. Seymour, C.B., from Australia.

The Racer, 11, 150 horse-power, Commander A. M. Lyons, from North America and the West Indies.

The Rolla, 6, Commander C. G. Nelson, late training-brig at Portsmouth.

The Termagant, 25, 310 horse-power, Captain R. Hall, from the Pacific.

The Vigilant, 4, 200 horse-power, Commander Lord Elphinstone, late of the Channel squadron.

We may add to these the Scylla, 21, 400 horse-power, Captain R. Lambert, from the Mediterranean, under orders to pay of at Sheerness.

This is an unusual number to be dismanted in one quarter; but, in addition to those already enumerated, there are no less than seventeen under orders to return to England, all of which will, in all probability, be paid out of commission on their arrival, their term of service having expired. These include:—

The Centaur, 6, 540 horse-power, from the East Indies and China.

The Clio 22, 400 horse-power, Captain T. Miller, from the Pacific.

The Encounter, 14, 360 horse-power, Captain R. Dew, from the East Indies and China.

The Fawn, 17, 100 horse-power, Captain R. P. Cator, from Australia.

The Hecate, 6, 240 horse-power, Captain G. H. Richards, from the Pacific.

The Imperieuse, 51, 360 horse-power, Captain Robert Gibson (acting), from the East Indies and China.

The London, 86, 500 horse-power, Captain H. Chads, from the Mediterranean.

The Mars, 80, 400 horse-power, Captain J. N. Strange, from the Mediterranean.

The Melpomene, 51, 600 horse-power, Captain C. J. F. Ewart, from North America and the West Indies.

The Odin, 16, 500 horse-power, Captain Lord J. Hay, from the East Indies and China.

The Pearl, 21, 400 horse-power, Captain J. Borlase, C.B., from the East Indies and China.

The Renaad, 4, 200 horse-power, Commander C. J. Rowley, from the East Indies and China.

The Ringdove, 4, 200 horse-power, Commander R. A. O. Brown, from the East Indies and China.

The Sanspareil, 70, 400 horse-power, Captain G. Le G. Bowyear, from the East Indies and China.

The Scout, 21, 400 horse-power, Captain J. Corbett, from the East Indies and China.

The Sphinx, 6, 400 horse-power, Commander T. M. Jones, from the East Indies and China.

The Vulcan, 6, 400 horse-power, Commander A. C. Strode, from the East Indies and China.

To supply the vacancies of the thirty-three ships paid off or under orders to return home, there have been only seven commissioned during the past quarter, viz.:—

The Egmont, 4, Captain F. A. Crauford, for service as a receiving and store-ship at Rio.

The Leopard, 18, 560 horse power, Captain C. T. Leckie, for the East Indies and China.

The Lily, 4, 200 horse-power, Commander H. Harvey, for North America and the West Indies.

The Meeanee, 60, 400 horse-power, Captain G. Wodehouse, for the Mediterranean.

The Pylades, 21, 350 horse-power, Captain A. W. A. Hood, for North America and the West Indies.

The Shearwater, 11, 150 horse-power, Commander R. G. Douglas, for the Pacific.

The Vindictive, 2, Master Commander W. F. Lew, for service as a store ship at Fernando Po.

Of these, two are merely store and receiving ships, and cannot therefore be accounted effective men-of-war. It is very clear, also, that during the ensuing quarter no material addition will be made to the numerical strength of the navy. At Portsmouth there are at present only three ships under orders to be brought forward for speedy commission, namely the *Frederick William* 82, the *Curacoa*, 31, and the *Esk*, 21, although the harbour is crowded with ships in reserve, the majority of them being in the second, third, and fourth classes. It will be observed that most of the homeward bound ships are from the East India and China Station.

THE FRENCH IN THE EAST.

A few years since the announcement that the French had occupied a spot on the shores of the Red Sea, in the neighbourhood of the Straits of Bab-el-Mandeb, would have caused as much glorification across the Channel as suspicion and jealousy here. Those who have been conversant with Continental opinions in our time know well that the possession of India, however underrated by a narrow school of theorists at home, is looked upon by foreigners not only as one of the greatest glories of England, but as a source of wealth and power for ourselves and our posterity. To obtain something similar for themselves, or, in default of this, to speculate on the means by which the bright jewel could be torn from the Crown of the British Sovereign, has been for a hundred years the fancy of the more ardent French politicians. There was, five-and-twenty years ago, a very natural belief among English politicians that France designed to assume the suzerainty of the whole African coast, and to obtain such a power in the regions bordering the Red Sea as would place the distant conquest of the British nation almost at her mercy. Heuce the bitter rivalry between the two nations in everything that regarded the East—a rivalry hardly composed by the alliance between the two countries in the Russian War. The desire to assert French influence in Egypt animated France in originating the Suez Canal in despite of the adverse opinions of Engineers, and jealousy at seeing so much power lodged in the hands of a foreign nation may, perhaps, have led the British Government to oppose with vehemence a scheme which might have been left to fall to the ground by its own scientific unsoundness. But there are signs that this mutual suspicion is passing away. We have now an opportunity of showing how calmly we can look on what ten years ago would have been denounced in most English circles as a dangerous aggression. The French Government, as we are informed on the authority of *La France*, "is about to take possession officially of Obok, a point in the Red Sea in proximity to the Straits of Bab-el-Mandeb. The steam-frigate *Hermione* has, it is said, been charged to carry this into effect. Obok is admirably situated for a coaling station, and the necessary works will shortly be commenced there." Thus our neighbours are also about to occupy their Perim. When we remember the part that this little islet, which was occupied by us as a coaling station a few years ago, played in the politics of the French press, and yet feel so little inclined to retort on the French for the occupation of Obok, it is not impossible to recognise how much the cause of international amity has gained within the last few years. We now know that if France takes possession of any scorching headland or shallow sandy harbour on the shores of the Red Sea, and sends a few marines to gasp in the perpetual vapour bath, it is done simply with the view of making communication more easy with regions further East, where her flag has a legitimate right to fly. In this case we know the objects of the occupation, and see that they are such as need not disturb the most suspicious Briton. The Messageries Impériales have now their Asiatic line in full working, with a large subsidy, and it is the wish of the Emperor that the success of this great national undertaking should be complete. Passengers, freight in large quantities, and a considerable amount of specie, together with the mails, will be perpetually passing to and fro in the French vessels. We see that the last steamer left Marseilles with sixty passengers and not less than £340,000 in silver. It may be, of course, that the Emperor is not disinclined to gratify his subjects with the possession of a French Perim or Aden on those celebrated shores; but the most obvious purpose is to render communication more easy with China, in which French commerce is rapidly increasing through the silk manufacture; with Cochin-China, where the French now possess three provinces; and with India, where they have their old factories and the power of taking part in the immense trade which is springing up in that regenerated country.—*The Times.*

THE CONDITION OF THE FRENCH EMPIRE.

A "Yellow Book," containing the statements of the different Ministerial Departments, has been laid before the Chambers. From the reports concerning War and Marine, we extract the following with reference to the position occupied by the French in the Far East:—

"The defence of European interests threatened in the extreme East, the conquest of a vast territory in Cochin-China, the events in North America, the expedition to Mexico; lastly, the protection of our countrymen, of our influence in all parts of the globe where they are engaged, have necessitated considerable armaments during the year just elapsed. At Shanghai, to save our establishments and preserve to European commerce one of the most important emporiums in those regions, we have been in conjunction with the English, obliged to repel the attacks of the rebels who were devastating the adjacent districts. The Commander-in-Chief has received instructions to engage in no struggles unless attacked or too hard pressed, and, in fine, to limit his efforts to securing Shanghai against the savage incursions of the Taipings. Moreover, we have reason to hope that the checks they have suffered at the hands of our soldiers, and the presence of the European detachments, will suffice to prevent further aggressions. The occupation of Taku and Tien-tsin, in concert with England as a guarantee for the execution of treaties, employs only a small detachment strictly necessary for holding the position we have chosen. In Japan the permanent presence of a vessel of war, to ensure respect for the French Legation, is but too well justified by the attacks which are still so frequently committed on Europeans by the natives. Notwithstanding the exigencies of the service thus arising in this part of the extreme East, the naval station has nevertheless been reduced to the figure of its regular composition, to which, however, it is indispensable to add a few small gunboats, which may be obtained from the docks at Shanghai. All the ships employed in the Chinese expedition, and subsequently in the conquest of Cochin-China, have then returned to France, so that, with the exception of a battalion of light infantry left at Shanghai we only maintain in those seas the forces that have at all times been thought indispensable to protect the political and commercial interests of France. In Cochin-China, after the glorious expeditions to Bien-Hoa, Baria, Ving-Luong, and the capture of Pulo-Condor, the Government of Hué has been obliged to sign a peace which cedes to France the three fertile provinces of Bien-Hoa, Saigon, and Mitho, with the island of Pulo-Condor, and which secures for humanity and religion those rights so long misconstrued, that we went to vindicate in concert with Spain. At the present day organisation is going on in place of war. To facilitate the re-establishment of peace and order, the Ministers of the Emperor of Annam who signed the treaty of Saigon have been placed at the head of the administration of the provinces that border on our territory; hitherto we have only had reason for satisfaction at their conduct towards us; but we must not dissemble the circumstance that our conquest and our pacification are of too recent date to allow us to consider our domination as definitively accepted by the former pos-

Digitized by Google

sessors of those rich countries. It is, then, essential to keep in Cochin-China forces sufficiently large to convince the Annamites who have submitted to the Government of Hué of their impotence as respects ourselves. At a later period only these gentle and industrious populations, already struck by our superiority, will completely understand the benefits they will derive from continuous relations with Europe, and the advantages they will reap from our establishment among them. Since the treaty of Saigon Admiral Bonard has been actively engaged in the organisation of the country. The bases of that which existed under the Government of Hué will be preserved; and these bases, already established in many parts of the territory, offer as many solid fulcrums for the raising of our domination over a people whose institutions have more than one analogy with those of France. The river Cambodia, which rises in Thibet, and has its mouth under the walls of Mitho, has been explored as far as the great lake by Admiral Bonard with the first steamer that ever hoisted a European flag in those waters. It was not far from thence that he discovered the remarkable Temple of Ancor, still standing—an irrefutable testimony of an ancient and powerful civilisation. Important works have already been executed. The lighthouse of Cape St. Jaques, first lighted up on the 15th of August, throws its rays on the banks of the river Saigon, and looks like a brilliant sign of a definitive possession of the country on the part of France. A telegraph wire unites Saigon with the principal points that we occupy; the material destined to complete the network will be located in a few months; houses are rising on the quays of the city; routes of communication are being everywhere completed; natives come in numbers to apply for work; timber has already been cut in forests which promise the best sorts of wood for our navy; the cultivation of rice, cotton, sugar-cane, tobacco, coffee, and silk is being re-established. The service of the Indo-Chinese packets, recently opened, has just given a new impulse to Saigon, where counting-houses are being erected; a floating dock will soon furnish us with the means of all indispensable repairs; finally, notwithstanding the short time that has elapsed since peace was signed, the hopes entertained by the Government of the Emperor in deciding to maintain a settlement in those countries are already beginning to be realised. Piracy—that scourge of the extreme East—does still, unfortunately, exist in some parts of Lower Cochin-China; it takes refuge in the numerous water-courses, as it has done in all times throughout the Malay Archipelago; but, traced as it is to its haunts, it will not long be capable of resisting the energy of our sailors, who penetrate with little gunboats into all the aroyos. The destruction of these bandits can, therefore, only be an affair of perseverance. If we cannot at present give a definitive form to the economic and financial organisation of our new possessions without the risk of coming into collision with many usages which we have still to study, we have, nevertheless, determined the principal rules. As regards commerce, they will be in conformity with the most liberal principles, and, while leaving provisionally at the charge of the Budget of the State the military and naval services, a recent decree has regarded the resources of the country itself as sufficient to meet all other expenses."

In another portion of the report we find the following statement with reference to the treaty in Cochin-China :—

"At Saigon a treaty has been concluded between France, Spain, and the empire of Annam, which puts an end to the war carried on in Cochin-China, and secures to us the definitive possession of the provinces of Bien-Hoa, Gia Diula, Diuh-Tuong, and the island of Pulo-Condor. The Government of the Emperor is convinced that our army and our commerce will derive great advantages from the acquisition of this new colony, which will contribute powerfully to the extension of our relations with the extreme East."

A FORCED CONSCRIPTION IN EGYPT.—It is unfortunate for the late Viceroy's memory that the same mail should bring the news of his death and the narrative of a proceeding which will shock all the English well-wishers in Egypt. It appears that about three weeks ago some of the French journals mentioned a contract between Said Pasha and the French Emperor for the enrolment of a negro regiment to be employed in Mexico. The statement excited no more attention in England than if we had heard that a battalion of native Algerians were to be enlisted and added to the Zouaves. The bare idea of a forced conscription for the service of a foreign Sovereign would never have entered an English mind, nor do we believe that either section of the Anglo-Saxon race in America would have impressed slaves by wholesale against their will into the ranks of the army. Such, however, was the bargain between the French and Egyptian Governments, and the terms of it were carried out with an absolute disregard of the rights or wishes of the poor creatures themselves. The very next day after the receipt of these tidings at Alexandria the *Seine*, a French transport, which had arrived with a body of troops for Cochin China was seen lying off the mouth of the harbour and getting up her steam. Meanwhile 400 or 500 of the Viceroy's negro soldiers "had been brought down from Cairo in the usual manner, little suspecting what was going to befall them." A body of police was in readiness, a number of boatmen were impressed to assist in the operation of getting them on board, and while the inhabitants of Alexandria were asleep the stratagem was completed, and before morning the *Seine* was out of sight with her living freight. Of course, the motive for kidnapping them is that African labour is required for the hardest and least healthy work of the campaign in Mexico. In that deadly climate black skins are in great request, and the Emperor, who justly takes credit to himself for having suppressed the system of "emigration," that was so liable to be mistaken for the slave trade, did not scruple to borrow a few hundred seasoned men from the Viceroy without asking questions. By what conceivable right the latter thus presumed to dispose of them remains to be shown. No person, of course, expects that a single one of these unfortunate creatures will ever return to Egypt to give an account of his experiences in the New World.

SWINDLING AT ALEXANDRIA.—The police of Marseilles have just succeeded in arresting a knot of remarkable swindlers. Several banking houses in Alexandria have lately been victimised by a swindler named Limker to the extent of at least £20,000. Limker had several accomplices, by whose means he expected to receive value for the draughts which he had obtained from the bankers of Alexandria by fraudulent pretences. Notice having been given to the police of Marseilles, measures were adopted to arrest one of the gang, named Weinberg, brother-in-law of Limker. Draughts were found in the possession of Weinberg to the amount of £12,000. It was known, however, that Weinberg was possessed of a much larger amount of property, and, as he would not give any information on the subject, further inquiries were instituted, when it was ascertained that he had negotiated one draught with a banker at Marseilles, from whom he had received 29,000 francs in bank-notes. Weinberg's sister and wife of Limker, who inhabited the same house as her brother, was then interrogated by the Commissary of Police, and she confessed that she had the bank-notes in her possession, which she handed to the police official. Then, fearing that she had compromised herself and might be arrested, she quitted Marseilles and proceeded to Paris. A telegram was forthwith despatched, and she was arrested on her arrival at the railway terminus. A sum of 79,000 francs was found in her possession. The elder brother of Weinberg, another accomplice, arrived at the same time from Paris, and draughts to the amount of 13,000 francs were found in his possession. It was likewise discovered that letters addressed to Madame Limker were dropped into the post-office. They were seized, and in them securities to the amount of 62,000 francs were found. The police of Marseilles have arrested the swindlers, and at the same time recovered the large sum of which the Egyptian bankers were defrauded.

THE PROSPECTS OF LIBERIA.—The message of the President of the Republic of Liberia (Mr. S. A. Benson), received by the last African mail, gives a satisfactory account of the progress and prospects of that country. The President details the circumstances of his recent visit to England, and speaks in grateful terms of the reception accorded to him, and of the disposition officially manifested to promote a satisfactory adjustment of boundary and all other questions in which England from her position on the African coast is relatively interested with Liberia. Great vigilance continues to be exercised by the Liberian Government to frustrate the slave trade from the neighbouring territories, and often with considerable success. The people are paying increased attention to the profitable cultivation of the soil, and the production of cotton, sugar, and other articles is likely to increase. Within the last twelve months six sugar mills have been imported. Iron and coal deposits exist, which it is hoped may soon be turned to account. A conviction is expressed that the war in the United States will cause an immense voluntary efflux of the coloured population of that country to Liberia, and this view is urged as a stimulus to all Liberians to set an example of industry that shall render the Republic increasingly beneficial as a place of refuge. The notice obtained by the contribution of Liberia to the International Exhibition, to which Mr. John Marshall was appointed Commissioner, is likewise alluded to with gratification.

RETURN OF AN ARCTIC EXPEDITION.—We hear, from Archangel, that Captain Krusenstern, of the *Jermack*, has returned thither in safety, after having been given up for lost some time. He was one of the expedition sent by the Russian Government to explore the mouth of the Yenisei, in the Polar Sea. The other ships and crew of the expedition had returned months ago, finding the obstacles on their way altogether insurmountable. The *Jermack* also was stuck in the ice, only a few miles from the mouth of the Yenisei. Captain Krusenstern and his crew reached the land by leaping from one block of ice upon another, doing battle bravely with all the horrors of the northern regions. Arriving at the shore, after infinite toil and wearied to death, they met with a party of Samoyedes, who at first fled, seemingly terror-stricken by the sight of these curious strangers. The interpreter, however, succeeded in making them understand the forlorn situation of the strange visitors; now they received the exhausted travellers hospitably, and at last helped them, by the loan of dogs, reindeers and horses, to return to Archangel.

PUNISHMENT IN RUSSIA.—A letter from Kieff, in the *Czas*, contains the following painful story :—"Colonel Krasucki, who was condemned to death for having assisted in circulating M. Hertzen's revolutionary journal, the *Kolokol*, has had his sentence commuted by order of the Emperor into twelve years' mining work in Siberia, with the loss of all his rank and position. This order was carried out by command of Governor-General Wasilczikow, in a public manner. The garrison was mustered on parade, and then the general appeared, surrounded by a numerous staff. Krasucki, in full uniform, and wearing all his orders, was placed upon the pillory, when the executioner cut off all his lace, ornaments, and orders, cut his uniform to pieces, broke his sword over his head, and then twice struck the unfortunate man in the face. As the executioner was about to remove the likeness of the Madonna, which the colonel wore round his neck by a riband, he offered opposition, and the military and crowd looking on murmured in a very audible manner. The portrait was accordingly left. His wife, who had determined to see him once more on this occasion, lost her reason. The wife of Governor-General Wasilczikow has also been reduced to the same condition since the death of her husband, which took place after the ceremony of the disgrace of the Colonel."

CEYLON RAILWAY.—About three years back, when the moderate estimate of the Ceylon Railway was disputed, and an extravagant sum was insisted upon by the *employés* of the company formed for carrying out the undertaking, the Colonial Secretary thought proper to refuse support to Captain Moorsom's plan, although that gentleman had offered to find a responsible contractor to undertake it, unless Captain Moorsom would, without any previous security, publish all his surveys and calculations—a measure which no engineer would submit to, since it would simply place in the hands of his competitors the power to alter and amend their estimates by pirating the ideas thus furnished to them. The consequence was a general break down of the whole affair, since the colony preferred to pay off the company rather than incur the heavy outlay which the Board and its engineers insisted upon as essential. The last mail from Ceylon finishes the history, and seems to show that, after having suffered a long delay, the colony has obtained and accepted a tender for the construction of the work upon terms which demonstrate that those offered at the outset by Captain Moorsom were perfectly correct. At the same time, the fact that Captain Moorsom was pushed aside for the advantage of others appears to serve as another indication, if one were wanting, that any engineer who seeks economy for his clients pursues a course which, at the present

COTTON CONSUMPTION.—It is calculated that the average weekly consumption of cotton in Great Britain last year was 22,900 bales, as compared with 45,900 bales in 1861, and 48,100 bales in 1860. The average

Digitized by Google

weekly consumption of France last year was 5,200 bales, as compared with 11,000 bales in 1861 and 12,000 bales in 1860. The average weekly consumption of the rest of the Continent was reduced last year to 8,300 bales. as compared with 18,100 bales in 1861 and 18,600 bales in 1860. An average total is thus arrived at of 36,400 bales per week last year, as compared with 75,000 bales per week in 1861 and 78,700 bales per week in 1860. This shows that the consequences of the American war were not very seriously felt in 1861, while they told with terrible effect last year. It is important to note that the export from Great Britain of cotton yarn and cloth in the first eleven months of 1862—for the official returns for the whole year are not yet available - exceeded the actual production in the same period by 93,850,000 lb., so that the accumulated stocks must have been reduced to that extent, holding out a promise of considerable future activity.

COMMERCIAL POSTSCRIPT.

CITY, TUESDAY AFTERNOON.

SILK.—The Circular of Messrs. Waithman, of this day, states:—We have had another busy fortnight in silk, though perhaps not quite so active a market as during the previous fortnight. Prices are wonderfully firm, and have more the appearance of being dearer than otherwise, especially for Taysaams, the future supply of which is expected to be scanty. Japans are freely taken on landing: prices seemed at one moment rather easier, but are to-day as firm as ever. Deliveries from the 1st to the 24th, inclusive—China, 4,702 bales; Japan, 1,184 bales. Total, 5,886 bales. The quotations for China Tsatlees are, No. 1, 24s. 6d. to 25s. 6d.; No. 2, 24s. to 24s. 6d.; No. 3, 23s. to 23s. 6d. Taysaams, Key-ing, No. 1, 21s.; No. 2, 20s.; No. 3, 18s. to 19s. Japans: Mibash, No. 1, 26s. to 27s.; No. 2, 25s. to 26s. 6d.; No. 3, 23s. to 24s.

ARRIVALS NOT INCLUDED IN THE TABLE.—Jan. 9, at New York, from Amoy, Magnet; 12, at Cadiz, from Maulmain, Mary Hyler; 26, at Queenstown, from Rangoon, Syren; at Deal, from Macao, Dewa Gungadnur; from Foo-chow-Foo, Bemah; from Colombo, Corinne; at London, from Colombo and Tuticorin, J. L. Hall.

DEPARTURES.—Jan. 22, from Hull for Singapore, Carl; 24, from London for Shanghai, Assyrian; for Singapore, China; for Cardiff, Ceylon, and Hong Kong, Jane Anna; 26, from London for Cardiff, Point de Galle, and Hong Kong, Anna.

SPOKEN. Nazarene, Liverpool to Sourabaya, Dec. 18, 12 S., 30 W. Sumatra (American ship), New York to Shanghai, Dec. 17, 4 N., 28 W. Nyassa, Penang to London, Dec. 17; Garrawalt, Shanghai to London, Dec. 17; Johanna Christina, Batavia to Rotterdam, Dec. 24; a Spanish ship, No. 3,475, 3rd d.p. Cadiz to Manila, Oct. 14, 13 N., 24 W.; Hero, Hong Kong to London, Nov. 23; Star of the East, Batavia to Amsterdam, Nov. 26; Willemina and Clara (Dutch), Java to Holland, Nov. 28, 34 S., 23 E.; 3rd d.p., No. 7,423, Colombo to London, and Canton, Foo-chow-Foo to London, both Nov. 30, 35 S., 20 E.; Victor of Allos, Singapore to Antwerp, Dec. 3, 35 S., 18 E.; Jan de Witt, Batavia to Rotterdam, Nov. 2, 26 S., 59 E.; Sopia Koniginn der Nederlanden, from Batavia, Nov. 15, 30 S., 37 E.; Lewe van Nyenstein, from Batavia, Dec. 5; Daphne (Amer. ship), from Manila off the Cape; Goede Verwachtung, from Java, 23 days out, Nov. 16; Raleigh, Shanghai to London, Nov. 28, 29 S., 45 E.; Augusta, Batavia to Amsterdam, Dec. 9.

CASUALTIES.—The William (ship), Hutton, from Singapore to London, foundered off East London, Cape of Good Hope, Dec. 22, crew, except two boys, drowned.

Capetown, 20th Dec.—The Melbourne, from Shanghai to London, which stranded N. of the Gouritz River on the 4th Nov., was sold a few days after she struck—cargo from her was afterwards shipped for this place by the Foam, and a letter from the wreck states that the Roe had left 12th Dec. for Table Bay, with 25 bales of cotton and 215 chests of tea, and that a large quantity of cargo had washed upon the beach, the hull having broken up.

The Tryntje Fenna (Dutch ship), from Batavia, had put into Capetown leaky, and will have to discharge.

LAID ON.—At London for Shanghai, Ballarat; for Cape of Good Hope and Singapore, Chieftain.

The Admiralty have engaged freight for Government stores in the Thames, from the River Thames to Colombo.

Monetary and Commercial.

CITY, MONDAY, JAN. 26.

With reference to the commercial treaty which has just been concluded with the King of Burmah, the circular by Messrs. Joseph Travers and Sons contains the following. The subject excites no small interest among the commercial community in this country, as is natural, considering that there is now every prospect of a new and very extensive field being opened for trade, which this journal has constantly kept before the public for the past two years:—

"The advices from India received yesterday contain an announcement of especial interest to all merchants and dealers connected with the produce of the East, namely, the completion of a commercial treaty with the King of Burmah. This object has for years been earnestly desired by all who are acquainted with the resources of that country, and with the peculiarities of its geographical position, which afford the readiest access to Western China. The present King of Burmah has long been known to be favourable to the cause of civilisation, and desirous of cultivating friendly relations with England through our Indian authorities, but until lately this disposition has not been sufficiently met by the home Government. It now appears that Colonel Phayre, our chief commissioner at Rangoon (the port of that portion of the country which was ceded to us many years back, and which is called British Burmah), has succeeded in obtaining a treaty which will accomplish all that the most sanguine could have expected. The details have not transpired, but they will reach us by the next mail, and meanwhile may, perhaps, be communicated officially by the Foreign-office. The distance from Rangoon to the Western provinces of China, which contain a population estimated at 80,000,000, is about 500 miles. Of this space 250 miles is through British and 250 through Burmese territory, and the distance between England and China would by that route be 1,500 miles less than at present. The country is alleged to be favourable either for a bullock road, a tram-road, or a railway; and the inhabitants of the district to be traversed are described by Rangoon merchants to be, notwithstanding their barbarous creed and rude condition, well disposed to facilitate the contemplated transit. The climate, likewise, is well spoken of; and it is an important fact, that while the portion of China with which it would bring us in contact is understood to be extremely rich, well populated, and supplied with roads, rivers, and canals, it has hitherto lacked all means of developing an exterior commerce, and can efficiently obtain that end only in the way now contemplated. The tea trade of Burmah is of great magnitude, and will now be much increased by the abolition of frontier duties between the native and British districts, Burmah is also celebrated for large deposits of petroleum, and in its general resources is, for its size, probably equal to any of the richest Eastern States."

The biddings for 40,00,000 rupees in bills on India took place on the 21st inst at the Bank of England. The proportions allotted were—to Calcutta, 18,90,000 rs.; to Bombay, 19,50,000 rs.; and to Madras, 1,60,000 rs. The declared minimum price was, as before, 1s. 11 3/4d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for about 140 lacs. Tenders on Calcutta at 2s. will receive about 85 per cent., on Bombay at 2s. about 14 per cent., and above that price in full; and on Madras at 2s. in full.

A further dividend of 1s. in the pound is announced as payable on the 27th inst. on the estate of Messrs. Reid, Irving, and Co., who failed in 1847, in the West India and Mauritius trade, with very large liabilities. Further dividends are anticipated as the realisation of the assets proceeds.

The present quotation (5s. 4 1/2d.) for Mexican dollars is the highest known for a period of about forty years. It is merely a nominal price, yet it is questionable whether any more dollars could be obtained at the same rate. The continuous advance in the value of this coin has been caused by the very moderate extent of the supplies from Mexico, combined with a certain though limited demand for China. The remittances of silver from Mexico of late have consisted almost exclusively of bars.

The French monthly mail steamer to the East, which sailed from Marseilles on the 19th inst., took out £340,000 in specie.

The half-yearly meeting of the proprietors of the Union Bank of London has been held, and it appears that the Bank has quite recovered the great Pullinger frauds. The net profits for the six months, after making the customary deductions, amount to £67,239, which is increased to £70,222 by the addition of £2,982, the amount brought forward from June last. The report, mentioning the declaration of a half-yearly dividend of 15s. per share, clear of Income-tax, and showing a balance of £25,222 for appropriation at the end of July next, was unanimously agreed to. The chairman, Mr. P. N. Laurie, stated that the deposits and current accounts are £1,000,000 in excess of the amount held at this time last year, and £1,500,000 above that held six months ago.

The fourteenth ordinary general meeting of the proprietors of the City Bank was held at the London Tavern, Mr. Peter Bell in the chair. The report and statement of accounts, which were adopted, showed a profit for the last half-year of £36,788, which with £2,172 brought forward from the previous half-year, made £38,961, out of which a dividend of 6 per cent. per annum and a bonus of £1 per share (equal to 10 per cent.) was declared, £2,660 being carried to the new profit and loss account. In responding to a vote of thanks to Sir R. W. Carden (the late chairman of the bank), that gentleman complained of the manner in which the directors had removed him from the chair, a step which left him no other course than to resign. He pointed out that the bank owed its existence to him, and that he had brought more accounts to it than all the other directors had done. He expressed his earnest desire to see the bank prosper, from which he had not withdrawn his account, nor had he, he asserted, sold a single share.

The half-yearly meeting of the proprietors of the Bank of London was also held, Sir J. V. Shelley, M.P., presiding. The balance of profit on the operations of the past six months was stated at £42,798, and the amount available for disposal at £27,069. The dividend declared was at the increased rate of 10 per cent. per annum, free of Income-tax, and £10,000 has transferred to the reserve fund, raising it to £82,000. The chairman mentioned that all the items in the accounts showed an improvement. The increase in the deposits and balances, compared with the same date in the previous year, is no less than £1,250,000, chiefly in the current accounts, and although the rate of discount had been low, the profit is larger than that

Digitized by Google

declared at any previous meeting. The report was adopted unanimously, and with much satisfaction.

At the meeting of the shareholders of the London and Westminster Bank, the net profits for the half-year amounted to £110,888, and are increased to £130,809 by the addition of £19,921, the unappropriated balance of the previous six months. After adding £6,406 interest to the "rest," or surplus fund (which now stands at £262,656), the directors declare a dividend and bonus equal to 12 per cent., or at the rate of 24 per cent. per annum, leaving £4,403 to be carried to the profit and loss account for the current year. The total distribution for the year amounts to 22 per cent. The deposits of the bank now amount to nearly £14,000,000.

The East India and London Shipping Company's steamer *Jason*, the loss of which vessel near Madras has just been recorded, was of 2,668 tons burthen, with engines of 350-horse power, and was insured for about £50,000, at Lloyd's and elsewhere. This sum fully covers the amount paid for her by the company. The *Jason* was built of iron in 1856 by Messrs. C. J. Mare and Co., of Blackwall.

The Milwall Iron Works and Ship-building Company (Limited commenced its operations under this title, with a fully subscribed capital of £300,000 on the 1st instant. These works which, till within a few months, were in the possession of Mr. C. J. Mare, it appears required a larger amount of capital than he could command; and, therefore, with the assistance of Mr. J. L. O'Beirne, who previously had been connected with the manage ment, an association was formed late last year for purchasing Mr. Mare's interest, and thoroughly developing the capabilities of the establishment. The parties who have entered into the arrangement are several influential capitalists and contractors of accredited position, under whose auspices the new concern will, it is believed, work well and show highly profitable results. There are now on the stocks the Government war frigate *Northumberland*, of 6,600 tons; and 10,000 tons of shippingin course of construction, including a large steamer for the Peninsular and Oriental Company, and a cupola ship for the Italian Government; while a contract has just been concluded for a war frigate with the Spanish Government of 4,000 tons. It is asserted that the capability and power of the iron rolling mills and hammers in the forging department will not, when thoroughly completed, be surpassed by any others existing in the country. The active superintendence of the works having been placed in sound practical hands, the progress in this respect it seems is considered encouraging.

Messrs. Maitland, Ewing, and Co., who suspended in the East India and China Trade in April, 1858, and discharged all their liabilities in full in March, 1859, have just paid interest at 5 per cent. to their various creditors.

With reference to the Western Neilgherry Coffee, Tea, and Cinchona Plantation Company (Limited), we (*Daily News*) have received a copy of a circular containing extracts from a despatch sent by Sir Charles Wood, Secretary of State for India, to the Government of Madras, dated the 16th inst., and the publication of which has been authorised. Sir Charles Wood refers to the complete success which has hitherto attended the important experiment of cinchona cultivation, and remarks that it has now "become necessary to take effective steps, both to ensure the steady annual increase of the area of the Government plantations in the Neilgherries, and the introduction of the cinchona into other hill districts." The official despatch further states as under:—

"Two companies have already been formed in London for the object of cultivating cinchona, in combination with coffee and tea, in the Western Neilgherries and Wynaad; and I observe that Mr. Lascelles, the agent of one of these companies, has already bespoken 10,000 out of the 20,000 plants which are to be sold this year. Cinchona, when grown together with coffee, is likely to be a profitable investment, especially if the leaves can be turned to account, notwithstanding the greater length of time that must elapse before any profit can be expected from the former. I am, therefore, inclined to take a more hopeful view of the prospect of capital being invested in this speculation than your Government has been able to do; and I desire that every legitimae encouragement may be extended to individuals or companies who may undertake cinchona cultivation."

The mania for new joint-stock banks (says *The Times*) has been but very partially checked, and the various promoters are still daily sending out circulars to the various merchants and others whom they hope to entice to become directors. Another bank for Wales is alleged to be in process of concoction; several fresh ones are spoken of for the American business, and the Continent and the colonies and all other parts of the globe are also, if possible, to be furnished with additional "facilities."

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton, on the 20th inst., was—in gold: To Alexandria, £31,700; to Madras, £7,355; to Singapore, £4,000. In silver: To Calcutta, £50,000; to Hong Kong, £21,933; to Shanghai, £15,610. Total in gold, £43,055; in silver, £87,543.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very strong, notwithstanding the very heavy supplies offering from the recent numerous arrivals. The idea gaining ground as to a reduction of duty being probable, and some purchasing on export account, have been the cause of this firmness, which has resulted in an advance on all good and fine kinds of Congou and Souchong, also on medium blackish leaf kinds of Congou, the only decline being in medium flavory sorts. Low to fair common Congous have sold to a moderate extent at former prices. Good Common is neglected at 1s. to 1s. ½d. per lb. Flavory kinds of old Imports, as also Common Hohows kinds remain difficult of sale. Fair to good Ho-hows and Ning-chows, also second-class Monings and Wopaks of old import are 1d. per lb. dearer, owing to the high prices ruling for new seasons. Flavory kinds ranging from 1s. 4d. to 1s. 7d. per lb. have been difficult of sale at a decline of 1d. to 1½d. per lb. Good Kaisows have been wanted, and prices show a rise of 1d. per lb. Second-class Monings and Wopaks have sold very readily, and prices have advanced 1d. to 1½d. per lb. Fine to finest Monings, Wopaks, and Kaisows continue in good demand, and prices are about 1d. per lb. dearer. Tayshans are without inquiry. Oolongs have been difficult of sale at a further reduction of 1d. per lb. Souchongs have sold very freely, and prices show an advance 1d. per lb. for fine to finest descriptions. Flowery Pekoes remain difficult of sale. Common Scented Capers show no alteration. The low prices for the fair to good and fine descriptions have attracted attention, and sales have been made to some extent at from 1s. 3d. to 1s. 9d. per lb. There has been more doing in Scented Orange Pekoes, medium qualities from 1s. 5d. to 1s. 7d. per lb. being most in request. Foo chow kinds of both have been difficult of sale at 1d. per lb. decline. Assam and Cachar kinds still readily at very full prices. Uncoloured Japan kinds have been required for from 1s. 3d. to 1s. 5d. per lb. The demand for Green Teas has been steady, and prices for all kinds, except Common to fair Young Hysons, have been fully supported; these, from over supply, show a decline of 1d. to 2d. per lb., and at this are not readily saleable, Fine Canton-made Young Hysons have realised 1s. 2d. per lb. at public sale. Canton Gunpowders show no alteration. A public sale took place on the 20th inst., comprising 24,230 packages, of which 14,155 packages were sold, including 8,320 packages without reserve, and 1,462 packages Assam and Cachar kinds.

SILK.—The latest quotations will be found in our commercial postscript.

SUGAR.—Prices continue firm, although little animation characterises the market, a want of confidence appearing to exist. Transactions have been too limited to remove the heavy appearance of the market; the purchases of the home trade have been confined to immediate payments. 3,152 bags of Penang have been disposed of at the following rates, which, it will be observed, are somewhat lower: Good middling to fine brown, 31s. to 33s. 6d.; low and middling yellow, 34s. to 35s. 6d. On the 23rd inst., 3,632 bags Penang went off more freely, and, on the average, at firm rates: middling to fine brown, 33s. to 33s. 6d.; low and middling yellow, 34s. to 36s.; good and fine, 36s. 6d. to 38s. Current quotations are:—Bengal: Crystalised, good yellow and white, 25s. to 28s. 6d.; Benares, grey and white, 23s. 6d. to 29s.; date, yellow and grey, 20s. to 26s. 6d.; ordinary to fine brown, 14s. to 19s. 6d. Penang: Grey and white, 26s. to 27s.; brown and yellow, 16s. to 25s. 6d. Madras: Grocery, grainy yellow and white, 22s. 6d. to 23s. 6d.; native, brown and yellow, 15s. 6d. to 19s. 6d.; jaggery 14s. 6d. to 16s. Siam and China: White, 24s. to 29s.; brown and yellow, 15s. 6d. to 23s. 6d. Manila: Clayed, brown and yellow, 19s. to 21s.; Muscovade, 15s. to 16s. 6d. Java: Grey and white, 25s. to 29s.

COFFEE.—Nearly all the descriptions continue in active demand. The amount offered at public sale has gone off with readiness. In Ceylon, the sales have been particularly spirited, and prices show an advance of fully 6d. to 1s. on our previous quotations. The shippers have been the chief purchasers. A large quantity of Plantation Ceylon has been offered; the sales were at extreme rates, a few parcels of the new crop causing some competition among exporters. 783 casks, 665 barrels and bags of Plantation; Low Middling, and Middling brought

Digitized by Google

85s. 6d. to 90s.; Fine Middling up to 93s. 6d.; and 276 casks, 2,611 barrels and bags native, good ordinary to fine 73s. to 78s., very superior picked 77s. to 78s. 6d.; and by private treaty, 200 casks fine ordinary have been sold at 74s.; of Mocha 1,617 packages have been brought to auction, greater part was taken off; greenish to good clean garbled short berry 90s. to 94s. 6d.; a slight reduction on prices at last public sales; it was purchased principally for export. We quote Mocha, ungarbled 60s. to 78s., garbled corn to good, 80s. to 93s., garbled fine, 95s. to 103s.; Ceylon Native good ordinary to fine 72s. to 76s., ordinary 68s. to 71s.; Plantation ordinary to fine ordinary 73s. to 83s. 6d., fine ordinary to middling 84s. to 87s., good middling to fine 87s. 6d. to 94s.; Java 67s. to 87s., Singapore, ordinary and good ordinary 56s. to 78s.; Sumatra, 57s. to 72s.

HEMP.—Prices for jute have advanced 10s. per ton, and the current rates are £20. 10s. to £29. A fair business has been done both for arrival and on the spot. Of 14,849 bales brought to auction, about half were sold. Arrivals and sales advertised. A good business done in Manila. Of 7,577 bales at auction, about half sold. Lupez has brought £58. 5s. to £58. 12s. 6d.; Sorsogon, £28 to £28. 10s.; and fair current, £25. 10s. to £26. 5s. per ton. Sales advertised. In sum, extreme prices are barely sustained; 256 bales of Calcutta, at auction, realised £23. 10s. to £29 for inferior to good.

RICE.—Privately, only small parcels, comprising about 9,000 bags, have been sold on the spot, for which steady prices have been obtained, viz., middling white Bengal 11s. 9d. to 12s., fair Moonghy and Ballam, 8s. 3d. to 8s. 9d., good Ballam, 9s., and good Bassein 10s. There has been some inquiry for floating cargoes for Spring shipment. 3,926 bags Bengal at public sale were brought in. We quote good middling white 12s. 6d. to 13s., cargo 8s. to 8s. 6d.

PEPPER.—Amount offered at auction have excited rather more competition; 2,011 bags Singapore Black was disposed of chiefly at the following rates: Dull and grey, 3⅝d. to 3¾d., fair to good black, 3¾d. to 3⅞d.; some spirited bidding took place for 1,100 bags fair to good dark Penang, which bought 3¾d. to 3¼d.; 85 bags fair Batavia sold at the same rates. 1,000 bags Black Singapore have been disposed of privately, 589 bags middling to good fair Singapore White were all disposed of, the bulk at 5¼d., a few lots 5⅜d., common 5⅛d. and 5¼d. Current prices are, Malabar, &c., 3⅞d. to 4¼d.; Eastern, 3⅛d. to 3⅜d.; White, 5d. to 1s. 2d.

SAGO.—No public sales or private transactions to report; 298 boxes small Pearl, meeting reduced offers, were withdrawn.

SPICES.—Pimento: The greater part of 1,020 bags in public sale, was held for an advance on the present value, and bought in; for the remainder full prices were paid. viz., ordinary to good middling quality 2⅛d. to 2⅛d. per lb. Current price, middling to good 2⅜d. to 3d. Cinnamon.—The quarterly sales advertised for the 26th instant will comprise about 2,200 bales Ceylon. Quotations, Ceylon 1, 2, 3, 11s. to 2s. 6d., Malabar and Tellicherry, 7d. to 1s. Cassia Lignea continues in but little request, of 290 boxes, at auction, a few low middling were taken at 97s. Current prices 95s. to 102s. per cwt. Cloves.—728 bags Zanzibar, offered in public sale, comprised damaged, which were about half sold at 3⅜d. to 3⅝d. the sound portion, common to fair, was mostly realised at 3⅜d. to 4d. We quote Amboyna and Bencolen 4⅛d. to 1s. 4d. per lb.; Zenzibar and Bourbon 3⅜d. to 4⅛d. Mace.—The finer sorts obtain stiff rates, but inferior qualities about the previous value, 62 cases selling as follows—middling to good red, 9d. to 11d.; palish, 1s. 4d. to 1s. 5d.; bright pale, 2s. Nutmegs continue to be freely bought at about former rates. 163 cases being all sold, viz., small, 10d.; middling, 1s. to 1s. 1d. good middling, 1s. 5d. to 1s. 8d.; rather bold, 2s. 10d. 73 boxes fair limed, from Rio de Janeiro, were bought in. Ginger.—East India common is quoted at 63s. per cwt., but the price is nominal. Cubebs.—£5. 15s to £6. 5s.; have fallen 5s. to 10s. per cwt., but at that decline have been taken to a considerable extent, partly on American account. 159 bags in auction, chiefly sold at 88s. to 108s. for damaged. Dragons' Blood, in reeds, £11 to £15; in lumps, £4 to £11; flat, and 64 cases at auction, all retired. Galangal Root, 25s. to 30s. Also flat. 114 bags at auction retired. Mace and Nutmegs, dearer; 2 cases sold at auction at 1¾d.; range of price, 1¼d. to 1¾d.

COTTON.—Little animation characterises the market, and prices have latterly declined ¼d. to ⅛d. per lb. The sales on the spot have been 4,200 bales, the bulk Madras; good fair and good Tinnivelli, 17d. to 17½d.; fully fair Westerns, 16½d; middling to fair Surat, 17d. to 17½d; and middling to good fair Bengal, 12½d. to 19½d. For arrival only 1,800 bales have been sold.

MISCELLANEOUS.—Cassia Lignea, 1, 2, and 3 quality, 95s. to 101s.; very quiet, and of 677 boxes at auction, a few lots only sold at 97s. per qr. for second quality. Buds, 260s. to 280s. The market has been cleared at our higher quotation, and not a chest of genuine buds now remains in London. Operations in camphor have proved very striking, prices fell with singular rapidity from £9 to £5 per cwt. Large business done, chiefly at £6 down to £5. 2s. 6d. The stock on hand is ample, the quantity afloat is extremely large. A few chests in second hands have been sold at £5. 15s., £6, £6. 5s., £6. 10s. show a recovery from the former lowest point of 30s. Oil of Aniseed, 5s. 3d. to 5s. 4d., is again 3d. per lb. cheaper; large business done privately at our lowest quotation. 47 cases at auction, half sold at 5s. 3d. to 5s. 4d. per lb. Nothing doing. Cajaputa, 2½d. to 3d., lower and very flat, and 45 cases at auction were all retired. Cassia, good flavour, 8s. 8d. to 8s. 9.; small sales made privately. Sapanwood, Bemah, £5 to £8; Siam, £8 to £11; quiet, and Manilla cheaper; 18 tons thereof sold at auction at £5. 12s. 6d. per ton. 20 tons Siam retired. Nothing of consequence doing privately. Shells, mother-o'-pearl, Sincapore, 125s. to 150s.; Manilla, 80s. to 100s.; remain firm, with little offering. Soy, 2s. 6d. to 2s. 8d.: scarcely so firm, but 54 casks at auction, chiefly sold at 2s. 6d. to 2s. 7d. per gallon. Star Anniseeds, 95s. to 105s.; very scarce and much wanted. No auctions. Sticklac, Siam, 55s. to 80s.; all sold with great irregularity, but being on the whole much cheaper. Of 1,512 cases at auction, half sold at 61s. to 76s. per cwt. for good to fine Siam; limited trade privately. Teeth, elephants', seventy lbs. and upwards, £36 to £38. 40 to 60 lbs., £33 to £35; 20 to 40 lbs., £28 to £32; Scrivelloes, £15 to £32; Ball, £30 to £40; the quotations are for sound Siam ivory, which is in demand; transparent Ivory of all kinds being scarce. Terra Japonica, Cutch, Pegue, 24s. to 26s. 6d.; good business has been done during the month up to 27s. per cwt., but it has receded to 26s. 3d Only 180 bags at auction, partly sold at 26s. 6d. Gambier, 21s. to 22s. 6d.; prices have risen 6d. to 1s. per cwt.; and of 3 510 bales at auction, one half sold at 20s. to 22s. 3d. per cwt.; for middling heated to good. 141 baskets fine, in squares, realised 26s. 6d. to 29s. Our higher quotation obtained privately, and demand active. Large transactions also entered into for arrival at 19s. 6d. to 20s. Tin.—Banca, £119 to £121; straits, £118 to £120. This metal remained quiet till recently, but within the last few days large operations have been accomplished in straits up to our quotations, being an advance of £1. to £2. per ton. In banca trade moderate. Tortoiseshell: Fine quality, 22s. to 26s.; sorts, 14s. to 21s.; inferior, 10s. to 13s. Nothing doing. Turmeric, 16s. to 30s. China scarce and dearer; 60 cases sold at auction at 29s. to 30s. per cwt. for fine, and 180 bags Java retired. Vermillion, 2s. 2d. to 2s. 4d Only five boxes sold at auction at 2s. 3d. per lb. Wax, Japan, 62s. to 85s. Of 222 cases at auction, one-fourth sold 72s. 6d. to 73s. Cochineal, Honduras, 2s. 4d. to 3s. 4d. All descriptions steady. Good Honduras silver 1d. per lb. dearer: supply of that class being inadequate to demand. Quality suitable for India worth 3s. to 3s. 2d. per lb. 1,300 bags at auction. Opium, Turkey, 19s. 6d. to 20s.; Egyptian, 11s. to 13s. Our higher quotation has been paid for fine Turkey, but there are few buyers thereat. Quicksilver, £7. Obtainable at the quotation. Saffiron, 35s. to 36s. Ebony Wood, £6 to £13. Myrabolanes, 11s. to 13s. 6d. Red Saunders Wood, £6. 10s. to £7. Senna, Tinnevelli, 4d. to 1s. 6d. Turmeric, 25s. to 30s. Galls, blue, 100s. to 110s; sorts, 70s. to 85s. Gum Ammoniacum, drop, 80s. to 122s.: block, 20s to 60s. Gum Animi, 1st size, £8. 10s. to £11; 2nd and 3rd size, £6. to £8; partially scraped, £2 to £6. Gum Arabic, picked, 32s. to 57s.; sorts, 25s. to 35s. Assafœtida, drop, 100s. to 120s.; block, 25s. to 90s. Market very dull here.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £7 nail rods, £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £9. 5s. to £9. 10s.; Staffordshire bars, £7. 15s. to £8; rails, £5. 15s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £105 per ton; yellow metal, 9¼d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I. C. 29s. to 30s. per box.

LEAD, &c.—English pig, £21 to £21. 5s.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £18.; zinc, English sheet. £23. 10s. to £24; quicksilver, £7 per bottle.

The export of metals to China for 1862 sand as follows:—Rail iron, 133 tons; pig, 454; bar and nail rod, 7, 156; hoops and sheets, 515; steel, 173; copper in sheets and nails, 220; yellow metal, 548; pig lead, 8,277; sheets, 450; spelter, 50; zinc, 19; tin plates, 10,081 boxes; quicksilver, 630 bottles.

The following is from the circular of Messrs. French and Smith:—A steady trade has been doing this month, principally for consumption. Iron is firm. Copper: Manufactured is not much in demand, but for unmanufactured there is enquiry. Tin: English is firm; foreign is rather improved. Straits, 117s.; cash, 118s. three months, for fine quality, at which some business has been transacted. For tin plates there is enquiry. Lead is firm, but rather quieter. Spelter rather firmer.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers (not including the present mail).

MANCHESTER MARKETS.

The yarn market is still quiet, but we have had a more hopeful feeling, with rather more inquiry, though it has not yet resulted in business. Judging, however, from circumstances attending this inquiry, and the various quarters it has come from, there is a confident feeling that there will be more business a few days hence, and at rather better prices than spinners would have accepted to-day. The tone of the market is decidedly more cheerful than it has been for some days past, and buyers have manifested more disposition to operate. There is hardly so much as a fractional change of prices to-day, and sellers are asking the highest rates current within the last fortnight, and have manifested no disposition to accept anything less. In cloth the market has been very dull. In the absence of any mail from the United States of America people seem unable to make up their minds to operate, and there is quite a pause in business for nearly all kinds of cloth. The home trade appear to be giving out no fresh orders, and are buying; but little

Digitized by Google

but the orders given out during the last six or seven weeks are in course of delivery, and would appear to be nearly sufficient to meet any demand that is experienced by houses in this trade from their retail customers. When it is recollected how many years it took to induce people to give up high-priced linens in favour of cheaper calicoes, it can hardly be wondered at, now that calicoes are, in many cases, fully as dear, if not higher priced than linens, that it should be a work of time and difficulty to sell home trade goods at the comparatively high rates which tradesmen are compelled to charge for them. Though the market here is stagnant, however, to-day we hear of no change in prices. There is no inquiry for India, and the shipping appears to be quite as inactive as any other branch of trade.

CASUALTIES.

The William Carey, from Singapore, did not arrive at Deal 30 Dec., as reported.

ROCHESTER, 13 Jan.—The Johannes Christian, Obelt, from London, for Batavia, &c., which put in here, 8th Jan., after collision, reports that, while in the Downs on the 5th, the Lady of the La e (barque), also at anchor, came across her, by which serious damage was caused.

The Ravensworth Kaurin, from Shields, and Christiansand for Singapore, put into Portsmouth 16 Jan., with loss of jibboom, foretopmast, mainyard, three boats, binnacle, sails, rails, and bulwarks, foretopmast sprung, damage to upper works, and four men sick. She had experienced heavy gales between the Faroe Islands and Shetland, and had had one man washed overboard.

PLYMOUTH, 15 Jan.—The Isabella Bruce, from London, for Singapore and Penang, which was towed into Catwater after striking on a sunken rock off the North Foreland, proved to be leaky, and will have her bottom examined.

ROTTERDAM, 19 Jan.—The Zephyr, Schey, from Batavia, slipped two anchors and got aground near Brouwershaven, the wind blowing a gale from N. W., but was got off at high water.

FAYAL, 3 Jan.—The Typhoon (Amer. ship), Salter, from Manila to Queenstown, put in here 25 Dec., very leaky, and was placed in quarantine for a few days, some of her crew having died. She is now discharging.

The Abo, from Manila, for Liverpool, put into Cadiz 21 Jan. with masts sprung.

The Stad Leyden, Vander Poll, from Amsterdam, for Samarang, which put into Bahia 15 Dec, had sprung her foremast and sustained other damage, but would not require to discharge her cargo.

At ST. HELENA, Dec. 6, from Bombay and Trincomalee, Star of the South; 4, from Shanghai, Ganjam.

FREIGHTS AND CHARTERS.

The amount of tonnage loading on the berth for India, China, and the Cape of Good Hope, is 50,266 tons. Outward freights continue firm, both for general cargoes and coals, and shipping is in fair demand.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 30s. 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £52 and £2. 7s. 6d. For Manila, £1. 5s. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £26 and £1. 8s. For Penang, £24. For Galle, £26 and £1. 10s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight for Government stores in the Maiden Queen for Hong Kong, and have offered the following for tender, viz.:—86 tons navy provisions and medical stores from the River Thames to Hong Kong, and 68 tons ditto to Trincomalee.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 45s. to 55s.; Shanghai, 55s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1863.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.
THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG

HOLLOWAY'S OINTMENT AND PILLS.—EXPERIENCE BEFORE AUTHORITY.—For nearly the third of a century have these remedies stood in the foremost rank for overcoming ulcers, sores, swellings, rashes, and all descriptions of skin diseases. At first the Faculty denounced these medicaments; but the experience of sufferers soon overthrew all interested opposition. Those whom Holloway's medicines had cured told other invalids the benefit they had derived from their use, these in their turn tried them, found equally satisfactory results, and thus are these admirable curatives used and prized throughout the habitable globe. The Ointment has always been applied with the most marked success in bad legs, erysipelas, varicose veins, swelled ankles, and numberless other infirmities by which thousands around us are sorely oppressed.

LIFE DEPARTMENT.
(REDUCED RATES FOR THE EAST INDIES AND CHINA.)
The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considera ly lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world not chargeable with an extra premium.
According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying a fixed rate which, it will be seen is very little higher than the home one.
The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.
ANNUAL PREMIUM FOR THE INSURANCE OF £100.
(Payable during the entire currency of the Policy.)

Age.	Without Profits.			With Profits.			Age.	Without Profits.			With Profits		
	£	s.	d.	£	s.	d.		£	s.	d.	£	s.	d.

Summary of News from the Far East.

JAPAN.

The nobles continue to leave Yedo. According to the latest advices, which reach to the 15th December, the English Legation was at Yokuhama. Several rumours are current which, however, cannot be relied on, one of which is that the Mikado has been seized; and another, that the father of the Prince of Satsuma has been murdered.

The foreign community is, it is stated, anxious to learn what steps will be taken by our Government with regard to the murder of Mr. Richardson.

The Russians are said to have the following fleet in Eastern waters, chiefly in Nagasaki, ready to join the allies in suppressing the Chinese Rebellion:—1 Corvette, 21 guns and 281 men; the Bogatin flag-ship; Calavala, 10-gun corvette, Commodore Tshebescoff; Novick, Rinda, and Posadnick, 10-gun brigs, 180 men each; Rasbonwick, Nyasnick, and Morge, gun-boats, each four guns, and from 80 to 100 men; Abreck, despatch-boat, 2 guns and 80 men; America, paddle-wheel steamer, 4 guns and 120 men; Japanitz, transport, 2 guns and 140 men.

CHINA.

PEKING.

There is no news of any interest from the capital.

SHANGHAI.

Our correspondent writes, under date Dec. 23:—

"We have, during the past few days, been rather rudely disturbed from our fancied security. Since the 13th of this month there have been no less than six attempted assassinations in the settlement, and in consequence revolvers, life-preservers, and thick sticks are in great demand. A little shortlived excitement has been caused by a report that there would in future be a weekly mail to and from Europe per one of the *Messageries Impériales'* steamers. Whether we shall be lucky enough to obtain a weekly mail appears at present rather doubtful, and still more so whether, even if we should get it, its arrivals would be anything like so certain as those of the villified P. and O. Co.'s steamers.

"It is astonishing how dull everything is at the present crisis. Little trade is being done. Wet weather prevails over the north of China, and in Japan—even the rebels in China and the Yaconins in Japan partake of the general slowness of affairs, and have alike given up slaughtering luckless Imperialist women and children on the one hand, and harmless foreign travellers on the other. Other prospects in Japan appear rather more cheerful than they did some few months ago, but there is a general impression that ill-will towards the Western residents is only smothered and not extinguished, and will readily break out on the slightest encouragement. You will have heard of an intended movement on Nanking, under the nominal supervision of Wu, the late Taoutai of Shanghai. This expedition has been postponed in consequence

Digitized by Google

of the extremely unfavourable weather we have had for some days. It would appear from the late surveys of Nanking and the country round that any attempt at its capture by a purely native force must be unsuccessful. At any rate, even if Burgovine's troops succeed in making any impression, however slight, on the walls or on the garrison inside, it will give the 'ever conquering army' (Ward's force) a *prestige* that they do not now enjoy. It is tolerably evident that sooner or later the disciplined Chinese troops will be metamorphosed into an English contingent, or at least that English influence will be dominant. The officers now holding the most important, positions are, with the exception of Burgovine himself, all English. Indeed, unconscious encroachment is the order of the day, and England will in a few years find China, or a part of it, thrust upon her.

"Up the river all is quiet. There are as yet no signs of any rebel movement of importance around Hankow. The obnoxious 'braves' who recently surrounded the latter place have disappeared, and petty outrages have therefore become by far less common. The regulations for trade on the Yang-tse not coming into force until January, have as yet created little excitement, but as soon as we absolutely experience the inconveniences consequent on the enforcement of the regulations there will be, no doubt, a disturbance.

"The Hong Kong papers will inform you of Windham's capture, of his progress from Shanghai to Foochow, where he was entertained by Messrs. Jardine, Matheson and Co., until news of his delinquencies arrived, when he was unceremoniously kicked out; of his advance on Hong Kong, and successful career there, of his subsequent trips to Macao for change of air, succeeded by a trip back to Canton, where he secured a passage in a brig starting to England, but was, alas! himself secured before he could go on board. He is in Hong Kong gaol, and likely to remain there for a while. Even now scarcely anyone in Shanghai appears to have made up his mind as to the question of identity, and people say frequently, 'Well, if after all this be Windham, what a row there will be in England.' The interesting swindler had not up to last advices confessed the cheat, but still persists in his claims to the name, &c., &c., of the real Simon Pure.

"The garrison theatricals have not come off yet. I fear they will turn out a delusion and a snare, as, so far as we can see, there have been no preparations made either in the way of a theatre, or dresses, or stage properties of any kind. A masonic ball is spoken of, but where there are so few ladies dancing is simply a bore."

With reference to the letter from Dr. Legge, in favour of the Taipings, which was published some months since in our own and other journals, the *North China Herald* writes:—

"Dr. Legge is hardly in a position to enter into the feelings of the residents of Shanghai, on a point to them of such vital importance. He resides in the sea-girt isle of Hong Kong, within a comfortable Mission House, in a British colony where life and property are as safe, and aggression from without as little thought of, as at Gravesend or Greenwich. We in Shanghai, on the contrary, live some eight or nine hundred miles from Dr. Legge and his secure home; and, but for the presence of ships of war, and between 3,000 and 4,000 British and French bayonets round us, would be from day to day in dread of attack; so that in place of retiring after the fatigues of the day to our peaceful slumbers, we should be taking our guard duty as a volunteer defensive force at the various barricades on the outskirts of our settlement—of which necessity has compelled the erection—a duty which, until the arrival of reinforcements from Tientsin and Hong Kong, was a reality of the civilian's life during the severity of an unprecedented winter last season in Shanghai."

The increase of crime in the settlement, which is mentioned in our correspondent's letter, awakens some anxiety. On the 5th December, a most audacious and dastardly attack was made upon some premises at the Old Race Course, belonging to Mr. Howell; occupied at the time by his stable boy and four other servants. The miscreants, who endeavoured to force an entrance into the house, managed to get the stable boy to come out and see what was wrong, when he was shot dead on the spot, right through the head. The remaining coolies, thinking the man who fired the shot was single handed, came out to seize him, but were all shot down in turn; with the exception of one who did not go out. After this the murderer walked quietly away. The person who fired the shots was armed with a revolver, No reason can be assigned for the perpetration of this murder. A reward has been offered of $100, for any one giving such information as may lead to the detection of the culprit or culprits.

On the 21st Dec., up the Barrier Road, another daring murder was committed, accompanied with robbery. It appears that about 7 P.M. a coolie was carrying a basket of sycee silver from a banker's. When he arrived within a few hundred yards of the Military Police Station opposite the Maloo Gate, he was there set upon by three men, one of whom stabbed him in the breast, while the others seized the basket of sycee and made off. Another coolie accompanied the man carrying the sycee, and seized one of the men, who held in his hand the sheath of the weapon that had done the deed. At this time Sergeant-Major Leach, of the Military Police, under Captain Gould, arrived at the spot, and handed the prisoner over to the municipal police. On the same day a man was attacked by some robbers, and fearfully wounded, in the Hong-que district of the settlement. He had fourteen severe sabre wounds on the breast and back, and was carried into the Chinese Hospital.

With reference to the "Revised Regulations" on the Yang-tse, an anonymous correspondent of the *North China Herald* writes:—

"As your distant readers cannot be supposed to understand the question of the navigation of the Yang-tse-kiang, nor to appreciate the importance of the retrograde step lately taken by the English and American Ministers, it may be useful to state clearly why the community of Shanghai are surprised and disappointed by the "Revised Regulations," to the degree shown by the recent contributions to the press. I propose, therefore, to state as briefly as possible some of the main points of the case.

"First, then, the Yang-tse-kiang flows for many hundred miles through the richest provinces of China, and the products of an exceedingly active and industrious people, numbering many times the population of Great Britain, can best reach a market from its banks, which present an immense number of points from which native goods can be sent to the treaty ports, and at which foreign merchandise can be conveniently delivered. Between these various points also a very extensive commerce was formerly carried on, and this commerce, although now paralysed by the rebellion, was likely to increase immensely as soon as steam was thoroughly applied to it. Now, this magnificent domain for the development of commerce was supposed to have been once and for ever conquered for free trade by Lord Elgin in 1858, and the following are some of the grounds upon which this supposition was based:—

"1st. By the English Treaty of 1858, the whole interior of China was opened to foreigners, who were declared to be at liberty to go everywhere for the purposes of trade, and even to build houses, warehouses, &c., wherever they pleased.

"2nd. By a special article of the same treaty (No. 10) it was agreed that 'British ships shall have authority to trade upon the great River (Yang-tse),' and it was, moreover, agreed that three ports of entry should be established upon the river after its waters were freed from the insurgents.

"3rd. The establishment of these three ports of entry was not meant to limit foreign trade to these points, but its object was simply to furnish convenient places at which merchandise from without could be entered direct, and from which native products could be cleared direct for foreign places.

"This is apparent from the general tone of the treaty, and also from the fact that the tenth article begins in the Chinese version of the treaty with the following words:—'On the Long River throughout, at every opening, English merchant vessels may traffic.' It is also apparent from the fact that Lord Elgin speaks of his arrangements for the opening of the river in 1861, as being convenient 'for the whole coast trade of the river,' which accordingly was left open to foreign ships by the regulations established under his instructions by Sir Harry Parkes, early in that year; and, in order that no portion of the river banks should be even temporarily closed, Admiral Hope followed up the policy of Lord Elgin by a convention with the chiefs of the insurgents, providing for the security of commerce, within the regions which were occupied or might afterwards be conquered by them. Accordingly, foreign vessels traded freely upon the banks of the river, and steamers have brought large quantities of native produce from various points direct to Shanghai, to the great advantage of both foreign and native commerce, inasmuch as the products of several districts cannot be carried to either Hankow, Kiu-kiang, or Chin-kiang, without great expense and delay.

"These things being once clearly understood, your distant readers, Mr. Editor, will be able to comprehend the recent surprise and disappointment of the community of Shanghai upon the publication of regulations which declared that only three points on the river could be visited by foreign vessels, and that the loading or unloading of cargo at any other point would be punished by the confiscation of vessel and cargo.

"We see that these regulations destroy the brilliant prospects which were opened to foreign commerce, by making free the entire trade of the river: we see that native commerce must suffer even more than our own; and we see that the Imperial revenue must be injured *pari passu* with commerce. We see that all this could have been easily made manifest, even to Chinese ignorance of political economy; and that a farther unanswerable argument could have been found in the fact, that by Admiral Hope's convention with the insurgents a large extent of country not in the possession of the Chinese Imperial Government, was actually open to foreign ships. How could this Government, after availing itself of foreign aid against the insurgents, undertake to expel foreign trade from the territory conquered from the insurgents? With what face could they do this, even if the liberty 'to traffic at every opening on the river' had not been

Digitized by Google

previously given by themselves, and even if the free-trade about to be destroyed could have been prejudicial to Chinese interests? And can it be supposed for a moment that they would have insisted upon this fatal measure had pains been taken to show them that the regulations proposed were not only contrary to the treaty and unjust to foreigners, but also exceedingly injurious to their own revenue and their own people?"

NANKING.

The *Bouncer* arrived at Shanghai on the 19th December, from a cruise on the Yang-tse, as far as Hankow and back; during which she steamed up the creek at Nanking in search of some missing junks, belonging to British firms in Shanghai, said to be captured by the Taiping Rebels. Commander Creasy in looking for them, put himself in communication with the Kan-wang, or Shield King, who has command of the rebel forces at the east gate of the city, and who showed much anxiety in giving all the information required; but nothing of the junks could be found, so it was surmised that they had been broken up for firewood. From all that could be seen both inside and outside the walls, the Taipings appeared to be in great distress for want of the necessaries of life, while ordinary comforts were not to be found by their chief leaders. This was exemplified in the case of the Kan-wang, who solicited the commander of the gun-boat to let him have some English soap and candles, a request which was readily complied with. On the other hand it was observed that the defences of the city were unusually strong. An immense thick wall of masonry had lately been added to the fortifications, some eighty feet in height, while additional guns of large calibre are placed in prominent positions. The number of Taipings and pressed inhabitants within the city was stated by the Kan-wang to be nearly two millions, but of course this statement must be received with the usual allowance for Chinese exaggeration. At the same time it was evident that their force is great, and their defences immensely strong inside the city, while the camp outside the western wall mustered a large body of well-equipped men. In reconnoitring the outer defences, Commander Creasy met with no hostile display from the Taipings. Indeed the Kan-wang and other chiefs were rather friendly than otherwise.

NINGPO.

It is stated that the French contingent of drilled Chinese have been distinguishing themselves in the neighbourhood of Yu-yaon by atrocities upon the country people. No particulars, however, are mentioned.

HONG KONG.

The news from Hong Kong by this mail is comparatively unimportant. Amateur theatricals have been commenced for the season. The company is composed of military officers and civilians. A strange and apparently incomprehensible act on the part of the authorities has attracted considerable notice. These worthies have allotted a piece of ground to the soldiers of the garrison as a burial place, and at the same time refuse to let the ground be consecrated. The consequence is that the greatest dismay exists among the men at the idea of being buried in unconsecrated earth.

A meeting of subscribers to the Sailors' Home was reported; the money in hand is over $21,000, but that sum is still insufficient to carry out the design fully and fairly. To give the scheme anything like a fair chance, it ought to have a proper start; all the internal furniture for the use and amusement of the inmates, such as libraries and bowling alleys, ought to be provided before the institution is opened as a rival establishment to the flashy taverns where the sailor at present resides, not, it is feared, for his good. An appeal is to be made for further subscriptions, and it is not doubted that it will be successful; meantime the work has been ordered to be proceeded with, and contracts are about to be entered into.

A meeting of the Legislative Council was held on the 17th Dec. A Bill was read entitled "An Ordinance to authorise the Appropriation of a Supplementary sum not exceeding One hundred and forty-nine thousand dollars to defray the charges of the year 1862." Another Bill was also read to amend the Ordinance for the relief of Insolvent Debtors.

Mr. John W. McLellan, who recently resigned the management of the Chartered Bank of India, Australia, and China, has been appointed agent in Shanghai for the Commercial Bank of India.

L. Wiese, Esq., has been recognised provisionally as Acting Consul for Sweden and Norway at Hong Kong, pending the approval of Her Majesty's Government.

CANTON.

A small party, consisting of the Rev. Messrs. Gray, Preston, and Bonney, had resolved to make an excursion on ponies from Canton to the Meiling Pass; but, in consequence of an official warning by Her Majesty's Consul, on the grounds that the country was then in an unsettled state, the excursionists determined not to go farther than fifty miles from the city. They accordingly started, and in seven days they reached the borders of Chay-ung-Ning district, in the west part of Wychow department, returning by another route, and reaching Canton in seven days more. On the mountains of Chay-ung-Ning they were met by a band of highway robbers, "armed to the teeth" with spears, swords, prongs, tridents, matchlocks, and shields. They saw at once that in such a case discretion was the best part of valour, and so made no resistance. They were taken three or four miles off the road into a valley, stript of all but their clothes, and left alone without any harm having been offered to their persons. They made for the nearest village, and acquainted the mandarins with what had happened. Those worthy officials sympathised with them, treated them kindly, and supplied them with boots, clothing, bedding, and money. Elsewhere on their route the officials showed them great courtesy. They visited many strange villages, distributed Christian books, and made numerous friends, so that they do not quite regret the journey. Five ponies, with saddles and bridles, were taken from them by the brigands, who appeared no novices at their work, and had probably heard of the route they meant to take, and had laid in ambush for them.

Ex-Governor-General Laou, of Canton, has been appointed to the Government of the Kwei chow province.

COCHIN-CHINA.

The following port regulations have been published by the French authorities:—

"1. Until further orders the Port of Saigon alone is open to the commerce of all nations, and except under uncontrollable circumstance vessels not furnished with special permits from the French authorities are precluded from anchoring in any of the other ports.

"2. The presence on board, of arms and ammunition not entered in the manifest and not declared to the authorities, will lead to the seizure of vessels met by the cruisers of His Imperial Majesty upon the coasts or within the ports of French Cochin-China.

"3. Every vessel found within one of the ports of French Cochin-China, interdicted to commerce, in case of its manifest being correct, will be subjected to a strict inquiry, and required to prove that its presence at the anchorage was caused by uncontrollable circumstances, proof, moreover, will be needed that it had not previously disposed of any articles contraband of war not appearing in the manifest."

BORNEO.

SARAWAK.

Everything is going on favourably in the new territories placed under the Sarawak Government, and a considerable trade is springing up on the Bintulu and other rivers. Antimony has been brought down by the Kayans, and they have also brought supplies of camphor oil, which may turn out a valuable article of trade. Some specimens of copper pyrites have been likewise produced by the Kayans.

The gunboat *Badger*, which has done good service in her time against the Lanun and other pirates, was unfortunately wrecked in the end of Nov., on the bar of the Bintulu river, in trying to get out while a heavy sea was running.

Another seam of fine coal has been found on the river Sadong, and it is to be hoped it may turn out workable and thus add to the resources of Sarawak.

Attention is being turned to the splendid timber which lines the banks of many of the navigable rivers in the Sarawak territories. Two ships were lately loaded by the Borneo Company (Limited) with hard woods for the Royal dockyards. The woods selected were Enkabong, Penang, Kapur, and Kranji.

JAVA.

By resolution of the Governor-General, published in the *Javasche Courant* of the 24th December, the importation of opium into the district of Kikim, in the Assistant Residency of Tibing Tinggi, in Palembang, is prohibited at the request of the chiefs there. The prohibition to date from the 1st Jan., 1863.

Captain Jenzen, of the Dutch ship *Vrendschap*, which left the Sooloo Islands on the 4th Dec., reports that the Sultan of Sooloo died in the month of November last. A Spanish steamship is regularly stationed there, and the Spanish flag hoisted on the fort, and a number of steam gunboats were sent, on the news of the death of the Sultan reaching Manila, to assist in the installation of his son. The people of Sooloo seemed to be dissatisfied with their new ruler, and an extensive rebellion had broken out against him.

The receipts of import and export duties in Java for the first

Digitized by Google

ten months of 1862 were much less than in the two previous years, and it was calculated that the amount for the whole year would not exceed eight and a-half millions, or some £772,000.

MACCA STRAITS.

SINGAPORE.

The New Year at Singapore was ushered in with the usual carnival, of which boat racing formed the principal feature

PENANG.

The Penang subscriptions to the Lancashire Relief Fund have already reached the large sum of $5,344. Not the least gratifying circumstance connected with it is that the Chinese and other native residents have contributed upwards of $2,300 of the above sum.

CEYLON.

The return of Tamil immigration for the year just closed shows 69,000 arrivals against 42,000 departures. It is said that about 250,000 immigrants are labouring on estates and settled in the country, and that Ceylon presents attractions to the labouring population of Southern India quite sufficient to induce an annual influx ranging from 50,000 to 70,000. With reference to the population of Colombo, the *Colombo Observer* writes :—"It appears that just one in four of the ordinary and settled population of Ceylon is liable to be called out to labour six days annually on the roads or to pay the commutation money.

"The Colombo district is, of course, one of the most populous in the island, embracing as it does the capital. But our readers will probably be astonished to find that the population of our chief city and port is not at this day anything like the estimates given in Gazetteers, &c., half a century ago. The persons liable to labour in Colombo are :—

Colombo North	2,797
„ South	2,450
„ East	4,192
„ West	3,261
Liable to labour...	12,700
Multiply by	4
	50,800
Add for immigrants, military, &c.	10,000
Total population	60,800

"Colombo includes an area of no less than nine square miles. This space takes in a good many separate villages and hamlets, so that the population of the city proper is probably not above 45,000."

In round numbers, the population of Ceylon may be taken at two millions, giving about 81 inhabitants to the square mile, and 7½ acres to each man, woman, and child.

From the paper above quoted we obtain the following additional particulars :—

"Taken according to race, the population of Ceylon is, we believe, fairly expressed by the following figures :—

Europeans	2,500
European descendants	4,000
Malays, Javanese, Parsees, &c.	4,000
Veddahs (Aborigines)	2,000
Moormen	130,000
Tamils (including immigrants)	700,000
Singhalese (Low Country and Kandyan) ...	1,157,500
Total	2,000,000

"Many of our readers will be surprised to see so low an estimate of the European population of Ceylon. But the figures are very near the truth. The constituents of the European section of the population are :—

Civil Servants, with their wives and families	250
Military, with their wives and families	1,350
Merchants, Planters, &c., with their wives and families ..	900
	2,500

Be it remembered, however, that of the Europeans, four-fifths of the whole, or 2,000 out of the 2,500 are adult males.

"Divided according to the religions they profess, we believe we may class the population as follows. The Roman Catholic priests put in a claim to 150,000 adherents, but we believe our figures are nearer the mark :—

Protestants	40,000
Romanists	100,000
Total Christians ..	140,000

"So that of the two millions of human beings who inhabit Ceylon, only 7 per cent. profess Christianity in any form. The Protestants may, we believe, be classed nearly as follows :—

Episcopalians	17,000
Presbyterians and Congregationalists	10,000
Wesleyans	10,000
Baptists	3,000
Total	40,000

"Amongst the Christians we include the whole of the 6,500 Europeans and European descendants, 1,000 of the Veddahs, 92,000 of the Singhalese, and 40,500 of the Tamils. We then get the religious constituents of our population much as follows :—

Christians { Romanists 100,000 / Protestants 40,000 }	140,000
Buddhists and Demon worshippers	1,065,000
Gentoos (worshippers of Siva, Vishnu, &c.)	657,500
Mahomedans (Moors, Malays, Javanese, &c.)... ..	132,500
Fire-worshippers, &c., &c.	5,000
Total	2,000,000

"That only 7 per cent. of the population of Ceylon should profess Christianity; that only 2 per cent. should be Reformed or Protestant Christians, will be melancholy facts, pregnant with solemn reflections to many of our readers.

"As regards the incidence of taxation, it would seem that the inhabitants of British India contribute to the revenue at the rate of 6s. per head, against 8s. in Ceylon—the larger sum being the lighter burden, in consequence of the progress of enterprise, wealth, and good Government in our "Indian Isle," which is, happily not yet, in an administrative sense, annexed to India. We prefer to pay 8s. per head with the certainty of having the money spent for our own benefit, rather than 6s. with the certainty of the greater portion of it being absorbed in "little wars" and "Home charges." We, in Ceylon, may calculate on continued progress if we are only, as of late years, "let alone."

"To make the comparison with India complete, we may mention that while the area of British India, including the assigned districts, appears to be nearly 1,000,000 of square miles, with a population of 140,000,000, or 140 to the square mile; Ceylon, with its area of 24,700 square miles, has a population of two millions, or eighty-one, nearly, to the square mile. In the matter of population alone do we suffer in comparison with India; and even in this respect we are certainly progressing."

The Governor left Colombo on the 3rd of January, and has been staying at Galle, where he had the opportunity of showing the hospitality of Queen's-house to Sir Charles and Lady Trevelyan, who touched there *en route* to Calcutta. The party had a very narrow escape from a serious accident whilst out driving, their horse having taken fright and galloped off for nearly two miles before Sir Charles Trevelyan could pull up.

The Governor was about to proceed on an inspection of the irrigation works at Kirmi and Orobokke, whence he would pass through the Saffragam district to visit the new road to Happotelle, now completed as far as Ballangode. The new trace for its continuation upwards is already advanced, and it is hoped that by the middle of the present year the streams between Ballangod and Kalupahani will be bridged.

About £120 is transmitted by this mail, through the Oriental Bank and the Chartered Mercantile Bank, for the Lancashire distress.

The Colombo Regatta lasted for three days, and proved a complete success, the number of competitors for the "cup" having been greater than on any former occasion. The prizes were again carried of by the little *Minnehaha*. The chief interest appeared to be centred in the last day's sports, consisting of rowing matches, which were a novelty for Ceylon, and well contested. These matches took place on the 3rd January. A "Boat Club," in addition to the Regatta Association, is now in contemplation, for the purpose of importing English wherries and forming regularly trained boats' crews.

A meeting of the Society for the Propagation of the Gospel was held on the 2nd January. The Bishop, who moved the first resolution, said :—He believed the society aimed at no other end than the spread of the Gospel; that it was a faithful handmaid to the Church of England, and that Church he believed to be a faithful witness to the pure and simple Gospel, scriptural in its system and in its teaching. He could speak with confidence as to the character of this society, having been concerned himself in the management of its affairs, and in particular he could testify that there was nothing of a party or sectarian character in its proceedings. He had never seen any opinion of such a kind prevail at the meetings of the parent committee, and he might point to the character of its late revered president,

Digitized by Google

the Archbishop of Canterbury, as in itself a sufficient answer to those persons who brought against the society the groundless charge of being the exponent only of a party in the Church of peculiar or objectionable views in religion.

In the course of the meeting statistics were given, from which it appears that there are now in the island 21 stations under the charge of 15 ordained missionaries and 14 catechists, supported wholly or in part by the society, whilst there are 55 schools of this society and of that for promoting Christian knowledge, in which about 2,751 children of both sexes are receiving Christian knowledge.

The Honourable H. B. Thomson was sworn in as Judge of the Supreme Court on the 15th Jan., the usual salute being fired.

The appointment of Mr. Richard F. Morgan as Queen's Advocate gives great satisfaction.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BERWICK—On the 7th ult., at Hillwood, Kandy, the wife of Marcus Berwick, Esq., D.Q.A., of a son.

BIDDELL—On New Year's-day, at Gampola, the wife of Mr. C. A. Biddell, Secretary of the Court, of a daughter.

CARREW—On the 15th Nov., on board the *Indomitable*, in the Straits of Malacca, the wife of Lieut. G. C. Carrew, R.N.R., of a son, stillborn.

DUNLOP—On the 24th Dec., at Jaffna, the wife of R. J. Dunlop, of a daughter.

GIBBS - On the 30th ult, at Southampton-villa, Highgate-rise, the wife of R. Gibbs, Esq., of a son.

HALL—On the — ult, at Turret-cottage, Victoria Park-road, the wife of Capt. S. P. Hall, of Hong Kong, of a son, stillborn.

JOCELYN—On the 2nd inst., at 52, Kensington-gardens-square, Westbourne-grove, the wife of Capt. R. W. Ker, S.S. Lady Jocelyn, of a daughter.

LAMBERT—On the 11th inst., at 5, Eastwood-terrace, Hornsey-road, the wife of J. W. Lambert, Esq., of a son.

LINDSAY—On the 23rd Dec., at Jaffna, the wife of B. Lindsay, Esq., of a son.

MOSS—On the 19th ult., at Kelvedon-villa, King Edward's-road, Hackney, the wife of Geo. W. Moss, Esq., of St. Helena, of a son.

REISS—On the 1st inst., at 30, Kensington-gardens-square, the wife of Emil Reiss, Esq., of a daughter.

SCHMIDT—On the 27th Dec, at Nassim-lodge, Singapore, the wife of A. E. Schmidt, Esq., of a son.

SVEHELIN—On the 28th Nov., at Taku, the wife of Brevet-Major Svehelin, 67th Reg., of a son.

WILKINSON—On the 30th ult., at 13, Lower Rock-gardens, Brighton, the wife of C. J. Wilkinson, Esq., Commander s.s. *Ganges*, Peninsular and Oriental Company's Service, of a daughter.

MARRIAGES.

BLACKLAW—PECK.—On the 5th ult., at Gampolla, by the Rev. W. E. Rowlands, F. Blacklaw, Esq., to Maria, second daughter of W. Peck, Esq. No cards.

BAIRD—CAVE.—On the 2nd last., at the Church of the Holy Trinity, Paddington, by the Rev. H. H. Mogg, cousin of the bride, assisted by the Rev. Francis Pigou, Henry Dillon Baird, Esq., of Ceylon, to Caroline Elizabeth, eldest daughter of Thomas Saunders Cave, Esq., of Rossbrin Manor, county of Cork, and Brancliffe Grange, Yorkshire.

CHALDECOTT—WINN.—On the 27th ult., at the Church of St. Mary Magdalene, Lincoln, by the Rev. Robert Hancock, M.A., vicar of Bathford, assisted by the Rev. J. S. Gebney, M.A., vicar of St. Mark's, M. Algernon Chaldecott, Royal Artillery, son of William Chaldecott, Esq., of The Holmwood, Dorking, Surrey, to Mary Elizabeth, elder daughter of the late Thomas Winn, jun., Esq., of Lincoln. No cards.

HARVEY—LONG.—On the 5th inst., at Brook-street Chapel, Knutsford, by the Rev. Henry Green, M.A., William Gaskill Harvey, Esq., of Ceylon, second son of the late Thomas Harvey, Esq., of Liverpool, to Mary Esther, eldest daughter of Henry Long, Esq., of Woodlands, Knutsford. No cards.

MILLS—GILMOUR.—On the 4th inst., at Broadway, Worcestershire, John Remington Mills, Esq, eldest son of John Remington Mills, Esq., M.P., to Mary Ann Gilmour, only daughter of the late Charles Gilmour, Esq., of Salisbury.

RYRIE—FORTH.—On the 16th Dec., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial Chaplain, Phineas Ryrie, to Edith Anne Mary, third daughter of F. H. A. Forth, late Captain Royal North British Fusileers, Colonial Treasurer, Kong Kong.

DEATHS.

BREMNER.—In Oct. last, at Shanghai, of cholera, Alexander Bremner, Esq., C.E., Associate of the Institution of Civil Engineers, London, and eldest son of the late James Bremner, Esq., C.E., of Harbour-place, near Wick, N.B. Friends will please accept this intimation.

CRUTCHLEY—On the 13th January, at Galle Face House, Mrs. Harriet Crutchley, widow of the late W. Crutchley, Esq., of H.M.'s 37th Regiment, aged 34 years.

CRAWFORD—On the 10th January, at Kandy, James Crawford, Esq.

CAHILL—On the 28th December, at Spring Gardens, Hong Kong, Thomas Bernard Cahill, aged 40 years.

MEYER—On the 12th January, at Colombo, Mrs. L. Meyer, widow, aged 80 years.

MORTLOCK,—On the 22nd Nov., lost in the wreck of the *Henry*, from Singapore, Wm. Hy. Mortlock, aged 21.

ORMISTON.—On the 1st inst., at Euston-square, London, Evan Ormiston, Esq., of Colombo, Ceylon, and Wigfair, St. Asaph, aged 34.

POMPEUS—On the 9th January, at Colombo, Mr. C. A. Pompeus, aged 52 years and 7 months.

SOUCHAY.—On the 1st inst., at East Oxford, Woodstock, Upper Canada, Charles John Edwin Souchay, only son of Charles Souchay, Esq., Withington-house, Manchester, aged 29.

TAFFS—On the 12th December, at Fuhchau, Ellen Taffs, daughter of C. C. Taffs Royal Engineers, aged 14 years.

VANSANDEN—On the 30th December, at Chilaw, J. C. Vansanden, Esq., Medical Assistant, of Calpentyn.

WALKER.—On the 22nd Nov., 1862, on board the *Mirage*, on his passage from Hong Kong to England, Samuel Kempson, eldest surviving son of the late Samuel Walker, Esq., of Wolverhampton, aged 22.

WALTER—On the 26th November, at Fuhchau, William H. Walter, late of the Imperial Customs.

WILLIAMS—On the 22nd December, at Hong Kong, on board H.M.S. *Melville*, Daniel Williams, A.B., H.M.S. *Eurydice*.

COMMERCIAL REPORT.

CHINA—EXPORTS.

CANTON.—The business of the fortnight has been very restricted, owing to the continued firmness of the teamen in the face of the unfavourable nature of the advices from London. The little business done in Congous was transacted at one tael reduction. Scented Capers have declined about one tael and a half. The business done in Country Greens has been for shipment to India, rates ranging about five taels above the rates ruling last year. The settlements of the fortnight are reported as under:—Congou: Chong-sow-kye, 1 chop at 28 taels; Canton packed, 400 chests and 1,500 half-chests at 16 to 19½ taels. Scented Caper: Common, 1,500 boxes at 15½ taels. Canton Greens: 100 half-chests Hyson at 22 taels, and 400 half-chests Hyson skin at 16 taels. Country Greens: 950 packages Hyson at 35 to 57 taels. Stock on the market is thus estimated: 95 chops Country Congou, 4,000 half-chests Canton packed ditto, 10,0 0 packages new, and 1,890 ditto old Country Greens. In other descriptions the stocks remain as stated in last report.

SHANGHAI.—Black: During the past fortnight the market has been very dull, and only seven chops have been settled at a decline of about 2 taels on previous rates. The news by the 26th October mail is again of a discouraging nature, and buyers are holding off expecting a further reduction. Stocks remain small, as arrivals from Hankow have been trifling; the high rates of freight still ruling have checked shippers. The quotations are, Hohow 20 to 22 taels, Oonaams 22 to 26 taels, Oopacks 25.5 to 27 taels. The settlements for the fortnight are reported at 5,600 chests, and transhipments on owner's account 5,100 do., together 10,700 chests, making a total for the season to date 248,196 chests, against 152,600 do. corresponding period last season. The present stock is reckoned at 7,000 chests Congou, and 1,500 do. flowery Pekoe. Green: The market still remains very active, and there is a good demand for all country teas at a further advance of about 2 taels. Fine teas are very scarce, and extreme rates can be obtained for good Moyunes; fully 4 taels over the highest point of the market last season.

FOO-CHOW-FOO.—Shippers act with extreme caution, but the teamen are so firm that the market has not fallen more than one tael. The transactions of the fortnight have been limited and mostly in barter. They are thus reported:—Congou, 22,000 chests, at 5 to 13 taels for trash to good common; 16 to 23 taels for middling to strong flavoury. Souchong, 600 chests, common, at 16½ taels. Oolong, 7,000 half-chests, at 13 to 35 taels for common up to 18 taels for good cargo. Flowery Pekoe, 100 chests, at 31 to 35 taels for middling. Scented Teas, 1,000 boxes, at 13 to 18 taels. The stock on the market stands thus:—Congou, 95,000; Souchong, 2,000 do.; Flowery Pekoe, 1,000 do.; Oolong, 45,000 hf. do.

AMOY.—A steady business has been done since last advices for shipment to the United States, with but little alteration in the prices then ruling. The American ship *Surprise* arrived on the 9th inst., and has commenced loading for New York. Congou: This description has come into notice, and settlements have been made to the extent of 820 half-chests at $14 to 16-50, showing a decline on rates previously ruling of $1 to 2 per picul. Stock, 2,400 half-chests. Oolong: A good demand has existed since our last report. Teamen, however, continue unwilling sellers, and the settlements reported show little change, but a firm tone prevails in the market. Settlements, 4,200 half-chests at $17.25 to 22. Stock, 20,800 half-chests. Ankoi: The clean burnt kinds are becoming scarce, and for those remaining on the market high prices are asked. Settlements consist of 4,000 half-chests at $8.50 to 16. Stock, 5,500 half-chests. Orange Pekoe: No settlements reported. Stock, 1,800 half-chests. Caper: No change. Stock, 10,000 boxes.

HANKOW.—The settlements of the fortnight are reported at 15 chops Congou at slightly easier rates, say at 17 to 19 tls., for common Hohows, 20 to 22 tls. for Oonams, and 23 tls. for Oopacks. As these quotations cannot be made to apply to the stock on the market, owing to its smallness and inferiority, they should be taken as nominal. The total settlements of the season to date are stated at 409 chops of Cougou, and as the above-named stock probably comprises the last of the yield, the season may be considered over.

KEWKIANG.—As no report was given last mail, the following must be taken to apply to the month. It seems now certain that the crop of green teas is very limited, which fully accounts for the firmness of the teamen. The entire crop is reliably estimated at under 300,000 hf. ch., 50,000 of which may be sent to Canton. There seems some obstacle existing to the teas coming forward from the country, the probability being that to the low state of the river, and to the scarcity of boats, owing to the requirements of the Mandarins, are to be ascribed this circumstance. The advices from London and New York tend to make shippers cautious, except for fine teas for the former, but the knowledge of the short crop, the tardiness of the supplies, and the firmness of the teamen have combined to raise the market fully 1 tael on common kinds, up to 2 or 3 taels on fine upon quotations previously ruling, or say 5 to 6 taels on the opening rates in the middle of October. The quality of the present crop is unquestionably inferior. The defect appears to lie in the admixture of leaf of the last crop, detained in the producing districts by political events. The settlements of Greens for the fortnight are thus reported: Fychows, 5,500 half-chests at 27 to 34 taels; Moyunes, 14,800 do., at 26 to 33½ do.; Kewkiang, packed, &c., 5,800 do., at 20 to 31 do; total, 26,100 half-chests for the month. In Black teas, nothing whatever is reported. The total shipments of the season to date amount to 135,000 half-chests Green and 50,000 chests Congou—but it must be borne in mind, that as these are sent for reshipment to Shanghai, they stand included in the exports thence.

YOKOHAMA.—There has been a fair steady business in this article during the week at previous quotations. Settlements estimated at 1,520 piculs.

NAGASAKI.—Rates had fallen $2 to $3 per picul. The total export for the season to date amounted to 1,412,183 lbs.

RAW SILK.—SHANGHAI.—The prices which have been established have checked purchasers, notwithstanding the receipt of improved advices from Europe by 27th October mail. The supply from the interior has been so trifling in amount that even the moderate business which has taken has again reduced the stock. The improvement in the rate of Exchange will no doubt also check business, as dealers are very firm for quotations, which allow an advance on last mail of 10 to 15 taels per picul. The arrivals of Japan Silk are heavy, say about 1,700 bales, and further supplies are expected to continue to come forward freely. The settlements of the fortnight are reported at 3,000 bales, against 4,400 bales for the corresponding period of last year, and 4,000 bales the corresponding fortnight of the season before. The total settlements of the present season to date amount to 51,300 bales, against 46,000 bales corresponding period last season, and 59,000 bales the season before. The present unsold stock is 5,000 to 6,000 bales, against 16,000 bales same period last season, and 7,000 bales the season before. The following are

Digitized by Google

the current quotations:—Teatlees, No. 1. tls 480 to 490 per pcl.; 2, 455 to 470; 3, 435 to 445; market, 3, 420 to 430; 4, 400 to 415; 5, and com., 380 to 395; Taysaams, No. 1, 390 to 405; 2, 360 to 375; 3, 335 to 350; 4, 5, and com., 300 to 325; Yuenfa, No. 1, 430 to 440; 2, 400 to 420; 3, 375 to 390; 4, and com, 360 to 370.

CANTON.—The settlements of the fortnight are reported at 200 to 300 piculs for shipment to Bombay. The quotations are:—Gowkong, No. 3, $375 to 380; Loonkong, No. 1 and 2, $415 to 435. The article is scarce. There is no stock.

KANAGAWA.—The market was in an excited state up to the receipt of advices per London mail of 26th Sept., after which buyers became more cautious. The closing quotations were:—Dye-pots, No. 1 and 2, $490 to $505; No. 1 to 3, $470 to 480; bricks, none; Hadziodje, $330; Soday, $430 to 460; Coshio, No. 1 and 2, $390 to 420; No. 1 to 3, $370 to 385; Shinshio, none; Oshio, No. 1 to 3, $440 to 460; Minoete, $300 to 320 for inferior. Exports of the season to date, 10,123 bales, against, 4,627 bales corresponding period last season. Unsold stock, 50 bales only.

DRUGS, &c.—The Canton market is thus reported on: Cassia Lignea—no sales; quotation, $16½ to $17: stock, 500 pls. Cassia Oil: No sales; quotation, $205; no stock. Cassia Buds: No sales; quotation, $48; stock, 15 pls. Star Anniseed: No sales; quotation, $24; stock, 50 pls. Rhubarb: No sales; quotation, $50 to $60; stock, 50 to 100 pls. Galangal, Chine Root, and Galls are quoted $4, $4.25, and $12.50 respectively; no sales, and stocks very small. Musk is scarce; wanted. Camphor: About 2,000 pls. have arrived from Formosa, whereof 1,400 pls. were placed at $31½; for the remainder it is said $30 have been offered and refused. The unsold stock is estimated at 1,000 pls. The French mail steamer *Imperatrice* took 175 piculs. At Nagasaki the article is eagerly picked up as it comes to market at $25½ to $26 per picul.

COTTON.—CANTON.—The market has been very quiet during the fortnight. The imports have been confined to 3,000 bales Shanghai, the sales comprise 350 bales Bombay, and 2,000 bales Shanghai. The quotations nominally are as under:—Bombay: new, 14*t* 5*m* to 16*t* 2*m*; old, 14*t* to 15*t* 5*m*. Bengal: 14*t* 5*m* to 15*t* 5*m*. Madras 14*t* 5*m* to 16*t* 2*m*. Shanghai: 13*t* 5*m* to 13*t* 8*m*. Shanghai: The capacity of this market for supply has been tested with a favourable result during the past fortnight. Owing to the scarcity of tonnage, the demand for the Southern ports ceased, when a fall of 5 mace occurred. Heavy settlements for Liverpool were then made at the decline, and although these amounted to 25,000 bales, the market did not advance. When it is borne in mind that the late drafts upon this market were made unexpectedly, and without affording the grower any opportunity of augmenting the yield, it may readily be believed that the capacity of production in the valley of the Yang-tse is very large—some believe unlimited. Three ships have sailed for Liverpool during the fortnight laden with the article, and six large vessels, all engaged full, are loading, similarly destined. A small quantity is under shipment to New York. The quotation is taels 11 to 11¼ for middling—up to 12 taels for the best. Kanagawa: The article was in demand at $15.75 per picul for shipment to England and Hong Kong, but the authorities having strictly prohibited the export, there is an end of the trade.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—There are no sales to report as having been effected during the fortnight, and prices are quoted nominally as at the date of last advices. The same remarks apply to the Canton and Amoy markets.

GREY SHIRTINGS.—These goods have remained without any inquiry, both here and at Canton; while at Amoy only a few hundred pieces 6.2 catties have been sold, the price reported being $3.56 per piece.

WHITE SHIRTINGS.—400 pieces low reed reported as having changed hands at Hong Kong at $2.80 per piece.

T-CLOTHS remain as previously quoted, without any sales to note from the Southern ports; but from Foo-chow, settlements of some 3,500 pieces are advised at $2.60 to 3.10 for 7 to 8.4 lb. goods respectively.

AMERICAN GOODS.—Quotations must be regarded as perfectly nominal, in the absence of transactions.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES WHITE AND COLOURED.—The same remarks apply to the rates named for these fabrics, which have remained without any inquiry since the date of last report.

DAMASKS.—480 pieces have changed hands.

CHINTZES AND HANDKERCHIEFS.—No transactions reported.

RAW COTTON.—The settlements of this staple in Hong Kong have been on a fair scale during the fortnight, 5,406 bales of Shanghai have changed hands. Prices appear to be slightly easier, but a fair demand continues to exist. Further considerable supplies from Shanghai are looked for, and the latest advices from that port are against any advance in prices here. The market is quite bare of cotton of Indian growth. In Canton, the settlements are put at 350 bales of Bombay and 2,000 bales of Shanghai cotton, leaving a very reduced stock of not more than 1,000 bales of all descriptions of Indian and about 3,500 bales of Shanghai, the prices paid for the latter being two mace lower than previous settlements.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths. The sales effected of Spanish Stripes in Hong Kong are put at 144 pieces of Scarlet, placed at $1.06 per yard. In Canton there have been no transactions. The quotation from Foochow is 95 cents. for Scarlet, at which rates about 150 pieces are reported sold.

LONG ELLS.—400 pieces have changed hands in Hong Kong during the fortnight.

CAMLETS remain much the same as at the date of last report, the business transacted being put at 420 pieces English. In Canton nothing doing.

LASTINGS.—180 pieces of these goods have changed hands in Hong Kong at $15.60 per piece, and a small sale of 100 pairs of Blankets at $6.25 has been effected in this market during the fortnight.

METALS—Iron, Flat, &c.—1,430 piculs of Nail Rod have changed hands in Hong Kong; prices remaining much as before quoted. In Canton there has been no business transacted, and quotations remain nominally the same.

LEAD has been purchased in Canton to the extent of about 1,600 piculs W.B. mark being quoted slightly lower, while on other description an advance of about 10 cents had been established. In Hong Kong nothing has been done, and rates remain as before quoted.

TIN.—1,992 slabs have changed hands in the Hong Kong market, but rates do not show any marked change. No transactions have been reported from Canton.

TIN-PLATES.—200 boxes sold here, and 270 boxes in Canton. The quotation at the latter port evinces a decline on previous rates of about 30 to 50 cents.

EXCHANGES IN LONDON.

[For dates, see first page]

			Bank.	Private.
At Shanghai (per Tael)	6 months sight.		6s. 2d. to 6s. 3d.	6s. 3d. to 6s. 4d.
At Foo-Chow-Foo (per dol.)	6	ditto	...	...
At Canton, At Hong Kong, At Macao	6	ditto	4s. 9d. to 4s. 9¼d.	4s. 9d. to 4s. 10d.
At Singapore	6	ditto	4s. 9¼d.	4s. 10d.

At Batavia (guilders.)	6	ditto	..	..
At Colombo			...	..

The Exchange on India at Shanghai was 297 rupees per 100 taels, and at Hong Kong 227 per $100. Bar Silver at Shanghai 111.50 per 100 tls., and Hong Kong 6½ per cent. prem. The current quotation at Shanghai for Mexican dollars was 84 tls. per $100, and the rate of exchange on Hong Kong was 24 to 25 per cent. discount.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—Dec. 6, the Queen Hortense, from Swansea; 7, the Lord Raglan, from Sunderland; 8, the Raphael, from Sunderland; 10, the Mischief, from Cardiff; 11, the B. L. Harriman, from Newcastle; 16, the Tung Yu, from London; 18, the Sovereign of India, from Cardiff; 20, the Artemisia, from Sunderland, and the Geologist, from Liverpool; 21, the Jacqueline and Elise, from Sunderland.

At HONG KONG.—Dec. 14, the Anglo Indian, from Sunderland; 15, the Diana, from Cardiff, and the Abeona, from Liverpool; 22, the Ettrick, from Cardiff.

At MANILA.—Mail uos arrived.

At BATAVIA.—From London: Dec. 16, Guinevere, from Glasgow; 22, Boni, from Liverpool.

At BANGKOK.—Dec. 4, Gleam, from North Shields.

SAILED.

From SHANGHAI—Dec. 10, the Palmerston and the Lebanon, for Liverpool; 13, the Harwood, for London; 17, the Cissy, for London; 20, the Orissa, for London.

From FOO-CHOW-FOO—Dec. 13, the Zingara.

From HONG KONG.—Dec. 14, the Rauma, for London; 20, the Genii for Liverpool.

From MANILA.—Mail not arrived.

From BATAVIA.—For England none.

For HOLLAND.—Dec. 3, Julia, Wassewaar, and Bendrina; 4, Johanna M. Christiana; 4, Von Galen: 10, Johanna Elizabeth; 11, Nieuwsland and Mary Goddard; 12, Kerstiling; 13, Argo; 14, Nova Zembla.

LOADING.

At SHANGHAI.—For London: Empress of India, Napoleon III., Queen's Own, Robert Henderson. For Liverpool: Herves of Alma, William Fairquairn, Gorilla, Crest of the Wave, Juanpore, Express, Monsoon, Blackburn, Oriental, Brierly Hill, Radnagore, Southern Cross, Gresham. For New York: Almena, Oneida, Golden West. For Montreal: Bittern.

At CANTON.—For London: Victory, Speedwell. For Liverpool: Henry Moore and Storm King. For New York: Hotspur.

At FOO-CHOW-FOO.—For London: Wave. For New York: Samuel Russell.

FREIGHTS AND CHARTERS.

HONG KONG.

Business in freights has been very languid during the past fortnight, the few settlements that have been made being principally for the coast. One or two rice charters have been negotiated at moderate figures. To Great Britain, the demand for vessels to carry cotton still continues, though in a moderate degree. To the United States little or nothing offering. At Foochow, freights for Great Britain have improved slightly, and we now quote them at from £4 to £4. 5s. At Shanghai, considerable trade is doing in cotton to the United Kingdom. Vessels are in demand at this port for coasting, at remunerative rates. We consider general business in tonnage as decidedly improving, although but few settlements have actually been made. We quote the following settlements:—Great Britain and the Continent: Fidelio, Ham. barque, 292 tons, from Whampoa and Macao to Hamburg, at £3. 10s. per ton. United States: King Lear, Br. ship, 1,970 tons, to San Francisco, £4, 500 in full (reported). Kathay, Am. ship, 1,438 tons, on the berth for San Francisco, at $8 per ton.

SHANGHAI

Three vessels have sailed for London since last report with silk and tea, and two for Liverpool, and one for London with cotton. For New York, one ship has sailed, tea laden—the Golden West and Oneida are also loading with tea for the same destination, and the Almena with cotton. In general business transactions to a fair extent have taken place during the fortnight. The following settlements are reported:—For Liverpool with cotton: The Blackburn, at £1. 1s. 6d. per picul. Stornoway, at £3. 10s. per per ton of fifty feet; Monsoon, at £3. 5s. per ton; Gresham, at £3. 5s.; Southern Cross on private terms. To London or New York, or Montreal: The Cæsar and Helene, at £4. 15s. for the first, £5 for the second, and £6 for the last.

CASUALTIES.

(From the *Japan Herald.*)

Since our last issue we have been favoured by Capt. Farrell of the wrecked (American) barque Chevallie with the following particulars of circumstance attending the loss of that vessel. Our previous account gleaned from various sources, appears to be substantially correct. The following is more particularly so, and will, perhaps, be more interesting to our nautical readers:—The barque Chevallie, a fine American vessel of 543 tons, left Hakodadi bound for Shanghai, on the morning of the 19th November; about noon, the wind rose from the N.W., and was blowing so strong that it was found impossible, as was intended, to make the proper westerly course through the Straits of Tsugar. The wind increasing still from the north-west, and the current setting at the rate of six knots east through the Straits, was obliged to bear up easterly. During the whole of that day had adverse winds. The next day, 20th, a very strong gale from the north-west prevailed, but on the 21st, being then more moderate, and inclining to the east, made some progress; on the 21st, in 38.30, sighted the land Kinkewazan, about 40 miles distant. On the 22nd, at noon, 36.40, saw high mountains about 35 miles off. Steered S.W. ½ S, intending to pass 20 miles to the eastward of Cape Blank—the current set strong to the north-west, taking the vessel on the port bow, setting her in towards the shore between the two rivers Navagawa and Sassagawa, but still believed that a course was being made 20 miles at least to the eastward of Cape Blank; but, as it now appears, the current was rapidly driving to the West. The night was hazy, and nothing could be seen till the vessel was found, about 11.30, to bump heavily. Endeavoured to luff, but the current was so strong and the vessel so near the bottom that she would not answer her helm, and drove in still further—thumping heavily on the bottom. Saw the breakers a-head—the vessel still working in towards them, the wind being right on to the shore. The next day the masts were cut away and attempts made to lighten the ship to ease her, but she kept surging in all the time. The whole of the bay seems to have a large sandy beach running out at least two miles, with a tremendous surf all round and with broken knolly ground. It became evident that the only thing now was to endeavour to save the lives of all on board.

The Tung-yu, from London, was totally lost in the Yang tse kiang. The wreck was sold for 415 taels, and a few tons of cargo at 525 taels.

The brig Martha and Emily, Captain Carter, which left Shanghai on the 31st October last for Ningpo, left Amoy for Taiwan in the early part of last month, but went ashore on the coast of Formosa, and was immediately deserted by her crew. Captain Carter, however, stood by his ship, and would not leave her. The consequence was, that he was shot through the head by a party of natives, who wanted to loot the vessel.

The Empress reports having picked up the crew of the Arab ship Atiet Rohoman, consisting of fifty-four men, they having been in the longboat two days without water or food. Their ship foundered at sea, in lat. 21.08 N. long. 87.23 E., in a most severe gale. The captain and crew lost everything belonging to them. On the 25th ultimo sent the crew of the lost vessel in their own boat to a ship proceeding to Calcutta, but her name could not be ascertained by the captain of the Empress.

PASSED STRAITS OF SUNDA.

From England and Continent to China: None. From China to England and Continent: Dec. 12, Sunda, Foo-chow-Foo to London; Dec. 12, Mallard, Shanghai to London; Dec. 13, Chapman, Foo-chow-Foo to London; Dec. 14, Meggie Atkinson, Shanghai to London; Dec. 17, Millbrook, Hong Kong to London; Dec. 20, Pioneer, Shanghai to Liverpool; Dec. 26, Anglo-Saxon, Shanghai to London. From China to New York: Dec. 16, Game Cock, from Shanghai; Dec. 26, Penguin, from Shanghai. From China to Sydney: Dec. 15, Sabrina, from Hong Kong. From England and Continent to Singapore: Dec. 11, Fanny, from Liverpool: Dec. 12, Patriot King, from Liverpool. From Singapore to England and Continent: Dec. 19, Bride, to London; Dec. 20, Thomas Paul, to London.

AFFAIRS IN JAPAN.

A series of diplomatic papers of considerable interest, relating to Japan, were presented yesterday to both Houses of Parliament by command of Her Majesty. They are 57 in number and cover 108 pages. They contain a full account of the reception of the Japanese Envoys in this country; the results of conferences with the Envoys respecting British demands; detailed accounts from the Consuls of the attacks on the British Legation last June, and the consequent retirement of the Legation to Yokuhama; explanations of the Japanese Ministers respecting these attacks; despatches from Colonel Neale respecting the murderous assault on Mr. Richardson's party; an account from an eye-witness of the murder of Mr. Richardson; a report of the interviews of Colonel Neale and Admiral Kuper with the Japanese Ministers; and a correspondence between Colonel Neale and the Japanese Ministers respecting these repeated outrages and assaults on the Legation and on British merchants, and on the insecurity of the Tokaido to which foreigners are entitled to resort under treaty.

The papers contain also communications with the Governments of France, Russia, and the Netherlands, respecting their negotiations with the Japanese Envoys, and a full statement of commercial reports and returns of Japanese trade. We must delay any further notice of these papers until our next issue.

BRITISH TRADE IN CHINA.

The following is the Memorial forwarded to Earl Russell last autumn from the Shanghai Chamber of Commerce:—

"British Chamber of Commerce, Shanghai,
4th September, 1862.

"Sir,—I have the honour of forwarding to you under this cover a letter to the Right Hon. Earl Russell, Her Majesty's Secretary of State for Foreign Affairs, upon the subject of certain privileges, accorded, as this Chamber conceives, by treaty, and which the Chinese Government now seeks to withdraw. This letter is signed by the various members of this Chamber of Commerce, and I have to request that you will forward it to the Secretary of State. I further enclose a copy of the same for your Excellency's perusal.

"I have the honour to be,
"Your Excellency's most obedient humble servant,
"EDWARD WEBB, Chairman.

"To the Hon. F. W. A. Bruce, C.B., Her Majesty's Envoy Extraordinary and Minister Plenipotentiary and Chief Superintendent of Trade in China, Peking."

"British Chamber of Commerce, Shanghai, Sept. 4, 1862.

"My Lord,—We, the undersigned members of the British Chamber of Commerce of Shanghai, had the honour to address your lordship on the 20th of August, 1861, respecting abuses in the administration of the Imperial Maritime Customs in China, which seriously injured our commercial interests; but we regret that up to the present time we have not been favoured with a reply; and, although the Hon. F. A. Bruce, Her Britannic Majesty's Minister at Peking, has applied a partial remedy in some few instances to the evils complained of, the chief grievances remain unaltered.

"While again soliciting your favourable consideration of those subjects upon which we have before written, we would respectfully draw your lordship's attention to further restrictions which the Chinese Government seeks to impose upon our Treaty privileges; we allude to the alterations now being made in the regulations of trade on the Yang-tse-kiang River, and to the limitation of the right to resort to the interior for the purposes of trade.

"When the navigation of the Yang-tse-kiang River was opened to foreigners in April, 1861, the regulations provided that all duties, whether import or export, should be paid at Shanghai or Chin-kiang-foo, and that above the latter port the whole of the river up to Hankow should be open to foreign trade. This system has given general satisfaction during the experience of the past year, but we now learn with regret that the Chinese Government dispute the right of foreigners to trade upon the river, excepting at the Consular ports of Chin-kiang-foo, Kiukiang, and Hankow, and further wish to establish Custom houses at the two last-named places. The importance of such a surrender of privileges can scarcely be overestimated, whether the value of the right given up be regarded, or the dangerous precedent of yielding up a concession once obtained, to the demands of the Chinese. His Excellency Lord Elgin was well aware of the advantages to commerce in the arrangements made by Sir Harry Parkes under his instructions, as he especially mentions the importance of paying the duties at Shanghai or Chin-kiang-foo, so that above that up to Hankow 'the whole coast trade of the river' might be open to foreign enterprise; and it seems needless to point out to your lordship the benefits of being able to trade at any place in four hundred and fifty miles of a river running through the richest provinces in China, compared with being confined to three Consular ports in the same distance, as it is obvious that by delivering foreign goods at or near the place of consumption, and by receiving teas and other produce at the country of their growth, considerable expense in transit is avoided, besides the heavy extortions of the local mandarins. The establishment of Custom-houses above Chin-kiang, in place of the system now in force, will occasion much delay and trouble to the trader, and will add nothing to the revenue of China, while it increases the cost of its collection; nor can it be urged by the Chinese that it is necessary to collect foreign duties at Hankow and Kiu-kiang for local purposes, for obviously till the opening of the river all the produce from those places and manufactures consumed there paid duty at Shanghai or Canton, so that the opening of the river could not deprive them of local revenue before enjoyed.

"We now refer to the second point,—viz., the limitation of our right to trade in the interior. During the month of May this year a circular was sent to the British community at Kiu-kiang by Her Britannic Majesty's Consul there, in which he informed them that Her Majesty's Minister at Peking, although admitting the right of British subjects to go into the interior for trading purposes, decided that while there they could not open or rent houses or buildings, or reside permanently, but must live in inns, boats, or Chinese houses.

"It might be supposed that the right to trade would include a right to do acts necessary to conduct such trade, and, without extensive premises, to carry on the business of a merchant is manifestly impossible; but even were it not so, the 12th Article of the Treaty expressly states that British merchants may purchase or rent land and buildings 'whether at the ports or other places,' and thus we can only regard the prohibition of the British Minister as directly opposed to this clause of the treaty. The objection to foreign merchants holding buildings in the interior, if raised by the Chinese authorities, can only arise from a wish to drive them away to the Consular ports, so that the internal trade may continue in the hands of the native dealers, whom they can extort money from more successfully than from the foreigner, and from a desire to resume the old exclusive policy of China which Western nations have striven so hard to overcome.

"In calling your lordship's attention to these two points, which in themselves we regard as of the first importance to our future trade with China, we would further respectfully urge, what past experience amply proves, that, in dealing with an Asiatic nation like the Chinese, any surrender of a right is attributed by them to any cause rather than forbearance on our part, and on that account, if for no other, such a surrender should never be made; and we are of opinion that a firm and decided tone in demanding all privileges accorded to the British nation by the late Treaty of

Digitized by Google

Tien-tsin will best preserve that peace which all classes, and more especially merchants, are so anxious to maintain.

"We have the honour to be,

"Your Lordship's most obedient and humble servants,

"W. R. Adamson and Co., Agra and U.S. Bank (Henry Turner, Manager); Geo. Barnet and Co., Birley, Worthington, and Co.; Blain, Tate, and Co.; Bower, Hanbury, and Co.; J. F. "To the Right Hon. Earl Russell, Her Majesty's Principal Secretary of State for Foreign Affairs, London."

"Peking, Oct. 8, 1862.

"Sir,—I beg to acknowledge the receipt of your letter to me of the 4th ult. together with its enclosure for Earl Russell, which I forwarded hence by last mail.

"I am, Sir, your obedient humble servant,

"FREDERICK W. A. BRUCE.

"E. Webb, Esq., Chairman of Shanghai Chamber of Commerce."

This memorial has called forth a large amount of correspondence. The ball was opened by a leader in *The Times*, which will be found under "Spirit of the Press." An assertion in that leader produced the following disavowal from Mr. C. Magniac, of the firm of Messrs. Matheson and Co., in the truth of which we entirely concur:—

SIR,—A leading article in your impression of this day (Jan. 30) contains the following statement referring to China merchants:—

"This important body has instigated us to two Chinese wars."

I ask of your impartiality to afford me sufficient space for a distinct and emphatic denial of the truth of this statement.

At the time of the first China war the property of China merchants was sacrificed by a British Commissioner in the vain attempt to avert war determined on in their ignorant arrogance by the Chinese Government.

Of the second China war a somewhat similar statement was made by Mr. Gladstone in the House of Commons, which was contradicted in a document presented to Earl Russell by the leading China merchants in the following terms, which I affirm to be the fact, viz.:—"The war arose out of the case of the lorcha *Arrow*, with which the merchants had no concern." I may add that in both wars the China merchants have largely suffered by the destruction of their property, for which they have never been fully compensated. With this experience of the first war, it is not very likely they would desire a second, neither did they.—Yours faithfully,

3, Lombard-st. CHARLES MAGNIAC.

Mr. Magniac's brief letter received the following reply from Mr. A. R. Johnston, Deputy-Superintendent of British Trade in China, from 1835 to 1843. Writing on the 2nd of February, he says:—

Of the episode in the history of British affairs in China to which I fancy your correspondent alludes, I think it would be more correct to say that a British Commissioner gallantly went to the rescue and identified himself with the troubles of his countrymen at a moment to them of extreme peril, in order to save them and their property from being sacrificed. Whether he was right in doing this has been doubted, but never the fact of his doing it.

The feelings of the British Canton merchants at the juncture in question are shown by the circumstance that a very great number of them voluntarily handed over to the custody of the Deputy-Commissioner, or Superintendent of British Trade (as he was then called), all their documents, with the property alluded to, at a moment when they with reason felt that it was in the greatest danger, that it might be extorted from them under peril of their lives, and that they were irretrievably in the grasp of the vindictive Chinese authority Lin.

It was on this occasion the Chief Commissioner forced his way through the floating barriers surrounding the British factories, and put himself at the head of his countrymen, afterwards dealing with their property in the way that, under the circumstances, he thought it most wise to do, and by this means saving, as I firmly believe he did, the lives of many of his countrymen who otherwise would have been sacrificed in hopeless detail with their property and much, if not all, of the property of the remainder of them.

In the opinion of the Home Government the British merchants were repaid the computed value of the property given over to the Chinese authorities, and in the sequel recovered from these by force of arms. Had this transaction not been converted into a national one by the Commissioners' interference, what would have become of the property the British merchants had actually begun, through the advice of the Hong merchants, to collect for the purpose of offering up?

It is only natural that the China merchants should have considered themselves under-compensated for property violently wrested from them; but, whatever may have been the other offences of the Commissioners, it does not appear that they can consistently be accused of sacrificing the property of the British merchants in any attempt to avert a war.

On the 31st January Mr. Autrobus wrote to the editor of *The Times* as follows:—

Sir,—In your issue of yesterday's date you published a memorial to Lord Russell from the Chamber of Commerce in Shanghai, and deemed the subjects to which that memorial referred of sufficient importance to bestow upon them one of your leading articles for the day. In this estimate of the weightiness of the questions involved, every one who has any personal interest, present or to come, in the China trade, must most fully concur; but it appears to me that some misapprehension exists as to the meaning which the memorialists attach to the "firm and decided tone" which they consider "will best preserve that peace which all classes, and more especially merchants, are so anxious to maintain;" and, therefore, as a member of one of the firms signing the memorial, and also as the late chairman of the body from which it proceeds, I desire to explain that meaning, and to show that, acceding to the request now made is more calculated to maintain than to impair the satisfactory relations existing between China and this country.

A now long and costly experience has at last clearly taught us that in dealing with Asiatic races "a firm and decided tone"—a rigid and consistent enforcement of our rights, whether as rulers or under treaty, will prove more conducive to peace and security than to war. I am not disposed to maintain that in China the consistent application of this policy would have avoided war in the end, for the pride and arrogance of the Chinese and their contempt of foreigners were such as to ensure the infringement of their treaty obligations; but that the vacillating and inconsistent policy of sometimes yielding up treaty rights as a means of conciliation, a step always misinterpreted into weakness, and of at other times applying the irritating persuasion of military or naval force, undoubtedly led to the ultimate climax of war, is an indisputable fact.

For the first time, however, in her history, by the Treaty of Tien-tsin and its enforcement at the gates of Peking by the introduction of the foreign representatives to a residence in the capital, and by the accession to power of the peace party under the more enlightened guidance of Prince Kung, China may be said to have been fairly opened to foreign nations, and the influence of their Ministers to have been really powerful.

As an early consequence of this improved state of things, the expedition up the Yang-tse-Kiang, under Admiral Sir James Hope, took place, and under his able management, and with the valuable co-operation of Consul, now Sir Harry Parkes, the ports of Chinkiang, Kiukiang, and Hankow were opened to foreign trade and made consular residences, steps which were confirmed by the Chinese Government and the British Minister; and by a wise arrangement that all duties on the river trade should be secured to the Imperial Government by collection at Shanghai, the whole river from Chinkiang to Hankow, a distance of 450 miles, was, with the exception of that portion occupied by the rebels (about one-fourth or one-third of the whole), opened also to trade by the common consent of the Chinese and foreign Governments.

At the same time, in full accordance with both the spirit and the letter of the Treaty of Tien-tsin, British merchants entered into large operations, more especially in tea, in the interior of the country, and for these operations they have necessarily purchased or rented extensive premises. The whole river thus opened to commerce, and the interior of the country as well as the ports accessible to our merchants, the development of trade has probably been the most extraordinary ever witnessed in a similar space of time, and this notwithstanding the presence of the rebels on a portion of the route.

The increase of the Customs' revenue at Shanghai, the large amount of foreign steam tonnage employed on the river, and the capital invested in it are the most convincing proofs of the truth of this remark.

It is now proposed by the Chinese Government—and the British Minister has assented to the proposal—to limit the trade of the Yang-tse-Kiang above Chinkiang to the actual ports of Kiu-kiang and Hankow only, to establish custom-houses at those ports also, and British subjects are informed that they may not rent houses or buildings in the interior, but must live in inns, boats, or Chinese houses.

I have always considered it the decided interest of British merchants to support the present system of custom-houses in China under foreign inspection, not only as affording a valid security for the equal collection of duties, but as providing, as is now exemplified in the case of the newly disciplined Chinese force at Shanghai and by the powerful squadron fitting out in this country under Captain Sherard Osborn and Mr. Lay, the pecuniary means by which a gradual regeneration of the power of the Chinese Government may, it is hoped, be effected; but I would willingly leave it to the intelligence and practical knowledge of Mr. Lay himself to decide whether the present restrictions to Kiu-kiang and Hankow, and the establishment of custom-houses there, are likely to benefit or to injure the Imperial Customs' revenue in the aggregate; to simplify or to complicate the Customs' arrangements all down the Yang-tse-Kiang; to accelerate or to retard the full development of commerce between the Chinese and foreigners; and, as to the restriction from renting houses in the interior of the country, which will completely nullify the most important privilege conferred by the Treaty of Tien-tsin, let Her Majesty's Government take not only the opinion of the Crown lawyers on the legality or illegality of the step, but of such men—all now resident in this country—as Sir James Hope, Sir Rutherford Alcock, Sir Harry Parkes, and Mr. Lay, as to whether the step will not, from being retrogressive in its nature, open the door to further claims by the Chinese to restrict the free operations of British merchants, and so pave the way for a renewal of those national disputes which by a firm, consistent, and yet conciliatory policy, may for the future be avoided.

I would wish to do ample justice to the tact with which Mr. Bruce has secured the confidence and respect of the Chinese Government, and fully recognise the generally satisfactory manner in which, in the face of many difficulties, he has acted in the interests of commerce; but the present restrictive alterations bear the appearance of a return to a vacillating line of policy sure to be misinterpreted. These are probably proposed at Peking at the interested instigation of the Viceroy, who would receive the duties at the new custom-houses, and present themselves to my mind, as to the Chamber of Commerce at Shanghai, as pregnant with evil for the future.

It is not, then, with the object of returning "to a system of threats and force," but, on the contrary, in the interests of an increasing commerce

Digitized by Google

and a settled peace, that the merchants of China advocate "a firm and decided tone,"—that is to say, a rigid adherence to our own treaty obligations, and the insistence equally clear and undeviating that the Chinese Government shall not withdraw a single of those privileges and rights which it has conferred on British subjects by the treaty of Tien-tsin, and the regulations of trade, established since its ratification.

I earnestly trust, therefore, that Her Majesty's Government may listen with favour to the representations which have just arrived from China, and that as the "Revised Regulations of Trade on the Yang-tse-Kiang," close with the words that they "are provisional and open to revision, if necessary," instructions may be given to Her Majesty's Minister in China to urge the re-establishment of the system in force prior to their institution.

Apologising for the length of this communication, which, however, I hope the importance of the subject may be considered to justify,

I am, Sir, your obedient servant,

R. C. ANTROBUS.

In reply to this able letter, which states every argument that can be urged in favour of the memorial, Mr. Lay writes:—

Sir,—Mr. Antrobus, with the memorialists who have addressed Earl Russell, have apparently quite overlooked the terms of the treaty of Tien-tsin respecting the Yang-tse. According to the 10th Article,—

"British merchant ships shall have authority to trade upon the Yang-tse. The upper and lower valley of the river being, however, disturbed by outlaws, no port shall be for the present opened to trade, with the exception of Chinkiang, which shall be opened in a year from the date of the signing of this treaty.

"So soon as peace shall have been restored British vessels shall also be admitted to trade at such ports, as far as Hankow, *not exceeding three in number*, as the British Minister, after consulation with the Chinese Secretary of State, may determine shall be ports of entry and discharge."

Thus the right to navigate the river beyond Chinkiang does not arise until the civil war now raging on its banks shall have been suppressed. A the instance of Lord Elgin, however, the Chinese Government consented to anticipate the period indicated, and the Yang-tse was opened as far as Hankow under provisional regulations, the last clause of which was as follows:—

"These regulations may at any time be suspended or annulled, added to or amended, as and in whatever way may be judged expedient by Her Britannic Majesty's Minister-Plenipotentiary in China and the high Chinese authorities in communication together."

Here distinct provision was made for the modification of the regulations, should it become desirable. Are the memorialists, then, warranted in representing the change as a "further restriction of treaty privileges?" I submit that they are not. The Chinese Government have not withdrawn a privilege conferred by treaty. They might, if they pleased, have closed the river until the condition named in the tenth article of the treaty was satisfied. But they have stopped far short of this, and have simply made an alteration in the provisional regulations, with the consent of our Minister.

I fully concur with Mr. Antrobus in his advocacy of a "consistent enforcement of treaty rights," but I do not agree with him and his brother merchants that, having obtained a concession over and above what we are entitled to by treaty, we should be right in resenting the modification of such concession, in accordance with a distinct agreement, as a breach of treaty. Is the treaty to be elastic where we are concerned, and to be rigidly enforced where the Chinese are concerned?

Revenue, I believe, is not the chief motive for the change complained of. It is the outrageous conduct of a certain class of Europeans that has alarmed the Chinese Government for the preservation of order if foreigners are to have unrestricted access to every town and village throughout the length of the river. These persons, when they come to grief, appear as British subjects, claiming redress at the hands of the Consul; when caught red-handed they are not British subjects, but subjects of some other Power, and so escape scot free. * * * * * * * *

I have no hesitation in adding that I quite concur in the advantage of opening the Yang-tse to unrestricted commerce, and I regret the inconvenience the new arrangements will entail upon the Customs' department, and possibly, also, the loss of revenue. Still we are bound to consider the difficulties of the Government, and ought not to consult solely our own profits. My belief is that there would be no great difficulty in inducing the Chinese to meet the wishes of our merchants, provided they obtain adequate guarantees against the abuses now rife upon the river.

I am, Sir, your obedient servant,

Feb. 4. H. N. LAY.

Two days afterwards, Mr. Antrobus wrote again to *The Times* in reply to Mr. Lay. The letter is as follows:—

Sir,—When addressing you on the 31st ult. I was not unaware of, nor did I in the least overlook, as Mr. Lay supposes, the terms of the 10th Article of the Treaty of Tien-tsin in reference to trade on the Yang-tse river. Every one connected with the China trade is cognisant of the fact not only that the river Yang-tse was opened to commerce in advance of the period designated by the treaty, but that when the step was adopted a much greater latitude was given than the treaty provided for, in opening up the whole of the river between Chinkiang and Hankow, the rebel possessions alone excepted, instead of restricting our merchants to a defined number of ports. The Chinese Government was astute enough to recognise the great advantage to itself of having a river daily traversed by foreign steamers, on a great portion of which no mandarin fleet at the time dared to show its nose, and thus for once, on the judicious and friendly application of our authorities, it forestalled the time of granting an advantage to the foreigner which otherwise, to its own great detriment in leaving the rebels in sole possession of the river, might have been indefinitely postponed.

The questions, therefore, of now restricting foreign merchants in their river trade to a rigid compliance with the treaty, and that of limiting their right of tenancy of such warehouses in the interior of China as may be essential to their trade there, though both involving more or less the same principle of action, so far as we are concerned, stand on very different grounds—the one on that of the expediency of not resigning, except on very weighty considerations, a valuable concession to us on the part of the Chinese, and the other on the still stronger ground of whether we should not be yielding up a most important right distinctly conferred upon us by treaty. If Mr. Lay will again refer to my letter he will find that I thus dealt with the two cases, that I did not designate the modification of a concession over and above our treaty rights as "a breach of treaty," and that I was not so unfair as to ask, as he implies I do, for any elasticity of interpretation or application of the treaty in our own favour; on the contrary, I very clearly laid down that the course which will justify us in adopting "a firm and decided tone," as advocated by the memorialists in China, is that of rigidly adhering to our own treaty obligations and then keeping the Chinese without exception to theirs.

Legitimate commerce has often to suffer for the misdeeds of filibustering adventurers, and the possible evils which Lord Elgin foreshadowed, as quoted by Mr. Lay, are always, no doubt, more or less impending over honest commercial interests in China; nevertheless, in the face of this, Lord Elgin and Mr. Bruce urged and obtained the institution of trade regulations, which threw open "the whole coast trade of the river," and the question now is whether those evils have really become of such magnitude as fairly to call for the restrictions now proposed.

If this be so—and Mr. Lay asserts it is the case—there is much to be said in support of the change assented to by our Minister in China, greatly as it may delay the otherwise rapid development of trade on the Yang-tse. I would only remark that the Chamber of Commerce—to the interest of whose members such a state of things is no less adverse than to the Chinese Government—does not allude to it as then calling loudly for redress, and that I have heard nothing from China to that effect myself.

If our Government could devise the means of establishing any international court, or any other process, in conjunction with other foreign Powers interested in China, by which the ruffians occasionally caught "red-handed" might be summarily and effectively dealt with, it would confer the greatest benefit on all interests in the East, and remove all possible grounds from the Chinese for urging that restrictions should be placed on the foreign trade.

I am glad to find that, apart from this open question of the amount of dangerous and illicit traffic on the Yang-tse, Mr. Lay most satisfactorily answers the appeal I made to him as to the undesirableness, in other respects, of the newly proposed regulations for trade on the Yang-tse-kiang.

I am, Sir, your most obedient servant,

February 6. R. C. ANTROBUS.

To this Mr. Lay rejoined on the 8th inst.:—

SIR,—In answering Mr. Antrobus's appeal in support of the Memorial of the China merchants to Earl Russell I purposely confined myself to the point which immediately concerned the Customs' department. Mr. Antrobus admits that we have access, as I have shown, to the Yang-tse by virtue of a concession (with the right of modification expressly reserved), and not by virtue of a right conferred by treaty. This is all that I contend for. But how has it come to pass that the influential body of merchants have represented the modification as one among "further restrictions which the Chinese Government seeks to impose upon our treaty privileges?" Such a representation is in direct conflict with the plain language of the treaty, and I protest against the erroneous impression they have conveyed to the British public.

Mr. Antrobus speaks of the "expediency of not resigning, except on very weighty considerations, a valuable concession." We extorted from the fears of the Chinese—there was no room for the exercise of the imputed astuteness—a concession to which we could not lay claim under our treaty, and we engaged to permit them to modify it "as, and in whatever way, may be judged expedient;" words which, if they mean anything, convey a distinct obligation on our part by which we are bound to abide. This is the only "weighty consideration" that should influence us; the question of expediency is, in my humble judgment, inadmissible.

With regard to the other grievance to which Mr. Antrobus directs my attention—namely, "the limitation of our right of tenancy of warehouses in the interior," I must say there seems to me as little real foundation for it as for that preferred in respect of the Yang-tse rules. The 12th article of the treaty upon which it is based simply says,—

"British subjects, whether at the ports or at other places, desiring to build or open houses, warehouses, churches, hospitals, or burial-grounds, shall make their agreement for the land or buildings they require at the rates prevailing among the people, equitably, and without exactions on either side."

It would not be becoming in me to express an opinion as to whether this clause does or does not give the merchant the right to build wheresoever he pleases. Sir F. Bruce seems to think that it does not. But I may ask what would be the practical result if the merchants' interpretation of the clause were forthwith acted upon? This, that not a single person would venture, in the present disturbed state of the country, unless, indeed, his safety were guaranteed by the presence of British ships of war, to build a house or a warehouse and take up his residence in the interior. The merchants come forward with a grievance which, the treaty right admitted, is, by reason of the practical difficulties in the way, in point of fact no grievance at all.

I am, Sir, your obedient servant,

Feb. 8. H. N. LAY.

In *The Times* of this day (Feb. 12) Mr. Antrobus replies as follows:—

With no desire whatever to continue a correspondence with Mr. Lay, I am forced to correct two important errors in his letter of the 8th inst. He states, "We extorted from the fears of the Chinese a concession to which we could not lay claim under treaty." In refutation of this it is only necessary to refer to the correspondence of Mr. Bruce in November, 1860, with the Prince of Kung, presented to Parliament in 1861, and to Lord Elgin's letter to Lord J. Russell of the 6th December, 1860, in which he states, "The right to navigate the Yang tse River does not in strictness arise under the Treaty of Tien-tsin until the civil war, which now rages on its banks, shall have been suppressed. The Prince of Kung

Digitized by Google

has, however, as your lordship will perceive from the correspondence of which a copy is herewith enclosed, met in a liberal spirit Mr. Bruce's proposal to anticipate that period by a provisional regulation."

That does not look like action under extortion, and a reference to Mr. Bruce's letter to Lord J. Russell of the 2nd of December, 1860, will amply prove, on the contrary, the friendly feeling towards the Imperial Government under which the proposal was made.

The modifications of the early regulations on the river were not placed in the sole power of the Chinese, but in that of our Minister and the Chinese authorities "in communication together."

Secondly, in opposition to Mr. Lay's reasoning and conclusions I assert, as a matter of fact, that, many leagues removed from "guarantee by the presence of a British man-of-war," my own firm has had clerks and other *employes* resident in the interior, under the protection of consular passports, in warehouses specially rented for purposes of trade, under the 12th Article of the Treaty of Tien-tsin, and the same has been done since the spring of 1861 by the majority of the firms in the north of China.

Any limitation of this right of tenancy is therefore the treaty right admitted, a grievance not imaginary, but most seriously real.

I am, Sir, your obedient servant,

Feb. 11. R. C. ANTROBUS.

Parliamentary Intelligence.

BRITISH INTERVENTION IN CHINA

(Feb. 5th.) Mr. DISRAELI, after glancing at several topics in the Queen's Speech, spoke as follows:—"But there is one country which is not mentioned in the Royal Speech, respecting which I should be glad to get some information and some particulars as affecting the popular question of the day—non-interference—and that is China. I wish we had a more accurate, or rather, I should say, a more precise idea of what our relations are with the Chinese, and what is going on with the Chinese, than seems to be in the possession of Parliament, and I wish we could command more knowledge on the subject than is to be obtained from the Speech on the table. As fas as I can judge from the communications which arrive by every mail, there is constant fighting in China, and, as far as that fighting is concerned, it appears to be supported in a great degree by our fellow subjects. By one mail we learn that a British Admiral is severely wounded. Another mail informs us that an English Colonel is killed. A great deal of slaughter is occasioned by causes at present unknown to us. But in the recess there was a communication made to the public by a member of the Government on the subject of China, which was of a very startling character. There was a meeting of the Scientific Society, and at this Scientific Society there attended some very distinguished officers in Her Majesty's service, and these officers informed the meeting that they were going to China, having been engaged by the Emperor of China, and having the privilege of enlisting their fellow subjects to fight in their behalf—in fact, another Spanish Legion. This was a communication which created a considerable effect, and there seemed some doubt on the part of the eminent chairman whether it could be depended upon; so, seeing a member of the Government present, he ventured to appeal to that right hon. gentleman whether there was any authority for the statement made to the meeting, and that right hon. gentleman rose and said it was perfectly true; he entirely agreed in the operations and enterprize, and he wished all success to the gallant Englishmen who were enlisting Englishmen to fight for the Tartar dynasty of China, and he trusted that they would completely accomplish their object. We hear, in fact, of officers in Her Majesty's service enlisting British subjects, in order to interfere between the Emperor of China and his rebellious subjects: and I want to know whether that is a policy which the House approves, and whether they do not think it requires some explanation. Let me remind the House that about twenty-five years since our Chinese policy commenced. The noble lord, the present First Minister, may be said to be its author. It began by attempting to put down the Tartar dynasty, and the noble lord when informed by the late much respected Sir James Graham, then a member of this House, that the population of China was considerable, nearly half the population of the globe, and that it was not so very easy to put down a Government commanding resources of such magnitude, said it was very true the population consisted of about 300,000,000, but half the population consisted of secret societies who were not at all aware of the real state of China; that the great body of the subjects of the Emperor of China were discontented with the Government, and he was confident they would have support of which the House had no knowledge, but that the Government was well informed, and the House might depend upon it the war would be successful. The war was successful. It was successful, if it may be called successful, in developing ever since these secret societies, which have taken other names familiar to the House. Twenty-five years have elapsed. The noble lord who made war against the Tartar dynasty is now supporting the Tartar dynasty and making war against the rebellious subjects of the Emperor of China. We have completely changed our position. We are making war against the Taiping insurrection. There has been a great controversy in this House as to the origin of the insurrection. Who are the Taipings? What are the Taipings? I maintain that we have nothing to do with the Taipings. Whether they are patriots, or whether they are brigands, is nothing to the people of England. The status of the Taipings is a question for China, not for England; and if we attempt now in this illegitimate and roundabout manner to support the Tartar dynasty, we shall ultimately be involved in another Chinese war for a different object and on a different side from that which we have hitherto taken. I say it is a matter of great importance, at a moment when we hear for the first time of reduction of public expenditure, that we should not get involved again in Chinese wars. Chinese wars have been one of the most considerable causes of commercial embarrassment in this country, and have led very much to that increase of taxation against which we have heard so many rumours lately."—Colonel SYKES made some observations upon the prospects of a supply of cotton from India, and upon the state of our relations with China, censuring in strong terms the mode in which the war in that country was carried on. He affirmed that the cost of the position which the English Government had taken up in China was not less than £1,000,000 per annum.—Lord PALMERSTON, after dwelling on the approaching marriage of the Prince of Wales, and defending the policy of the Government with regard to Greece and the Ionian Islands, spoke as follows with regard to the China question, in reply to the leader of the Opposition:—"If there are any papers which anybody wishes to have relating to recent transactions in China there will be no difficulty in producing them. But the right hon. gentleman said that the policy we were pursuing in China was inconsistent with that which we originally followed, and was a policy leading us into a Chinese war. The policy we pursued in China from the beginning was to protect our trade and commerce with that country, and those who know anything of China will not hesitate to admit that our commerce with that country is a most important outlet for the productive industry of these islands. Whence in the outset proceeded the obstructions to our commerce in China? From the Imperial Government. It was the duty of the Government of this country to endeavour to remove those obstructions, and to insist upon those rights which properly belong to our subjects resident in China. At that time, therefore, we were in conflict with the Government of China. We are no longer in conflict with the Government of China; on the contrary, our Minister and officers there are on the most friendly footing with the Government, which, having its eyes open to its true interests, seeing that the old prejudices which induced it to keep the 'outside barbarians' away from the country were illusions, now does all it can to promote commercial intercourse with other nations. Who now are the obstacles? The Taipings. All the information we get from China goes to show that wherever the Taipings pass, peace, commerce, industry, are destroyed. Their course is marked by murder, by bloodshed, by plunder, by everything that destroys commerce and the elements of commerce. But we are not making war against these Taipings except so far as this—we require them to respect the neighbourhood of those cities in which our commercial establishments are fixed. We are withdrawing troops from China instead of sending them there. It is true, indeed, that we have authorised British officers to engage in the service of the Emperor, to organise in his service and his pay certain small bodies of men who, by drilling and instructing his troops and his navy, may enable him to restore tranquillity in his dominions. You may depend upon it that there is a strong English interest in that. Until tranquillity and order are restored in the provinces of China we cannot expect that development of British commerce which otherwise could not fail to take place. So much for our policy in China, which is not in contradiction to that we originally acted upon, but is entirely in unison with it. The result has shown the success of our policy, because we have converted an enemy into a friend, a suspicious and jealous people into friendly and eager traders."

BRITISH OFFICERS IN CHINA.

(9th.) Colonel SYKES asked the Under-Secretary for Foreign Affairs whether, as permission was given, by a notification in the *Gazette* of January 13th, to British officers to accept commissions in the service of the Emperor of China, similar permission extended to British officers and British subjects to accept commissions in the service of the Taiping Emperor or his Government.—Mr. LAYARD said that no permission had been given to officers to hold commissions under the Taiping Emperor, with [illegible] acquainted.

Spirit of the Press.

BRITISH TRADE ON THE YANG-TSE.

THE TIMES.

Twenty-nine of the principal commercial houses in China have signed a Memorial to Lord Russell, begging him "to hold a firm and decided tone" towards the Chinese Imperial authorities. This is a very serious matter. We cast our eye down the list of names printed on the circular copy of this memorial, and we recognise signatures which represent nearly the whole body of wealthy and energetic men who have, by all and every means necessary to the end, broken down the old moral wall of China. Our wars have been, in fact, their wars, our victories have been their victories, our occasional defeats have been their defeats. Successors of the old East India Company, they pushed their traffic silently and submissively so long as these means served their purpose, but hailed to England for ships and armies when their views became more extended and the objects within their reach more precious. This important body has instigated us to two Chinese wars, of which the cost has pressed heavily upon the country. They have been as much our guides and leaders as if we had once again incorporated a body of rulers, and had let them loose to make conquests in the East. What paths they have led us through we would rather not at this time of day discuss. These powerful and wealthy merchants will more safely justify the course through which they have led us by the results which have been attained. These have been so enormous that, when we contemplate the contrast of China as she was and China as she is, we must all believe that, however questionable may have been some of our earlier acts, the ultimate result has been a great good, both to us and to the Chinese. Looking at our trade statistics also, we must admit that, if these energetic sons of commerce, busy upon the spot, have gathered the first fruits of every victory, yet the wider and the later harvests have been so shared by the people of these islands that every cottage feels the benefit in employment widened and in comforts cheapened. Still, however, these are startling words which come by this mail from Shanghai, especially when backed by the authority of every house upon "the Bund." Up to this time a "firm and decided tone" towards the Chinese has always meant that we should insult somebody, or take a city, or burn a fleet of war-junks. It behoves us to look very anxiously at a document bearing such ominous words. We hope, however, that the entire change of circumstances which has taken place within the last five years has given a new meaning to an ill-sounding phrase. These British merchants are no longer shut up within their factories at Canton, or timidly building counting-houses on the narrow harbour-ledge at Hong Kong. They have raised palaces and cities in the spots where it has pleased them to fix their trade. They have obtained a great hold upon the industry of the people. The tea districts and the silk districts are no longer indif-

Digitized by Google

ferent to the markets of the outer world, and the present race of Chinese, content with the balance of trade, accept with eagerness our imports from Europe and from India, and calculate the duties carefully, even although "foreign medicine" should be included among the cargo. The complaint now made by the British merchant against the Chinese shows how great has been the advance in a short time. The mighty river Yang-tse, upon the waters of which our merchants dared not show themselves at a time which seems to have been but yesterday, is now not only mapped and surveyed, and made as known to science and as free to commerce as the Thames, but it is held to be an intolerable grievance that the Chinese should erect Custom-houses upon its banks, or should restrict exportation or importation to any specified port throughout its 3,000 miles of stream. Until after the advance to Peking the hopes of our merchants hardly ever dared to reach beyond entering some of the forbidden towns, and establishing some direct communication with the interior. Now, it is put forward by them as a great injury that, although they are allowed to pass at will through any part of the Chinese territory, and are free to buy and sell as they pass, yet they are expected either to lodge at a Chinese inn, or to make their dwellings, as millions of Chinamen do, in some floating habitation on the river or canals, and are not allowed to occupy any portion of the soil of China. These are the two grievances which have been thought of sufficient magnitude to produce the very important memorial which we publish elsewhere—first, there are Custom-houses on the Yang tse; and, secondly, merchants may not build or buy houses. We are by no means inclined to underrate the importance of either of these complaints. It would undoubtedly contribute greatly to the freedom of our relations with the Chinese if all the duties upon our goods were paid once for all at the outport, and if they then passed free, without hindrance from Custom-houses, through all the inland waters. It is also a fair expectation that with the advance of our commerce British Hongs should arise upon the banks of the Yang-tse just as they have risen at Hong Kong and Shanghai. There may, indeed, possibly be something to be said upon the Chinese side with respect to the Custom-houses on the Yang-tse, for there may be some lack of certainty that a ship which proposes to break bulk some 600 miles up the river has paid quite all its duties at the Custom-house near the mouth of the river; but the refusal to allow our merchants to occupy houses could only be conceived in a grudging and illiberal spirit. These vexations, however, are not matters to take a "firm tone" about. That "firm tone" policy is a worn-out tradition now. China is passing into another phase of existence. The door has been sufficiently opened for the strong tide from the West to stream it, and not all the united force of the black-haired race of Han will ever be able to shut it again. Instead of using resolute expostulation, it is wiser now to await the current of circumstances which is certain to carry us on to the full development of our commercial relations with that part of the world. What China now wants is peace, and, unless at the last extremity, it behoves us not to cramp her movements while exerting herself to obtain peace.

DAILY NEWS.

The Shanghai Chamber of Commerce has seriously memorialised Earl Russell to adopt a firm and decided tone in demanding from the Chinese Government as treaty rights certain privileges which the Treaty of Tientsin not only does not grant, but also guards against. The great complaint of these merchants is, that the "Chinese Government dispute the right of foreigners to trade upon the river, excepting at the consular ports of Chin-kiang-foo, Kiu-kiang, and Hankow," and the only phrase to be found in the treaty in their favour is that in the tenth article—"British merchants shall have authority to trade upon the Yang-tse." Of course, in no country could such an agreement be interpreted as giving a general right to trade anywhere and everywhere on the banks of an enormous river; but it is also specially mentioned that the trade is only to be carried on "at such ports as far as Hankow,, not exceeding three in number, as the British Minister, after consultation with the Chinese Secretary of State, may determine shall be ports of entry and discharge." It is a very serious reflection upon the intelligence, the good sense, and the good feeling of the British community in China, that, in the face of such explicit language, such an unwarranted demand should have been made by the Shanghai merchants, and it is to be hoped it will be repudiated by the more important Chamber of Commerce at Hong Kong, as it is certain to be by the independent English press of China. The unreasonable demand thus made is all the blacker because it follows on a concession made in a friendly spirit by the Chinese Government, to which it was not at all compelled by treaty. It is expressly stated in the tenth article that the upper and lower valley of the river, excepting Chin-kiang, are not to be opened to British trade while "disturbed by outlaws"—that is, the Taipings; and until "so soon as peace shall have been restored." Thus it is by mere favour of the Chinese Government that the Shanghai merchants are trading on the Yang-tse at all, except at Chin-kiang; but instead of meeting this concession in a proper spirit, they make it a ground for new and extravagant demands.—*Daily News.*

OUR RELATIONS WITH CHINA AND JAPAN.

With the late Emperor Hienfung, whose remains have just been removed from Peking, there ended one great phase of Chinese policy towards Europe, and, we may add, of English policy towards China. While Hienfung sleeps with the six previous Emperors of his dynasty, the Regent, Prince Kung, actively and sincerely carries on the work of consolidating foreign relationships, as agreed to by treaty; while the younger members of the British Legation at Peking are described, in the latest accounts, as playing at cricket in one of the Temples of Heaven. This is indeed a change, and there are not wanting those who audaciously claim the merit of having produced it, on the fictitious, and even then imperfect, ground that it has resulted from that application of force which they always supported. The truth is, however, that our relations with China have improved, not so much because of our wars with that country as in spite of them, and the improvement is, in many respects, more real than apparent. With an expanding commerce as the basis of relationship, and a commerce involving common interests, common politeness, and common duties, the connection between England and China could not have failed, under any circumstances, to expand and improve; and it may be fairly questioned whether more obstacles were really thrown in the way of that improvement by the bigoted old Chinese party at Peking, who set their faces against all compromise, or by the "Old Canton" party of foreign residents, who ever sought to ride rough-shod over Chinese feeling and prejudices, and who cunningly involved this country in a war which was condemned by the conscience and by the Parliament of Great Britain. By more justice, more consideration, and better diplomacy on our part, the connection between the two countries might have been developed without violence, and without originating that great and desolating rebellion which seems now happily to be drawing to a close. As it is, the Chinese have scarcely more improved in their treatment of us than we have done in our position, especially as a nation, towards them. In Japan, on the other hand, the movement as regards foreign connection is entirely and continuously retrograde. Yedo is represented as "fast becoming deserted;" and there is no longer any doubt that it is ceasing to be the capital. The Prince of Kanga, who has the reputation of being, along with the Princes of Mito and Satsuma, one of the three most powerful Daimios of the empire, has already left it, along with his establishment and those of many other Daimios. This Prince has about 30,000 armed retainers of his own, besides those of inferior nobles who are dependent on him—so his power may be imagined. As yet it is quite uncertain whether Yedo is being deserted as a measure preparatory to continued peace or to war. It may be to either, or with an eye to both. If intended as a peace measure, its evident object is to make the treaty-right which foreigners have of residing at Yedo of as little use to them as possible. That same treaty forbids their going to Miako, the place where the spiritual Emperor resides, and which is now likely to be the seat of the temporal power also, so that little will be gained by insisting on the right of residence at the former capital of the Taicoon. But it is quite possible that the Japanese nobles are preparing for the contingency of war. They have heard of the destruction of the Emperor of China's Summer Palace, and know that Yedo is in a position which can be commanded by gunboats. They themselves, indeed, have been buying up several powerful European steamers of late, but these are not well fitted for any purpose of war except transport. In the event of there being a war with the Japanese, whether through their fault or ours, it is of importance to have some idea of the amount of force which they are able to bring into the field. Mr. Pemberton Hodgson, who from his official position had peculiar opportunities for inquiring into this matter, roughly calculates the entire available force of the empire at nearly three-quarters of a million of fighting men. This is probably an under-calculation, for the Princes of Kanga, Mito, and Satsuma have between them at least 80,000 fighting men, which would add above 50,000 more to the number belonging to the first class Daimios. Thus we have a very formidable force; and though mere numbers of native troops have never been thought much of in the East, in that sense the Japanese are not Easterns at all, and there is little doubt that they will fight to the death, and be almost as formidable as European troops.—*Daily News.*

THE TAIPINGS IN CHINA.

A writer in the *Dublin University Magazine* says:—"What are the prospects of the Taiping rising? In this question we are interested no less in a general than a selfish point of view. Commander Brine thinks that the ultimate result will be the division of China into two empires, over one of which the Taipings will rule. He reminds us that the popular notion of the Chinese empire having always remained unchangeable under one emperor is a mistake. Centuries ago it had two emperors, whose dominions were divided by the broad-spreading Yang-tse. Now all things point to some change in the ruling dynasty. The great famines, the desolating pestilence, which have filled to overflowing the cup of the people's misery, predispose them to change. They long to rest from their sufferings; and they scarcely hope to find safety from the ruling house under which so much has been suffered. But Siu-tsuen does not trust alone to human feelings. Wildly, foolishly, savagely, perhaps, he has touched the deep emotions of religion in the hearts of his followers. It is of no avail to sneer at his misconceptions and the inflation of his style. He is but a poor uncivilised man. It is not many years since he tended his parent's cattle, and spent his days in menial drudgery, pressed by penury, unknown or despised as a semi-maniac. In those days of adversity his heart beat high with lofty resolve, and his spirit swelled proudly and tumultuously with a religious enthusiasm which was noble though irregular. A few years have passed, and he has risen to be the rival of a dynasty which has lasted for centuries. If his career of conquest has been stayed, it is only because he has done so much that flatterers can tell him he need do no more. His future no man can prophesy. What he has done entitles him to rank among the heroes of mankind."

CHINA PRIZE MONEY.—"A Field Officer" writes to *The Times*:—"More than two years have passed since the termination of the neat little campaign in China, and nothing is heard of the prize money. After the capture of the Taku forts a commission was appointed to take account of guns and other articles of prize, and Sir Hope Grant, the Commander-in-Chief, promised the troops that their interests should, in this respect, be most strictly guarded, which promise was repeated after the subsequent actions in the advance to the capital. It is true that a distribution of money took place at Peking, but this was from the proceeds of the sale of 'loot' brought from the Summer Palace. Only a third part of the expedition shared therein, and the main articles of 'prize' remain unaccounted for up to this time. There cannot be two opinions upon the propriety of keeping faith with our soldiers in the matter of prize money."

THE TRANSIT THROUGH EGYPT.—A number of passengers on board the P. and O. steamship *Candia* write to *The Times*, under date Jan. 13, complaining that, during the 24 hours occupied in the transit, the distributionsof the hours of starting and arrival was calculated for the greatest possible discomfort to the passengers, and apparently for the greatest possible profit to the Egyptian innkeepers. Mr. Howell writes in reply that the Marseilles boat was three days late, owing to the detention of the outward mail from the 26th to the 29th December by the authorities of the Post-office—a measure which must always be attended with much inconvenience to passengers, especially in Egypt.

SIR RUTHERFORD ALCOCK is at present staying in Paris.

MR. C. F. B. ALLEN, Mr. N. B. Dennys, Mr. E. Solbé, and Mr. T. Walters have been appointed student interpreters in China and Siam.

LONDON, THURSDAY, FEB. 12, 1863.

INTERVENTION IN CHINA.

OUR relations with China and the new footing on which we are about to stand in that country, demand the earnest attention of all who are interested in Eastern politics. We are no longer the despised barbarians whose presence in the land was simply endured, but not sanctioned, by its rulers. We are now the councillors of the EMPEROR, the supporters of his throne, the defenders of Imperial rights. The Court at Peking is not only on terms of amity with Great Britain, but Prince KUNG has been compelled to seek for our active co-operation in order to rid the Empire of the land-pirates who are now rendering it desolate. The humility of the Celestials is wonderful; not only have they consented to receive British advice, but they are willing that their soldiers shall be drilled and led to battle by English officers, and that the revenues of China should be administered by English officials. It is well that we should thoroughly weigh the exact bearings of our position. Let it not be said hereafter that the responsibilities of the undertaking and the complications it may involve have come upon us unawares.

Without consent of Parliament, the Government has given permission to English officers to serve under the EMPEROR and to enlist English mercenaries for the same service, and at this very time Captain OSBORN is busily engaged in beating up recruits. No defensive alliance has been entered into with the Imperial Government; yet we are in reality pledged for its protection. And whatever city the Taipings may venture to attack in future, they will find themselves opposed by Englishmen. Not eighteen months have elapsed since Earl RUSSELL instructed Mr. BRUCE that provision should simply be made for the defence of the Treaty ports, that in no case were the Chinese authorities to pay our troops, and that "Her MAJESTY'S Government desire to maintain, as "they have done hitherto, neutrality between the two contending "parties in China;" and only eight months ago our Foreign Secretary in his despatches still maintained the policy of non-intervention. In official language this policy may be even now sanctioned by the Government, but in reality a great change has been effected. We have taken up an entirely new position with regard to China, we have commenced a mighty enterprise, and we have done this without consultation with Parliament. The course of policy sanctioned by the Government in this respect is so serious that it must speedily form the subject of debate in the lower House, and Mr. DISRAELI has already prepared the way by his remarks on the Royal Speech, and by the demand for a more precise idea of what our relations are with the Chinese. On constitutional grounds, this policy is fairly open to discussion, and if taken up as a party question the Government will have to prepare for a vigorous attack.

When Mr. LAYARD showed the necessity of preserving the Treaty ports by ridding the neighbouring territory of the Taiping pestilence, and when it was asserted that the action of our military authorities was for the defence of British subjects in China, and not for the purpose of rendering aid to the EMPEROR, every one, with the single exception of Colonel SYKES, felt that the case as thus stated was most reasonable, that it was in fact essential so to act, if we would preserve our rights and privileges in the Flowery Land. It was possible to take the gauge of those operations; but no one can foresee the results likely to flow from the new policy. That the rebellion of the Taipings will be destroyed may be regarded as certain, but what then? Peace obtained through the help of the foreigner will entail no trifling liabilities on the Imperial Government, and many circumstances may arise which will call for direct intervention on the part of Great Britain. But while it is acknowledged that we shall incur some risk and no slight responsibility by undertaking to support the Chinese Government with the aid of English officers, it is argued that if we do not thus interpose we shall be superseded by other European Powers. Russia is eager for direct intervention, and France would be equally willing to assume a protectorate over China. So in very self-defence we are compelled, it is said, to come forward, since, as a writer in *Blackwood's Magazine* remarks, "our commercial interests and revenue "are so interwoven with the well-being of China that we cannot "afford to wait the time that might elapse before the restoration "of order." The same writer observes, and the aphorism is one which cannot be gainsayed, that "the foot of a vigorous "European nation once planted firmly on the soil of an Eastern "State cannot be withdrawn." This is the end to which our present policy in China is tending; military and administrative aid will lead to a protectorate, and a protectorate will ultimately involve occupation. Such a result may in the end be an advantage to the Chinese and a commercial benefit to ourselves, or it may prove an expense and burden to the country. This is a question which deserves to be thoroughly ventilated by the press and in Parliament, and we are surprised that the allusion in Her MAJESTY'S Speech to our relations with Japan was not followed by a paragraph relative to our position and prospects in China.

REGULATIONS OF TRADE ON THE YANG-TSE-KIANG.

THE publication, a few days since, of the "Memorial" from the British Chamber of Commerce at Shanghai in the columns of *The Times* has created considerable interest, if we may judge from the leaders and letters which have appeared on the subject, of which the most important will be found in another part of our paper. If the merchants at Shanghai were anxious to have their views discussed by the London press, their wishes must be fully gratified. Enough, and more than enough, has been written on the subject, since it is evident that the whole case lies in a nut-shell. Has the Treaty of Tien-tsin been infringed by the restrictions of which the memorialists complain? This is the first question which would naturally be asked by a disinterested person, and the answer must be distinctly given in the negative. In fact, if the Chinese Government stood upon its rights in the matter, it would be justified in going much further than it has gone at present; and when we remember the manner in which smuggling has been abetted in years past, we cannot wonder at the measures which have been adopted.

But there are other reasons for the regulations which have given so much offence at Shanghai. The Imperial Government is at the present time in an abnormal and most critical position. It is forced to protect itself against the evils which free trade on the Yang-tse would inevitably bring upon it. There are plenty of unscrupulous European traders in China whose love of the "almighty dollar" would lead them to drive a brisk business with the Taipings, at the expense of the Imperialists. This has been done, and will continue to be done, despite the vigilance of the authorities, but it is too much to expect that the Chinese Government should abstain from taking steps to mitigate the evil. There is no doubt that this vexatious interference would not have occurred if it had not been for the injury entailed by these transactions, and our merchants will do well to unite with the Chinese Government in assisting to deliver the country from these marauders. Granted even that the establishment of the Custom-houses, of which the memorialists complain, is a blunder on the part of the Imperialists, it is one which they were perfectly at liberty to commit, and "a firm and decided tone" on our part on account of such a grievance would be alike ridiculous and culpable. As far, then, as the chief point of the memorial is concerned, we conceive that the merchants have no case. The second grievance is more reasonable, inasmuch as it is an obvious infringement of a clause in the Treaty which permits merchants to "purchase or rent land or buildings, whether at the ports or other places," and unless a good reason can be shown why that right should be waived for the present, our merchants should be permitted to exercise the privileges it affords them.

THE ISTHMUS OF KRAW.

MORE than four years have now elapsed since Sir JOHN BOWRING stated, in a letter to Mr. WISE, that the project of uniting the two Bays of Bengal and Siam had for a long while occupied his attention, and in his account of Siam he observes that if the scheme could be accomplished it would indeed be a noble work. We are glad to learn that the King of SIAM has recently given his formal sanction to the Isthmus of Kraw Railway, on the ground, as stated by his Prime Minister, that it is "connected with the advancement of civilisation." The report and survey of those eminent Indian officers, Captain A. FRASER, of the Bengal Engineers, and Captain J. A. FORLONG, the Executive Engineer of the Tenasserim Provinces, describing the route over the Isthmus, will be of great service to the undertaking, the further prosecution of which awaits the return of the requisite documents from Bangkok. At a recent meeting of the Royal Geographical Society, an account of which appears in our columns, the subject was once more brought before the public. In the month of January, 1859, we expressed in strong terms our interest in the project, and during the time that has intervened, no argument has been brought forward calculated to alter our opinion. The objections urged by Mr. CRAWFURD are comparatively trivial, and even allowing that he is correct with regard to the generally safe navigation of the Straits of Malacca, the fact still remains that by the aid of the railway we should gain at least four days in point of time, a boon which is not to be lightly rejected. No doubt, if the scheme can be carried out, Singapore would be a serious sufferer, but as the interest of individuals are compelled to give way for the public benefit, so also the interests even of such a settlement as that of Singapore must not be placed in competition with a project of general utility.

MR. H. B. LOCH, C.B., LIEUTENANT-GOVERNOR OF THE ISLE OF MAN.

Our readers are aware that Mr. H. B. Loch, C.B., has been appointed Lieutenant-Governor of the Isle of Man. The appointment is designated by *The Times* as "a small mark of Royal favour bestowed upon a gentleman whose sufferings in the prisons of Peking two years ago excited so much sympathy, not only by reason of their severity, but also by the gallant bearing with which they were endured." Although this may be a "small favour" in comparison with the merits displayed by Mr. Loch, it is, nevertheless, a proof that his services have not been forgotten by his country; and we heartily wish him all happiness and prosperity in the quiet but highly honourable office which he has been called upon to fill. The Hon. George Waldegrave succeeds Mr. Loch as private secretary to Sir George Grey.

Literature.

Sir Rutherford Alcock's "Capital of the Tycoon," which has so long been announced as nearly ready, will be published to-morrow. The work is in two volumes, and contains more than a hundred illustrations. Mr. Fortune's work, "Yedo and Peking," is also announced by Mr. Murray as just ready, and Mr. Bentley gives the same announcement with regard to Lieut.-Colonel Fisher's "Personal Narrative of Three Year's Service in China." *Blackwood's Magazine* for February contains a second article on "Progress in China." The writer, after giving a summary of the rebel movement, concludes with a "God-speed" to Mr. Lay and Captain Osborn. Mr. Samuel Laing has just written a pamphlet entitled "India and China. England's Mission in the East." We shall notice it fully in our next number. Dr. Colenso has published the second part of his volume. He comes to the conclusion that there are different authors concerned in the composition of the book of Genesis, whose accounts in some respects contradict each other. One of the authors abstains altogether from the use of the name Jehovah in that book, while the other uses it freely. He endeavours to prove that Samuel was the Elohistic writer of the Pentateuch, and that all those portions of the first four books, and the book of Joshua, which are not due to the Elohists, were composed by one or more writers who wrote in the latter days of David, and in the early part of Solomon's reign. Dr. Colenso is preparing a third part on the Book of Genesis. In connection with the controversy raised by the bishop's arguments we may mention as worthy of high praise, a small volume entitled "The Book and the Life," being four discourses preached by Dr. Vaughan before the University of Cambridge. Mr. Isaac Taylor, and a host of other less celebrated writers, have already replied to Dr. Colenso's arguments on the Exodus. Turning from the field of controversy into a more genial region, our readers will be glad to learn that Mr. Tennyson's new poems, "Boadicea," and "Enoch the Fisherman," are complete, and will shortly be published. The latter is a dramatic subject, worked out, it is said, in powerful and even harrowing details. Mr. Edward Robert Bulwer Lytton, only son of Sir Edward, perhaps better known to some of our readers as Owen Meredith, the author of "The Wanderer," and other poems, has just been appointed Secretary of Legation at Copenhagen. Mr. Lytton has been long in the diplomatic service, and has served as an attaché at many of the Courts of Europe.

Naval and Military.

Our readers at home and in the Far East will most heartily congratulate Vice-Admiral Sir Michael Seymour, G.C.B., on the appointment just bestowed on him as Commander-in-Chief at Portsmouth. This is a fitting acknowledgment of his untiring zeal and ability in conducting the war in China, and a distinct avowal on the part of Government as to their opinion on the charges made against him by Lord Elgin. Captain W. K. Hall, C.B., will hold the post of flag captain, in which capacity he ably seconded the Admiral in China.

As Vice-Admiral the Hon. Sir F. G. Grey has expressed a desire to seek for parliamentary honours, in preference to the very attractive and important post of Commander-in-Chief in the Mediterranean, it is confidently expected that Sir W. F. Martin's successor will be Sir James Hope, K.C.B.; but as Rear-Admiral Codrington, the Superintendent of Malta Dockyard, whose time does not expire until next July, is senior to Sir James, it is not improbable that Sir William Martin may hold the appointment for a few months beyond his allotted time.

Captain the Hon. Swynfen Thomas Carnegie, C.B., now in command of the *Colossus*, Coastguard ship, in Portland Roads, has been appointed Controller-General of the Coastguard, vice Commodore Yelverton, promoted.

The command of the 2nd Infantry Brigade at Aldershot, vacant by Brigadier-General Brown's appointment to China, will in all probability be filled by Brigadier-General Bates, late of the 98th and now commanding the 2nd Brigade at Malta.

It is rumoured that Lieutenant-General Sir John Pennefather, who has been in bad health, is not unlikely to resign the Aldershot command before long, and Lieutenant-General Sir Richard Airey is spoken of as his probable successor. The name of Lieutenant-General Cameron, about to return from New Zealand, has been also mentioned in connection with the anticipated vacancy.

No successor to Lieutenant-General Cameron in New Zealand has yet been selected. A new arrangement respecting the Australian Staff is about to be made. The Major-General commanding the troops will be in New Zealand, and a Brigadier-General under him at Melbourne. Several minor changes in the way of reduction will ensue, the Divisional Staff at Melbourne coming down to the dimensions of a Brigade Staff.

The *Leopard*, 18, paddlewheel steam-frigate, Captain C. T. Leckie, was at Rio de Janeiro on the 9th of January, *en route* to China, but was detained by Rear-Admiral Warren in the event of her services being required.

The 96th Regiment has received orders to march on the 15th instant to Portsmouth, to embark for Simon's Bay, Cape of Good Hope. The regiment will embark in the transport screw-steamer *Himalaya*; the ultimate destination of the regiment is supposed to be Natal.

The *Urgent*, iron screw troopship, lately paid out of commission at Portsmouth, on her return from service in China, has been placed in dock at Portsmouth and her bottom found to be covered with barnacles and other marine adhesions. The *Urgent* had been previously, during the term of her commission, carefully coated over her bottom with various so-called patent preservative compositions. The result has only been to coat her bottom with shell matter and weeds more plentifully than could possibly have been the case without them.

TELEGRAPH FROM MOSCOW TO THE PACIFIC.

The Times' correspondent at San Francisco writes:—

A subject of much interest to England is the telegraph line now being constructed by the Russians from Moscow to the Pacific. The line runs through Siberia and comes down the Amoor river to its mouth. From the mouth of the Amoor, I was informed by a gentleman who saw the direction of the line marked upon a map, that advantage would be taken of the archipelago of the Aleutian Islands, some forty in number, all belonging to Russia, and which would form a convenient series of stations for telegraph poles; while their proximity to one another, and the length of the group, would obviate the necessity of long submerged cables. By means of these islands the long marine portion of the line, by any other route, would be avoided; and from them the telegraph could be made to strike the coast, follow it through the Russian and English possessions into those of America, and either under or along the shores of Puget Sound to Portland in Oregon, to which place a telegraph from San Francisco is now in course of construction. This would complete the telegraphic communication between—say, St. Petersburg and San Francisco, and from the latter city to New York by the overland telegraph across the Rocky Mountains; or, in other words, between St. Petersburg and New York.

Digitized by Google

Another route spoken of is to carry the wires from one of the Aleutians to Cape Alaska, and thence by submarine cable to the mouth of the Columbia river; so that, as many of our kind neighbours would much like, "by avoiding the coast of British Columbia, telegraphic communication with Europe, Asia, and America could be kept distinct from and outside of British interference if deemed necessary."

However this may be determined, the telegraph is being laid along the Amoor; stations and other erections are being built as far down as close to the mouth of the river; and the wires will most probably reach Nicolaievski (or Nicolaski, as the town is commonly called) on the Amoor this year. So I was informed by a gentleman lately from the Amoor, whose opinion it is, however, that the Russians will for the present rest satisfied with opening telegraphic communication between St. Petersburg and their great garrison at the town last mentioned. If this be so, it indicates a change of purpose, for the intention certainly was to extend the line to Oregon, so as communicate with San Fransisco; and the American Government very naturally took a warm interest in the project, offered every assistance towards its completion, and in the last session procured an "appropriation" of money to defray the expense of making a survey of the marine portion of the line, and offered to the Russian Government the use of one or more men-of-war for the purposes of such survey.

The completion of this line would, it is supposed, obviate the necessity of the "Atlantic line," so long attempted, or at any rate discourage or prevent its completion. It would certainly appear as if it would take the wind out of the sails of the Atlantic Company and mar their project. The Russian line would work thus:—A message from London or New York for San Francisco would be sent to St. Petersburg by the present telegraph, and the latter would be forwarded *via* San Francisco, if for New York. Its other operations any one can work out. I see it stated that communication by electric telegraph has already been established between London and Turnen, in Siberia, a distance of 4,000 and odd miles; and the promoters of the Russian line profess their belief in the completion of the great line I have described by the end of next year.

What effect the scheme by itself would have on England, socially, politically, or commercially I will not wait to discuss; but taken in connection with two other projects on the *tapis*,—the Pacific railway and steam communication between California and China—both encouraged by the American Government, and both in my opinion likely to be realised, the telegraph forms a link in the chain of measures by which England is to be seriously damaged in her Eastern commerce.

It is announced by the promoters that one great object of the railroad and of the steamboat line is to change the traffic of Europe, Asia, and America by diverting the trade of the East through America—to change the present road from England to India, to China, to Japan, so that it will pass through America. "We have had to pay toll," said a promoter of the railroad at a convention of its corporators held lately, "to the turnpike-keepers, the bankers of Liverpool and London, in passing to the East for our teas, our silks, and our drugs. Freights, insurances, commissions, and premiums on bills of exchange" are among the exactions which the present course of trade enables the English merchant to subject his American correspondent to, which will all be saved, while a great many new advantages will be gained by the compietion of the two vast projects contemplated.

I cannot pursue the subject further at present than to remark that I can see no serious obstable to the completion of these three undertakings. They all involve vast sums of money certainly, but except the telegraph, which, if made at all, must be made by the Russian Government, the difficulty is not so insurmountable as at first sight appears. The terms granted to the railway promoters are so liberal, there are so many States to divide the expense, and there is so earnest a desire for the road, that it appears probable enough it will be made. The war may, instead of retarding, hasten this result, for the road will give work to the disbanded army after hostilities cease; and, as for the steam line, it will be taken up as soon as the promised Government subsidy shall have been passed. And its prospects are not at all fanciful. The intercourse with China is so great, that the best informed men expect the line will pay.

ROYAL GEOGRAPHICAL SOCIETY.

THE ISTHMUS OF KRAW.—A VISIT TO TSUSIMA.

A crowded meeting of this society was held on the 26th ult.; Sir Roderick I. Murchison, president, in the chair.

Among those present were—Admirals Sir George Back and R. Collinson; Generals Sir Justin Sheil, Sir George Pollock, and Sir Andrew S. Waugh; Lady Franklin and Miss Cracroft, and Lady Oliphant; Colonels Dickson, Walker, Hawkins, and Shaffner; Captains Bedford, Glyn, Hope, Porcher, Lindesay Brine, Dyke, and Stirling, R.N.; Major Cooke; Captains Baker, Harris, Murchison, Pounden, and Pook; M. Du Chaillu; Hon. H. S. Law; Sir Stuart Donaldson; Mr. and Mrs. Hoggins; Hon. A. Dillon; Mr. Gregson, M.P.; Drs. Rae, Day Goss, Gallagher, MacLoughlin, Camps, Sherrin, Shea, Ogle, Seemann, Hamilton, and Webster; Messrs. Osborne Smith, Charles White, Biddulph, Cocks, Pennycook Brown, Rolston, Arrowsmith, Findlay, Galton, &c., &c.

John Gardiner Austin, Esq., J. A. Olding, Esq., and several other gentlemen were elected Fellows.

The minutes of the former meeting having been read by Dr. Norton Shaw, Mr. Spottiswoode read the First Paper, "On a Proposed Route to to Siam, China, &c., across the Isthmus of Kraw, by Captains Fraser and Forlong;" communicated by Dr. Duncan Macpherson, F.R.G.S., &c., &c. The paper set forth the advantages to be derived by constructing a railway through the neck of land in the Malay Peninsula, known as the Isthmus of Kraw, both as regards time and safety. The paper stated that the saving in time between Calcutta and Hong Kong by this route would be ninety-three hours; and fifty-six hours would be saved from Ceylon to to Hong Kong. Touching at four ports, viz., Akyab, Rangoon, Moulmein, and Kraw, while coasting it from Calcutta to Hong Kong, thirty-four hours will be saved over the present route, viz., Singapore. From Ceylon to Kraw, and thence direct to Calcutta two extra English mails may be carried in nine and a-half days to the mouth of the Hooghly, necessitating only one extra steamer between Ceylon and Aden, to meet the Bombay mail. The capital required for construction would not exceed £700,000.

Mr. JOHN CRAWFURD, F.R.G.S., observed that the so-called Patchkau River, which was said to be navigable for fifteen miles, was simply an estuary of the sea, with a depth of four or five fathoms for half the distance, and of but a fathom and a-half for the remainder. Then at the eastern terminus of the proposed railway there was no harbour, and the shore was moreover exposed to the north-eastern monsoon. With these disadvantages the route in question would never serve as the transit for the great trade between Europe, India, and China. Nor, if practicable, would the small saving of time to be gained justify the great outlay that must be incurred. In reply to the alleged dangerous navigation of the Straits of Malacca, Mr. Crawfurd stated that during a period of eighteen years the Peninsular and Oriental Company had lost only two ships in the Straits, and that arose from a collision in the dark; that out of three hundred voyages made by steamers from Calcutta and Bombay, not a single vessel had been lost; and that no instance had occurred of the loss of any of Her Majesty's steamers, nor of any of the vessels despatched fortnightly by the Dutch Government, which had passed through these Straits.

Captain ANDERSON said that the navigation of the Straits was not dangerous, as far as the harbours are concerned. He had navigated the Straits thirty-seven times, and had never met with a single accident. He, too, thought the proposed route across the Isthmus of Kraw not desirable in a national point of view, and certainly not equal to other routes which had been projected overland with the view of opening up a more direct communication with China, either from Eastern Pegu or by way of the Irrawaddy.

After a short allusion to the inland sea of Japan, Mr. OLIPHANT gave an account of a visit to Tsusima, an island lying midway in the Straits of the Corea. Fatchio, the capital, is situated on the east coast. It contains 10,000 inhabitants. The Prince's Palace is situated near the town. He is absolute proprietor of the island, and has a monopoly of the transit trade between the Corea and Japan, which consists chiefly in tiger skins, hides, rice, silver, and gold. The island is about 40 miles long, from 8 to 10 broad, and contains a population of 30,000. It is hilly, the highest peaks attaining an elevation of upwards of 2,000 feet; they are heavily timbered. The island is almost bisected by a deep sound, from which numerous deep fiords diverge. The fleets of the world might be concealed in this labyrinth of inland waters. As yet our knowledge of the interior of the island is very limited. Its position between Corea and Japan renders it important.

The PRESIDENT complimented Mr. Oliphant upon having had the zeal to make this exploration while still suffering from the wounds he had received in Japan, and congratulated the country upon possessing diplomatists who thus combined a willingness for scientific exploration with the performance of their political duties.

Sir RUTHERFORD ALCOCK, F.R.G.S., stated that the island of Tsusima was of some interest to him when he was in Japan, from the proceedings of the Russians in that quarter. It was known that they had for some time made it a sort of naval port for carrying out most extensive repairs to their ships; and it was therefore desirable to ascertain whether the island enjoyed advantages which might be fairly shared by other nations. The reports which had been received convinced him that there is no part of the Chinese seas which could be chosen with so much advantage as this magnificent harbour in an unfrozen sea, capable of being made defensible against attack, and of serving as a place of resort for fleets in distress. Sir Rutherford then called attention to a series of charts and maps on the table, including a topographical plan of the city of Yedo, which had been executed by natives of Japan, and brought from Yedo by Lady Franklin. He next dwelt particularly upon the extraordinary accuracy of these maps and charts, stating that Captain Ward, of the *Actæon*, found that the utmost reliance could be placed upon them, and that his own labours in surveying were very much abridged in consequence. He mentioned in the highest terms the wonderful industry, ingenuity, and perseverance of the Japanese; and observed that, by the side of a material civilisation which rivalled that of European nations, there flourished a rampant feudalism such as that which existed in this country a thousand years ago, and which formed the great stumbling-block in our dealings with these people.

Captain BULLOCK, R.N., said he could bear personal testimony to the extreme beauty and correctness of the Japanese charts; every mountain-range, every valley and post-road, was delineated with the utmost fidelity. It was not too much to say that the charts obtained by Captain Ward had been the means of enabling us to anticipate the survey of the Japanese coasts by at least twenty years. In reply to a question as to how the Japanese effected these surveys, Captain Bullock said the native officers who accompanied the surveying expedition repudiated any connection with either the Jesuits or the Dutch; but they told him that in the middle of the last century a ruined merchant, having gained some acquaintance with the use of mathematical instruments from Europeans, undertook the survey of the islands, and was occupied fifty years in the work; at the end of which period, having presented the charts to the Government, he was restored to his former wealth and honours.

Captain MALCOLM, R.E., F.R.G.S., said, when he was in Japan he made the acquaintance of Colonel Siebold, of the Dutch Engineers, who showed him some original Japanese surveys of a very old date, and told him that, in years gone by, a Russian officer had surveyed the coast, and had instructed the natives in the art of surveying. There was an Astronomer-Roya at Yedo, whom Siebold instructed in astronomy and in taking latitudes and longitudes.

Legal.

VICE-CHANCELLOR'S COURT.

(Before Vice-Chancellor Sir W. P. WOOD.)

THE MESSAGERIES IMPERIALES COMPANY V. BAINES AND OTHERS.

This was a motion for an injunction to restrain the defendants, Messrs. James Baines and Co., shipowners of Liverpool, from interfering with the loading of the American ship, *Ella A. Clark*, at Liverpool, in accordance

Digitized by Google

with the charter-party entered into by the master with the agent of the plaintiffs to carry a cargo of coals for them to Point de Galle, Ceylon. The question in the case was as to the general authority of the master of a foreign vessel to enter into contracts in respect of the vessel so as to bind the owners. The charter-party for the voyage to Ceylon with coals for the plaintiffs was made by the master, Ebenezer T. Sears, on the 26th of December, 1862. The ship, which had then recently arrived from Boston, commenced taking in coals at the Birkenhead Docks, and the loading continued until the 8th of January, when the plaintiffs' agents received notice from the defendant's, James Baines and Co., that the ship had been purchased by them for the Australian passenger trade, and announced to sail on the 15th inst., and that the loading with coal must be stopped. The plaintiffs now moved for an injunction to restrain any dealing with the ship by the defendants so as to prevent the charter-party from being carried out. The defendants' case was that the master was entrusted to bring the ship to England for the purposes of sale only, and that he was exceeding his authority, and acting in direct opposition to the views of the owners in chartering her to Ceylon. The great inconvenience to the defendants, who had undertaken to sail the ship on the 15th, and entered into engagements with passengers, was also urged as a reason against granting the injunction; while the plaintiffs, it was said, could easily find some other vessel for carrying their coals to Ceylon.

Sir Hugh Cairns, Mr. C. Hall, and Mr. Milward appeared for the plaintiffs in support of the motion; Mr. Giffard and Mr. Druce were for the defendants.

The Vice-Chancellor (without calling for a reply) said that the motion must be granted. It was not disputed that the defendants, Baines and Co., were perfectly aware of the charter-party when they bought the ship. They were told of what had happened, they purchased with their eyes open, and took their chance as to the validity of the contract. It was said that the master, by chartering the vessel, had exceeded his authority, and committed a fraud upon the owners, but this was very far from being proved to be so. The authorities clearly treated the master of a ship as having power to charter her when the owners were not present, and, looking at what had taken place, the injunction must be granted.

Continental Intelligence.

FRANCE.

The position of the French in Cochin-China is by no means secure. On the 17th December the people round Saigon rose and attacked the garrison, penetrating into the interior of the fort. They were repulsed at last, but not a Frenchman remained unwounded. The Annamites fought with incredible boldness. They left a number of killed on the field, and more than 2,000 prisoners. According to another report the Annamites left 3,000 dead upon the field. Ten days afterwards they attacked Mytho, but were driven off with a loss of 225 men.

The latest news states that Admiral Bonard did not doubt that a vigorous suppression of the insurrection would have an influence upon the Government at Hué favourable to the maintenance of peace. He had entered into negotiations with the Annamite Minister in reference to the settlement of some of the details and the ratification of the Treaty of Saigon, which it is proposed shall take place at Hué. The difficulties likely to attend the execution of the Treaty threaten to be very great. On Dec. 15 a General, sent by the King of Annam, arrived at Saigon with a letter from his Sovereign, in which Tu Duc declared that it was impossible for him to adhere to the Treaty, as far as regarded the cession of the three provinces of Lower Cochin-China, and the liberty of navigation to French vessels of war on the river. He promised to allow the establishment of one or two factories on points which he would indicate, and to pay the indemnity at the periods agreed on.

La France announces the departure from Toulon this morning of 700 men for Alexandria, upon their way to Cochin-China.

A letter from Lyons states that a first cargo of silk has arrived there from Japan. It reached Europe, not by the Chinese seas and India, but by the Pacific and the Isthmus of Panama. The silk crossed the Isthmus by railway, and was again embarked on the Atlantic, whence it arrived, taking an opposite direction to that by which silk has been sent from Japan.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, Feb. 6.

Your readers who take an interest in the affairs of Holland will not fail to learn with satisfaction that the great and absorbing topic that has been agitating the public mind for the last ten years has been definitively put to rest, the First Chamber of the States-General having passed what is here called, "the Water Roads Bill," by a majority of twelve; the numbers found at the division being twenty-four in favour of the measure, and twelve against it. Three members were unavoidably absent from illness. The Bill received immediately the Royal Assent, and is now become law. In every part of the country the joyful intelligence was received with unmistakable feelings of satisfaction, and everywhere public demonstrations were made. But perhaps the greatest enthusiasm of all was evinced in this city, where the bells of all the churches were set ringing, cannon fired, wreaths of evergreens suspended across the principal streets, and scarcely a house in the whole city that was not decorated with the national flag. In the evening bonfires illuminated the larger squares and market-places, and a procession of several thousand gentlemen and householders, each carrying a torch or Chinese lantern of coloured paper, preceded by a band of music, and accompanied by the members of the two Choral Unions, perambulated the streets and performed a serenade before the residence of the very popular Burgomaster and that of Mr. Jaeger, the concessionary of the Great Ship Canal, amidst the deafening shouts of the assembled thousands.

Another important piece of intelligence is that the appointment of Colonial Minister, vacant by the resignation of Mr. Uhlenbeck, and held provisionally by Mr. Betz, the Finance Minister, has been given to Mr. J. D. Fransen van de Putte, one of the members for Rotterdam in the Second Chamber of the States-General. The new Minister is known as a decided Liberal and thorough-going free-trader, as well as a man of business, and of great experience in colonial affairs. This appointment has everywhere been received with expressions of great satisfaction, and cannot but prove a valuable acquisition to Mr. Thorbecke's Liberal Cabinet.

The voyage of the fifteen young Japanese, who are about to visit this country for their education, may justly be called an instance of the pursuit of knowledge under difficulties. They sailed on the 2nd of November in the *Calypso*, from Nagasaki, which vessel was wrecked in the Straits of Banka, but all the passengers were saved. Intelligence has now been received in this country that they were afterwards attacked by some of the numerous pirates infesting those waters, but succeeded in driving them off after a severe fight. This, however, I am unable to state as a fact, but merely mention it as I heard it, though it is generally believed to be true. However that may be, on the 15th of December the two principal officers of the party—both Daimios—arrived by the mail steamer at Batavia, and accompanied by Mr. Basslé, formerly one of the principal officers of the late Dutch factory at Decima, proceeded to Buitenzorg to pay their respects to H. E. the Governor-General. Several of these young men were former pupils of Capt. Huyssen van Kattendyke (the present Minister of the Naval Department) when he was in Japan, of Dr. Pompe van Meerdervoort, who has been so successful in organising the medical service and establishing a public hospital at Nagasaki, and of the distinguished naturalist Col. von Siebold, whom I mentioned in my last letter as having just returned from Japan. These young Japanese are to reside for some years in Holland at their own expense, and for that purpose are accredited for a large amount with the Netherlands Trading Company. From a private letter from Batavia that I have just perused, I learn that they have now taken their passage in the Dutch ship *Ternate*, of Rotterdam, Captain Cars, with which vessel they may be expected to arrive in this country in about a month.

There have been very severe storms here since the departure of the last mail, which did a vast deal of destruction to the dykes, the shipping, and private property all round the coast and islands. At Rotterdam the whole city was for four whole consecutive days completely under water, and an East Indiaman, the *Admiral van Wassenaer*, loading in the Haringvliet for Batavia, was capsized at her moorings by a violent and sudden gust of wind. In a letter from Kampen, giving a description of the storm, it is stated that no less than twenty-five millions of cut and dried sods of turf were carried away by the sea, causing a loss to the inhabitants of more than 100,000 florins.

By the last overland mail we learn that the customs duties paid in Java and Madura during the month of October amounted to 1,105,850 fl., and for the first ten months of last year 8,817,568 fl., being 771,596 fl. less than the previous one, and 423,460 fl. less than in 1860.

During the month of November the private trade exports of produce from Java to Holland were as follows:—

Julie: 1,565 piculs of coffee, 7,905 pic. sugar, 300 pic. rattans, 3,123 hides, 13,625 kilogr. indigo, and 64 pic. cubebs.

Edouard Marie: 5,692 pic. sugar, 3,262 hides, and 511 pic. tobacco.

Emilie: 3,489 pic. coffee, 4,798 pic. sugar, 30 pic. rattans, 1,000 hides, 8,540 kil. indigo, and 50 pic. cubebs.

Digitized by Google

Three Bells: 9,429 pic. sugar, 93 leggers of arrack, and 637 pic. tobacco.

Metis: 13,118 pic. sugar, 6,000 hides, and 875 pic. indigo.

Atlantic: 14,872 pic. sugar, 103 leggers of arrack, 80 pic. rattans, 106 pic. tobacco, and 30 pic. sapanwood.

Jan Daniel: 3,000 pic. coffee, 10,000 pic. sugar, and 193 pic. rattans.

Graafstroom: 10,424 pic. sugar, 250 pic. rice, 150 pic. rattans, 121 pic. indiarubber, 584 hides, and 49 pic. gum damar.

Gebroeders: 900 pic. coffee, 2,466 pic. sugar, 20 pic. rattans, 401 pic. tobacco, 446 hides, and 9 pic. mace.

Samuel: 3,008 pic. coffee, 6,032 pic. sugar, 180 pic. rattans, and 1,000 hides.

Nederland and Orange: 6,526 pic. coffee, 5,936 pic. sugar, 2,472 kil. indigo, and 1,000 hides.

Peking: 1,794 pic. coffee, 6,000 pic. sugar, 100 pic. rattans, 1,489 hides, and 250 pic. tin.

Susanna Elizabeth: 5,000 pic. sugar, 9,000 pic. rice, 150 pic. rattans and 189 hides.

Crystal Palace: 991 pic. coffee, 9,180 pic. sugar, 256 pic. rattans, and 778 hides.

Cornelis W. Edouard: 4,400 pic. coffee, 6,565 pic. sugar, 220 pic. rattans, and 2,400 hides.

Cornelis Gips: 5,000 pic. sugar, 7,203 pic. rice, 200 pic. rattans, 207 pic. pepper, and 220 pic. tobacco.

India: 2,531 pic. coffee, 18,489 pic. sugar, 400 pic rattans, 105 pic. indiarubber, 8,858 hides, 1,309 pic. tobacco, 100 pic. sapanwood, 266 pic. cassia, 300 pic. tin, and 50 tubs of camphor.

Hugo Grotius: 9,770 pic. sugar, 168 leggers of arrack, 145 pic. rattans, and 3,500 hides.

Mr. R. H. Th. Friederich, who has been so successful in collecting and deciphering ancient inscriptions in Java and Bali, and who has been spending the last three months in this country on leave of absence, is about to return to India to prosecute his explorations, and will embark at Rotterdam on the 8th inst. on board the *Hebe*, Capt. A. H. Kiel, for Batavia. Four of the most intelligent non-commissioned officers from the East India depot at Harderwyk are under orders to accompany and assist him in his researches, to qualify themselves for which duty they have been undergoing a course of instruction at Leyden in copying inscriptions in the Museum of that University.

On the recommendation of the Colonial Department, the King has fixed the contingent required to fill up the vacancies in the East India Army during the present year at six hundred men, who will be sent out in detachments of about a hundred each in chartered transports, as hitherto, under the command of officers returning to India from leave of absence to this country. The number for each branch of the service will be as follows:—265 for the infantry, 160 for the cavalry, and 175 for the artillery.

As an event that but seldom occurs, I may here mention that on the 1st inst. the eminent shipowning firm of J. Salm and Meyer celebrated the hundredth anniversary of their establishment in this city. Mr. J. Terlet, one of the present partners, has been a member of the firm for the last sixty years.

Accounts have been received here that the *Stad Leyden*, Capt. J. C. van de Poll, hence to Samarang, put in to Bahia on the 15th December for repairs, having carried away her mizen mast, and suffered other damage. The captain writes that the vessel will not be required to discharge her cargo, as the hull is perfectly uninjured. Passengers and crew all well.

A letter from Sourabaya of the 29th of November last states that the hull of H. N. M., first class paddle steamer *Gedah*, eight guns, has been sold by public auction for 9,300 florins, whilst the two boilers and a funnel belonging to the same ill-fated vessel fetched 5,070 florins.

The number of vessels that have arrived in this country during the month of January from Netherlands India amounted to 53 (against 14 in December, 10 in November, and 48 in October), of which 27 discharged their cargoes at Amsterdam, 19 at Rotterdam, 2 at Dordrecht, 1 at Middleburg, 1 at Schiedam, and 2 at Zieriksee. Thirty-eight brought cargoes for the company, and fifteen for private merchants. Forty-one came from Batavia, one from Passaroeang, two from Tjilatjap, three from Samarang, one from Patjitan, and five from Padang.

H. N. M. screw corvette *Bali*, 10, Lieut. Palm, which left Batavia for this country on the 30th of November, has not yet arrived, but may be expected about the end of this month. She is under orders to go to Helvoetsluys.

Captain-Lieut. Wichers is appointed to the command of the first class paddlewheel steamer *Ardjoeno*, 8, ordered to be commissioned in May. Lieut. N. M. J. Kroef is to be her First Lieutenant.

The second class screw corvette *Groningen*, 14, returned last summer from the East India station, is still undergoing repairs at Nieuwe Deep. She was built at Kinderdyke in 1857.

In the Royal dockyard in this city the keel has been laid down for a new paddle steamer with engines of 300-horse power, which, when finished, is intended to relieve as guardship at Nieuwe Deep the third class paddle steamer *Cycloop*, 6, no longer considered sea worthy. Captain H. Camp, now in command of the *Cycloop*, will be relieved in May, his period of service having then expired. His successor has not yet been appointed, but in naval circles it is expected that the command will be given to Captain G. C. C. Pels Rycken, R.N.

Accounts from Brussels inform us that the King of the Belgians has undergone a fresh operation, which was successfully performed by Professor Langenbeck, who was sent for from Berlin a second time. It is not stated what induced the King to discard the celebrated French operator Dr. Civiale, who was so successful last summer. These medical gentlemen on the Continent appear to be quite aware of the value of money, the above-mentioned Dr. Civiale having charged a fee of 100,000 francs (£400) for performing two operations, in addition to which he modestly claims the sum of 50,000 francs more (£200) for travelling expenses from Paris to Brussels and back, though it is difficult to understand how he can make up such a sum, when any other traveller can perform the same journey by the railway in eight hours, at a cost of less than £2, in a first-class carriage, and the same back. Besides, it must be remembered that Dr. Civiale had free quarters at the Royal Palace during his stay at Brussels, and "fared sumptuously every day" at the King's expense. And, finally, it may be mentioned that in addition to his fee he received the honorary distinction of becoming a chevalier of the Belgium Order of Leopold, so that, on the whole, his pretensions may be considered as somewhat of an exaggerated nature.

PASSENGERS ARRIVED.

Per *Princess Amalia*, Capt. Ryn van Alkemade, at Brouwershaven from Java: Mr. and Mrs. Einthoven, seven children, and a Japanese native servant, Mr. Carlier, administrative officer, Mr. Vermyne, medical officer, E. J. Arney;—26 passported soldiers.

Per *Staatsraad van Ewyck*, Capt. de Winter, at Nieuwe Deep from Batavia: Mr. Dumans and two children; Munsters, First Lieut. of Grenadiers; de Man, First Lieut. of Artillery, and two Messrs. Knooks.

COMMERCIAL.

COFFEE.—During the first week of the past fortnight this article was rather quiet, though prices were well supported; but in the course of last week a favourable reaction has taken place, and the dealings have been very considerable both here and at Rotterdam. Among the sales may be mentioned 1,400 bags of Padang, ex *Celeritas*, at 45½ cents, and 300 bags of ditto, ex *Paul Johan*, at same price; 8,200 bags of Java, ex *L. A. Bang*, at 45½ to 46 for good ordinary, and 50 for fine blue; 13,100 bags of Sumatra, ex *Noach*, from Padang, at 44½ to 45; 3,200 bags of Java, ex *Kosmopoliet*, at 46 for good ordinary to 51 for fine blue; and 2,500 bags of Padang, ex *Celeritas*, at 45½ cents. At the company's sale of 329 bags and 119 casks of Ceylon, the following prices were obtained:—Plantation 47 to 52½ cents; Peaberry 53; broken 41 to 47; and native 43 to 43½ cents. At another sale for private account 2,051 bags of Sumatra were brought to the hammer, and No. 1 realised 36 to 36½ cents; No. 2 37½ to 38; and Nos. 3 and 4 36 to 36½ cents.

The Dutch Trading Company have announced their Spring sale to take place on the 18th of March next; the quantity offered will be altogether 411,000 bags, viz., 395,000 of Java, and 16,000 of Sumatra. The samples will be on show on the 20th inst., when the valuations will be made by the brokers. The company give the usual promise not to bring any more coffee for sale before their Autumnal auction, except such sea-damaged parcels as might spoil by being kept in warehouse. Last years' Spring sale contained 419,730 bags, and the price obtained for good ordinary Java was then 44½ cents. The deliveries of Coffee in January were 29,272 bags, against 11,345, last year, and 17,741 in 1861. The present disposable stocks are 92,222 bags, against 60,025 last year, and 181,634 in 1861. The unsold stocks in the company's warehouses now are 447,273 bags (including the above 411,000 for the March sale), against 383,318 last year, and 355,200 in 1861.

TEA.—The public sale of tea mentioned in last report went off at higher prices, the Souchong realising 188 to 191 cents, and the fine flowery Pekoe 248 to 250, which is considerably above the valuations of the brokers according to the state of the market then. All was sold but two lots. A cargo from China to Rotterdam has arrived in the channel, and may be expected in a few days.

SUGAR.—The operations in the raw article have been extremely limited, and former prices but feebly supported. Among the few sales reported were 250 kranjangs of Java, No. 9, and 243 kranjangs of Sourabaya, No. 11, ex *Oscar*, at secret prices. On the other hand some considerable purchases have been made of refined goods at better prices, chiefly A S R and W and Z for delivery in March. Refiners, however, are reluctant to sell at present rates and demand a higher figure. On the whole the market is decidedly firmer than a fortnight ago.

RICE continues in a favourable condition. 10,000 more bags of the beautiful cargo of Java table rice per *Wave Queen* (of which in last report I stated that 1,500 bags had been sold at 17½ fl.) have since been purchased at 17¾ fl., and the importers now demand 18 fl. for the rest. All parcels of fine Java are much sought after, but difficult to obtain, as the stocks are so greatly reduced.

SPICES.—Java cinnamon No. 3 finds willing purchasers at 72 cents. No. 1 nutmegs of 1861 have been done at 62 cents, but on the whole the market is feeble and without animation.

RATTANS are in demand. Among the sales by importers are 900 bundles ex *Paul Johan*, 3,106 ex *Franz and Elise*, and 600 ex *L. A. Bang*. Better prices were paid.

Digitized by Google

CASSIA VERA also in request, and a trifle higher. 220 chests ex *Noach* were sold by importers.

TOBACCO calm, but prices well supported. Some public sales are advertised for next week, and will contain 2,320 bales of Java of the following marks:—Bondowosso, Bezoekie, Limburg, WCoJ, Δ with an L in it, DP and JAB; also 581 bales of the mark PR; and at Rotterdam 231 bales of Java marked Lemadjang, 7 do. V., 187 do. VDZ, 62 do. Tanl, 230 do. Banteng, 80 do. VA, 140 do. Stoll, 292 do. Wonosari, and 331 do. P. The stock of Java (including the above for sale) is 3,386 bales.

TIN.—Some sales of Banca have been done at 70 and 70½ fl., at which last figure there are sellers. On the whole the market is inanimate.

BRITISH AID TO CHINA.

The *Englishman* of India writes:—"When noticing, some days ago, the extensive despatch of the materials of war to China on account of the Government of that empire, we ventured on a remark to the effect that, as a hundred and fifty thousand rounds of ball ammunition were about to be sent round, the authorities here might as well, whilst their hands are in, make it an even million, for all of which amount, we observed, the necessity would almost certainly arise. It appears that, large as then appeared the stretch of our imagination, it fell short of the requirements that seem to have since arisen, as the fact now is that enormous amount of two million of cartridges are to be sent from the Fort William arsenal to the scene of hostilities in China. In addition to this, and to facilitate the proper lodgment of the bullets among the Taipings, a further supply of muskets, in addition to those already sent to or left in China, will be sent from Fort William, to the amount of six or eight thousand stand of arms. Those who may be anxious about the financial transactions connected with this extensive sale of arms and ammunition to the Celestial Government will be glad to hear that, in the first place, the arms are obsolete and positively useless to us; and in the second place, that not a single musket or cartridge has been, or will be, despatched from this country for China, without the Chinese Government first paying, through its agents in Calcutta, for everything supplied, and all contingent expenses incurred by packing, &c. Hitherto payment has been made here punctually and in full; and there is every prospect of its being continued. The fact is, that the arms and ammunition supplied by the British Government to that of China will, if well and effectually used, not only amply pay for themselves, but still further enrich the Chinese Government; as with victory over the rebels will come peace and order, and with them production, trade, and revenue. In this way both parties to these ammunition bargains will be benefited; we part with what we don't want, for ready money; and the Chinese receive what they do want, paying for the same. Thus, the probability of quarrels hereafter is prevented. As we have before remarked, people in England will be rather surprised to hear, by degrees, how we are getting deeper and deeper into this Chinese business, the steady increase of which we here have watched from the commencement with no small interest and curiosity, the more intense as we have not been able to find out exactly who the moving and directing genius in the whole matter is."

London Gazettes.

THE VICTORIA CROSS.

The Queen has been graciously pleased to signify her intention to confer the decoration of the Victoria Cross on the undermentioned seaman of the Royal Navy, whose claim to the same has been submitted for Her Majesty's approval, for his gallant conduct at the capture of Fung-wha, in China, as recorded against his name, viz.:—

George Hinckley, able seaman of Her Majesty's sloop *Sphinx*.—For volunteering, while under the east gate of the city of Fung-wha, to carry to a joss house, 150 yards distant, under a heavy and continuous fire of musketry, gingalls and stink-pots, Mr. Coker, master's assistant of the *Sphinx*, who had been wounded in the advance to the gate; in which object Hinckley succeeded. On his return to the gate, under a similar fire, he again volunteered, and succeeded in carrying to the joss house Mr. Bremen, an officer of Ward's force, who had been also wounded in the advance on the gate; and he again returned to his post under the gate.

CHINESE DESPATCHES.

The *Gazette* contains the following despatch received by Earl Russell from the British Vice-Consul at Shanghai:—

"British Consulate, Shanghai, Nov. 19, 1862.

"My Lord,—I have the honour to enclose for your Lordship's information a copy of my despatch, No 201, addressed to the Hon. F. W. A. Bruce.

"I have, &c.,

"JOHN MARKHAM, Vice-Consul in charge.

"The Right Hon. Earl Russell, Her Majesty's Secretary of State for Foreign Affairs, &c."

VICTORY GAINED BY COMBINED FORCES OF IMPERIALISTS AND BURGOVINE'S FORCES.

"British Consulate, Shanghai, Nov. 19, 1862.

"Sir,—I have the honour to inform you that a large force of rebels left Soochow, Hangchow, and Hoochow, headed by the Ting Wang, Mu Wang, and Ha Wang, for the purpose of attempting the re-capture of Kahding and Tsinpo, and taking if possible Sung Keong, Shanghai, and Paushun. They were to have assembled at Na-ziang, and thence marched in three separate divisions on the above-named enterprise. Information being received that a large portion of this force had already reached Wangdo, between Tsingpo and Kahding, the Governor of the province marched against them from this city in person, and Colonel Burgovine, with a force of some 1,500 disciplined Chinese, simultaneously left Sung Keong for Tsingpo. Both parties fell in with the rebel force on the 16th inst., and after a hard fight of some hours the main body of rebels were dislodged from their position in a strong stockade by Colonel Burgovine's artillery, and the whole force was utterly routed with immense loss. The Ting Wang was drowned, the Mu Wang badly wounded, and an extraordinary number of chiefs killed and taken prisoners, the rebels having incautiously trusted to a floating bridge, which gave way at the first rush for escape. What with killed, prisoners, and deserters (chiefly the last) 10,000 only are said to have got away, and the Chinese authorities express their confidence that this victory will have the effect of keeping the thirty miles round Shanghai free from rebels for some time to come.

"Colonel Burgovine's men are said to have behaved extremely well and to have shown great confidence in their officers. Their loss was trifling.

"I have, &c., JOHN MARKHAM,
"Her Majesty's Vice-Consul in Charge.

"The Hon. F. W. A. Bruce, C.B., &c."

Monetary and Commercial.

CITY, WEDNESDAY, FEB. 11.

The eighteen cargo boats building at the yard of Mr. Charles Lungley, on Thames, under the superintendence of Captain Maxton, late of the *Falcon*, will be shortly finished and despatched to Shanghai. They are intended for the Yang-tse, and will be towed, after the style of similar boats on the up rivers in India.

Intelligence has been received at Lloyd's of the loss of the *Tung-yu* in the Yang-tse. Seventy tons of cargo are reported as saved.

A number of articles, marked *Bussorah*, have been washed up on the island of Islay. The steamer *Bussorah*, belonging to the Burmah Steam Navigation Company, left the Clyde on the 15th January, and there is no doubt but this vessel has been wrecked. She was a new vessel, and intended to augment the company's fleet in their extended operations with Singapore, &c., an account of which we lately published.

The biddings for 60,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were: to Calcutta, 34,50,000 rupees; to Bombay, 24,00,000 rupees; and to Madras, 1,50,000 rupees. The declared minimum price was as before, viz., 1s. 11⅛d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for about 170 lacs. Tenders on Calcutta at 1s. 11⅛d. will receive about 78 per cent., and above that price in full; on Bombay at 2s. will receive about 10 per cent., and above that price in full; on Madras at 2s. will receive in full.

At the meeting of the Mediterranean Extension Telegraph Company a dividend of 3s., free of income-tax, on the original shares was recommended and agreed to, in addition to the usual payment on the preference shares. An amendment in favour of the payment of 3s. 6d. in the former case was lost.

The half-yearly meeting of the Telegraph to India Company took place on the 2nd, when the directors' report was agreed to, an amendment in favour of winding-up the undertaking being lost.

The following is extracted from the Report:—

"The shareholders were informed at the late special general meeting on December 12th that the Government had decided to retain in their own hands the construction of the Persian Gulf line; and that under these circumstances the directors recommended the shareholders to maintain and work their Egyptian line, and to await the result of the completion and working of the Persian Gulf line, before deciding upon the course to be pursued.

"Since that period the directors have found it necessary to discontinue for the present the station at Jubal, on account of the risk which was considered by the Peninsular and Oriental Steam Navigation Company to attend their vessels calling for telegrams. Under these circumstances the directors considered it the best course in the interests of the company to make arrangements with Messrs. Glass, Elliot, and Co., the lessees of the Malta and Alexandria cable, for working the Alexandria and Suez line for four years, from 1st January, under which the line is to be worked and maintained in good condition, without any charge upon the company, by the lessees, who are to pay the company, so long as the Malta and Alexandria cable continues in working order, £2,500 a year during the term of the lease. This will enable the board, unless any unforeseen accident arises, to pay a dividend to the shareholders during the next four years of from 4 to 5 per cent. per annum.

"The Board have not been unmindful of the interest of the shareholders in regard to the Persian Gulf Telegraph; they have applied for and obtained the sanction of His Highness the Viceroy of Egypt to construct a line to El Arish, with a view to completing the further communication to Beyrout, Iscanderoon, or Alleppo, and so connecting this company's line with Constantinople by one about to be constructed by the Ottoman Government from Diarbekir, on the direct line from Constantinople to India, and also by the Persian Gulf Telegraph with India, by which means a portion, and in case of accident to the direct line, the whole, of the India and China messages will pass through the company's lines.

"The Board consider that this short and inexpensive addition will materially affect and increase the value of the company's property; but the company having been formed for the special object of utilising the cable laid down by the Red Sea Company from Suez by Aden to India, the board are advised that it would not be competent to this company to make the line to Beyrout. Under

Digitized by Google

these circumstances the directors recommend, as the simplest means of effecting an object so vital to the interests of the company, under the circumstances which have occurred, that the branch line should be registered under the Act as a new and co-operative company, under which all the shareholders in the Telegraph to India Company shall be entitled to their rateable proportion of shares. This can be done at a very small expense under the same management. The directors have to report the arrival of the steamer *Sir James Duke* from the Red Sea, with the cable on board, which was to have been used in repairing the line there.'

The following are the chief passages of the report of the directors of the Bank of Egypt, to be submitted at the annual meeting on the 17th inst.:—

"The directors of the Bank of Egypt have the pleasure, at this their seventh annual general meeting, to submit to the shareholders the annexed statement of accounts for the half-year ending the 31st of December last. The net profits, after providing for bad and doubtful debts, amount to £10,157. 14s. 5d. This, added to £5,255. 11s. 5d., the balance brought forward from the previous half-year, makes a total of £15,413. 5s. 10d. available for appropriation. The directors recommend that the balance of preliminary expenses (£2,000) be written off, and that the usual dividend, at the rate of 7 per cent. per annum, for the half-year (£8,750), free of Income-tax, be declared, leaving £4,663. 5s. 10d. to be carried forward to the next account.

The subjoined circular has been issued to the shareholders in the Oriental Commercial Company (Limited):

"The directors of the Oriental Commercial Company (Limited) have the satisfaction of sanctioning the announcement that, upon closing the books to the 31st of December, 1862, after little more than three months of actual operations, there appeared a clear nett profit amounting to 8 per cent. upon the capital paid up (equal to 30 per cent. per annum). Under these circumstances, if any of your friends should desire to obtain a portion of the shares still disposable, it is requisite that application be made through you directly to the board, in order that you may enjoy the preference to which you are entitled as a shareholder.—JAMES BURNEY."

Mr. T. G. Craig, formerly of the Chartered Mercantile Bank of India, London, and China, has been appointed the manager in London of the Scinde, Punjaub, and Delhi Bank Corporation.

We (*Money Market Review*) have received from the East India Irrigation and Canal Company a copy of the contract which has just been executed by the Governor-General of India and this company, for the construction of the scheme of works in Orissa and the adjacent districts towards Calcutta. The company are quite satisfied with the provisions of this deed, and believe that they will be found highly advantageous to the company, as well as satisfactory to the Government and beneficial to the country, in their working. This is the first instance in which clauses of arbitration have formed part of a contract between the Government of India and a private company. It appears that the Governor-General, the Lieutenant-Governor of Bengal (the Hon. C. Beadon), and all the authorities at Calcutta and in the districts embraced by the undertaking, are evidencing, by the most cordial co-operation, their wish to expedite the company's progress as much as possible, and so effectually have they up to this time aided it, and so energetically has the chief engineer conducted his investigations and surveys, that the plans and estimates of a canal from the Hooghly to Balasore, ninety-five miles in length, are now complete, and its construction has been, or is about to be, immediately entered upon. The Government view this line from Calcutta to Balasore as one of great importance, and express a strong wish for its completion as quickly as possible, so that there is every probability of the work progressing very rapidly, especially as the introduction into Balasore of salt from Liverpool has broken up the manufacture of that article in the locality, and has materially increased the supply of labour for the company's operations.

The silver market continues flat, and the quotation for bars has receded to 5s. 1¼d. per ounce, in consequence of the rise in the foreign exchanges, and the absence of any active demand for India. Mexican dollars have been dealt in at 5s. 6d. per ounce.

The amount of bullion by the P. and O. Co.'s str. *Ceylon*, from Southampton on the 4th inst., was, in gold, to Alexandria, £14,500; to Ceylon, £2,000; to Madras, 4,501; to Singapore, £650. In silver, to Madras, £275; to Calcutta, £20,000; to Singapore, £10,250; to Hong Kong, £3,100; to Shanghai, £29,365. Total in gold, £21,651; in silver, £62,990.

SAM MENDEL'S BULLION AND EXPORT TABLES.—MANCHESTER.

These tables, six in number, are printed on the finest of linen, with a beautifully glazed surface, within a flexible cover of pocket-book size. They extend over a period of ten years—namely, from 1853 to 1862 inclusive, and exhibit the monthly returns of the amount of bullion in that time in the Banks of England and France, with the fluctuations that have occurred in the Bank of England rate of discount in consols and in the price of cotton, yarn, and cloth, taking for the latter the price current on the 1st of each month, also the monthly and annual exports of plain, coloured, and printed cottons from the chief ports of Great Britain to those of India, China, the Dutch East Indies, the Brazils, the River Plate, and the ports of South America on the Pacific, stating the ports of clearance and entrance of each separate monthly quantity. It is unnecessary to dwell on the value of these comparative statements in regard to the cotton trade, providing, as they do, data for estimating the magnitude of future transactions, with the relative ratio of increase in any given direction, and allowing of the comparison of shipments and prices current with the then state of the money market—that infallible index to the influences bearing upon and affecting the trade. The conclusions deducible from this series of exhibits in tabular form must prove of practical value to all concerned; the admirable arrangement of figures leave, indeed, nothing to be desired. A well-earned reputation has been secured by Sam. Mendel's Prices Current of the Manchester Cotton Trade, including transactions in, with reports of, the condition of the several markets, and the above work, so happily conceived and admirably carried out, may be considered, to some extent, as a summary of that circular through the ten years to which it relates.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY, FEB. 12.

The Circular of Messrs. Waithman states,—We have still to report an active silk market, especially for Japans, which seem to be more eagerly sought after than ever. Tsatlees are comparatively neglected, and prices certainly no dearer; but for Taysaams there is a brisk demand at rather improved rates. Deliveries, 1st to the 9th inclusive, China, 1,537 bales; Japan, 569 bales. The quantity of tea afloat, up to last advices from China, is 24,873,471 lbs.

Mr. William Dent, jun. (late of the firm of Dent and Co., of Hong Kong), of Bickley-park, Kent, has joined the direction of the Joint-Stock Discount Company (Limited). It is notified that Saturday next will be the last day for receiving applications.

ARRIVALS NOT INCLUDED IN THE TABLE.—Feb. 5, at Hamburg, from Manila, Louise; 9, at Queenstown, from Maulmain, Escort; at Falmouth, from Manila, Jupiter; 7, off the Eddystone, from Manila, Norwood; from Colombo, Avon; 6, off St. Alban's Head, from Samarang, Lewe van Nyenstein; 10, at Falmouth, from Manila, Jupiter; at Liverpool, from Manila, A. O'Swald; 11, at Cowes, from Macao, Palmerston; at Liverpool, from Hong Kong, Palma; at Cowes, from Batavia, Amalia Maria; 9, off Plymouth, from Batavia, Albasserwaard; 8, at Texel, from Batavia, A. R. Falk; 9, Anna and Elise.

DEPARTURES.—Feb. 9, from Deal for Hong Kong, Uncowah (ship); from Milford for Shanghai, Osborne; 7, from Liverpool for Point de Galle, Indiana; 8, from Deal for Singapore, Carl; from Cardiff for Ceylon, Telegraph; from Swansea for Galle, Woodcote; 11, from London for Amoy and Foo-chow-Foo, Philomela; for Hong Kong and Canton, Invincible; for New York and Shanghai, General Putnam; 9, from Cardiff for Ceylon, Rutland.

SPOKEN.—Tirrell (American), London to Singapore, Dec. 29, 4 N., 21 W.; Geelong, Shanghai to London, Jan. 3, 9 S., 11 W.

LAID ON.—At London, for Shanghai, Beemah; at London for Hong Kong and Canton, Romeo; for Shanghai, Weymouth; for Colombo, Avon; at Liverpool, for Hong Kong, Bahama (st.).

The Almelo, Tjebbes, from Tjilatjap to Amsterdam, had put into the Cocos Islands leaky, but was ready to proceed on 22nd Nov.

The vessel bound from Manila to Liverpool, which was abandoned 25th Jan., in lat. 34 N., long. 31 W., was the Persian of Belfast, not of London, as before reported—Savage, master.

A collision took place at Marseilles on the morning of the 5th of February, between the French mail steamers Phase, which was coming in from Alexandria, and the Labourdonnais, which was getting to her berth. The bow of the Phase ran into the side of the latter vessel, and remained in that state the next day.

ARTICLES OF IMPORT.

TEA.—The arrivals have been larger than ever before known in one month, but the demand from the trade has been very large, whilst exporters have also operated to some extent, and the result has been an advance in all good to fine kinds of Congou and Souchong, also on the medium blackish leaf kinds, whilst the medium flavory sorts have given way 1d. to 1½d. per lb. The demand has been stimulated by the general belief that the long promised reduction in the tea duties will take place this session, whilst a continuance of the demand for Russia on the same scale as last year is generally looked for. It is satisfactory to find that the official return of the deliveries for the past year exceeds our estimate. The total quantity being 106,535,726 lbs., of which 78,768,004 lbs. were taken for the home consumption, and 27,767,722 lbs. for export. Dusty and broken leaf kinds of Congou continue without improvement, the prices ranging from 7½d. to 10½d. per lb.; those with leaf have been rather more inquired for, and may be quoted ½d. per lb. dearer. Good common remains in limited request at 1s. 0½d. to 1s. 1d. per lb. Flavory kinds, of old import, have been rather more saleable

Digitized by Google

at ¼d. per lb. advance. Common Ho-Hows have been difficult of sale at former prices. Fair to good Ho-Hows and Ning-Chows, also the few remaining parcels of second-class Monings and Wopaks, of old season's imports, have sold readily at an advance of 1d. to 1½d. per lb. The medium Kaisow kinds, ranging from 1s. 4d. to 1s. 7d. per lb., have been difficult of sale at irregular prices, but generally at a decline of 1d. to 1½d. per lb. The better grades, from 1s. 8d. to 2s. per lb., have been more wanted, and prices have advanced latterly about 1d. per lb. Fair to good and fine Honams, Monings, and Wopaks have met with a general inquiry, and sales have been very large of these kinds at an advance of 1d. to 1½d. per lb. Finest Chops of these, as also fine to finest Kaisows, have been in steady demand, and have risen about 1d. per lb. There has been some inquiry latterly for fair Tayshan kinds. Common to fair Oolongs have sold at a decline of 1d. per lb. Good to fine are in over-supply, and difficult of sale at a further decline of 1d. per lb. Souchongs of all descriptions have been very readily saleable, common to fair at an advance of 1d. per lb., and good and fine about 2d. per lb. The inquiry for Flowery Pekoe is limited, and prices in a measure nominal. Common Scented Capers show no alteration. Fair to good kinds have been taken to some extent at from 1s. 3d. to 1s. 7d., and fine from 1s. 8d. to 1s. 10d. per lb., the low prices having attracted attention. Fair to good Scented Orange Pekoes have been sold to some extent at from 1s. 5d. to 1s. 7d. per lb., and later sales show an advance of about 1d. per lb. Fine are wanted from 1s. 10d. to 2s. per lb. Foo-Chow kinds of Caper have been difficult of sale. Orange Pekoes have been taken from 1s. 8d. to 2s. 1d. for fair to fine quality, being a decline of 1d. per lb.; old season's selling about 1s. 5d. to 1s. 7d. per lb. for fair descriptions. Uncoloured Japans have been wanted at from 1s. 3d. to 1s. 5d. per lb. Assam and Cachar kinds have sold readily at very full rates. In Green Teas there has been a fair amount of business doing. The bulk of the recent arrivals are not yet placed on the market. There has been some demand for Common Twankay and Hyson Skin for Australia, and fair prices have been paid. Common to fair Young Hysons have been difficult of sale at a decline of 2d. to 3d. per lb.; good to fine have been better supported, but these rule rather low. Hysons have been readily saleable at full prices, though late sales show a slight reduction on the highest point of the month. Imperials and Gunpowders continue firmly supported, and have sold readily at very full prices. Common to fair Japan young Hysons remain very heavy at lower rates, but the finer kinds of this season's imports sell rather better. Fine Canton-made young Hysons sold, at public sale, at 1s. 2d. per lb.; common kinds are neglected. Gunpowders are in fair demand at previous prices. The public sales comprise 54,531 packages, of which 25,354 packages were sold, including 13,654 packages without reserve, and 3,581 packages Assam and Cachar kinds. The letters were deliverrd on the 15th and 27th inst., latest dates being Hong Kong December 15, Foo-Chow December 5, and Shanghai December 6. The stock in the United Kingdom on the 31st ult. was estimated at 81,600,000 lbs, against 70,000,000 lbs. last year, and the quantity afloat at 38,440,000 lbs., against 30,440,000 lbs.

SILK.—We have a comparatively quiet market in silk—not a matter of surprise, seeing the very large business in the first three weeks of the year—still all goes fairly well, except that the high range of prices renders the chance of profit to manufacturers more than questionable. The only feature of the last fortnight has been the continued disposition to take Japan silk; all that has come forward has been taken freely at full rates. Another vessel is now about to unload with 1,200 bales. This class continues to hold its ground in popular favour, and is most welcome at a time when the supply of China silk threatens to be comparatively small, and when the quality and size are becoming less and less favourable. The deliveries of the month were very large, and prices generally are fairly supported. The usual periodical public sales are fixed to commence on the 18th inst. The present quotations are:—

SUGAR.—In raw Sugar speculation has risen in this market, and purchases of Sugar paying the 16s. and 12s. 8d. duties have been made in anticipation of probable alterations. The public sales have been large, and have passed off well, all descriptions being readily taken; those qualities operated upon by speculators have advanced 6d. At these sales there have been disposed of 3,163 bags Penang, low brown to good yellow grocery, at 31s. to 37s. 6d.; 2,654 bags Madras Jaggery, at 27s. 6d. to 30s. 6d.; 3,100 bags Madras Jaggery at 28s. to 28s. 6d.; 1,507 bags Madras at 28s. to 31s. 6d.; 4,199 bags Madras, grainy, 37s. to 40s. 6d., syrups, 32s. 6d. to 39s. In refined only a small business has been again transacted, but no further reduction has taken place in prices, except in Brown goods, which, owing to a temporary scarcity, have advanced 6d. Crushed and Pieces are in good supply.

COFFEE.—The market has been firm, with a moderate demand for all growths. Prices for most descriptions of Plantation are unchanged, a few lots of the new crop only having sold at a slight advance. Native Ceylon remains very steady.

RICE.—At auction a cargo of 5,844 bags was brought forward, of which all the sound was retired at 11s. 6d. to 12s. per cwt., the damaged selling at 8s. to 8s. 6d. Bengal has been steady, with large business in the lower descriptions; prices not materially changed, but transactions upon fully former terms. Our quotations for Bengal white are 10s. to 15s. per cwt., Madras 10s. to 12s., Arracan, Rangoon, &c., 7s. 6d. to 11s. 6d. Nothing has been done in Java, which we quote at 9s. 6d. to 18s.

RUM.—Only in partial request, but prices have been steadily maintained. 600 puncheons Penang realised 1s. 5d. per proof gallon.

SAGO.—We have to note a decline of 1s. per cwt. in medium and inferior descriptions. Small Pearl is steady at 17s. to 19s. per cwt., large Pearl may be quoted at 19s. to 23s. Of 2,911 boxes at auction about one-third sold at 18s. to 19s. per cwt. for medium, and 17s. 6d. to 19s. middling to good small. The stock on February 1st was 1,498 tons, against 748 at the same period in 1862. Of 983 bags of Sago flour brought to auction half were disposed of at 14s. per cwt. for good. Prices are steady at 13s. 6d. to 14s. per cwt. The stock on hand February 1st was 1,797 tons, against 410 tons at the same period last year.

SPICES.—Camphor: China and Japan range from £6 to £6. 10s., and although we have no transactions to report beyond the sale of some damaged at £5. 15s. to £5. 17s. 6d., the article attracts much attention; the stock on hand, Feb. 1, was 813 packages, against 1,387 packages at the same period last year. Cassia Lignea: first, second, and third quality rule at 95s. to 101s.; 111 cases brought forward at auction having been retired. Stock on hand, February 1, consisted of 4,504 package,s against 4,114 at the same period last year. We quote Buds at 260s. to 280s. per cwt.; but nothing is doing for want of supply. Cinnamon: Ceylon, the quarterly sales consisted of 2,973 bales, of which two-thirds sold: first sort at a decline at 2d. to 3d. per lb. compared with the last auctions; second at former currency; and the third and lower sorts at par to 1d. advance, viz.: 690 bales first sort at 1s. 2d. to 2s. 1d. per lb., with a few lots superior at 2s. 11d. to 3s. 6d., 1,533 second 1s. to 1s. 9d.; 575 third 10d. to 1s. 4d.; 175 fourth and Jungle 8d. to 11d.; arrivals. Cloves: No transactions to report in Penang, which ranges from 4½d. to 1s. 4d. per lb.; Zanzibar is steady at 3⅜d. to 4⅛d. per lb.; 1,378 bags were sold at auction at 3⅞d. to 3¾d. per lb. middling to fair, and sales are advertised. The stock on hand Feb. 1st consisted of 5,185 packages, against 7,157 packages on Feb. 1st of last year. Cubebs have declined 10s. per cwt.; and of 329 bags at auction the bulk at £5. 5s. to £5. 7s. 6d. per cwt. The stock on hand at the commencement of this month was 598 bags, against half the quantity at this period last year; our quotations are £5. 5s. to £5. 15s. Ginger: Calicut and Cochin is £2. 15s. to £6. 10s. per cwt.; prices are firm, but little is doing; of 69 cases at auction all were retired at very high prices; sales advertised. Bengal we quote at 45s. to 50s., but the market is unsupplied; stock on hand is 3,675 packages; Calicut and Cochin Mace: 1st quality is 1s. 8d. to 2s. 3d.; 2nd quality 9d. to 1s. 2d.; the market is quiet. 34 cases Singapore, and 3 cases Penang sold at auction at 8d. to 10d. per lb. for low and ordinary. Arrivals. Musk: 1st quality 23s. to 28s. per oz.; lower qualities 12s. to 21s. per oz. in pod; no transactions; 9 caddies Grain at auction, mostly sold at 34s. to 39s. per oz. Nutmegs: 1st quality, garbled, 2s. 6d. to 3s. 9d. per 2nd and 3rd qualities; garbled or shrivelled 11d. to 1s. 8d., without further material reduction; 77 cases Penang, and 34 cases Singapore sold at auction at 11d. to 1s. 3d. per lb., ordinary to very good small; arrivals and sales advertised. Galangal Root is 25s. to 30s. per cwt. Pimento, middling to good, is 2¾d. to 3d. Pepper: Transactions moderate at former prices, and the market rules firm. At auction 268 bags Singapore White have been disposed of at 5¼d. to 5½d. per lb. for ordinary to fair, and 80 bags Penang 5½d. for good; of Black 7,587 bags Singapore were disposed of at auction, two-thirds of the lot bringing 3⅛d. to 3⅜d. per lb., and 1,306 bags Penang 3⅜d. to 3½d.; private transactions in the latter are somewhat more animated. There have been some arrivals, and sales are advertised. We quote Black at 3½d. to 4d., and White at 5⅛d. to 6½d. In Malabar, the market is steady, 4d. to 4⅜d. for sifted, but no transactions to report.

COTTON.—Madras, 1s. 2d. to 1s. 4½d. per lb.; Surat, 1s. 1¼d. to 1s. 8d. per lb.

HEMP.—The market in the early part of the month was rather unsettled, and latterly general dulness has existed, only limited sales being practicable at a decline of 30s. per ton from the rates current at the date of our last report. The total transactions are about 33,000 bales, part for arrival, common to very good having been realised on the spot at £20 to £27. 15s. per ton. Soon after the 9th ultimo the value of Manila hemp gave way 10s. to 15s. per ton, very common roping to good Sarsagon selling at £23. 15s. to £27. 12s. 6d., after which there was some reaction, and though the demand is now rather languid, the following prices have latterly been obtained, fair to good roping £25. 15s. to £26. 10s., and Boluson £29.

MISCELLANEOUS.—Aloes: Transactions moderate. £9. 10s. to £24 per cwt.; firm and scarce; 29 packages Hepatic sold at auction at £8. 7s. 6d. to £10. 2s. 6d. per cwt. for low soft to fair. Cardamoms, Malabar: 5s. to 7s. 3d. per lb.; at auction, 9 cases ordinary Malabar retired, and 28 bags Madras sold at 5s. 8d. to 5s. 9d. per lb. for good bold Alleppy, being 1d. dearer. Castor Oil: 4½d. to 5d. per lb.; none in the market. Coculus Indicus: 9s. to 12s. per cwt.; nothing doing. Senna: 2½d. to 6d.; firm, 64 bales sold at auction at 3½d. to 4d. per lb. for ordinary to middling. Seed—Linseed: 68s. to 71s.; Rapeseed, 68s. to 75s.; dearer, and advanced quotations realised; do. Guzerat, 75s. to 78s. Shells—Mother-o'-pearl: 25s. to 64s.; firm; 140 cases Bombay sold at auction. Teeth, Elephants', 70 lbs. and upwards, £30 to £35; 40 to 60 lbs., £28, to £33; 20 to 40 lbs., £27 to £32; Scrivelloes, £12 to £32; Ball, do., cut, £43 to £53; do. do., uncut, £29 to £41; Hollows, £13 to £28; Points and Tips, £14 to £33; Sea Horse, 4 lbs. and upwards, 6s. to 14s.; 3 lbs., 4s. to 8s.; 1 to 2 lbs., 9d. to 2s.; the Ivory sales are, on the whole, very satisfactory, as compared with the sales of last year. Tortoiseshell, 9s. to 20s.; little done. Bees' Wax, White £11 to £12. 5s.;

Digitized by Google

Yellow, £7 to £8; both sorts scarce; and white much wanted. Only 9 cases Bombay yellow at auction, at £9 per cwt. Ebony Wood, £6 to £13; quiet. Myrabolanes, 11s. to 13s. 6d.; firm, 500 bags at auction sold at 12s. 6d. to 13s. per cwt. for good. Red Saunders Wood, £6. 10s. to £7; firm, at previous rates with enquiry. Turmeric, 25s. to 30s.; firm. Gutta Percha, 1s. 4d. to 2s. 6d. per lb.; steady, of 16 tons at auction a small portion sold at 1s. 8d. to 2s. 3½d. per lb. for middling to good natural. India Rubber, 1s. 3d. to 1s. 5½d. per lb.; very quiet; 314 baskets Singapore, 20 baskets Penang, and 103 packages Assam, at auction, all retired. Manila, £23 to £27; Sunn, £15 to £30. Horns, Buffalo, 23s. to 42s.; Buffalo Tips, 20s. to 25s.; Deer, 27s. to 55s. Nux Vomica, 9s. 6d. to 10s. 6d.; quiet. Safflower, good to fine, £6. 10s. to £8.; inferior to middling, £4 to £5. 10s.; firm and active. Saltpetre: 35s. to 37s.; prices have been drooping, and are 1s. lower. Shellac, Orange, 170s. to 187s. 6d.; Garnet, 160s. to 170s.; Liver, 150s. to 170s.; Block, 100s. to 170s. Senna, Tinnevelli, 4d. to 1s. 6d. Tin: Banca, £121 to £122 per ton; Straits, £119 to £121. Limited sales effected in Banca. Tortoiseshell: fine quality, 22s. to 26s.; sorts, 14s. to 21s.; inferior, 10s. to 13s. Only 5 cases Singapore, 3 cases Manila, and one case Sydney. Vermillion: 2s. 2d. to 2s. 4d. Wax, Japan, 62s. to 85s. Quiet. Sapanwood: Bemah, £5 to £8; Siam, £8 to £11; quiet, but firm. Mother-o'-Pearl Shells; Singapore, 125s. to 150s.; Manila, 80s. to 100s.; 95s. to 99s. per cwt. Soy: 2s. 5d. to 2s. 7d.; quiet at 2s. 6d. per gall. Star Anniseed: 105s. to 110s. Sticklac: Siam, 55s. to 80s.; very quiet, and 188 cases at auction. Terra Japonica: Cutch, Pegue, 24s.; to 26s. 6d.; very quiet, 504 bags at auction. Gambier: 21s. to 22s. 6d. steady, but of 1,797 bales at auction very few sold at 22s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £7. nail rods, £7. 10s.; hoops, £8. 10s. to £9; sheets, single, £9. 5s. to £9. 10s.; Staffordshire bars, £7. 15s. to £8; rails, £5. 15s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £95 per ton; yellow metal, 8½d. per lb.

TIN.—115s. for block; 116s. for bar. Tin plates, best charcoal, I. C. 28s. 6d. to 29s. per box.

LEAD, &c.—English pig, £21 to £21. 5s.; shot, patent, £23. 10s.; sheet, £21. 10s.; spelter, £18.; zinc, English sheet. £23. 10s. to £24; quicksilver, £7 per bottle.

TIN.—In English a good business has been done. The price of Foreign has been gradually creeping up, principally owing to the falling off in quantity of the shipments from Singapore and Penang. A large quantity of Straits tin has changed hands at prices from 117s. to 121s., at which latter quotation the market is firm for full prompt. Some purchases of tin have been made here and in Holland, for shipment to Japan, which is a very extraordinary circumstance. The stocks of foreign tin, here and in Holland, for three years are given below:—

	31st January, 1863.		1862.		1861.	
	Slabs.	Tons.	Slabs.	Tons.	Slabs.	Tons.
Foreign in London, estimated at		2,520		1,510		404
In Holland	60,405	1,850	48,866	1,496	61,901	1,870
		4,370		3,006		2,274
In Holland towards next sale	75,950	2,325	81,620	2,500	102,615	3,142
		6,695		5,506		5,416

The quantity of Straits tin afloat for Europe is 396 tons, against 1,440 tons in 1861, and 1,064 in 1860. Tin Plates: The demand continues steady. The shipments last month were about 60,000 boxes, against 49,000 boxes in January, 1862. Lead continues very firm. Spelter is rather improved. The stock 31st ult. was 4,752 tons, against 5,423 tons last year.

EXPORT OF BULLION TO CHINA, &c.

The following return shows the shipments of bullion from Southampton during the present year by the P. and O. Company's mail steamers (not including the present mail).

	Gold.	Silver.

United States Gold Coin	3 16 3½
Silver in Bars	0 5 1 to 2
Mexican Dollars	0 5 5 to 6
Carolus Dollars	0 5 6

MANCHESTER MARKETS.

There was a good deal of inquiry at the commencement of last week for both yarns and cloths, though it led to very little business. In yarns, some kinds can be bought now at a decline of 1d. per lb. Such, for instance, as 32's to 50's crops (for shirtings), and 60's to 100's, may be quoted at ¼d. to a 1d. per lb. lower. From 70's to 80's doubled are at about the same decline. There is more steadiness in 40's to 60's doubled, and in very fine doubled. In yarns, which are out of stock, and scarce also, there is more firmness. This day's prices of cloths are nominally unchanged, because there are no purchases to test them; but there is no doubt that the market is weaker for cloths as well as yarns, and buyers would not have much difficulty in operating at ¼d. to ½d., and in some cases at a 1d. per lb. decline on the rates demanded last week.

FREIGHTS AND CHARTERS.

Outward freights are firm, both for general cargoes and coals, but there is no alteration in rates. Homeward freights are active, and good inquiry exists for forward ships to Manila, also for smart vessels from China.

Current Rates of Freight for Vessels on the Berth :—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 30s. 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £38 and £1. 17s. 6d. For Shanghai: £48 and £2. 7s. 6d. For Manila, £1. 12s. to £1. 12s. 6d. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £27 and £1. 8s. For Penang, £24. For Galle, £26 and £1. 10s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freight for Government stores in the Thames, from the River Thames to Colombo, and are still open for tenders for 8 tons heavy stores to the same port.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 45s. to 55s.; Shanghai, 55s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

CASUALTIES.

The William (ship), Hutton, from Singapore to London, foundered off East London, Cape of Good Hope, Dec. 22, crew, except two boys, drowned.

Capetown, 20th Dec.—The Melbourne, from Shanghai to London which stranded N. of the Gouritz River on the 4th Nov., was sold a few days after she struck—cargo from her was afterwards shipped for this place by the Foam, and a letter from the wreck states that the Roe had left 12th Dec. for Table Bay, with 25 bales of cotton and 215 chests of tea, and that a large quantity of cargo had washed upon the beach, the hull having broken up.

The Tryntje Fenna (Dutch ship), from Batavia, had put into Capetown leaky, and will have to discharge.

The Star of the South, Renner, from Bombay and Trincomalee, with cotton, which arrived at St. Helena 3rd Dec., was making from 10 to 12 inches water per hour. Her donkey engine being out of order, she procured another, and left 10th Dec. for Liverpool. On the 26th Dec., in lat. 7 N. long. 28 W., she was spoken, making water, from which she could scarcely be kept free, and running for Barbadoes, where she arrived 6th Jan., leaking badly; and, having been surveyed, her cargo was ordered to be discharged for further inspection.

Advices from Anjer report that the Mirage, Roberts, from Hong Kong for London, struck on Lynn Rocks 30th Nov., and remained for eight hours; the master states that the ship did not strike heavily, but that a good deal of copper was torn off her bottom, and that he had to break out cargo and put it aft, and start the foremost water tank, before she came off.

St. Vincent, Cape de Verds, 22nd Jan.—The Ferdinand (Russian), from Newcastle for China, has put into Porto Praya leaky; condemnation probable; part of cargo sold.

The Persian, of London, from Manila for Liverpool, was fallen in with in a sinking state by the Zanzibar arrived at Havre; crew saved and landed there. The Giant's Causeway passed her Jan. 26, in lat. 33 N., long. 31 W., water-logged and abandoned. The Bengal (ship) was in company, and sent a boat on board.

At ST. HELENA.—Dec. 5, West Capelle, Crucq, from Batavia, and sailed, 6, for Middelburg; 10, William Simpson, Napier, from Batavia, and sailed for London; 11, Glenclune, Turnbull, from Amoy, and sailed for New York; 13, Henrietta Maria, Tjebbes, and Staatsraad van Ewyck, Winter, from Batavia, and both sailed, 14, for Amsterdam; Prinses Amalia, Alkemade, from Batavia, and sailed, 15, for Rotterdam; 18, Alcor, Van Oppen, from Batavia, and sailed, 19, for Amsterdam; Henrietta, Loeven, from Batavia, and sailed, 19, for Amsterdam; 19, Conference, Newlands, from Shanghai, and sailed, 20, for London; Benvoirlich, Jenkins, from Batavia, and sailed, 20, for Queenstown; Anna Elise, Roever, from Batavia, and sailed for Amsterdam; 20, Prince Alfred, Splatt, from Singapore, and sailed for London; 22, Nil Desperandum, Downing, from Hong Kong, Persian, Savage, from Manila, and both sailed for Liverpool; 24, Corsair, Sanders, from Foo-chow-Foo, and sailed for Liverpool; 25, Weymouth, Norris, from Foo-chow-Foo, and sailed, 26, for London; 26, Norwood, Brisbow, from Manila, and sailed for London; Briton, Byford, from Padang, and sailed for Amsterdam; Avon, Richardson, from Ceylon, and sailed for London; Vier Gezusters, Bik, and Krimpenerwaard, Heyning, from Batavia, and both sailed for Rotterdam; 28, Mary Glover, Hughes, from Java.

Off ST. HELENA.—Dec. 6, Maria G., from Shanghai for London.

Off ASCENSION, Dec. 22, Daisy, from Shanghai for London; Catherina Maria, from Padang for Amsterdam; 30, Sappho, from Shanghai for London; John Temperley, from Foo-chow-Foo for London; 31, Mary Lee, from Hong Kong for Liverpool.

At ST. VINCENT, C. V., Jan. 15, Clan Alpine (st.), Bolton, from the Clyde, and left, 18, for Singapore and Hong Kong.

At TABLE BAY.—Dec. 1, Coniston, Owen, from Liverpool, and sailed 18 for Hong Kong and Canton, with foremast sprung; 2, Reliance (str.), Kitto, from Liverpool for China, with bottom foul; Nov. 26, Crouch, Brothers, Crouch, from Foo-chow-Foo, and sailed 2 Dec. for London; 27, Hero, Inglis, from Hong Kong, and sailed 20th Dec. for London; 28, Leila, Rapson, from Liverpool, and sailed 19th Dec. for Colombo; 29, Princess, Somawaty Roy, from Manila, and sailed 2nd Dec. for Liverpool; 30, Phillipine, Rowe, from Kanagawa, and sailed 10th Dec. for London; Dec. 1, Amelia Maria, Cederberg, from Batavia, and sailed 6 for Falmouth; Falcon, Sullivan, from Batavia, and sailed 18 for London; 13, Augusta, Westerberg, from Batavia; 17, Geelong, Wright, from Shanghai, and sailed 19 for London; Dec. 6, Akbar, Fraser, from Colombo.

At ALGOA BAY.—Nov. 29, Hero of the Nile, sailed for Ceylon.

At EAST LONDON.—Dec. 13, Greenwich Banks, sailed for Ceylon.

At SIMON'S BAY.—Nov. 24, H.M.S. Argus, from Plymouth, and left Dec. 4 for China.

OFF CAPE RECIFE.—Dec. 15, Prode, from Foo-chow-Foo for London.

At MAURITIUS.—Dec. 18, Birman, Bidean, from Singapore; 17, Hydaspe, S. S. Granderie, sailed for Singapore; 18, Wm. Stevenson, Brown, sailed for Singapore; 25, Nouvelle Pallas, Daban, sailed for Colombo; 27, Matchless, Hill, sailed for Colombo; 30, Finella, Murray, sailed for Singapore.

PREPARATORY EDUCATION, BRIGHTON.
A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to "Alpha," at the office of this Paper, 12, George-yard, Lombard-street, E.C.

HOLLOWAY'S OINTMENT AND PILLS.—Bad legs, bad breasts, ulcers, abscesses, wounds and sores of all kinds may be thoroughly healed by the application of this Ointment to the parts affected after they have been duly fomented with warm water. The discharge should not be checked at once, but rather encouraged, for such sudden check must of course be always dangerous. Nature is the noblest of physicians, and must not be opposed, but seconded. All sores are, for a time, the safety-valves of the constitution, and should not be closed or healed until they assume a healthier character. Under the action of this powerful Ointment, together with the Pills, the depraved humours of the body will be quickly removed.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,
MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.
Consultations, Ten till Three and Six till Eight.
REVIEWS OF THE WORK.
"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.
"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.
Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

VICE-SECRETARY—Edward Fuch.

LIFE DEPARTMENT.

(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world not chargeable with an extra premium.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying a fixed rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.
(Payable during the entire currency of the Policy.)

Age.	Without Profits.			With Profits.			Age.	Without Profits.			With Profits.

List of Passengers.

PASSENGERS INWARD.

By this Mail, to Marseilles, per Massilia, arrived Feb. 23.—From Hong Kong: Mr. Cashlo, Mr., Ocano. From Singapore: Messrs. Buchanan, Tauriative, Stakieff, and Nikaeff. From Ceylon: Mr. and Mrs. Gavin, infant, and European female servant, Mr. Grant, Major Murray. To Southampton, per Ceylon, expected to arrive March 2.—From Hong Kong: Lieut. Haines, R.N., Lieut. Boulton, R.N., J. Brownlie, and J. Littleford. From Singapore: Mr. Meyer. From Ceylon: Mrs. Brookes, infant, and European female servant. To Alexandria.—From Galle: Mr. Jenny. From Hong Kong: Messrs. Marshall and Dickman. From Singapore: Mr. Reimer. To Suez, per Nubia, arrived Feb. 14, from Galle: Mr. Jackson.

By last Bombay Mail, to Marseilles, per Euxine, arrived Feb. 18.—From Singapore: Mr. Guimaraens. To Southampton, per Delta, Feb. 23.—From Galle: Mr. Jarratt.

PASSENGERS OUTWARD.

By this Mail, per Pera, Feb. 20, from Southampton.—To Shanghai: Mr. Stonach, Miss Cookson, Mr. and Mrs. T. Davies, and native female servant, Messrs. Prior, T. Stainer, W. Wallace, Laity, and N. B. Drewry. To Hong Hong: Mrs. Caldbeck, infant, and European female servant, Mr. Galton, Mrs. Torrey, Andrew Miller, Mr. I. N. Ryder, Mrs. Moul, two children, and European female servant, Mrs. Ryder, and three children, Dr. Heelis, Mr. Crook, Mr. Jno. Fairbairn, Capt. and Mrs. Barton and servant, Miss Evans, Mr. A. T. Miller, R.N., Capt. Vincent. To Singapore: Mr. Young, A. and E. M'Alaster, Capt. H. Browne, Mr. Desborough, Major Jno. Drysdale, Mr. R. S. Hill, Major F. S. and Mrs. Chamier and servant, R. Smith, E. P. Jull, Mrs Whitworth Russel, Mr. I. R. Went, Mrs. Anderson, child, and servant, Mrs. Brooks, Mr. Hanks, Miss Anson. To Ceylon: Mr. and Mrs. Wise, child, and European female servant, Mr. I. S. Alston, Jas. Scott, Mr. Spink, Mr. M'Bean, Mr. G. D Wallace, I. N. Lodge, I. Barker, W. Berry, I. Moore, Whenton, I. Nichols, Messrs. Foot, Heath, and Trial. To Madras: Lieut. T. F. Gordon, Mr. R. F. Morris, T. Clark, wife, and child, Jos. Shepherd, Rev. W. H. Craig, H. Algar, Mr. Beattie. To Alexandria: Mrs. Turner. From Marseilles, per Euxine, to leave Feb. 28.—To Shanghai: Mr. and Mrs. R. Reid and European female servant, Gen. Brown, Lieut. Savory. To Hong Kong: Mrs. Savory and European female servant, Mr. and Mrs. Harper, Mr. Baker, Mr. M. Crawford, Com. Wilmot, R.N. To Singapore: Mr. and Mrs. G. Bushell. To Penang: Mr. and Mrs. F. Kastermann. To Ceylon: Messrs. M'Gorme, Van der Stantan, Molesworth, Hom, Gallott, and Scott. To Calcutta: Messrs. C. Campbell, Gray, and W. Gannett, Major and Mrs. Delafosse, Col. Gloster, Capt. M'Dougal. To Madras: Dr. and Mrs. Brennan and infant, Mr. G. Vans Agnew, Mr. N. G. L. Cotton, Mr. G. A. Harris, Lieut. C. J. Blair. Mr. D. Leman.

Per P. and O. str., March 4, from Southampton.—To Ceylon: Mr. and Mrs. Wilson, Miss Wilson, Mr. Leechman.—From Marseilles, March 13.—To Hong Kong: Mr. W. J. Bryans. To Singapore: Mr. and Mrs. W. W. Cook.

Per P. and O. str., March 20, from Southampton.—To Hong Kong: Mr. Despard. To Ceylon: Messrs. H. Durand, S. Carey, and L. Dobree. From Marseilles, March 28.—To Singapore: Capt. and Mrs. J. Burn. To Ceylon: Rev. C. C. and Mrs. McArthur and infant.

Per P. and O. str., March 4, from Southampton.—To Ceylon: Mr. and Mrs Churchill, Mrs. King, Mr. A. H. Baillie. To Hong Kong: Mrs. Pauncefote and infant, Mr. R. Coen, R.N., surgeon Snell. To Shanghai: Mr. King, Mr. T. Watters, Mr. C. F. B. Allen, Mr. P. Solbe. From Marseilles, March 13.—To Hong Kong: Mr. and Mrs. Lay and infant, Don Pedro Rodriguez and wife, Messrs. R. Brett, F. C. Bishop, and W. R. Robertson. To Shanghai: Mr. Toulouse.

Per P. and O. str., March 20, from Southampton.—To Ceylon: Mrs. Saboradiere. To Shanghai: Mr. T. W. Walker, Mrs. Willcoss, Mr. Higginbotham. To Hong Kong: Mr. Wm. Keswick, Mr Youl. From Marseilles, March 28.—To Hong Kong: Mr. R. H. Chambers. To Shanghai: Mr. Jas. Duncan Campbell.

Per French Mail str., Feb. 19, from Marseilles.—The whole of the available space for passengers by this vessel has been taken up by the French Government for the conveyance of reinforcements to Cochin-China.

Summary of News from the Far East.

JAPAN.

The intelligence from Japan is chiefly a repetition of that transmitted last mail—namely, that the design of reducing Yedo to a third-class city is still being carried out by the exodus of the Damios. There still exists a great demand for steamers there, and the object of their possession is not so conclusive as it is wished to make it appear.

Colonel Neale has been warned by the Mayor of Kanagawa that some new danger is imminent. The Japanese authorities are certainly indomitable as alarmists, the periodical recurrence of these warnings being now set down at three months, an assassination following every third warning.

The *Japan Express*, which fluttered for a few weeks, is, we hear, defunct, leaving the *Japan Herald* the sole promulgator of news in Japan.

The *Japan Herald* contains the proceedings of a Court of Enquiry into the salvage in the case of the brig *Guinea*, wrecked in Japan.

CHINA.

PEKING.

The news from the capital is unimportant. A project has been formed for a line of railway between Tien-tsin and Peking; the ordinary daily traffic is large; coal is cheap and good if properly wrought; the country between Tien-tsin and the capital is flat; and the Imperial authorities are ready to give their consent to the scheme. There is little doubt, therefore that it will some day be accomplished.

SHANGHAI.

Our correspondent writes, under date January 8:—"Since my last letter pregnant events have taken place in Shanghai. Ward's army has mutinied, a red-button mandarin has been attacked in his own house, and robbed of $40,000, the General of the disciplined Chinese has been degraded and deposed, and intrigue is hard at work to provide a successor. Here are the events of the past week put in a nutshell. To explain, however. It is now very generally known that when Ward wanted supplies for designs which he knew would not be approved of if submitted openly to the Chinese Government, he was in the of slightly increasing the amount of his requisition for money for evident necessaries. Burgevine had, it appears, either too much principle or too little *savvy* for this mode of action, so he at first indented for large sums for the defences of Sung-kong-foo, &c. When, however, this was refused, he openly took the money intended to pay the troops, and applied it to the purpose, which he considered needed accomplishment. However, instead of, as might have been expected, bringing in military labourers, he employed outside workmen altogether, and threw away at once immense sums, and the most favourable chances of making an efficient corps of engineers, sappers and

Digitized by Google

miners in connection with his force. The consequence of all this was that the troops mutinied, and declared their positive intention of deserting to the rebels, if not paid. Money must be forthcoming—but here occurred another hitch, which I must explain. Burgevine had so long procrastinated, instead of advancing on Nanking, that the confidence of the Chinese was greatly shaken. But still the hong merchant Ta-ku, the Government banker, stood up for and supported him. About ten days, however, before the day finally appointed for the starting of the expedition from Shanghai, the ex-Taoutai, Wu, went up to Nanking, and presented himself to Chang-ko-fan, the Commander-in-Chief of the Imperialists there, promising that the "Ever Victorious Army" would immediately follow him. Negotiations had meanwhile been carried on with a Cantonman, who, with a garrison of 12,000 rebels, held an outpost on the river side of the city, and who declared his readiness to change sides. But, in consequence of the expected arrival of Ward's men, these negotiations flagged, and the Canton chief, with his entire garrison, escaped from their position, which was rather perilous, and, falling on Chang-ko-fan's brother, routed him, and captured a line of villages, formerly held by the Imperialists. Wu was instantly accused of treachery by Chang-ko-fan, and had so "lost face" by the non-fulfilment of his promises that he endeavoured to poison himself on his way down to Shanghai, and now lies here in a precarious state. Now, Wu was the bosom friend of Ta-ku, and the latter resented the injury sustained by his friend to such an extent, that he swore he would not advance another cash to Burgevine. On Saturday, Jan. 3, Sung-kong was in a state of uproar; the city gates had to be shut; the officers were in terror for their lives; and all business was at a standstill. Sunday morning, Burgevine came down in the *Confucino*, a little steamer belonging to the Chinese Government, and taking his body-guard of thirty men, marched through the British settlement to Ta-ku's house, effected a forcible entrance, bruised Ta-ku's face with his fist, and bore away $40,000 which Ta-ku had in his coffers. He then went to Gen. Staveley and to Captain Borlase, of the *Pearl*, and recapitulated what he had done, omitting, of course, the personal assault, offering to give himself up if either chose to arrest him. This they both declined, and he departed on his way to Sung-kong. As soon, then, as the thing was bruited abroad, General Staveley sent up a despatch stating that he no longer recognised Burgevine as head of the force, and the same messenger who took up General Staveley's despatch took also Burgevine's dismissal from the Chinese authorities. Now the question is, 'Who is to succeed him?' English influence will be used to make the force an English contingent, but the Chinese bitterly oppose this. Gen. Staveley, with a natural desire to have his finger in the pie, has offered to officer the force right through, but the Chinese themselves have done no less than offer the command to an assistant-surgeon in a marching regiment, who has had many opportunities of making himself highly popular! This will surprise the people at home, but it is a fact, to be probably corroborated by next mail; but the great question now is, whether the English military and official influence is not more than sufficient to quash any appointment made by the Chinese authorities exclusively. *Nous verrons.*"

The conduct of Burgevine, and the result to which it led, as recorded in the letter of our correspondent, form the prominent topics of discussion in the China papers. The general opinion appears to be that General Burgevine was wrong in striking the Imperial banker, but that he had great provocation. The *Friend of China* writes:—

"General Ward's successor is no longer in command of the Chinese army in this quarter. In fear of his life, Mr. Burgevine has claimed the protection of Capt. Borlaise, R.N., and it will be well if he can succeed in leaving Shanghai without imprisonment at the suit of parties to whom it is said he has become indebted on behalf of the Chinese Government.

"General Burgevine's fate will be a warning to those who, leaving other avocations, have taken up arms for the imbecile, faithless Chinaman; and though we cannot defend his course, on Sunday last, in forcibly taking from Ta-Kee's the 40,000 taels required to pay the men under his command, there is much to be said in extenuation of his offence. Supposing he had not acted as he did, what then should he have done? that is the question. Here were three thousand men dependent on their pay for their daily food, and what would follow if they did not get it? Why, one of two things, either a revolt *en masse*, in which event every officer in the garrison might have been murdered, or desertion. Considering, therefore, what was the best for the interest of his Imperial master, it seems to us that but few, if placed in a similar position, would have acted differently."

We are glad to see that the *Friend of China* has commenced a new life in Shanghai. The first number is now before us, and is a highly creditable production. It is to be published twice a-week. We wish it all success.

HANKOW.

A Chamber of Commerce is being formed to regulate the price of all exports. The authorities will support it. Two hundred war-boats have been launched, and a number more will follow. Their destination is Woo-hoo. The river has fallen 24 feet, and the thermometer stands at 35 degrees. Some falls of snow have marked the approach of still colder weather.

NINGPO.

All remains quiet, but almost daily, additional taxes are imposed on the people by the Chinese Government. A correspondent of the *Shanghai Recorder* writes:—

"H.M.'s gunboat Hardy left this port on the 22nd of December, and returned next day, having in tow the American barque Agnes, which cleared on the 20th, and sailed on the 21st inst. She reports that on the day she left port light winds obliged her to anchor during the flood. About 3 P.M. she weighed again, and was hailed by H.M.'s gunboat Hardy, and requested to anchor, with which order she refused to comply. She was shortly after boarded by the commander of the Hardy, who demanded the Agnes's papers, and it is said that some ill-feeling was caused by the entire proceeding. The Agnes remains in charge of the British naval authorities, there being no American consul at this port, and a rumour is current that she was seized by Captain Dew at the request of some of the American missionaries."

SWATOW.

At Swatow a daring piratical robbery had occurred. A band of well-armed men landed on Double Island, and took possession of the Chinese bank; as no adequate resistance was at hand, they proceeded to work, and removed all the treasure they could lay their hands upon. The amount of plunder is said to have exceeded $100,000. Various persons, native and foreign, witnessed the whole proceedings, but were powerless to interfere. The money, or a large part of it, is said to have belonged to the Imperial Customs.

HONG KONG.

The subject of the Manchester Relief Fund is still occupying attention. The subscriptions already given are not felt to have been sufficient. The P. and O. Company's employés at Hong Kong have sent home £250.

"In the matter of the Lancashire operatives," says the *China Mail*, "the loan does not seem to be a very taking one in the Hong Kong market, at least, among smaller investors;" and that journal proceeds to contrast the contributions by sixty Chinamen in sums varying from one to five hundred dollars, recorded in the *Penang Gazette*, of Dec. 27th, with the subscriptions made by the English community of Hong Kong. The approaching grand bazaar, to be held for educational purposes, was bitterly satirised in this connection, and church functionaries, and the Amateur Theatrical Company, were strongly appealed to.

One of the vessels belonging to the P. and O. company has narrowly escaped total loss. The *Cadiz* had sailed for the North early one morning at nine o'clock, but just as she was outside of Ly-yu-moon Pass, an alarm of fire in the forehold was raised. She immediately put back to harbour, and was run aground on Kowloon shore. Orders were given to scuttle her, and by means of guns this was done, five or six shots being fired into the fore part of the vessel. By two in the afternoon the fire was extinguished. A detachment of men from H.M.'s 99th Regiment, and a party from a man-of-war, were on board all day rendering what assistance they could. The damaged portion of the cargo does not exceed one hundred and sixty chests of opium, and some mixed cargo in the forehold. The undamaged cargo was transshipped on board the *Benares*, and despatched on the following day.

The new pier just completed at Hong Kong, and which is very similar in appearance to the marine parades which adorn our own harbours in England, had excited much admiration, contrasting, as it does, in solidity of appearance and beauty of proportion with ordinary Chinese praya, notable for irregularity of design, and made hideous by unsightly structures of bamboo. Primitive bamboo piers are evidently destined to be superseded to a great extent by more substantial structures. The present pier has cost £1,200, whilst a ricketty bamboo pier, in its place, could have been erected for £80. This pier has no pretensions to high ornamental style, being a neat, plain, strong erection, constructed out of the very hardest

Digitized by Google

wood from Singapore, extending 250 feet from the praya, with a breadth of 25 feet or so, and a broad landing platform at the further extremity. Vessels of 900 tons and upwards have already discharged cargo alongside of this platform, and it is part of the design to have two lines of rails, by which trucks, full and empty, shall be run between the ship's side and the godowns, by which still greater expedition can be observed in discharging. It is needless to point out also that robberies between the vessel and the godowns cannot occur on this plan, as they do under the system of cargo boats. It thus promises to be as serviceable as it is substantial—superseding flimsy make-shift fabrications of cane.

Five European prisoners had succeeded in escaping from the Hong Kong gaol on the 14th of January. The mounted police were at once put in motion, and two of the men were apprehended soon after. A rumour that Stanford was among the fugitives created some excitement, but this was found not to be the case. One of the prisoners, who was picked up at sea, has shown, by previous feats of the same kind, that to place himself outside of the gaol is at almost any time in his power. There has been found to be a trade in files between the inmates of the gaol and the outer barbarians. No doubt there is a demand, and that will regulate the supply. If a prisoner can pay a dollar or two for a nice light file, made out of a watch-spring, he will find some one to supply him. This laxity of discipline had excited some attention, and no doubt some new regulations will be adopted, giving more security to the community. One of the turnkeys was in custody on the charge of aiding in their escape.

With reference to the recent regulations for trade on the Yang-tse, the *China Mail* writes :—

"The present course now adopted by the authorities at Peking was spoken of so far back as 1859, and felt to be necessary in order to render the customs scheme complete. The merchants and others, among whom the idea of a foreign customs' collectorate originated, have always urged the necessity of an efficient preventive service in order to complete the scheme and render it effective for the purpose intended. It is even affirmed that a fleet of cruisers, each capable of giving a good account of the largest smuggling vessel now afloat in Chinese waters, would have been had from England though no rebellion had ever existed. The opinion here and elsewhere certainly is, that Sherard Osborn's fleet is for service against the rebels, and would never have been organised but for that purpose. We have reasons for doubting this: the idea of such a fleet has long been in existence, and the presence in England of a high officer of foreign customs is the first good opportunity that has offered for carrying out the idea, on to which that of warfare has undoubtedly been engrafted. Be that as it may, the new regulations for trade on the Yang-tse show that operations against Nanking, if they be undertaken by Captain Osborn's fleet of gunboats, are not expected to absorb all his attention; it seems to be assumed that he will be able to spare time for the supervision of the river trade. There is even a likelihood of Captain Osborn's fleet being used to prevent unlawful trading on the coast as well as in the river. It must be confessed that England has begun to build up in China much of what she threw down by her earlier policy. She is determined, at least, that future wars with China shall not arise out of mercantile embroilments, where it is difficult to affirm positively who is most in the wrong; she is determined, too, that if the English nation is, to its loss, represented in China by a class who do not scruple to carry on "a very large and lucrative trade in smuggled goods," it shall also be represented by those who will endeavour to turn the national revenues into their legitimate channel, and see that the treaties are observed and our own countrymen controlled. Let China be as faithless towards us as she may, we shall at least be able, when another collision takes place, to challenge the criticism of neutral nations as to the undeviating faithfulness with which we have performed our portion of the treaty and wrought for the interests of the empire."

The clock in the now completed tower at Pedder's Wharf has been at length "set going," and both tower and clock are pronounced a complete success.

CANTON.

By a decision of Mr. Bruce, goods sent from one treaty port to another, but transshipped at Hong Kong, are treated as coming from a foreign port, although protected by a duty chop and fully identified. This decision particularly affects the trade of Canton, whence a large proportion of exported goods is brought to Hong Kong in steamers, and transferred to vessels on the berth for the several coast ports. The rapidly increasing preference of the Chinese for foreign bottoms, and the absence of injury to the Imperial revenue from the system of transshipment under very simple checks, renders it desirable that so obstructive a decision should be reversed.

With reference to the Canton Baptist Mission, the Rev. F. S. Turner writes :—

"In Canton, with its population estimated at a million, and for the surrounding populous districts with their millions more, there are at present only nineteen Protestant missionaries; and this feeble band is threatened with diminution unless Christian friends step forward with aid. Among the various missionary societies represented here, is the American Baptist Mission, receiving support from the Southern States; the head-quarters of their society being in Richmond, Virginia. Now, the present disastrous war in the United States has cut off these missionaries from the institution which sent them to this land, and wishes to sustain them here. It is now a long time since they received any remittance from their board. Twice this year they have had letters stating that their treasurer has funds but is unable to find any means of forwarding them. Fortunately the missionaries of the same society stationed at Shanghai had some money in hand, which, without thinking of their own probable future necessities, they shared with their colleagues here. Some subscriptions, too, were collected by the Rev. J. H. Gray, and from these sources the mission has been supported during the present year. Their treasury, however, is once more empty, and, unless replenished by a re-opening of communication with their parent society, or by assistance of friends in these parts, they will be compelled to seek some secular employment for the maintenance of their families."

The Viceroy Laou handed over his seals of office to the Acting-Viceroy Yen Twan-shoo, on the 4th inst. The Acting Viceroy is the Special Commissioner who recently arrived to direct the collection of the War-tax, the pressure of which is causing much distress among the native traders. The ex-Viceroy Laou was to leave for the province of Kwei-chow, being ordered thither for the purpose of settling the claims of the French for compensation on account of the murder of a missionary in that province. The following is the version of this story current in Japan :—

"About a year ago three men, in the guise of French priests were preaching the religion of the Lord of Heaven in the Province of Kwei-chow, and as their presence and their preaching creating disturbances and suspicions to the disquiet of the popular mind, and were therefore distasteful to the Provincial Government, they were requested by the authorities to leave that part of the country; they appealed to the Government of the Province, and asserted their treaty right to live and preach in Kwei-chow as well as in any other part of China. On examination, however, two of the party proved to be Chinese, and the third was suspected to be a seditious character, but as there was no proof of crime against any of them, they were simply forbidden to stay there longer. Shortly afterwards three *bona fide* French priests travelled into the same region, and the Governor presuming that they were the same identical three he had already dismissed, ordered their seizure, and after a severe warning, sent them on their way to Canton. Arrived there, and having reported their case to the French Consul, a despatch was procured from Governor-General Laou, of the Two Kwang, assuring the Governor of Kwei-chow that the three individuals were but three peaceful missionaries, entitled by Treaty to propagate their creed throughout China. This despatch was forwarded by an ordinary messenger, and relying on its efficacy the three missionaries started on their return journey to Kwei-chow; but it so happened that the three missionaries reached their destination before the despatch; thereupon the Governor of Kei-chow knowing of nothing that had taken place since his last dismissal of them, again ordered their seizure, in effecting which one of the three was killed; the other two were, after confinement, returned to Canton. The matter was then reported to Peking, and the result was that Prince Kung directed the Governor of Kwei-chow to be deprived of his rank and position, for having caused the death of the subject of a friendly nation. The Governor, however, resented this treatment, argued that his conduct had been right throughout, and absolutely refused to heed the Imperial edict directing his degradation, and finally, in effect, threatened that sooner than he would submit to the oppression, he would cause the province under his control to "secede." His protest caused alarm to the Peking Court, and, with a view to settling the matter to the satisfaction of all parties, Governor General Laou is now directed by the Court to proceed to Kwei chow, and to endeavour to pacify the rebellious Governor of that province (who is an old friend of his), and to induce him to select some other officer who can more conveniently be made to bear the blame and to submit to the degradation required for the satisfaction of the French demand."

COCHIN-CHINA.

The country round Saigon is in a very unsettled state from piratical Mandarins—four pirates were taken and beheaded at Saigon, on the 7th ult. Trade is quite paralysed, and no chance of any being done this season. The merchant vessels are leaving for Bangkok and Singapore. There is a good deal of sickness; several Europeans have died from fever and dysentery.

BORNEO.

LABUAN.

The *Straits Times* says that the accounts from the mines are very favourable, there not having been a single case of sickness

Digitized by Google

among the Europeans in December. If sufficient labour were available, 200 tons of coal could be raised daily. The class of miners is steadily improving, and the manager is now in a position to contract for 1,000 tons per month, and estimates that he will raise at least 30,000 tons in 1863—and probably very considerably more.

SIAM.

BANGKOK.

The First King of Siam published, on the 8th Dec., a very long circular on the death of his second son. It commences as follows :—

"The sad and mournful circular from His Gracious Majesty Somdetch Phra Paramendr Maha Mongkut, the reigning Supreme King of Siam, intimating the death of His Majesty's most affectionate, well-beloved, and lamented Royal second son, his Royal Highness Prince Krom Mu'n Visnunarth, whose loss is now mournfully sustained by His Majesty and the Royal family and the principal members of the Government of Siam. To all the foreign friends of His Majesty and of his late lamented Highness, resident or trading in Singapore, Malacca, Penang, Ceylon, Batavia Saigon, &c., and in Europe, America, China, &c."

The circular concludes as follows :—

"The days of the life of this Prince were 14,078 in number, being thirty-eight years six months and a-half, his children were eleven in number, three of whom are sons, the eldest fourteen years of age, and eight daughters, the eldest of whom is sixteen years of age, and there were a few of his children who died before him.

"At present the Prince's remains are kept in a royal urn at his residence, according to the Siamese royal custom, waiting the preparations for his funeral ceremony, which will take place about the month of April or May of the ensuing year.

"Whereas this Prince, just deceased, was known to many, and acquainted with several foreign friends in various regions of the world; so His Majesty the King of Siam, his mournful Royal father, has caused this circular to be published to communicate the information of this sad intelligence relating to the life and decease of the late Prince, his beloved second son since his birth, to all his and his son's friends abroad, who, His Majesty trusts, will take part sympathising and condoling with him in true friendship, and that this news will produce great emotion in the breasts of those who are under good religious feelings, teaching them that there is an eternal life, as they may see that death comes to every one of mankind in every age, region, or place and time, without exception, and his friends will be glad to observe this mark or proof of His Majesty's true friendship towards them, too."

MALACCA STRAITS.

SINGAPORE.

The following is the treaty which has been concluded between Colonel Cavenagh and His Highness the Sovereign Ruler of Johore. We give it, as far as possible, in a condensed form :—

"Whereas by Article 6 of the Treaty between the Honourable the English East India Company on the one side and their Highnesses the Sultan and Tumongong of Johore on the other, concluded on the second day of August, 1824, the said East India Company engaged, in the event of the said Tumongong preferring to reside permanently in any portion of his own states, and to remove for that purpose from Singapore, to pay to the said Tumongong, his heirs or successors, the sum of fifteen thousand Spanish dollars ($15,000) and by Article 7 of the said treaty, the said Tumongong, in consideration of the said payment, did thereby relinquish for himself, his heirs and successors, to the Honourable the English East India Company, their heirs and successors, for ever, all right and title to every description of immovable property of which his Highness might be possessed within the Island of Singapore, or its dependencies, at the time he might think proper to withdraw from the said island, for the purpose of permanently residing in his own states. And whereas it has been agreed that in consideration of his Highness Datu Tumongong Aboobakar Sri Maharajah, for himself, his heirs, and successors, renouncing all right and claim to the payment of the aforesaid sum of fifteen thousand Spanish dollars ($15,000), and making over to the British Government certain portions of the lands of which he is now in possession at Telloh Blangah, in the Island of Singapore, as shown in the plan hereto annexed, the said British Government shall grant unto his Highness, his heirs, executors, administrators, and assigns, a title in fee simple to the remainder of the lands at Telloh Blangah aforesaid in his possession, and that Articles 6th and 7th of the said treaty shall in consequence be abrogated and annulled. Now it is hereby concluded and agreed by and between the parties to this treaty :—

"1. That his Highness Datu Tumongong Aboobakar Sri Maharajah, for himself, his heirs and successors, doth hereby for ever renounce, release, and make over unto the British Government all claim and demand whatsoever to the said sum of fifteen thousand Spanish dollars.

"2. That it is mutually stipulated and agreed between the parties hereto that Articles 6th and 7th of the aforesaid treaty, so far as they relate to any claims or rights between the British Government and his Highness Datu Tumongong Aboobakar Sri Maharajah, his heirs or successors, shall be considered as abrogated and annulled by this agreement, and they are hereby abrogated and annulled accordingly.

"Done and concluded at Singapore the nineteenth day of December, in the year of the Christian era one thousand eight hundred and sixty-two, corresponding with the twenty-eighth day of the month of Jamada-l-Akhir, in the year of the Hegira one thousand two hundred and seventy-nine.

"ORFEUR CAVENAGH, Colonel-Governor of the
"Straits Settlement.
"UNKU TUMONGONG ABOOBAKAR."

Writing on the effect of the American War on the Singapore trade, and with reference to the Lancashire distress, the *Straits Times* says :—"Singapore being an emporium from which all surrounding countries draw supplies, forms a sort of trade barometer, by which a very correct idea can be formed as to the increase and decrease of stocks in the consuming markets. An estimate of stocks, then, in Singapore would prove the correctness of the statement, that there has been a great over-production at home of all cotton manufactures. The *Exchange* publishes a quarterly estimate of stocks in importers' hands, which, we understand from good authority, is very reliable. A look at this document issued at its last prices current will, we think, convince the most sceptical. The figures are in some cases enormous, and present a supply which many months will not clear. We do not feel quite sure but that "many years," in some cases, would be a more correct expression. This stock, too, is made up to the end of 1862, at which date shipments from Europe must have been all but entirely stopped. Now, had this over-production continued at home, we can scarcely calculate how disastrous the result would have been. Operatives alone would not have been the sufferers, but millowners and merchants alike would have been included in the ruin. The American war, however, has put a stop to this. Mills have been shut, supplies have been stopped, and markets both in the east and west, but especially the former, have got breathing time, for which they will emerge into a much healthier state. This is one of the "goods" that this American hurricane seems to us to have produced; and while we are particularly gaining benefits from it, we should all the more liberally give in aid of those who suffer from its evils. The necessities of Lancashire are daily becoming more pressing, and, though they are met in a noble spirit of generosity by our countrymen of all classes and all creeds at home, yet the relief afforded is but small, and to be continued must be indebted to every possible source for aid. Our own subscription, £1,150—considering that it was collected in about a fortnight, and that many of the givers here are also givers at home through their head establishments—was a very creditable one. Three months, however, have passed away since this effort of our generosity, and it is time for us to see if we can do something more in aid of this great and national cause. We cannot believe that the resources of the place are unequal to another donation, for we find that Penang, with much more limited trade and resources, has sent a subscription exceeding ours by some £500.

CEYLON.

The directors of the Madras and Colombo Steam Ship Company have laid their prospectus before the Ceylon public; and have announced that applications for shares will be received by the Oriental Bank Corporation at Colombo, Kandy, and Galle. The vessels of the company are to ply between Colombo and Madras, calling at intermediate ports, such as Tuticorin, Jaffna, Negapatam, &c. "The new company," says the *Colombo Observer*, "will be most useful to our island, by bringing over coolies as deck passengers from the coast, and by uniting us with that now important place, Tuticorin, which has become the great outlet for the cotton grown in Southern India. Regular communication between the southern and northern ports of Ceylon is of great importance; but the *Pearl* is so frequently detached from the line as to baffle all calculation. We hear that a large proportion of the shares are already subscribed for; and it is to be hoped that the Ceylon public will support a scheme which will confer so many benefits upon them. We have heard some objections raised to the seat of management of the company—Colombo people slightly disapproving of Negapatam merchants managing the concern. But as the Colombo world have so long neglected any enterprise of the kind, jealousy is decidedly out of place now; and the company should, as no doubt it will, receive considerable local support."

Sir Charles MacCarthy, after passing a fortnight at Galle, had been visiting the irrigation works in the Southern Province, and the new Happotella road, and was expected back in a day or two at Colombo.

His Excellency the Governor has made the following appointments :—

Captain W. J. Gorman, to be Acting Deputy Commissary General.—Date 16th January, 1863.

Ensign J. W. Arrowsmith, C.R.R., to be Acting Assistant Commissary at Colombo.—Date 16th January, 1863.

Digitized by Google

Captain C. C. Durnford to be Deputy Assistant Commissary at Kandy.—Date 1st January, 1863.

The Board of Examiners has reported that the undermentioned gentlemen have passed the first examination prescribed by the Minute of the 15th August, 1853:—

In the Singhalese language, G. S. Williams, Esq.

In the Tamil language, J. W. Birch, Esq.

A correspondent of the *Colombo Observer* says:—"The Bishop of Colombo has taken another step in the right direction. He has commenced open-air preaching. His first attempt appears to have been a successful one. Although he addressed the crowd by interpretation, yet they listened to him with great attention, as he expounded to them the great truths of the Gospel."

It is said that Archdeacon Wise is about to return to England, on leave; and that his place is to be temporarily filled by the Rev. Mr. Schrader, whose duties are to be entrusted to the Rev. Barcroft Boake.

A Buddhist periodical, published at Galle, writes:—"When the chief 'Bishops' of the Christian religion thus characterise the narratives of the Bible as a fiction, what use is the argument of the editor of the *Banner of Truth*, to prove that the Bible is the true word of God." "The Buddhist party will find no difficulty now that the Bishops have entered the list against the *Banner of Truth*." The *Banner of Truth* referred to is a Christian publication.

The Rev. J. Bamforth, of the Buona Vista Mission, Galle, left recently for Madras, having obtained the appointment of Principal of the Military Male Orphan Asylum there. The Rev. Mr. Ellis, of the Collegiate School, Colombo, will fill his place, temporarily, at Galle.

In India it is now lawful to marry out of canonical hours, and the Episcopal clergy in Madras are "at liberty to solemnise marriage at any time between the hours of sunrise and sunset." We hope (says a Colombo paper) that the Bishop of Colombo will follow the example of his brother at Madras, and afford like advantages to his flock in Ceylon.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BAILEY—On the 6th December, at Yokuhama, Japan, the wife of the Rev. M. Backworth Bailey, British Consular Chaplain, of a son.

GORMAN—On the 22nd ult., at Colombo, the wife of Capt. W. J. Gorman, of a daughter.

GOTTELIER—On the 28th ult., at Primrose-Hill estate, the wife of A. Gotteller, Esq., of a son.

HARPER—On the 31st December, at Hong Kong, the wife of Patrick Rose Harper, of a son.

LEGGE—On the 6th January, at the London Mission House, Hong Kong, the wife of the Rev. Dr. Legge, of a son.

RAJECARUNA—On the 18th ult., at Cosgodda (Rallepitty Modera), the wife of Mr. D. A. P. Rajecaruna, of a son.

ROSAIRO—On the 14th ult., at Colombo, the wife of Mr. J. P. Rosairo, of a son.

MARRIAGES.

O'TOOLE—LUZ.—On the 11th January, at the Roman Catholic Chapel, Patrick F. O'Toole, Inspector of Police, to Maria Florence Luz.

TALBOT—STOWELL. On the 1st ult., at the Wesleyan Chapel, Madras, by the Rev. E. E. Jenkins, M.A., the Rev. Wm. Talbot, of Jaffna, Ceylon, to Jane, fourth daughter of the late Rev. W. Stowell D.D., of Cheshunt College.

DEATHS.

BRAND—On the 23rd December, at Yokuhama, Japan, Andrew Brand, late of Glasgow, aged 34.

KEER—On the 2nd January, at Shanghai, Charles Keer, aged 34 years.

LOSS—On the 23rd ult., John Adrian Loss, Esq., chief clerk and accountant Oriental Bank Corporation, aged 35 years.

MORO—On the 24th Nov., 1862, at Shanghai, of fever, after a few days' illness, James, late master of ship *Marquis of Argyle*, last surviving son of James Moro, master of ship *John Knox*.

NARRAMORE—On the 6th January, at Hong Kong, on board H.M.S. *Melville*, William Narramore, A.B., H.M.S. *Eurydice*.

NAPIER—On the 17th December, at Ningpo, Peter Napier, infant son of Dr. William Parker.

PRESTON—On the 1st January, at Canton, Maggie, daughter of the Rev. C. F. Preston, aged 6 years and 6 months.

PARKER—On the 13th December, at Amoy, William W. Parker, aged 50, of Portland, U.S., late master of the Siamese barque *Success*.

COMMERCIAL REPORT.

CHINA EXPORTS.

CANTON.—The near approach of China New Year, the unusual pressure on the money market at present, and the large stock on offer, combine to induce a decidedly downward tendency in Congous; and although the effect produced will probably be an ultimate reduction of rates to correspond with the ideas of exporters, still that must be a work of a little time, inasmuch as the advance in exchange and freight nearly counterbalance the reduction already obtained. The transactions in Green and Scented Teas have been upon previous terms. There have been considerable arrivals of country Greens, the sales which have occurred being entirely for India and the United States. The following are the settlements for the fortnight:—Congous: 2 chops of Honchows at 22½ to 23½ taels; 1 chop Monings at 24 taels; 1 chop Chong-sow-kye at 27 taels; 3 chops Woopack at 27 to 35 taels; 1 chop (half-chest) Kai-sow kind at 28½ taels, and 200 half-chests Tysaan at 18 taels. Scented Teas: 2,500 boxes Capel 14½ to 16½ taels, and 2,000 boxes Orange Pekoe at 18 to 23½ taels. Co[illegible] Greens: 200 half-chests Hyson for India at 38 to 54 taels, and 2 full chops at 35½ taels for New York. The stock on the market is thus reported:—Congou: 91 chops country Tea, and 2,000 half-chests Tysaan. Scented Teas in very full supply. Country Greens: 14,000 packages new, and 1,890 do. old.

SHANGHAI.—Blacks: The market has been rather dull since last report, and the settlements during the fortnight have not exceeded four to five chops. Previous rates have not declined materially, but buyers have shown less eagerness since the arrival of last mail, and seem to be holding off for a reduction in prices. Stocks have increased considerably during the fortnight, as the receipts from Hankow have been rather larger than during the last fortnight. Quotations: Hohows, tls. 20.0 to 22.0. Oonuhams, (3rd crop), tls. 21.0 to 26.0 Oopaks (3rd crop), tls. 25.5 to 28.0. Transactions for the fortnight are 5,078 chests. Contract and reshipped, and 3,400 do. sold on the market—together 8,500 chests, making a total from June 1st of 256,271 chests against 168,057 chests same time last year. Stocks 13,000 chests Congou and 1,500 do. Pekoe. Greens: There has been less activity than during the past fortnight, but prices, especially in fine teas, have been pretty well maintained. Holders are more anxious to dispose of their stocks, as arrivals from Kewkiang have been large and stocks increasing. On some kinds a decline on previous rates has taken place. Quotations: Gunpowder, tls. 45 to 60; Imperial, tls. 34 to 46; Young Hyson, tls. 27 to 46; Hyson, tls. 36 to 60; Twankay, tls. 20 to 30. Settlements for the fortnight are:—17 305 half-chests Moyune, Fuychow, &c., and 3,253 do. Pingsuey, together 20,558 half-chests, making a total from June 1st of 199,277 half-chests against 146,310 packages same time last year. Stocks of all kinds about 23 300 half-chests.

MACAO.—Blacks: Tyshan Congous, sales 1,630 half-chests of common sorts at 12.5 to 14.5 taels for India, and 625 half-chests of the best contract tea at taels 19.5 gone forward per *Bahai*, leaving in stock only 3,000 half-chests. Scented Orange Pekoe sales 300 half-chests at 19.7 taels, sent over to Hong Kong. Greens: Young Hyson sales 1,500 half-chests at 15.5 taels. Gunpowder, 1,000 half-chests at 14.5 taels reported as shipped per *E reka*.

FOO-CHOW-FOO.—Most of the "cheap lots" appear to have been disposed of; but, on the other hand, during the last few days, the large holders have shown more disposition to meet the market. Settlements reported are:—Congou: 11,000 chests and 5,200 half-chests, at Tls. 5·5 to 23, say for ordinary and broken leaf, at Tls. 5.5 to 14.5; good common to 2nd better, at Tls. 14 to 15.5; good flavoury, at Tls. 15.5 to 19; Souchong and Kisow kinds, at Tls. 19 to 23. Souchong: 300 chests at Tls. 20.5 for fair. Pekoe: 300 chests at Tls. 16 to 30 for common to fine. Green Tea: 100 half-chests at Tls. 16 for common gunpowder. Oolong: 2,100 chests at Tls. 10 to 18 for inferior to good cargo. Scented Tea: 3,400 boxes at Tls 8 to 18 for common dusty to fair. Total arrivals and settlements of Congou this season are:—Market teas 509,400 chests. Sales 426.000 chests. Contract teas, 50,000 chests. Total, 559,400 ch. against 400,600 ch. last year. Stocks are thus reported:—Congou: 82,500 ch. (say 34,000 ord. 39,000 good common to 2nd better: good flory to kaisow 9,500). Souchong: 1,000 ch. Pekoe: 1,200 do. Green Tea: 600 hf. ch. Oolong: 50,400 do. Scented Teas: 3,700 boxes.

HANKOW.—The settlements have been upon a fair scale, being reported at 21 chops at 12 to 20 taels, showing a decline of about 2 taels—say 13 chops Oonam, 5 chops Oopack, 2 chops Ningchow, and 1 chop of Hohow. Of these, 7 chops were shipped under advances on Chinese account. The stock remaining on the market consists of about 10 chops, 3 being fine and the remainder common. The settlements of the season to date amount to 961 chops; the teas which arrive under contract are reported at 90 chops. About 12 chops more are expected from the country, so that the total supplies of the season, including the stock, will amount to 473 chops of Cougou.

KEWKIANG.—Green Teas: In the early part of the fortnight rates were somewhat easier, but buyers for shipment to London entering the market, they immediately regained their former standard. The transactions have been considerable, and are thus reported:—500 half-chests Taiping, at 23 to 24 tls.; 3,500 ditto mixed Tea, at 24 to 27 tls.; 10,000 ditto Moyunes, at 26 to 33½ tls.; 5,000 ditto Fychow, at 25 to 30 tls.; total, 19,000 half-chests. The teamen are very firm, and do not anticipate any fall during the season. The present stock is little short of 20,000 packages. In Black Teas there have been no transactions. The stock consists of 2 chops common Hohows. The exports this season (say shipments to Shanghai) approach 50 000 chests Black and 155,000 half-chests Green. Yokuhama.—There has been an improved business, and a rise on last week's prices may be noticed. Settlements are estimated at 2,250 piculs. Nagasaki.—A very fair amount of business has been done during the past month. Supplies again falling short, prices have advanced; medium to fair descriptions of leaf, say $10 to $16. Stocks consisting chiefly of fine classes of leaf.

RAW SILK.—SHANGHAI.—The business of the fortnight has been on a very limited scale, barely amounting to 700 bales of China Silk. Prices have advanced 5 to 15 tls. per picul, influenced by improved accounts of the Home Market, and the small supply coming from the Interior; buyers are, however, very cautious at such extreme rates, and purchases are conseqnently considerably reduced. Taysaams are in very moderete supply, and the stock is chiefly composed of Tsatlee. From the Interior there have been scarcely any arrivals, and each month appears to confirm the almost certainty of a short crop. The receipts from Japan have been about 1,500 bales, but by last advices stocks were reduced and the supply becoming more moderate. The settlements of the fortnight are reported at 2,200 bales, against 4,000 bales at corresponding fortnight of last year, and 4,500 bales the year previously. The total settlements of the present season to date are stated at 53,500 bales, against 50,000 bales same period last season, and 63,500 bales the season before. The stocks for those periods stand 5,000 bales now, against 2,000 bales and 7,000 bales respectively.

The following are the current quotations:—Tsatlees, No. 1, 480 to 490 taels per picul; 2, 460 to 470; 3, 440 to 450; Market, 3, 425 to 435; 4, 410 to 420; 5, and com. 390 to 400. Taysaams, No. 1, 405 to 415; 2, 375 to 395; 3, 345 to 363; 4, 5, and com., 310 to 340. Yuenfa, No. 1, 440 to 450; 2, 410 to 430; 3, 385 to 400; 4, and com. 370 to 380; Haining, 370 to 440; Sewhing's, fair to good, 330 to

Digitized by Google

350; middling to inferior, 300 to 323. Canton: The article continues scarce. The transaction of the fortnight are confined to a few purchases for Bombay. The quotations are, Gowkong No. 3. $400. Loonkong No. 1 and 2, $430 and $410.

MACAO.—The remaining stock of Cumchook last reported was taken for India at $395.

YOKUHAMA.—There has been an active business in this article during the past week. Supplies small, which have been cleared on arrival. Quotations generally are high, especially for Oshus, which are now $20 higher. Settlements estimated at 350 bales, leaving very little on the market.

NAGASAKI.—Settlements about 80 piculs, consisting of Sodai, Tazima, and Hatchozen. Sodai, No. 1, $4.80; No. 2, $4.45. Hatchozen, No. 1, $4.30; No. 2, $3.80; Hatchozen Common, $3.40. Taziam, middling to fair $3.50 to $3.80. Settlements from 1st Jan. to 15th Dec., 800 piculs.

DRUGS, &c.—Cassia Lignea: Sales 1,900 piculs at $15.70 down to $15.25; present stock 1,500 piculs, held at $15.50. Cassia Buds: None offering. Cassia Oil: Sales 26 piculs at from $210 to $220; stock 40 piculs. Aniseed Oil: No sales, nominal price $155; stock 120 piculs. Star Aniseed: No sales, nominal price $2?; stock 40 piculs. Galangal Root: Sales 150 piculs at $3 20; stock 550 piculs. Gall Nuts: None offering. Ginger Preserves: $2.70 for the best. Vermilion: $34. The Canton report is—Cassia Lignea: $16.75 to $17; no sales; stock 500 piculs. Cassia Oil: No sales and no stock. Cassia Buds: Sales 20 piculs at $48; stock 20 piculs. Star Anniseed: No sales, no stock. Rhubarb, $50 to $55 per picul; stock 55 piculs. Gamboge: $35 to $45 per picul; no sales, no stock. China Root: $4 to $4.25 per picul; stock 200 piculs; no sales. Galangal: $3.75 to $4 per picul; stock 300 picu's; no sales. Vermilion: $41 per box. China Galls: $12.50 per picul; stock 50 piculs; no sales. Camphor: Hong Kong.—The sales of the fortnight are reported at 200 piculs at $32 50, and 400 piculs at $31. The stock remaining is small, but supplies are daily expected.

COTTON.

CANTON.—The market is dull, the only sales reported during the fortnight are 1,500 bales at a reduction on previous rates. The stock unsold is given at 2,341 bales Bombay, 286 bales Bengal, 392 bales Madras, and 5,000 bales Shanghai. At Hong Kong the sales reported are 4,100 bales Shanghai at $18.30 to $18.80 per picul, and 1,100 pls. Japan at $19.75 to $20. There is an unsold stock of several thousand bales. Shanghai.—The high rate of tonnage, and the unfavourable advices from the Southern ports, have tended materially to depress the market. The purchases during the fortnight have been consequently small, and for the present the supply exceeds the demand. Best quality can be had at tls. 11.4 to 11.7.5, and common at tls. 10.7.5 to 11. The unsold stock on the market is estimated at 40,000 bales. Four ships have been despatched to Liverpool with full cargoes since the date of last report, and several large ships are still wanted at 20 shillings per picul. One ship, the *Sovereign of India*, has been taken up to load 3,000 bales to Bombay at $3¼ per picul.

CHINA AND JAPAN IMPORTS.

TIEN-TSIN.—This port is closed by ice, so that supplies being cut off, holders of stock had the market to themselves. They were firm holders at last quotations, and were sanguine of doing a good business, ere the spring came and the river became clear of ice.

YOKUHAMA.—Grey Shirtings are inquired for; stock small. T-Cloths, Spots, Brocades, Damasks, Velvets, and American Goods, no stock and wanted. Long Ells saleable, stock small. Camlets nominal. Lastings in demand. Tin, Speltre, and Rattans saleable.

KEWKIANG.—The sales of the fortnight are reported at 2,500 piculs. Grey shirtings at 2.6 taels for 6¼ catties, and 1.9 taels for 5½ catties. T-cloths are scarce and wanted.

HANKOW.—Holders of imported manufactures are very firm, and have made up their minds to hold their stocks until after the holidays, unless they can obtain an advance.

CHEFOO.—The import market was very dull, the Chinese dealers refusing to operate at the enhanced rate for foreign manufactures.

SHANGHAI.—Dealers having run through their stocks have been compelled to re-enter the market, and holders being extremely firm an improved feeling has resulted. Cotton Goods generally have advanced about 2 mace per piece. Fancy goods are about the same as last quoted; Brocades and Damasks tend upwards, Chintzes tend down. Black Velvets are inquired for. Camlets and Lastings are readily saleable, and Long Ells are coming into better inquiry. Spanish Stripes are heavy of sale. American Drills are more inquired for, and so are Sheetings, whilst Jeans are held at an advance. The stocks are 80,000 pieces Drills, 3,000 pieces Sheetings, and 1,500 pieces Jeans. Coals are in spirited demand. Tin has advanced about 8 taels per picul. Straits Produce appears to be steady of sale; prices as last quoted. The following are the sales of the fortnight reported from Foo-chow:—Grey Shirtings, 8.10 lbs. 2,050 pieces at $3.70 per piece. T-Cloths, 6 to 7lbs., 1,900 pieces at 2.27 to 2.60 per piece. American Drills, 40 yards, 300 pieces at 6 per piece. Shanghai Cotton Cloths, 700 bundles at 7.50 per bundle. Woollens, assorted 100 pieces at 1.10 to 1.90 per yard. Lead (against tea), 2,000 piculs at 8.75 to 9.30 per picul.

CANTON.—The market continues very inactive. Shirtings are very dull. Yarn is better, but dealers will not give the price which holders ask. Woollens are dull. Quicksilver has advanced.

HONG KONG.—The supplies of the fortnight have been pretty full, say per Empress Eugenie, Lord Clyde, and John Masterman. Holders of cotton goods are firm, although the few sales effected show a small decline. Still, unless cotton declines in Europe, prices are likely to be maintained. For Cotton Yarn, there is some inquiry as also for Grey Shirtings, white being dull. T.-Cloths are saleable. Fancy Goods dull. Camlets, no inquiry. Lastings in better demand. Spanish Stripes no inquiry. Long Ells, sales of Scarlet. Metals dull.

The Exchange on India at Shanghai was 296½ rupees per 100 taels, and at Hong Kong 226½ per $100. Bar Silver at Shanghai 111.25 per 100 tls., and Hong Kong 3½ per cent. prem. The current quotation at Shanghai for Mexican dollars was 81 tls. per $100, and the rate of exchange on Hong Kong was 22 to 23 per cent. discount.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Cardiff: Dec. 31, Fanny Fern. From Sunderland: Jan. 5, Caldera.

At HONG KONG.—From London: Jan. 6, Empress Eugénie; 7, H.M.'s Racehorse; 10, John Masterman. From Liverpool: 9, Lord Clyde; 12, Mary Mildred. From Cardiff: 5, John Bull; 11, Insulaneren.

At AMOY.—From London: Dec. 29, Beerman.

At MANILA.—None.

At SINGAPORE.—From London: None. From Liverpool: Jan. 20, Little Edith. From Hamburg: Jan. 21, Gazelle; 22, Wilhelmsbura.

SAILED.

From SHANGHAI.—For London: Dec. 29, Queen's Own; Jan. 7, Napoleon III. For Liverpool: Dec. 24, Express; 29, Crest of the Wave; Jan. 3, William Fairbairn.

From FOO-CHOW.—For London: Dec. 18, Lucy and Harriet; Jan. 3, Marquis of Argyle. For New York: Dec. 5, Marmion; 27, Sarah H. Snow.

From SINGAPORE.—For London: Jan. 1, Eliza Thornton; 17, Alchymist. For Liverpool: Jan. 3, Dova; 17, Niobe. For Glasgow: Jan. 10, Spanker.

LOADING

At SHANGHAI.—For London: Appollina, Lord Raglan, Queen of the North, Robert Henderson, W. W. Smith. For Liverpool: Blackburn, Brierley Hill, Gresham, Monsoon, Oriental, Radnagore. For New York: Almena, Oneida. For Continent: Beasor and Helena. For Montreal: Bittern.

At FOO-CHOW-FOO.—For London: None. For New York: Samue Russell. For Hamburgh: Blohm.

At AMOY.—None.

At HONG KONG.—For London: Speedwell. For Liverpool: Edith Moore, Storm King. For New York: Hotspur. For Havannah, Perseverant. For Havre: Tapparette.

At SINGAPORE.—For London: Chaturanga. For Liverpool: Crescent City. For Bordeaux: Fils Unique.

At MANILA.—For London: Canaan. For Cork: Caprera, Ceylon, Slatelie, Victor Emanuel, Viola. For Cadiz: Gertrudio, Cervante.

At PENANG.—For London: Corsair's Bride, Edouard, and Julia.

FREIGHTS AND CHARTERS.

SHANGHAI.

To Great Britain vessels are much wanted to load cotton, and rates have advanced fully ten shillings. To New York little is doing, and the Golden West had to leave a few hundred tons short. There is still a good

Digitized by Google

demand for ships to go to Foo-chow-Foo for timber, and for the coast trade generally a fair business is being done. Prospects are good, especially as rice and coals have advanced. The current rates are to London £1. 5s. to £3. 10s. for tea, and £4 to £4. 10s. for silk. To Liverpool: £3. 15s. to £4 for cotton. To New York, $12 for tea and $17.50 for raw silk. Foo-chow-Foo: To London, £4 vessels wanted. Hankow: To Shanghai, 7 to 9 taels per ton per steamer. Kewkiang: To Shanghai, active at 8 taels per ton per steamer.

NAGASAKI.—The steamer City of Hankow has been sold for $130,000, and the Gazette for $70,000.

YOKUHAMA.—To Shanghai, per sailing vessels, for silk, $2.50 per picul; measurement, $4. Per steamer, for silk, $3 per picul; measurement, $6 per ton.

MANILA.—In the absence of any available tonnage, there have been no transactions to Great Britain during the fortnight, but advanced rates would be paid for both sugar and hemp, and it is probable that the latter may be obtained by some of the vessels now loading for Great Britain at £4. 15s. to £5 per ton. The American ship Mountain Wave has been chartered for Macao, to take on the cargo of rice of the French ship Malauin (condemned here) and for which she obtains 38 cents per picul.

PASSED STRAITS OF SUNDA.

From CHINA to LONDON.—Dec. 12, Mallard and Sunda; 13, Chapman; 14, Maggie Atkinson; 18, Millbrook; 20, Thomas Paul; 28, Helenslee; 29, Harwood; 31, Ann Adamson and Rauma; Jan. 5, Cressy; 6, Lucie and Harriet. To Liverpool: Dec. 2), Pioneer; Jan. 5, Lebaton. To Continent: None. To New York: Dec. 16, Game Cock; 26, Penguin; 27, St. Paul; 29, Marmion. To Australia: Dec. 15, Sabrina; 28, Bereagaria. From England and Continent to Singapore: Dec. 11, Fanny; 12, Patriot King. From Singapore to England: Dec. 19, Bride; 20, Thomas Paul; 28, Beverley; Jan. 2, The Bride. From Manila to New York: Jan. 8, Fearless. From England to China: Jan. 4, Maggie Leslie; 10, St. Argus. From Manila to England and Continent: Dec. 19, Queen of Nations to London; 26, Gerardus Jacobus to London; 26, Shaftesbury to Cork; 27, War Hawk to Cork; 29, Skylark to Liverpool; 29, Agamennon to Liverpool.

CASUALTIES.

HONG KONG.

Transactions in freights have been limited during the past fortnight, owing to the scarcity of suitable tonnage. The firmness of the Rice market at Shanghai has caused a steady and increasing demand for vessels for that port, and rates have advanced from 45 cents to 55 cents, at which latter rate, for vessels under 12,000 piculs, they are firm. 60 to 65 cents is freely offered for Bangkok, without takers, for medium-sized vessels,—the troubles at Saigon having diverted the Rice traffic to that port. To Great Britain, a very moderate trade doing at our quotations. To the United States, little or nothing. For the Colonies, very little freight in the market, and no further business will be done until after Chinese New Year. At about the same time business to San Francisco will probably be very good. From Manila, we learn that freights there have improved, and are likely to be good. We quote as settlements:—Great Britain: Edith Moore, Br. ship, 1,489 tons, on the berth, hence to Liverpool, £3. United States: Ardville, Br. barque, 424 tons, voyage changed from Vancouver's Island to San Francisco, $6,000 in full.

The P. and O. S. N. Company's steamer Cadiz left the anchorage on Jan. 10th, at 9.30 A.M., bound to Shanghai with the mails, a valuable cargo of opium, treasure, &c., and about twenty-three European and sixty-five Chinese passengers. She had proceeded as far as East Point or a little farther, when an alarm of fire was given. Upon it being ascertained that the danger was imminent, Capt. Hazlewood very wisely turned his ship round, and ran back to the anchorage, at the same time hoisting the ominous singal "I am on fire." Boats belonging to H.M.S. Euryalus, Sanspareil, Cormorant, and Princess Charlotte were quickly in attendance with fire engines, &c. Officers and men belonging to the company's vessels in harbour the China, Benares, and Fort William, arrived at same time—meantime it was discovered that the fire was situated in the fore hold; the hatch was taken off—some busied themselves in passing up the chests of opium—and others in getting the hoses from the men-of-war boats laid on—the steam hose belonging to the ship having been laid on previously. It was soon known on shore, and every one was of course anxious to give every assistance. Innumerable boats flocked off to the vessel. Messrs. Dent and Co. sent their cargo boats off, and their schooner Vindex was towed over by the steam yacht Little Eastern. The Sycee with cargo boats of Messrs. Lane, Crawford and Co. and Mr. Lapraik in tow were soon on the spot, besides which cargo boats belonging to Messrs. Thos. Hunt and Co., D. Sassoon, Sons and Co., and many others, with the representatives of the houses to which they belonged on board, were alongside and anxious to render all the assistance in their power. Meanwhile the fire was not got under in the least, the smoke became suffocating on account of the opium which was in the forehold, and officers of the P. and O. Co., to wit., Messrs. Scott, Pilbrow, Methven, Heywood, and others were almost overcome in their efforts to save property and find out the exact seat of the fire. At eleven A.M. it was found absolutely necessary to beach and scuttle the vessel, the anchor was lifted and she steamed slowly over to the Kowloon shore, and was run on the sandy beach there. One of the men-of-war boats was sent for a gun for the purpose of making a hole wherewith to scuttle her. An Armstrong gun was sent with a gunnery officer in charge, and altogether the vessel was fired into seven times, a small piece (a six-pounder) belonging to one of the cargo boats having more effect than the Armstrong, as the latter when fired managed to throw its shot much higher than was intended, but we are informed that the gun could not be depressed sufficiently. By 2.15 P.M. the fire was reported extinguished, and all but one of the men-of-war's boats took their departure. The cargo was gradually being discharged into the cargo boats for transmission to the Benares (left yesterday at 2 P.M.). No water found its way into the engine-room, the forward bulkhead being perfectly right—neither did the cargo in the afterhold sustain any damage. Steam was kept up all Saturday night, and at high water yesterday she was successfully floated again. The whole of the fore saloon is completely destroyed and the deck burnt, and of course all the cargo not burnt is saturated with water. There was one hundred and sixty chests of opium forward. The cause of the fire has not yet been correctly ascertained. When the tide fell last night the lower deck again caught fire, but was soon put out. Several of the officers and stewards have lost all their private effects, as their cabins were forward.

The Ly-ee-moon left Shanghai on the 11th inst, and has experinced a moderate monsoon and thick weather on her passage down. Saw H.M.S. Manila from Chefoo, between Gutzlaff and Lightship. Saw the mail steamer Benares off Cork Point on the 13th inst., at 8 A.M. Same date passed the Pekin, bound down, off Breaker Point, at 5 P.M. The Bethel at Whampoa, severely damaged in the late typboon; has been sold by auction to Messrs. Thomas Hunt and Co, to be fitted up as a residence.

Parliamentary Intelligence.

HOUSE OF LORDS.

PETITIONS FROM INDIAN OFFICERS.

(13th.) Lord ELLENBOROUGH, in presenting petitions from Indian officers complaining of the loss of certain advantages guaranteed to them by Parliament, insisted upon the fulfilment of the engagements which Parliament had entered into with the officers of the old Indian army, as an act of simple justice. Having stated in detail many of the grievances complained of, he said that the greatest complaint of all was that made on account of the formation of the Staff Corps, which, in the opinion of the petitioners, unjustly interfered with general promotion.—The Duke of ARGYLL considered there was no cause for the complaint that the guarantees of the Act of Parliament had been violated. Parliament had guaranteed that the position of the Indian officers should not be made worse, but had taken no engagement that it should be made better; yet notwithstanding this those officers had been treated in a liberal and generous spirit by the Government. He then explained the objects of the Staff Corps, showed that the fears entertained by the petitioners were groundless, and concluded his explanation by stating the numbers of the officers who had taken advantage of the Staff Corps, of those who had been promoted in their regiments, and also of those who had retired from the service.

HOUSE OF COMMONS.

THE RUSSIANS AND FRENCH IN CHINA.

(16th.) Colonel SYKES rose to ask the Under Secretary for Foreign Affairs whether any information, official or otherwise, had reached the Foreign-office to the effect that the Russian diplomatic authorities in China had entered into arrangements with the Tartar Government to aid in taking the cities of Nanking, Soochoo, and Hangchow, on condition of having ceded to the Russian Government Chusan and the adjacent islands in the mouth of the Yang-tse-kiang; whether the Taoutai of Ningpo had issued a proclamation announcing that barracks were to be prepared for 2,000 Russian troops at Ningpo; whether it was true that the French were appropriating land at Ningpo, and were raising a body of Chinese troops under French officers; and whether the Customs duties at Ningpo were being collected by an officer of the French navy.—Mr. LAYARD said that the reports respecting the proceedings of he Russians to which the hon. and gallant gentleman had referred had reached the Government, but they had no reason to believe that there was any truth in them. He believed that French officers had been employed in disciplining Chinese troops, but he was not aware that they were raising any special body of men, or had appropriated any land at Ningpo. Frenchmen as well as persons of other nations were employed by the Chinese Government in the collection of the Customs.

COMMERCIAL TREATIES.

(17th.) Mr. S. FITZGERALD drew attention to the question of commercial treaties, and especially to the treaty pending between this country and the kingdom of Italy. He observed that it appeared to him Her Majesty's Government had proceeded upon a principle that was radically wrong, by having allowed the French Government in every case to take the initiative, and as soon as that Government had succeeded in obtaining a commercial treaty with any of the nations of Europe, then to bestir themselves and accept a tariff which had already been settled by France. He wished to have an assurance from the Government that they were alive to the importance of negotiating such treaties, and would not be content with simply treading in the footsteps of France.—Mr. LAYARD defended the course the Government had pursued.

FORCED LABOUR IN EGYPT.

(20th.) Lord PALMERSTON, in reply to Mr. GRIFFITH, said that it was understood that the Pacha was about to abolish forced labour, a course which, as far as it would be proper for the English Government to interfere in a matter of the internal arrangements of another country, would be encouraged by them.

Spirit of the Press.

ASSASSINATION IN JAPAN.

The official correspondence in regard to the recent assassinations in Japan does not remove the suspicion that they were deliberately planned in order to favour the exclusion of foreigners. It seems that on the very day on which the second attack on the British Legation in Yedo occurred, namely, the 26th of last June, one of the Japanese Governors for Foreign Affairs waited upon Colonel Neale, the Chargé d'Affaires, to congratulate him on the Legation not having been assaulted for a whole year, and more particularly on account of the previous day having passed without any disturbance or other untoward occurrence. Colonel Neale replied to this congratulation by saying that he did not anticipate any more danger, and that the earthquakes appeared to be his only enemies, on which the Governer smiled and took his leave, without even recommending caution,

Digitized by Google

and after having previously stated that he was glad to find "all was right." That night a private and a corporal of Marines were murdered at Colonel Neale's bedroom door, under circumstances which render it probable that the life of the Chargé d'Affaires was aimed at. The assassin was a retainer of the Daimio whose business it was to protect the Legation; he got the password from the native soldiers on duty; the Japanese sentry, who ought to have intercepted him, fled on receiving a slight scratch, and some time elapsed after the assault commenced before the Japanese guard thought fit to turn out. In the light of these facts, it is no wonder that Earl Russell suggests that the visit of the Japanese Minister, who "exhausted his communications in congratulation," was intended to throw Colonel Neale off his guard, and prevent him taking the precautions which might have saved the lives of the unfortunate victims. It is true that the Gorogio, or Japanese Council for Foreign Affairs, afterwards expressed its regret at not having given the Colonel warning; but this apparent frankness looks somewhat like deep subtlety; and while expressing a profession of regret for the past, the Gorogio neither took any sufficient means for, nor gave any assurance of, efficient protection in the future. In regard to the murder of Mr. Richardson, the circumstances are even still more peculiar. On the 13th of September the Ministers for Foreign Affairs wrote to Colonel Neale, who was then at Yokuhama, asking him to warn foreigners off the Tocaido for a day or two, as a great Daimio, an envoy of the Mikado, was about to travel along it, leaving Yedo on the 15th. This was not giving sufficient notice, as Colonel Neale only received the communication on the 14th, on which day Mr. Richardson, meeting on the Tocaido with the retainers of some Daimio or other, was foully slaughtered. Does this not look very like as if the Japanese Government was cunningly trying to give a warning which would be ineffectual in keeping foreigners from being murdered on the Tocaido, and yet would give it credit for wishing to prevent a collision? The difficulty of the situation in Japan is not at all removed, but rather increased, by the supposition that there is an understanding between the Ministers of the Tycoon and the murderers of foreigners. That only shows the unity of the national sentiment in regard to the advantages of an exclusive policy. We are glad to notice that Earl Russell, instead of precipitating a catastrophe, acts towards Japan with remarkable forbearance and caution, while making no concessions that can hamper any future position which England may ultimately find it necessary to take upon its treaty with that country. In demanding £10,000 sterling as compensation for the families of the Marines who were murdered, he hit upon almost the only practicable step which can be taken at present, and one which the Japanese evidently expected, for some of their inferior officers made inquiries as to the social position of the unfortunate Marines, and tried to discover whether 3,000 dollars would be considered sufficient compensation. The Japanese are not a wealthy people, and when they find assassination to be a very expensive amusement they will probably give it up. Having themselves admitted their responsibility in regard to such acts, it is just and highly expedient that Earl Russell should place a high value on English life in Japan, however unsatisfactory and repugnant to good feeling such an arrangement may be.—*Daily News.*

THE CHINESE IN THE WEST INDIES.

The following extract of a letter from Dr. Mitchell, Immigration Agent-General in Trinidad, to Stephen Cave, Esq., M.P., Chairman of the West India Committee, dated Trinidad, October 7th, 1862, has been forwarded to us for publication. Mr. Cave has been travelling for some months on the continent, which will account for the delay in its transmission :—

"The *London and China Telegraph* of August 27th, 1862, has the following statement :—

"'Mr. Cave's statement that the Chinese have been found to answer perfectly well in the West Indies is so opposed to the opinions expressed by residents in these colonies that we should be glad to know on what facts he grounds his assertions.'

"This remark from the Editor of the *Telegraph* should not be allowed to pass unnoticed, otherwise the labour interests of the West Indies might possibly be unfairly influenced. The residents in these colonies can scarcely be planters from Demerara, who appear to be satisfied with the results which have there attended the introduction of Chinese; otherwise, in addition to 3,496 immigrants from Hong Kong in 1861, they could scarcely have imported 3,200 more in 1862. In Trinidad, on reference to the annual emigration reports, it will be found that the Chinese who arrived here in 1853 gave unqualified satisfaction when under judicious control. The few of that importation who now work for wages earn from fifteen to sixteen dollars per month, or twelve dollars, and are found in board and lodging. As a rule, however, they cultivate lands for themselves, which they have either purchased or leased; and the extensive fields planted out in corn and sweet potatoes in the vicinity of Port of Spain declare unmistakeably the labour value of their occupants. It is not too much to say that, without the personal exertions of these Chinese agriculturists, and the stimulus of their example to our native peasantry, the present prospects of an abundant provision harvest (in contradistinction to the staple sugar) might have proved one of prostrate dependence on the Northern States of America for a doubtful and ruinously expensive supply. It would be premature to pronounce definitely on those who were landed here in July last. Since they disembarked the rains have been continuous, and, in common with all others, they have suffered much from fever; as yet, however, with few casualties (7 in 320), an unexpectedly happy issue when it is borne in mind that these people had a five months' passage, and were, in the majority of instances, unaccustomed to bodily labour. Their employers speak of them in general most favourably, only wishing that they had arrived in January instead of July.

"The principal drawback to Chinese labour on a large scale is its enormous expense; could that be modified, its introduction would, no doubt, effect the same change for the better in the West Indies that it has done in Java and elsewhere. The Chinese peasant is found here, by experience, to be industrious, peaceable, and law-respecting; and when his confidence is fairly gained, to be less addicted to theft and falsehood than the European of a similar class."

FOREIGN TRADE IN CHINA.

The following letter from Mr. Lay appeared in *The Times* of February 17 :—

Sir,—In the letter from your correspondent in China, published in *The Times* of Friday last (Feb. 13), he remarks that "several questions connected with foreign trade in this country, in addition to those on which the Shanghai Chamber of Commerce has taken action, are assuming important dimensions, and will require prompt settlement." Permit me to add a few words in elucidation of his meaning?

First, he says, "by a decision of Mr. Bruce, goods sent from one treaty port to another, but transhipped at Hong Kong, are treated as coming from a foreign port, although protected by a duty chop and fully identified." He does not specify foreign goods or native goods. But, as he goes on to remark that "this decision particularly affects the trade of Canton, owing to the rapidly increasing preference of the Chinese for foreign bottoms," I believe I am correct in assuming that he refers to native goods. He is desirous of obtaining the privilege of carrying native produce between Chinese ports upon the payment of a single duty, whilst the native merchant is charged duty at each port to which he carries his goods. He thus claims more favourable conditions for the British merchant than are accorded to the native merchant. As, however, no provision was made in the Treaty of Tien-tsin to deprive the Chinese of their coasting trade, your correspondent's proposition is scarcely tenable. The Chinese Government is entitled to levy a coast trade duty upon Chinese produce, the amount of which was, by the regulations of the 30th of October, 1861, agreed to by our Minister, "declared to be half import duty"—*i. e.*, the equivalent of 2½ per cent. *ad valorem*.

Your correspondent seems to object to Hong Kong being treated as a foreign port. I make no doubt the Chinese Government would be glad to treat it as a Chinese port. Coast trade duty would then be leviable there upon Chinese produce, and the Chinese Government would have the power of doing that which it cannot do while Hong Kong waters are British waters—namely, to supervise "the system of transhipment under very simple checks," and "fully identify goods protected by duty chops," and thereby secure its revenue against the loss it sustains at present, by reason of the proximity to Canton of the free ports of Hong Kong and Macao, whither large quantities of tea and silk are annually exported through the labyrinth of waters which surround Canton for a distance o ninety miles, without paying a fraction of duty.

With respect to the other question, that "the extent of the powers o the foreign Commissioners, and the area of their several jurisdictions, require to be defined," your correspondent says :—"British subjects claim Consular investigation of all cases of seizure and confiscation by the Customs' authorities, whenever hardship or injustice is alleged." This is not quite correct. It is not "investigation" that they claim, but "adjudication" by their Consul, with the assistance of two assessors (merchants) on all cases of alleged infractions of the revenue laws of China. The Chinese Government has granted "exterritoriality" in criminal matters, but it has not surrendered its right to be the judge of infractions of its own revenue laws. Its decision in any case is subject to the "political," but not to the "judicial" action of the Consul. If the Consul conceives his subject aggrieved, he is bound to remonstrate, and, if need be, to refer the complaint to his Minister; but the Chinese authority is not bound to appear in the Consular Court to take the decision of the Consul and the merchants. Suppose a French subject detected in a fraud upon British revenue in a British port, and imagine the French Consul citing the British Customs' authorities before him to receive his judgment in the case. Yet this is precisely the "principle" your correspondent would have adopted. We have had treaty relations with China since 1842, and the right of the Chinese Government to decide its own cases has never once been questioned by foreign Governments. But the merchants have recently made the discovery that unless they can get the power out of the hands of the Chinese authorities, who have now the assistance of the foreign Commissioners of Customs in exacting a becoming observance of treaty provisions, their chance of infringing these provisions with impunity is diminished. On the other hand, with all action on the part of the Chinese authorities paralysed, all "obstructive" clauses might indeed be set aside, and points might be "settled with more reference to the liberal spirit of the treaty than has hitherto prevailed at Peking;" the good old times might be restored, but not, it is to be feared, with "the absence of injury to the Imperial revenue."

Your correspondent alludes to the case of Johnson and Co. It may serve to make clear the grounds of the seizure by the Chinese Government if I subjoin a *précis* of the case by Mr. Fitzroy, the Commissioner of Customs at Shanghai. On the 9th of October, 1861, Messrs. Johnson and Co. applied to land from a certain ship eighty bales gray shirtings, which they declared contained 2,000 pieces. Twenty days afterwards it was proved that these contained 4,000 pieces! The Chinese authorities confiscated only twenty-two bales, instead of the entire quantity, as they were entitled by treaty.

Lastly, your correspondent objects to the seizure of vessels engaged in clandestine trade with illegal passes, at ports not opened by treaty, although such trade is expressly prohibited by the 47th article of the Treaty of Tien-tsin. He jumbles three articles—the 9th, 12th, and 47th—together, while each refers to a separate subject; the first to the interior, the second to buildings, the third (and it only) to unlawful trade at other than the open ports. Unless this clause be annulled, I apprehend that the Chinese Government has the right to do what that clause gives it permission to do—namely, to seize and confiscate vessels so offending.

I remain, Sir, your obedient servant,

Feb. 16. H. N. LAY.

COMMERCE WITH WESTERN INLAND CHINA, FROM RANGOON TO KIANG-HUNG, ON THE UPPER KAMBOJA.

SIR,—Following the information of the treaty with Burmah, which I and my son sent to *The Times* (see its City Articles of the 14th, 17th, and 19th ultimo), a letter appeared in its issue of the 27th, from "A Merchant," asking "our authorities for what we had stated of the Shan town of Kiang-Hung, on the upper Kamboja river, and of the facilities for commerce with it across our north-east Per... frontier, from the port of Rangoo

Digitized by Google

&c." In my absence my son answered the inquiry, but most briefly; observing very rightly that, "the subject was far too lengthy to expect the editor of that journal of daily information from all parts of the world to give the space in his columns which a full reply would require (see *Times*, City Article of the 7th inst.).

From my first entering, now some years since, upon the work of informing our manufacturers, merchants, shipowners, and ministers, that China proper possessed a western half, as rich in population and in mineral and agricultural products as are its seabord provinces, the geographical statements I have had to make have been by some—even by old professed geographers—publicly denied, by several doubted, and by a few interested others ridiculed. It seems to me, therefore, to be due, if not to myself, to those I have sought to instruct and influence, that *I* should take special notice of "A Merchant's" inquiry, by making public the sources of my information and statements. And as your journal is devoted mainly to commercial relations with China, and has, from the first, consistently and ably advocated our proposed commercial opening of its Western Provinces, I will, with your sanction, make it the channel of a more full answer to "A Merchant" than my son considered could have insertion in the city article column of *The Times*. In doing this I will, however, be as concise as possible, consistent with my satisfying your readers that in proposing the commercial opening of the West of China, across our N.E. Pegu frontier, through Kiang-Tung to Kiang-Hung, and the extension of the Pegu branch of our Indian telegraph by the same route to Hong Kong and the Chinese open ports, I have *not* undertaken what I have neglected to study in every way possible, both in the part of the world treated of, and since leaving it.

Serving as a young subaltern through the entire of the first Burman war, the latter half of it attached to the survey branch of the Quarter-master-General's department, and quartered for different periods in various parts of what is now British Pegu, especially at and around its ancient ruined capital, I availed myself of the opportunities to collect geographical information of that splendid but then depopulated and waste land, and of the countries between it and the west of China Proper; and what I then ascertained formed the nucleus of my continued and very extensive collections on the interesting subject.

Sent at the close of the war, in the same branch of the Staff, to the Tenasserim provinces then ceded to us by Burmah, and stationed at different times at Amherst, Tavoy, and Mergui, I added to my information every thing procurable in those provinces, either by my own observation, or from the reliable reports of others, including intelligent Chinese there settled.

During that period of service I traversed much of those provinces, and of Pegu; ascended more or less of the Irrawaddi, Pegu, Sittoung, Salween, Tavoy, Tenasserim, and Pakchan rivers; and, in a different variety of vessels, including Chinese junks, I passed several times up and down that coast and among the wild islands which line it.

At a later period, spending some time for my health at Penang, and after that serving at Malacca as Station Staff officer, I at each place continued the work of collecting information, maps, and charts, of the portion of Asia between the Malacca Straits, British India, Tibit, and the whole west of China Proper; and in this work did not omit to seek out at each place the best informed of the Chinese settled at them, and to gather from each what I could of different parts of their own country and of those adjacent to it, and named above.

Returning from the eastward to a Staff appointment at Madras, I there resumed this general study of *Asia extra Gangem*, in course of which I added to my collections many old and modern publications having reference thereto. And my personal close observation of them having made me fully aware of the utter worthlessness in revenue compared to their charge, and in commerce, of the unpeopled jungle provinces of Amherst, Tavoy, and Mergui, and of their heavy annual drain on the Indian army and Treasury; and my collected information inducing the belief that a large trade could be esablished with the west of China if it was commercially approached from the Gulf of Martaban, I drew up some papers on the subject for the then (1833-34) Governor-General, and submitted for his consideration whether it would not be advantageous to both England and India to restore those provinces to Burmah (under British protection of them from other naval powers), in exchange for the historic island of Syriam, in the Rangoon River, and a direct commercial road across Burmah, with a low transit duty, to the nearest point of Western China. And that this suggestion, and the information with I which supported it, was not thought "idle" or "visionary" by that able ruler of British India, may be justly inferred from the fact that, though I was otherwise wholly unknown to him, he communicated to me that he had made a note of my name for civil emyloyment on the east of the Bay of Bengal when opportunity should offer. Continued ill-health, however, the result of hard service and privations in the Burman war (in which I lost a brother from the same causes), compelled my return to England, and enforced ultimate relinquishment of further service in India. But after his own return to England, Lord William Bentinck, the Governor-General above referred to, was kind enough to write me the following, perhaps too partial, opinion of the papers and suggestions I had so submitted to him:—

"Although Captain Sprye never acted immediately under the orders of the Supreme Government of India, it is in my power to state, from circumstances having reference exclusively to myself as Governor-General, my opinion of him as a public servant. During the years I was Governor-General I received from him numerous important papers, drawn up upon various topics connected with our Indian administration; exposing what appeared to him to be defects in our system and proceedings, and suggesting measures for their revision and amendment. The invariable tenor of those papers exhibited a lively interest in the welfare of the Government, and in the general good of both its servants and subjects; and there appeared throughout them considerable talent, much information and research, enlarged views, and just observations."

About the same time, and in reference to papers which, with his permission, I had addressed from India, also as a stranger, to the President of the Board of Control, Lord Glenelg wrote me thereof:—

"I very much regret that ill-health has compelled you to give up service in India. I sincerely wish you may succeed in your endeavours to be still useful to your country, and shall be glad if I can assist you therein. I can have but pleasure in stating that your correspondence from India with me, as President of the Indian Board, gave me a very favourable impression of your talents, industry, and political views; and if the expression of such my opinion can be of service to you, I shall be very much gratified."

I give you these opinions, from among several I hold of high officials of India during my service there, as showing that I did not neglect, even in that young period of life, the opportunities it afforded me of acquiring eastern information, and this beyond the range of my mere military duties; and that the opinions and views the knowledge so acquired led me to form were not thought unfavourably of by even the highest of our Indian authorities. Those opinions and the recommendations they caused me to offer, invariably embraced honourable peace with our Asiatic neighbours, and the material improvement of our own subjects by education, the encouragement of cultivation, the construction of roads and canals, and THE EXTENSION OF COMMERCE in every direction that could be opened for it.

The geographical study of eastern inland Asia, into which I was so led by my earliest service in India, I earnestly resumed in England, with the view of bringing about a direct commerce with China by a land route from the Bay of Bengal; and in 1843 I addressed a paper on the subject to our then Prime Minister. Of that paper copies still exist in print to show that what has been since done in India in the way of railroads, canals, increase of cultivation, and their ever-attendant increase of commerce, were all then strongly urged by me upon the attention of that minister, when it was neither fashionable nor popular so to advocate the interests of our Indian fellow-subjects; with my opinion that no parts of Burmah were of real territorial or financial value to India or England *beyond affording a commercial way from Rangoon to the south-west of China.*

In adding in England to the reliable material I had collected in India bearing on this latter point, I was greatly assisted by the kindness of Mr. J. S. Mill, and other principal officials of the late East India Company, all of whom, with the proverbial courtesy and liberality of that establishment, permitted me and my son the great advantage of perusing, copying, or taking extracts from, documents and maps among the Company's records, having reference to different countries of Asia We thus had the advantage of collating the printed accounts of the embassies of Turner, Symes, Cox, Crawfurd, Pemberton, Phayre, and others, to Tibit, Bootan, Burmah, Siam, Cochin-China, &c., with their more full and unreserved official journals, reports, and correspondence while so employed; and were able to add to those printed works full copies of the MS. journals and reports of Symes' Second Embassy to Burmah, of Canning's Missions to the same, of the late most able (but neglected) Colonel Henry Burney's very voluminous and instructive journals and reports of his Mission to the Court of Siam, and of his subsequent long sojourn, as Resident, at the Burman Court—journals and reports which are unusually full of valuable political, geographical, and commercial information; Pemberton's "Eastern Frontier," Richardson's several "Missions to Changmai (Zimmé), Moni, Bankok, &c.;" McLeod's more important "Mission to Kiang-Tung and Kiang-Hung;" O'Riley's "Journey from Toonghoo across the Karennee Mountains, north of Pegu, to the Salween River;" Brigg's "Expedition up the Salween, beyond our Pegu frontier;" Tremenhere's "Survey of and Report upon the Isthmus of Kraw and the Rivers Pakchan (for this *is* a river) and Chimpehoon;" Bowring's "Correspondence, as Envoy to Siam, with the Governor-General of India;" Hodgson's "Geographical and Commercial Papers on Nepal;" Campbell's "on Sikhim Murong;" Jenkins's "on Kooch Behar;" Jackson's "on Darjeeling;" McCulloch's "on Munnipore and the Adjacent Hill Tribes;" Bedford's "on the Brahmapootra;" Neufville's and Wilcox's "on Assam and the North-East Hill Tribes;" Wilcox and Burlton's "Report of their laborious and perilous journey from Sudiya to the Kampti country and source of the Irrawaddi River;" Hannay's "on the Northern and Eastern Shan States and Upper Irrawaddi;" Larkin's "on the Discovery of the Tea Plant in Sylhet;" and very many other official reports, journals, and itineraries, with their several maps, treating of the countries and peoples west of China Proper, but not available to the general reader.

These, with the many ancient and modern published works and maps which I have continuously added to them on countries of Asia, and complete sets of the printed Selections from the records of the different Presidencies of India, of the Chinese Repository, of the Annual Reports of the Commissioners of Assam, Arracan, Pegu, Martaban, and the Tenasserim provinces, form together a collection of recent and authentic, as well as of ancient and uncertain, general and detail information of the portion of the globe between the Caspian Sea and Pacific Ocean, the North Sea and Eastern Archipelago, such as can be, I imagine, at the constant command of but very few private individuals.

That I and my son have fairly studied this mass of printed and MS. material, with the maps and charts attached to it, as bearing upon commerce between India and China Proper, *by every imaginable land route*, even from Peshawur to Maulmain; and that we have striven to make it useful to British manufacturers, to the merchants of England and India, and to the Home and Indian Governments, is manifested, in some degree, by the many portions of it which we have submitted to Her Majesty's Ministers since the commencement of the second or "*the lorca Arrow*" Chinese war,—by the six private pamphlets we have drawn up from it and liberally circulated, with maps, among the manufacturing, mercantile, and shipping interests of the United Kingdom,—and by the frequent favourable notices which enlightened portions of the public press, especially that of the manufacturing districts and commercial ports, have taken of our labours and propositions.

I have gone into this detailed statement of our "Authorities" for what we have put forth, not only to answer and satisfy, I hope, the individual "Merchant" who addressed his inquiry on the subject to *The Times'* Editor, but also to admonish—if it be not possible to instruct—some few others who, arrogantly assuming to posses extensive, accurate, and exclusive

Digitized by Google

geographical and trade knowledge of the whole eastern half of Asia, consider that for any other man to speak and write of any part thereof, or to offer commercial suggestions thereon, is but audacious poaching upon their preserves, such as must be put down, and this even with false evidence if the truth will not avail them.

Should you consider this letter worth appearing in your columns, it shall be followed by another communication, which, for "A Merchant's" greater satisfaction, shall detail more of my knowledge of the two Burman Shan States and towns of Kiang-Tung and Kiang-Hung, and of the Upper Kamboja River—called in its Burman portion Mei-Kong, and in its still more northern Chinese portion Lantsang—and state the "authorities" from which I derive it. In the meantime, with every possible apology for the length and seeming egotism of what I now offer to your columns, I beg to remain, Sir, yours very obediently, Richard Spreye.

London, 13th Feb., 1863.

Continental Intelligence.

FRANCE.

La France publishes the following:—"Rear-Admiral de la Grandière, appointed Governor and Commander-in-Chief in Cochin-China, left this morning (18th) for Marseilles, where he will embark in one of the Royal mail steamers for his destination. Rear-Admiral de la Grandière is accompanied by Captain Desmoulins, the chief of his staff, and by Lieutenant Ansart, his aide-de-camp. A body of 300 marines, sent as a reinforcement to Cochin-China, and various volunteers who have joined at their own request, go by the same steamer. Rear-Admiral Bonard, who has received permission to return to France, will await Rear-Admiral de la Grandière, when he will hand him over the command."

A transport vessel on a new plan has just been completed at Cherbourg. Thirty-six others are nearly finished on the same plan, and they are to be increased to 50. Each vessel is capable of accommodating 1,000 men, so that, in case of necessity, the flotilla at Cherbourg might transport an army of 50,000 men.

A newspaper called *La Paix* has circulated an announcement to the effect that some of the most distinguished engineers in France, among whom are mentioned MM. Flachat, Petiet, Lechatelier, and Girard, have approved a plan of a railway from Paris to Marseilles, which would resolve a problem hitherto considered impossible. They assert that the journey from Paris to Marseilles, 510 miles, may be accomplished in an hour and a half, with more economy and security than it is at present performed in eighteen hours. They are so decided in their opinion, that several of them have demanded permission for the construction of the railway. The plan has been submitted to the Emperor for his approbation. The hydraulic system invented by M. Girard, in which he substitutes sliding for running on wheels, is the basis of the new plan.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

Amsterdam, Feb. 22.

Scarcely has the new Colonial Minister, Mr. Fransen van de Putte, had time to take possession of his new office, when, as is often the case, he is attacked right and left by the Opposition in the States-General and by the Conservative organs of the press, who accuse him of following a policy that must inevitably lead to the dissolution of the ties existing between this country and her East Indian possessions. They affirm that it must annihilate the welcome annual surplus revenue that flows in so regularly, and stop up the springs from which they are derived, by ruining the colonists in Netherlands India, and ultimately bringing about a separation from the mother country and producing a social revolution in Java; whilst their fears cause them to prognosticate all sorts of evil from limiting to a few favoured individuals the permission to Europeans to settle in that flourishing island. In mentioning this I am happy to be able to add that whilst the Colonial Minister treats these attacks with the silent contempt they merit, he is preparing with the dignity of conscious rectitude to endorse the liberal and enlightened policy of the Thorbecke Cabinet, in which he is supported by the King and applauded by a decided majority both of the States-General and the nation.

Messrs. J. Santhagens and E. Cramerus, the agents in this city of the Dutch East India Discount Company at Batavia, have distributed circulars giving an account of the operations of that institution during the past year, from which it appears that whilst the rate of discount in this country is not more than 4 per cent. (and only 3 per cent. on call), it has risen in Java gradually to 9 per cent., by which they are in a position to declare a handsome dividend. It is further proposed to increase their joint capital by raising in Holland a further sum of 3,000,000 florins in shares of 500 florins each, for the purpose of forming a Guarantee Fund, the subscribers to which are to receive a certain fixed rate of interest and a participation in the general profits of the company, according to the mode described in the circular or prospectus.

It is stated to be the intention of the Minister for the Naval Department to ask from the States-General an additional vote for a large sum (report speaks of fifteen tons of gold, or a million and a-half of florins) for building iron-clad ships for the Royal Navy, the amount to be charged to the surplus revenue of 1862.

The *Staats-Courant* contains an official notice from the Colonial Office, that the Governor-General of Netherlands India is empowered by the King to sell by public auction in Java, during the course of this year 200,000 piculs of sugar, and 50,000 piculs of coffee, and that the days of sale, and the quantities to be offered in each, will be made known at a later period.

The Netherlands Trading Company have chartered the following sixteen vessels to bring cargoes of East India produce from Java to this country:—

Ship.	Captain.	Port of Discharge.
Henriette Gertruida ...	F. C. de Boer ...	Amsterdam.
Margaretha Simonetta ...	F Hofman ...	"
Hendrika	De Groot Stiffry ...	"
Bantam	J. P. Claasen ...	"
Telenak	F. H. Poppken ...	"
Petronella Catharina ...	C. H. van der Veen	"
Amsterdam	A. Wehdemeyer ...	"
Mentor	P. Duinker	"
Helena and Anna	J. C. Lupken ...	Rotterdam.
Johannes Martinus	J. Kooy	"
Kinderdyk	D. Zwanenburg ...	"
Hebe.	A. H. Kiehl... ...	"
Landbouw	E. H. Kleynenberg...	"
Bezoekie	C. J. Reckers ...	"
Ægidia and Paulina... ...	P. Hoogland ...	Dordrecht.
Helena	H. P. Dill	Schiedam.

A batch of bills for the naturalisation of foreigners has been introduced in the Second Chamber of the States-General. Among the gentlemen thus proposed are the following names:—C. T. de la Chaux, born at Macassar; M. J. Sauer, of Parie-Batoe; F. Lucher, of Pamakassan; and J. F. Quartero, of Passaeroeang.

Accounts have been received in this city that the Dutch ship *Almelo*, Capt. R. P. Tjebbs, which sailed on the 6th of Nov. last from Tjilatjap to Amsterdam, had put in to the Cocos Islands in a leaky state, and after discharging her cargo and undergoing repairs, proceeded on her voyage on the 22nd of the same month.

In the February number of the Colonial Annual (*Koloniale Jaarboeken*), published at the Hague, is an interesting description of the military expedition to Ceram in 1860, from the pen of Mr. W. A. van Recs, and an elaborate article on the present state of the cultivation of sugar in Java.

A letter from Harderwyk announces that the first detachment of supplementary troops this year will march from the Colonial Depôt in that town on the 28th inst. to Rotterdam for embarkation there on board the chartered transport *Princess Amalia*, Capt. L. W. van Ryn van Alkemade, for Java. It will consist of 125 men and 15 non-commissioned officers, under the command of Lieut.-Colonel C. Rapport, of the E.I. army, returning to duty from leave of absence to this country, accompanied by Lieutenants J. F. Schneider and H. Wilkens, of the E.I. Infantry, and Lieut. K. F. de Wylde, of the Engineers, as well as the Military Apothecary of the Third-Class, A. C. van Ravensway. Last year the number of men that embarked for Java was 1,150. This year not more than half that quantity will be required to fill up the vacancies from death and sickness, unless any unexpected contingency should occur.

The official *Staats-Courant* contains the conditions and particulars of a system of steam communication in Netherlands India to come into operation on the 1st of July next, and for which service contractors are invited to compete. The steamboat lines are:—From Batavia to Singapore, to Samarang and Sourabaya; from Sourabaya to Macassar, the Molukka Islands, and Timor; from Batavia to Pontianak and Bencoolen; and from Sourabaya to Banjermassin, in Borneo. Applications and tenders to be made to the Minister for the Naval Department.

On the 19th inst. the King's birthday was celebrated all over the country with more than usual loyal demonstrations in order to testify the joy of the people at the successful passing of the "Water Roads Bill." The illuminations in this city were very general, and the consumption of evergreens for garlands and

Digitized by Google

wreaths to decorate the public buildings and private residences was enormous. I happened to be at the railway terminus the day before, when a special train of no less than sixty-eight trucks, all loaded with evergreens, arrived. They had been ordered by the Corporation, and were sold at cost price.

In celebration of the Royal birthday at Court, a number of promotions in the army and navy were made, amongst which are H.R.H. the Prince of Orange-Nassau, hitherto Lieutenant-General and Vice-Admiral, to be General of Infantry and Lieut.-Admiral, and Colonel J. W. Blanken, of the Artillery, the present Minister of War, to be Major-General in the Army.

H.R.H. the Prince of Orange has been pleased to acquaint Mr. Jaeger that he accepts, with feelings of the greatest satisfaction, the office of Honorary President of the new "Amsterdam Canal Company," which is being formed for the execution of the great ship canal.

At a preliminary meeting of the electors of Rotterdam to choose a candidate for the representation of that borough, vacant by the appointment of Mr. Fransen van de Putte to be Colonial Minister, the following gentlemen were proposed and seconded :—Mr. Willem Adrian Viruly Verbrugge, Burgomaster of Gorinchem ; D. L. Wolffson, formerly officer in the Royal Navy, now of Leyden ; L. Pincoffs, member of the Municipal Council of Rotterdam ; and Mr. P. F. Hubrecht, lawyer, of that city. Mr. Pincoffs having expressed a wish not to be put in nomination, a ballot took place, the result of which was that Mr. Verbrugge received the most votes, and was declared the successful candidate.

There has also been an election for a member of the Second Chamber of the States-General for the borough of Zierikzee, at which Younker J. F. Schuurbeque Boeye was declared duly elected out of eight candidates.

The contract for the construction of the iron floating-dock for the use of H.N.M. ships in Netherlands India has been awarded to Messrs. P. van Vlissengen and Dundok van Heel, of this city, for 366,685 florins, as the lowest tender. There appears to have been considerable competition for the contract, no less than seventeen tenders having been received by the Naval Department.

Accounts have been received here of the safe arrival, on the 31st of December, in the Bay of Rio de Janeiro, of H.N.M. steam corvette *De Heldin*, Capt.-Lieut. S. H. Binkes, from Nieuwe Deep to Batavia. She was to proceed on her voyage on the 8th of January. All well on board.

PERSONAL.—The King has conferred the distinction of Knight of the Fourth Class of the Military Order of Willem on Sergeant P. C. Schnack, of the East India Infantry, in grateful acknowledgment of his bravery in the late expedition to Borneo, and especially at the disembarkation of the troops in the River Kopocas on the 28th April, 1860.

H.M. has given orders that Lieut. J. R. Engelhard, Sergeant H. Schuilenburg, and Fusileer G. Belkmeer, of the East India Infantry are to be honourably mentioned in General Orders to be read to the troops in Netherlands India and at home, for their distinguished bravery during the expedition to the Leboug in Sumatra in March, 1862.

Mr. Rudolph Selhmacher has been recognised as Prussian Consul at Sourabaya.

Accounts have been received announcing the arrival of his Excellency Lieut.-General C. P. Schimpf, the newly-appointed Commander-in-Chief of the East India army, on the 18th of December last, in Batavia Roads, on board H.M.'s second-class paddle steam-corvette *Bromo*, of eight guns.

The undermentioned lieutenants of the East India Infantry, now at the colonial depot at Harderwyk, are under orders to embark the end of this month for Java :—F. H. Schoenmaker, J. J. van der Broek, H. Wilkens, M. Harbach, J. G. van der Bos, E. N. Mugge, and G. H. Kobus.

Lieut. J. Arnoldy, of the East India Infantry, has received orders to embark at the end of this month at Nieuwe Deep on board the ship *India Packet*, Capt. G. Diepering, for Java.

Capt. R. C. Stoos, R.N., in command of H.M.'s first-class sailing frigate *Ryn*, 52 (guardship at Helvoetsluys), will be placed on the 1st of April on half-pay as his period of service will have then expired. His successor is Capt. Lieut. A. J. Kroef, R.N.

The King has accepted the resignation of Mr. J. H. Donker Curtius, of the East India Civil Service (late Dutch Commissioner in Japan and Siam), now on leave of absence to this country, and granted him a retiring pension.

Mr. F. C. de Greuve, Ordinary Professor of the Faculty of Philology in the University of Groningen, having completed his seventieth year, has been permitted to retire with a pension and the title of *Emeritus*. Mr. H. van der Wyck is appointed to the vacant professorship.

APPOINTMENTS CONFIRMED.—Mr. P. van Nieuwenhoven Helbach to be Member of the Court of Justice at Batavia ; Mr. W. H. van der Horst to be Assistant Resident of Sintang ; Mr. G. J. van der Tuuk to be Assistant Resident of Palembang ; Mr. P. J. van Kampen to be Director of the Telegraph Office at Batavia ; Mr. A. Robertson to be Secretary and Magistrate of the Residency of Banka ; Mr. J. R. Pillard to be Assistant Resident of Demak ; Mr. A. J. van Hemert to be Assistant Resident of Grobogan ; to Mr. C. Castens to be Resident of Bagelen, vice Mr. A. W. Kinder de Camerecq, who has received two years' sick leave to this country.

PASSENGERS ARRIVED.

Per *Hendrika*, Captain Bus, at Rotterdam, from Batavia : Mr. H. I. Wuestenink.

PASSENGERS OUTWARDS.

Per *Hebe*, Captain Piehl, from Rotterdam to Batavia : Mr. R. H. H. Friedrich, officer of the E. I. Civil Service ; Mr. M. van Dobbe, Mr. Verloop, a sergeant and three corporals.

Per *Noord Holland*, Captain Witting, from Amsterdam to Batavia : Dr. and Mrs. Diest Lorgion, C. Baart de la Faille, Fredzess Coenhaas, De Spiegel, Mrs. Greve and two children, Lamberts, Broen van Gournon, van Slie, Dignies, Helderman, and J. G. Vriese.

Per *Johannes Ludewyk*, Captain van der Waal, from Rotterdam to Batavia : Mrs. E. Hermens and five children, Mrs. Specht Gryp, Mr. and Mrs. R. H. van Os, Miss van Os, Miss de Ruyter, Miss de Meester, and Mr. Koch.

Per *Orange Nassau*, Captain Strang van Nes, from Rotterdam to Batavia : Captain Butner and family, Lieut. Pluym Mentz, E. I. Artillery, Lieut. Chevallereau, Messrs. Hackefort, Ardenne, and Receveur.

Per *Henriette Gertruida*, Capt. de Boer, from Nieuwe Deep to Sourabaya : Mr. and Mrs. B. Brune and three children, Mrs. Schottenburg, Messrs. J. H. Swart, D. C. Otken, Van der Venne, and J. Boeske.

COMMERCIAL.

COFFEE.—Since the departure of the last mail, this market has remained in its usual firm attitude, and notwithstanding the high prices, considerable business has been transacted. Amongst the sales may be mentioned 700 bags of Macassar at 48 cents 525 of Java at 48, and triage at 32, 313 of greenish Java at 45½, 3,000 bags of Java ex *Lady Egidia*, of different qualities, ordinary green at 45 and fine green 50, 4,400 bags of private trade Java, ex *Princess Amalia*, at 46 to 49½, 700 bags of do., ex *Emilie*, at 45½, and 1,500 bags of do., ex *Graham*, at secret prices ; and at public auction 699 bags of Java at 43 to 46½, as well as 278 bags of Java triage which fetched 32½ to 38. Good ordinary Company's Java is not to be had under 46, and even at that figure there are but few sellers. The market closes firm.

TEA.—A cargo has arrived by the *Crouch Brothers*, direct from Foochow-Foo, and is advertised for public sale next week. The valuations made by the brokers are as follows : Kaisow Congo, 98 to 110 cents ; fine do., 105 to 120 ; superfine do., 122 to 175 ; fine Souchong, 115 ; superfine do., 165 ; extra superfine do., 180 ; superfine flowery Pekoe, 200 to 225 ; Assam, 85 to 135 ; and pure uncoloured Japan (Oolong imitation), 125 to 150 cents.

SUGAR.—At the beginning of the fortnight the market appeared rather lively, and considerable sales were made, but within the last few days a depression prevails, and prices are a trifle lower. Among the sales recorded are 1,477 Kranjangs, of Sourabaya, Samarang, and Batavia, Nos. 10¼ to 17—averaging 15½—for delivery on arrival, and 487 kr. of Java, both at secret prices, 262 kr. of Sourabaya, No. 14, realised 31½ fl., as did also 492 kr. of Java, No. 13.

The Netherlands Trading Company have advertised 62,300 kranjangs of Java for sale on the 11th of March ; as compared with the March sales of previous years, the quantities were 64,200 kr. in 1862, 70,593 in 1861, 53,599 in 1860, 57,522 in 1859, and 53,861 in 1858.

For refined goods the opinion is beginning to improve, and several speculative purchases have been made, chiefly of B and H, at 32 and 30½ fl. for March delivery, and W and Z at 30 fl. for April.

RICE.—The market for cleaned descriptions is firm and prices are looking up, as the stocks are low and only short supplies known to be at sea, more business has been done in rough grain both by public sale and private contract, full prices being realised.

SPICES.—Cloves have been very dull, but are now in more favour, and there have been some considerable purchases made at full rates. Transactions continue to take place in Pepper to a moderate extent at former quotations.

TIN exhibits a successively rising market. At first 6,000 blocks of Banca, were sold at 70 fl., but since then parcels have been sold at all prices ranging between that figure and 73 fl., at which latter quotation 1,000 blocks have been disposed of. At Rotterdam the market is also rising, yesterday 1,000 blocks of Banca being sold at 72, then 1,500 at 72½, and finally, 1,500 at 73.

RATTANS in demand and prices rule firm. Amongst the sales are 3,500 bundles ex *Lady Egidia* ; 600 ex *L. A. Bang* ; 900 ex *Paul and Johan* ; and 3,106 ex *Franz and Elise*.

INDIA-RUBBER has had an easy sale, but now the article is dull and prices can with difficulty be supported.

TOBACCO.—There have been some considerable sales by the private trade, by which the stocks of Java are nearly cleared off, the whole quantity of unsold in warehouse being only 126 bales.

GUTTA PERCHA.—A public sale of 9,550 kilogr. imported here direct from Pa lang per *Noach*, went off as follows :—B quality sold at 100 to 106 cents ; BB realised 60 ; C bought in at 48 and D disposed of at 50 cents.

LONDON, THURSDAY, FEB. 26, 1863.

OUR POSITION IN JAPAN.

IN the Parliamentary papers just published on affairs in Japan, we have additional proof of the dogged, persistent obstinacy displayed by Japanese officials. To do everything that can irritate or obstruct the foreigner without driving him to active resistance is the great aim these men have in view. To evade a direct answer, to fabricate an apparently credible story, to delay replying to an inquiry, to make large promises and to be slow in performing any of them, to claim concessions on the plea of weakness, and at the same time to yield no point until positively compelled to do so; these are the tactics which have been steadily pursued in Japan, and which have taxed to the uttermost the skill and patience of Her MAJESTY'S representatives in that country. From time to time the GOROGIO have shown a wonderful readiness to make promises, which have proved utterly unreliable, and when all other arts have failed they have endeavoured to thwart us by simply doing nothing. Notwitstanding our concessions, or probably as a result of them, our position in Japan remains as insecure as ever. Two-thirds of the trade of the country is already in our hands, and the importance of commercial relations with the Japanese becomes daily more apparent. All we have won, however, has been gained in the face of continual discouragements occasioned by the non-fulfilment of contracts; by the interference of the Custom-house, which has stood in the way of direct dealings with the people; and above all, by the daily peril of life under which foreign merchants are doomed to follow their vocation. How long is this state of things to last, and what will be the result of all our toilsome efforts to gain a fair commercial footing in Japan? The Japanese Government throws the blame upon the Daimios, and the princes complain, or did complain, before the late change was effected, of the jealousy and surveillance of the TYCOON.

It is to be feared that the patient hostility of the Daimios, who are opposed to foreign trade, and whose grand object is the expulsion of the foreigner, will be ultimately successful, unless we take a firm stand, obtain a ratification of our treaties at the court of the MIKADO, and make no further concessions. For the concessions already made, Earl RUSSELL states, more than once, that Her MAJESTY'S Government will expect an equivalent; and in the memorandum signed by our Foreign Secretary and the Japanese Envoys it is expressly stated that since Her MAJESTY'S Government are willing to defer the opening of the Ports, as stipulated by Treaty, they expect that all other points of the Treaty shall be strictly executed, and that the TYCOON and his Ministers will specifically abolish and do away with—

1. All restrictions, whether as regards quantity or price, on the sale by Japanese to foreigners of all kinds of merchandise, according to Art. XIV. of the Treaty of the 26th of August, 1858.

2. All restrictions on labour, and more particularly on the hire of carpenters, boatmen, boats, and coolies, teachers and servants, of whatever denomination.

3. All restrictions whereby Daimios are prevented from sending their produce to market, and from selling the same directly by their own agents.

4. All restrictions resulting from attempts on the part of the Custom-house authorities and other officials to obtain fees.

5. All restrictions limiting the classes of persons who shall be allowed to trade with foreigners at the ports of Nagasaki, Hakodadi, and Kanagawa.

6. All restrictions imposed on free intercourse of a social kind "between foreigners and the people of Japan." These conditions, it is added, are only what the Japanese Government was already bound to fulfil, and if not complied with, the concession with regard to the ports and cities would fall to the ground, and the British Government would be free to insist upon their being immediately opened.

On these stipulations, then, we may take our ground, and if the weakness of the Government at Yedo be urged as an excuse for their non-fulfilment, our plan of action becomes all the more definite. The real power to redress our grievances lies with the MIKADO, and to that high personage we must look for the due fulfilment of our Treaty rights.

CHINESE IMMIGRATION TO THE WEST INDIES.

THE question of Chinese immigration is one pregnant with interest. The Chinaman, like the Anglo-Saxon, has shown a remarkable aptitude for settling in strange countries, in order to acquire a fortune or a competence. No one doubts his capacity for work; his patient industry; his energy in the pursuit of wealth. Many a spot once uncultivated in the Eastern Archipelago has been transformed by his labour, and in Australia since he can afford a much lower rate of payment than the European, he has been able in some instances to take possession of the labour market. That this should cause dissatisfaction among a spirited and somewhat lawless community is no cause for surprise; and the disputes which have occurred between JOHN BULL and JOHN CHINAMAN in the gold-diggings of Australia are only what might have been anticipated under the circumstances. In the West Indies, where the demand for labour is steadier, and where it is sometimes with difficulty supplied, there is of course no ground for similar complaints at the introduction of Chinese labourers. But West Indians have other reasons for complaint against the Chinese, especially against those recently imported, who, according to what we believe to be trustworthy authority, are a moral curse to the colonies, while in many instances they are far from proving a material benefit. In a brief article written last year on the Chinese in Demerara,* we stated that, "while the emigrants who were first settled in the colony "appear to have been sober and hard-working, those imported "of late years are said to be among the most lazy, dissolute "fellows in existence; perpetrators of the most disgusting vices, "and victims of the most terrible diseases;" and in another article (August 26th), in alluding to a speech of Mr. CAVE'S, the Chairman of the West India Committee, we asked on what facts he grounded his statement that the Chinese have answered perfectly well in the West Indies. In reply to this inquiry on our part, a letter has been placed in our hands, and will be found in another column, from Dr. MITCHELL, Immigration Agent-general in Trinidad. Dr. MITCHELL'S opinion is worthy of respect, and his facts are doubtless to be relied upon; but, nevertheless, we cannot say that he has convinced us that the statements we made on the subject are incorrect. In the first place, the information on which those statements were based was derived solely from Demerara, and in the next place, the main point of our assertion was not that all Chinamen in the West Indies were equally idle and depraved, but that those imported of late years were by no means of the same respectable class as those which arrived earlier in these colonies. Dr. MITCHELL'S statement with regard to the immigrants of 1862 has, however, special reference to Demerara, and is no doubt favourable to his views. Indeed, as far as it goes, it is highly encouraging to the promoters of Chinese immigration. But while Dr. MITCHELL'S figures show that 3,200 Chinese immigrants arrived in Demerara in 1862, they do not contradict our statement that these men were far inferior in character to the earliest immigrants from Hong Kong.

THE LAST BLUE BOOK ON JAPAN.

THE "Correspondence respecting Japan," just presented to Parliament, like the papers published last year, possesses a fascinating and tragic interest happily not often to be met with in official publications. Scarcely had the large indemnity been paid for the wounds inflicted on Mr. OLIPHANT a year before, when Colonel NEALE had to record another murderous attack on the Legation. Two Englishmen were killed in this assault, the shameful character of which was increased by the fact that the murderer of the sentries was an adherent of the prince appointed to watch over the safety of the Legation. Then followed the

* *London and China Telegraph*, July 14th.

Digitized by Google

usual intercourse with the Japanese officials; the oft-repeated expressions of regret, the accustomed promises and unsatisfactory explanations, and, finally, the demand for compensation, which was acceded to as usual.

Colonel NEALE's correspondence with regard to this tragedy is worthy of perusal. In laying the matter before the Japanese Ministers for Foreign Affairs, he "solemnly acquaints" their Excellencies that he shall continue at Yedo with the rest of Her MAJESTY's Legation, "to whatever perils we may "be subjected or whatever events may happen." And Earl RUSSELL, in his reply to Colonel NEALE's despatch recording the events of June 26, approves his resolution, and adds, "The abandonment of Yedo by Her MAJESTY's Le- "gation would be a great encouragement to the assassins and "their abettors." Eleven days after the solemn assurance just referred to, Colonel NEALE writes to Earl RUSSELL, "The general situation of this Legation at Yedo, confined "within the limits of the house and grounds, where alone any "degree of safety can be assured, is far from satisfactory, and "it is not improbable I shall be under the necessity of residing "at Yokuhama;" and a few days after he writes that he has removed thither. We do not find fault with Colonel NEALE for a temporary abandonment of a position which he felt to be insecure, but we cannot but think he was culpable in so strongly asserting to the Japanese Ministers his intention to remain at Yedo, no matter to what perils he might be subjected or what events might happen, and then within a few days removing from the capital. Such a sign of weakness could not fail to have an evil influence on the Japanese, who are only too pleased to discover any tokens of vacillation in a British Chargé d'Affaires.

Two months pass away, and Colonel NEALE, who is still at Yokuhama, has another barbarous murder to record. The events which followed on Mr. RICHARDSON's assassination nduced no slight ill-feeling between H.M.'s representative and the European residents at Yokuhama. In the excitement caused by that fearful occurrence, no doubt charges were made against Colonel NEALE which could not be substantiated; but after reading his explanations in this correspondence, we still think he did not act with the vigour demanded at such a crisis, and that Captain VYSE was fully justified in ordering Lieutenant APPLIN's troop out for the purpose of recovering the body of the murdered man. The correspondence concludes with the record of poor RICHARDSON's murder, and the interviews and letters between Colonel NEALE and the Japanese Ministers on the subject. For those interested in the sad tale the narrative terminates too abruptly; since the decision of our Government, with reference to the murder remains still unrecorded.

WESTERN CHINA AND THE TREATY WITH BURMAH.

AT a recent meeting of the Ethnological Society, its President —Mr. JOHN CRAWFURD—had a question put to him, not very relevant to the matter then under discussion, as to the probable effect of the Treaty with Burmah on our commerce with inland China, in reply to which he somewhat confidently stated "that "the sterile and rugged character of the country between "Burmah and China would be a barrier to any trade in that "direction; and that the recent commercial treaty with Burmah "would be worthless."

On this subject, however, Mr. CRAWFURD's judgment may be fairly questioned. More than thirty years have passed since Mr. CRAWFURD was in Burmah; and, moreover, his travels in that country were limited to ascending and descending the Irrawaddy in a steamer, while neither in his mission to the Court of Burmah, or the Courts of Siam and Cochin-China did he travel inland in the direction of China Proper. Since that time our knowledge of the country has been largely increased from various sources. Several enterprising British officers have travelled over it, under the direction of the Indian Government, for the purpose of collecting commercial and geographical information, and their unpublished reports satisfy us that Mr. CRAWFURD is entirely mistaken in his views in regard to the value of the Treaty with Burmah. Our own opinion is fully corroborated by the Indian journals, almost all of which express approbation of the Treaty, and the expectation that through means of it we shall be able to establish a considerable trade with Western China. This is not all; the GOVERNOR-GENERAL of INDIA, after a personal conference with Lieutenant-Colonel PHAYRE, who negotiated the Treaty, spoke as follows on the subject in the Legislative Council, on the 14th ultimo:—

"It was without doubt a step towards the development of "trade by opening up an intercourse, not only between British "Burmah and Burmah Proper, but by opening up commercial "relations between them and the States on the South-West "frontier of China; the importance of opening up which com- "munication had been of late much insisted upon. He thought "that one of the most flattering prospects connected with the "Treaty was, as he gathered from conversations with Colonel "PHAYRE, the extreme interest Chinese traders in those parts "had evinced in the prosecution of the Treaty. He could not, "certainly, guarantee that all the advantages he had mentioned "would follow on the Treaty, for his great experience of the dif- "ficulties in carrying out similar ones, had taught him that it "was rash to speak too positively. But he was certain that, if "carried out properly, the Treaty engagements now entered into "would result in the development of a vast amount of wealth. "He hoped, too, that the management and firmness of the "agents of Government in Burmah would, in all cases, remove "those difficulties which always must occur in putting into "practice similar treaties with similar States; and he would "repeat his opinion, that great advantages would then accrue, "not only to British interests, but to the interests of those "States themselves."

Now, as Colonel PHAYRE, who negotiated the Treaty, is the chief political agent in Burmah of our Government, and as the Consul to be located at the Burman capital will have to act under the Colonel's instructions, we have every confidence that all tact and firmness will be shown on our side in bringing the Treaty into working order. With reference to the speech of the GOVERNOR-GENERAL, to which we have referred, the *Bombay Gazette* of the 28th ult. writes:—"There can be no doubt that the VICEROY, in "speaking of the opening up of communications and trade be- "tween British Burmah and the Western Provinces of China, had "reference to the noble and disinterested efforts that have been "so long made by the enterprising Captain SPRYE, aided by "his son, with this important object in view. We have always "maintained that the realisation of their great object was a mere "matter of time. The first Government step towards it may "now be considered to be taken. We trust, however, that in "whatever may be further done in carrying out this work to "complete realisation, the indefatigable and persevering labours "of these gentlemen will not be ignored. Their labours are "beyond all praise, and they are entitled, as a right, to have "them acknowledged."

The Treaty being thus appreciated in the East, we are glad to call the attention of our readers to a letter from Captain SPRYE in another column, in which he details the principal sources of the information which originally led him to propound his scheme for establishing an overland trade with Western China, and have sustained him in urging it against all objectors—private and official. Whoever reads his letter will perceive that he does not venture to advocate this great commercial subject without being fully conversant with all the sources of information—geographical, commercial, and political—to which it was possible to refer. Captain SPRYE's labours in the cause are well known to the readers of the *London and China Telegraph*. We are glad to learn that there is every probability that they will ere long be crowned with success.

MR. MOSS'S CASE.

WE have just received from Mr. Moss a full narrative of his sufferings in Japan and treatment by the Consul-General. It only serves to confirm our opinion that he was treated with great injustice by Sir RUTHERFORD ALCOCK at the time, and has been harshly dealt with by the Government since. Mr. Moss says, "A little more than two years ago I was a mer- chant in Japan, on the high road to fortune. I am now a ruined man, forced to begin life again under a bitter sense of injustice and a load of debt." Mr. Moss can, however, remember for his consolation that he has the full sympathy of his countrymen in the Far East, as well as at home, who are acquainted with his story. We shall return to the "narrative" in our next number. It is published by Mr. RIDGWAY.

Literature.

The Capital of the Tycoon: A Narrative of a Three Years' Residence in Japan. By Sir Rutherford Alcock, K.C.B. 2 vols.: Longman and Co.

Sir RUTHERFORD ALCOCK is not an old man, but he possesses in a striking measure one of the faults incident to old age. Never, surely, was there a Minister Plenipotentiary so garrulous, never one who discussed politics,

Digitized by Google

or described what he thought, did, or saw in a style so diffuse. In portraying the Japanese, the author of these charming volumes photographs himself at the same time, and so natural is this peculiarity, that the reader is on the whole amused rather than annoyed by it. Moreover, the discursiveness of the narrative, while it sadly injures its effect as a literary production, will scarcely be deemed a fault by those who are glad to gather up even the slightest fragments of information with regard to Japan. We need scarcely say that this is by far the ablest and the most reliable work which has as yet appeared on the subject. Perhaps, also, in spite of the author's inveterate prosiness, and of many passages which one feels compelled to skip, it is the most lively and amusing. The pages abound with clever illustrations of Japanese life, drawn with considerable power. Nothing can be more graphic than the sketches which illustrate the letterpress, and the *fac similies* of Japanese woodcuts are equally effective. Indeed, as a picture-book of Japan, these volumes, had they no other merit, would deserve a place in every well-furnished library. But in truth the work has merit of no common order, much of which is due to the author and much to his position. Sir Rutherford Alcock has had golden opportunities, and he has used them diligently. Three years spent in Japan could scarcely have been wasted by any man, but the Minister of Great Britain possessed peculiar advantages, and being at the same time a man of considerable ability, he has turned them to good account.

On the whole, we prefer Sir Rutherford Alcock's description of what he observes, to his political dissertations. He has a quaint sense of the ludicrous and a curious faculty for seeing analogies or employing illustrations, which will often create a smile. Three years' residence has not removed the impression first formed by the author that Japan is a very curious country. Despite all its beauty, he observes that the flowers have no scent, the birds no song, and the fruit and vegetables no flavour; and he tells us that one of his colleagues gave the characteristics of Japan in another triology equally correct, if less poetical, viz., women without crinoline, houses without bugs, and towns without lawyers. In another place he describes as follows the strange anomalies of Japan when regarded from our stand-point:—

"Japan is essentially a country of paradoxes and anomalies, where all—even familiar things—put on new faces, and are curiously reversed. Except that they do not walk on their heads instead of their feet, there are few things in which they do not seem, by some occult law, to have been impelled in a perfectly opposite direction and a reversed order. They write from top to bottom, from right to left, in perpendicular instead of horizontal lines; and their books begin where ours end, thus furnishing good examples of the curious perfection this rule of contraries has attained. Their locks, though imitated from Europe, are all made to lock by turning the key from left to right. The course of all sublunary things appears reversed. Their day is for the most part our night; and this principle of antagonism crops out in the most unexpected and *bizarre* way in all their moral being, customs and habits. I leave to philosophers the explanation—I only speak to the facts. There old men fly kites while the children look on; the carpenter uses his plane by drawing it *to* him, and their tailors stitch *from* them; they mount their horses from the off-side—the horses stand in the stables with their heads where we place their tails, and the belts to their harness are always on the hind quarters instead of the front; ladies black their teeth instead of keeping them white, and their anti-crinoline tendencies are carried out to the point of seriously interfering not only with grace of movement but with all locomotion, so tightly are the lower limbs, from the waist downwards, girt round with their garments;—and, finally, the utter confusion of sexes in the public bath-houses, making that correct which we in the West deem so shocking and improper, I leave as I find it—a problem to solve."

The bath, adds the Minister, is a great institution of the country; the people's Parliament, or House of Assembly, which "certainly has a recommendation wanting in all other Parliaments, of acknowledging to the fullest extent the rights of both sexes and their equality." He confesses that he is puzzled to discover the Japanese standard of morality, while believing that some must exist "for a gentle, womanly, and modest expression and bearing generally marks the women; and the well-conditioned among the men have a certain refinement and delicacy in their manners." Yet we suspect that, after all, the Bishop of Victoria's statement is the true one, that the Japanese are the most licentious nation in the world.

Of course in these volumes we have the usual, and now familiar, descriptions of the manners, customs, and amusements of the Japanese; their social and political life, their religious creed, their civilisation, as compared with that of Europe. But all Sir Rutherford says on these points has the advantage of coming from a keen and truthful observer; and whatever knowledge we possessed before of these subjects is made all the more real and vivid by his careful though frequently verbose descriptions. Chapters on topics such as these will always be read with interest by the general reader. Those chapters, on the other hand, which are devoted to an account of our diplomatic relations, or to semi-philosophical reflections on the antagonism which lies at the bottom of all intercourse between Asiatics and Europeans, or to a summary of despatches which have already been published in Parliamentary Blue Books, valuable though they may be, will possibly be considered heavy. To those however, who find a special interest in Anglo-Japanese politics they will be found highly suggestive, although most of the facts contained in them will be already familiar. We have not space even to catalogue the variety of topics about which Sir Rutherford Alcock records his impressions. As Her Majesty's representative in Japan, we often found occasion to question the wisdom of his conduct, but we never doubted the uprightness of his intentions. In reading "The Capital of the Tycoon," we may frequently question the author's premises, or demur to his conclusions; we may object to the verbosity of his style, or smile at the asperity with which he regards the local press of China and Japan, but we never doubt for a moment that he is a thoroughly truthful writer and true-hearted man. If Sir Rutherford Alcock, to give a secular meaning to an apostolic sentiment, is somewhat disposed to magnify his office, it is a fault into which many far less worthy than himself have fallen. If in some of his transactions in Japan he presented to his countrymen the most unfavourable side of his character, in this work they will be able to view it in a fairer light. Sir Rutherford's worst enemy will feel disposed to shake him heartily by the hand after a few hours' pleasant intercourse with him in these genial volumes.

Naval and Military.

DISTRIBUTION OF NAVAL PRIZE MONEY.

Notice is given that the distribution of the proceeds of the Chinese junks and their cargoes captured for breach of blockade of the Canton River, in the year 1857 will commence on Thursday, the 19th inst., in the prize branch of the Department of the Accountant-General of the Navy, Admiralty, Somerset House.

The vessels and cargoes referred to are:—Two junks captured by Her Majesty's ships Cruiser and Forester, on the 29th of August, 1857; 13 junks captured by Her Majesty's ships Esk and Forester, on the 31st of August, 1857; 2 junks captured by Her Majesty's ships Niger and Forester, on the 6th and 7th of September, 1857; a junk captured by Her Majesty's ships Bustard and Esk, on the 12th of September, 1857; 2 row-boats captured by Her Majesty's ship Niger, on the 17th of September, 1857; 2 junks captured by Her Majesty's ship Bustard, on the 18th of September, 1857; a junk captured by Her Majesty's ships Sampson, Bustard, Haughty, and boats of Elk, on the 26th of October, 1857; a junk captured by Her Majesty's ship Surprise, on the 19th December, 1857; a junk captured by Her Majesty's ship Haughty, on the 10th of December, 1857; stores removed from a junk scuttled when chased by Her Majesty's ship Lee, on the 7th of December, 1857; 3 junks captured by Her Majesty's ships Nimrod, Highflyer, and Lee, between the 9th and 14th of December, 1857; and a junk captured by Her Majesty's ships Nimrod, Highflyer, and Lee, between the 9th and 14th of December, 1857.

It will be satisfactory to the two Services to find that the authorities have not ignored the claims of those gallant fellows the Marines, who took a part in the engagements which led to the capture of Peking, but have granted them the honour of an additional clasp to their medal. Sir James Hope and Sir Hope Grant did not fail, as we have been informed, to render high testimony to the value of the services rendered by the Marines while serving under their respective commands in China.

The Himalaya, 6, iron screw steam-troop ship, Captain Edward Lacy, left Portsmouth on the 15th inst., with the 96th Regiment on board, for the Cape of Good Hope. The Himalaya will, on arrival at the Cape, disembark the 96th, and receive the 13th Regiment on board, and will convey it to the Mauritius, to relieve a regiment on service there, which will be conveyed in the Himalaya to the Cape, that vessel finally concluding her round of service by bringing to England a regiment from the Cape. Colonel Horne, 2nd battalion 13th Regiment, and wife, are passengers by the Himalaya, to the Mauritius.

The following Divisional Order was issued on the 12th inst.:—

"No. 2. The Major-General is not in the habit of issuing valedictory orders to regiments quitting the division in the ordinary periodical interchange of quarters, but in the case of a removal to a distant country he willingly deviates from his usual practice. He has had the honour of having the 96th Regiment under his command in the garrison of Dublin two years ago, and he greeted its arrival in the South-Eastern District in April last. The general bearing and conduct of the regiment has called forth his satisfaction and approval; and upon its now proceeding to the Cape of Good Hope, Major-General Dalzell begs to assure Lieut.-Colonel the Hon. A. M. Cathcart, the officers, non-commissioned officers and soldiers, that, whilst parting with them with regret, the 96th Regiment carries with it his best wishes for its health and prosperity.—By command, (Signed) R. C. H. TAYLOR, Acting Adjutant-General." The following is the detail of the regiment:—2 field-officers, 7 captains, 18 subalterns, 5 staff officers, 44 sergeants, 31 corporals, 19 drummers, 668 privates; total, 821 of all ranks, 69 women, and 92 children.

The following is the list of officers:—

Lieutenant-Colonel Hon. Augustus Murray Cathcart, Majors: William Campbell Mollan, C.B., *Ens.* George Frederick Campbell Bray, Captains: Arthur Henry C. Snow, Patrick James, John Grant, James Buchanan Kirk, Rouse Douglas, James Briggs, Alfred Edward Cookson,

Digitized by Google

Edmund John Scovell, William Osborne Baynard, James Morrison Kirkwood, Charles Edward Wright, Marriott Aytoun, Edward Hogg, Francis Reid.

Lieutenants: John Whitty, Elias William Dixon Gray, Edward Johnston, Henry Houghton, John Leslie Toke, *Adj.* Robert Algeo Mostyn, Frederick Henniker, William Naper Carleton, Frederick John Josselyn, Francis Lemox, George Grey, Hon. Augustus F. Arthur Sandys, Arthur Cadell, G. Leman, Alfred Herbert Morse, William George Mackie, Talbot Henry King.

Ensigns: Arthur George Hay Church, John Oldham Ellis, Thomas Edward B. Townsend, Arthur Francis Lamb, Dennis Du Moulin Gunton, Henry Kimberly Gould, George Tuthill, Charles Folliot Powell, John Gillespie.

Paymaster: William Thompson; Quarter-master: James Jamieson; Surgeon: Benjamin Swift; Assistant-Surgeon: Hamilton Mitchell.

Letters received at Plymouth from the Pacific state that the screw steam-frigate Bacchante, 39, Capt. Donald M. L. Mackenzie, was at Callao on the 13th of January, and would leave about the 20th for Panama, where Rear-Admiral Sir Thomas Maitland, K.C.B., the retiring Commander-in-Chief in the Pacific, would land, and cross the Isthmus for the purpose of returning to England. The screw steam-corvette Charybdis, 21, Capt. the Hon. George D. Keane, was also at Callao, but was to leave about the 30th of January for the rendezvous, Valparaiso, where she would wait the arrival of the newly-appointed Commander-in-Chief, Rear-Admiral John Kingcombe, who left Plymouth in his flagship, the screw steam-frigate Sutlej, 35, Capt. Matthew Connolly, on the 11th of Dec.

The Royal Engineers who left England in the early part of 1857 for the purpose of making the Ordnance survey of the Cape Colony, have arrived at head-quarters, Chatham, under the command of Lieut. F. Bailey. They have spent upwards of five years in the prosecution of the work. During their passage to England the surveying party were shipwrecked, and lost the whole of their valuable surveying instruments, and what were of still greater value, the original plans of the survey. Fortunately, however, they succeeded in saving the duplicate copies which they had made before leaving the Cape, and these will be immediately published, their value being enhanced by the fact of their being the only complete survey of that important colony yet made.

The 20th company of Royal Engineers, under the command of Capt. C. E. Sim, which recently arrived at Chatham Garrison from Western Australia, after an absence from England of several years, is ordered to be raised to its proper strength from the companies at head-quarters, the numbers having been very much thinned from the length of time the company was away. The number of men belonging to the company who are married being considerably in excess of the regulations, an order has been received for their transfer to the other depot companies. Since the 20th company has arrived from Australia it has been put through a course of study in the various schools connected with the Royal Engineer Establishment.

The navy estimates for the year 1863 64 have been published. It appears that the Government is able to reduce the expenditure by more than a million (£1,058,273) without injury to the effective service. The number of seamen is 39,000, against 40,000 last year; of boys, 9,000, as last year; of coast guards, 9,000, being 1,150 more than last year; of marines, 18,000. The Naval Coast Volunteers are taken at 8,000, and the Royal Naval Reserve at 16,000—making, with the men, boys, and marines, a total of 100,000; exactly as in the year 1804.

We (*Army and Navy Gazette*) hear it is probable that a 5th West India Regiment will be formed out of the Gold Coast Corps, the establishment of the officers being completed from the St. Helena Regiment, which is to be disbanded, the island being garrisoned by a wing of one of the regiments at the Cape. It is now found necessary to have two native regiments for the duty of the West Coast of Africa, and by the new arrangements there will be three more available for reliefs.

In the House, in answer to Sir F. Smith, Lord C. Paget said it was the intention of the Admiralty to appoint Mr. Reed the Chief Constructor of the Navy.

A return has been issued, showing the number of officers who, within the last seven years, have been permitted to sell their commissions for commuted or other sums without having either purchased or completed twenty years' service, with the name and rank of each of them. It appears that the total numbers in the period stated were 19 lieutenant-colonels, 36 majors, 515 captains, 504 lieutenants, 14 cornets, and 57 ensigns.

The army estimates include charges amounting to £3,620,256 for military purposes in the colonies, exclusive of the cost of arms, accoutrements, and barrack, hospital, and other stores to be supplied from this country. But rather more than a fourth of this charge is incurred in respect of the Mediterranean and other stations not properly colonies. The year's expense in respect of Canada is estimated at £702,115, and in Nova Scotia and New Brunswick, £180,695; the West Indies, £291,525; New Zealand, £347,269; China and Hong Kong, £334,789; West Coast of Africa, £77,438; Labuan, £4,500; Western Australia, £29,368. From all these colonies no repayment is expected. The cost for the Cape of Good Hope is put at £290,384, and Natal £50,693, but they will contribute £13,500 in aid of the extra allowances of the troops. For New South Wales and Queensland the charge is £28,140; for Victoria, £24,767; for Tasmania, £30,214; and for South Australia, £6,829 New South Wales and Victoria pay the expense of one battery of garrison artillery, and these Australian colonies pay special allowances to the troops, but the amount of these is at present under discussion; New South Wales and South Australia also defray the cost of barrack buildings. The charge for the Mauritius is £150,995, and for Ceylon £89,534, but the former contributes £10,000, and the latter £24,090, and both make allowance to the officers, Ceylon also bearing its commissariat charges and expense of barrack buildings.

A Parliamentary return has been issued, setting forth the number of men flogged in the army and militia of Great Britain and Ireland in the year 1861. There was no case in the militia. In the army 168 soldiers were flogged, 8,200 lashes being in all inflicted. The sentence in almost every case was fifty lashes. In the Scots Fusilier Guards, Portman-street barracks, a man who was sentenced to fifty lashes for insubordination received only fourteen, and there are two or three cases of men on whom a similar sentence was passed, receiving twenty-five or forty lashes. Twenty of the Royal Artillery were flogged, nine of the 60th, eight of the Military Train, seven of the 32nd, six of the 36th. Desertions, making away with necessaries, and insubordination are mostly the offences.

In addition to the Formidable, 84, the Cumberland, 70, and the Leander, 51, ordered to proceed to the Nore on the 5th of March, to form the squadron under orders of Vice-Admiral Johnstone, K.C.B, that will salute the Princess Alexandra on her arrival at the entrance to the Thames in the Danish frigate Slesvig, it was stated at Chatham that the Channel squadron, under the command of Rear-Admiral Smart, K.H., will be sent home from Lisbon and stationed at the Nore, in order to make the reception of the Princess as imposing as possible. The Channel squadron consists of the Revenge, 78, 800-horse power, Captain C. Fellowes, flagship of Rear-Admiral of the Red, R. Smart, K.H.,; the Warrior, 40, 1,250-horse power, Captain the Hon. A. A. Cochrane; the Black Prince, 40, 1,250-horse power, Captain J. F. B. Wainwright; the Defence, 16, 600-horse power, Captain A. Phillimore; and the Resistance, 16, 600-horse power, Captain W. C. Chamberlain. Although no positive orders to that effect have been received at Chatham, it is probable that the Wellesley, 72, the training ship for supplying seamen to the various vessels of war at the eastern ports, will also proceed from Chatham to the Nore to form one of the squadron of honour on the occasion.

The Racoon, 21, 400-horse power, Captain the Count Victor Gleichen (Prince Hohenlohe), remains in the Medway, where she is moored off the west shore, receiving the remainder of her supplies, stores, &c. According to orders received at Chatham last week, she proceeds round to the Thames for the purpose of shipping her provisions at Deptford. It is probable that the illness of his Royal Highness Prince Alfred will change intentions regarding the departure and course of this vessel.

The army estimates for the year have been issued. The reduction on the estimates of last year amounted, as in the case of the navy, to a trifle over a million, making, as far as yet appears, a reduction of two millions on the year's expenses. The reduction is on the effective service, the non-effective service showing a slight increase. The estimates for the volunteer force are £200,000 above those of last year, preliminary, we presume, to the adoption of the suggestions contained in the report of the Royal Commissioners.

The annual return, made up on the 1st of February, shows that the present month finds the Royal navy comprising 522 steams ships afloat and 103 effective sailing ships, and there are forty-four steam ships building, but the building of nearly all, except the armour-plated, has been suspended. The list of armour-plated ships is as follows:—Two second-rate iron ships afloat, and four building; three third-rate ships afloat, and one building; three third-rate wood ships afloat, and three building; one third-rate iron turret-ship building; one third-rate wood turret-ship converting; one sixth-rate wood corvette building; two sloops, wood, building; three iron floating batteries afloat; four wood floating batteries afloat. The general total of ships afloat and building is twenty-one less than in February, 1862, when there were three more steam ships afloat, eleven more building, and seven more sailing ships afloat.

Captain Allan Young, the Arctic voyager, who is about to serve under Captain Sherard Osborn, in the Chinese-Anglo fleet, is at present at Southampton, for the purpose of inspecting the fitness, preliminary to the purchase, of Mr. Anderson's yacht Thule, for the Chinese-Anglo squadron now fitting out in this country.

AFFAIRS IN JAPAN.

From the papers recently read before Parliament on "Affairs in Japan," we take two or three extracts. Here is a passage from Mr. (now Sir) Rutherford Alcock's last communication, before his departure for England, to the Japanese Ministers for Foreign Affairs:—

"Foreign Powers must feel that had the Government of the Tycoon been really and earnestly desirous to give honest execution to those treaties, rather than to conciliate factious enmities, it would have found means of securing not only the foreign representatives resident in the capital, but every foreigner in the country, from injurious treatment at the hands of its own officials at all events, if they could do nothing more. To fail in this, whether from want of effort or of power, unavoidably tends to destroy all confidence.

"It is under these circumstances that the Tycoon addresses the treaty Powers, requesting them to cede important rights guaranteed by solemn contracts quite recently entered into. Can your excellencies wonder if, with this experience of the past, and without the slightest guarantee for the future, there can be little disposition to make concessions?

With regard to the murder of Mr. Richardson, and the meeting of the merchants in Yokuhama on the 15th of September, Colonel Neale writes to Earl Russell:—

"Having been one of the first to become aware of the distressing circumstances which had occurred, my first step was to direct the escort attached to this Legation to mount and be in readiness to act as they might be required. I next immediately ascertained from the explicit evidence of an American subject, who had that moment ridden over from Kanagawa, that the wounded gentlemen of the party attacked were within the United States' Consulate at that place, and attended by a medical officer attached to the American mission.

"My informant further stated that the other gentleman who had been wounded was dead, and lying on the road in the vicinity of Kanagawa, but beyond it. The lady, Mrs. Borrodaile, who was with the party, had already happily escaped, and I had conducted her myself to her residence in this place.

"Being thus in possession of these facts, I at once abandoned all thoughts of sending the escort, composed of seven or eight men, along the tokaido, or high road, where they would run the gauntlet through hundreds of armed men that covered the high road, fresh from the outrage and murder they had just perpetrated. The officer commanding the escort, Lieutenant Applin, was moreover absent, and there was no one to aid or to rescue had he been present. The water communication with Kanagawa was speedy

Digitized by Google

and safe, and I immediately communicated with Her Majesty's ship *Centaur*, and requested that an armed cutter should be dispatched to Kanagawa, to bring over from the United States' Consulate the wounded gentlemen, and the body of Mr. Richardson. This was at once done, when I returned to the escort, who, I found, greatly to my surprise, had left. Upon inquiry I learnt that Captain Vyse, Her Majesty's Consul, who was not in Yokuhama at the preceding stage of these proceedings, had, upon his arrival, taken the escort with him by the high road to Kanagawa. Lieut. Applin now arrived, when I informed him that his escort had gone without necessity and without authority. Lieutenant Applin said he would follow them, and see that all was right.

"The preceding apparently unimportant circumstances I have been constrained to lay before your lordship, as the press here, which may find echo elsewhere, imputes blame to me for objecting to the disappearance of my escort, upon a dangerous and unnecessary errand.

"The settlement of Yokuhama, as far as the Japanese are concerned, remained thoroughly tranquil and undisturbed. The British, and a few other members of the foreign community, however, thought it essential and expedient to hold a midnight meeting, at which resolutions were passed to the effect that a deputation be appointed to wait upon the various civil and naval authorities, with the view of inducing them to immediate action—that is to say, to send out an armed force from Her Majesty's ships, and from the other ships of war in harbour, for the purpose of attacking the *cortege* of the high Japanese personage, consisting of between 500 and 600 men, and of seizing the person of that personage himself. I was visited by this deputation at three o'clock in the morning, when they informed me that they had waited upon Admiral Kuper, who had arrived in Her Majesty's ship *Euryalus* a few hours before from Hong Kong, and that he had consented to attend a meeting at the residence of the French Minister, at six o'clock that morning, for the purpose of discussing the propriety of adopting the measures suggested.

"They further said they had already called, with a like view and with like results, upon the senior French naval officer and other officials. I promised to attend at the appointed hour.

"I went, accordingly, to the residence of the French Minister, when we were joined by Admiral Kuper with Captain Joslin, and other British, French, and Dutch naval officers, as well as by the several Consuls.

"The resolutions of the committee, expressing the object they had in view, a copy of which I have the honour to inclose, were read; and my colleague of France requested me first to express my opinion respecting the suggestions contained in the resolutions, stating that he considered himself as only in the same position as the others who had been invited to attend.

"I then, without any hesitation, stated my opinion, which was as follows:—

"'It is my decided opinion that the coercive measures proposed to be adopted in the resolutions of the community are not only utterly impracticable, but if they could, with any chance of success, be carried into effect, I deem that to enter upon actual armed conflict with several hundreds of armed Japanese, who are passing along the high road, and to seize the person of their chief, would be tantamount to a sudden commencement of hostilities with the Government of Japan, with whom I had not had even time to communicate respecting the event which has only a few hours since occurred. Such a premature measure, I added, would be altogether unjustifiable, fraught with all the evils and consequences of actual war, the stoppage of trade, and result, probably, by involuntarily engaging Her Majesty's Government in a course of action which it had not contemplated. And I further added, however distressing the outrage which had thus unhappily been added to those which had preceded it, I must bear in mind, and the community must bear in mind, apart from all private considerations, that, in a national point of view, the premeditated attacks, accompanied with bloodshed and murder, which took place within the precincts of Her Majesty's Legation at Yeddo, and directed against the life on two occasions in one year, of Her Majesty's representative, still more loudly called for reparation.

"'I awaited the instructions of Her Majesty's Government, whose hands I have not hampered by premature acts of reprisal or violence towards the Japanese authorities, and I see no good or rational reason why I should pursue a contrary course on the present occasion.'

"With respect to the second resolution, I said I was prepared and intended immediately to enter into urgent communication with the Japanes Government, for the purpose of urging upon them the necessity of immediately multiplying the guards upon the high road, and all other place within the limits assigned by Treaties to foreigners around Yokuhama and Kanagawa, so as to avert the chance of any recurrence of the misfortune which has just occurred.

"My colleague of France then left the room, and returned with a paper upon which he said he had already written his opinion, and which, when read, coincided in every material respect with my own."

In forwarding to the Foreign Secretary the documents transmitted to him by Consul Vyse, containing the minutes of the meeting held by the merchants at Mr. Clarke's residence, Captain Vyse occupying the chair, Colonel Neale says, under date September 21:—

"Press of time renders it impossible for me, by this occasion, to draw your Lordship's attention to the erroneous statements with which these documents abound, and the facts which have been suppressed in all which relates to my own course of action, as I have had the honour circumstantially to report them by this mail."

SALT TRADE WITH CHINA.

The following are the chief reasons urged by a deputation which waited on Earl Russell on the 11th inst. for the admission of salt into China:—"During the first China war, in 1859, the Salt Chamber memorialised the Foreign-office to obtain the admission of English salt into China. Instructions were sent to Lord Elgin, but arrived too late; the war was over, and a treaty concluded. An interview was sought with the Hon. Mr. Bruce, Minister appointed to Peking, and the subject brought fully under his notice before he left England. When Lord Elgin returned from China a deputation from the Chamber had an interview with his lordship, who then stated that it was a question of revenue, and that if we could satisfy the Chinese Government that they would not suffer in this way it might be more feasible. Her Majesty's Government promised renewed representations to China on the subject. The war was renewed, Lord Elgin returned to China, and concluded a treaty in which a clause was allowed making the admission of salt prohibitory, to the great surprise of the Salt Chamber. Renewed application to the Foreign-office, who promised to urge the British Minister in China on the subject. Interview with Mr. Lay, at Lord Elgin's suggestion, also with Mr. Parkes. The former thought it might be practicable to induce the Chinese Government to make a trial with one province, under some arrangements with the English representatives that would prevent any detriment to the revenue. Nothing has yet been done in this way, and Mr. Lay is returning to China. In 1844 not a ton of English salt was imported into India; in 1862 Calcutta alone 200,000 tons. The salt trade is much dependent on foreign consumption. The Southern States of America have hitherto taken one-fourth of the production, and the trade is much depressed from the failure of this source. The salt trade employs a large quantity of tonnage, and the vessels going to China are much in want of outward cargo. The privilege of exporting this article to China would be a great boon to shipping. The consumption of salt in China is believed to be enormous. Smuggling exists to a large extent; but it does not appear that an importation of foreign salt would interfere with any vested interests, or that the Chinese have any prejudices that way. It is, as Lord Elgin justly said, a question of revenue, and the only explanation the Chamber has received of Lord Elgin allowing salt to be a prohibited article under the treaty is, that without this clause it might have led to a smuggling trade up the rivers, for which the British Government might be held responsible, or involve its representatives in questions with the Chinese Government. The Chamber has no desire to cause disputes with the Chinese Government; they believe that both the Chinese Government and people would be benefited by the admission of English salt; and that under such an arrangement as that suggested to Mr. Lay, the Chinese revenue would be fully protected. It is a revenue question, as stated by Lord Elgin, and the example of Calcutta is an encouragement in this respect. It only requires bonded stores, whence the salt can be delivered on payment of the Chinese duty, more easily and efficiently collected than under the present Chinese system. In every respect, as regards the salt manufacture in this country—the shipping interest, which suffers from the want of outward cargo, and promoting commercial intercourse with the Chinese, the admission of salt is an object of great importance, which it should be strongly impressed on the English authorities of China to obtain."

COTTON IN EGYPT.—Advices from Alexandria state that the crop of cotton in Egypt promises to be most abundant this year. 'There will not be less than 180,000 bales for export, the quantity last year having been only 105,000.

The *Gazette* of Feb. 13 furnishes sketches, provided by the Admiralty, of a series of flags which the Emperor of China has been pleased to establish for the European naval forces.

COMMERCIAL POSTSCRIPT.

CITY, THURSDAY AFTERNOON.

SILK.—The circular of Messrs. Waithman, Jacomb, and Hoggs states:—The silk market has been more quiet during the past fortnight, but prices on the whole have been well maintained. In Japan there has been much less eagerness to do business, and some sales have been effected at a trifling reduction; still any apparent decline in prices is more to be attributable to a falling off in quality than anything else. Deliveries, 1st to the 25th inclusive—China, 4,831; Japan, 1,484 bales; total, 6,315.

A meeting of merchants, dealers, brokers, and others interested in the tea duties, is to be held in the Commercial Sale Rooms, Mincing-lane, on the 27th inst., when Mr. T. Baring, M.P., Mr. R. W. Crawford, M.P., Mr. Western Wood, M.P., and Mr. George Moffatt, M.P., have promised to attend. Mr. Samuel Gregson, M.P., will preside. The draft resolutions to be proposed are as follows:—

"1. That in the opinion of this meeting the present duty on tea of 1s. 5d. per lb. upon an average bond price of about 1s. 5d., or 100 per cent. on the gross market value, is an oppressive import duty, interfering with the extension of our commerce with China, and also with the consumption and daily comforts of the community.

"2. That in the opinion of this meeting the present state of the public revenue justifies a strong appeal being made to the Chancellor of the Exchequer for an immediate reduction of the duty on tea, more especially as 5d. per lb. of the present scale has for the last six years been acknowledged as a war tax, and to be withdrawn when an opportunity should offer.

"3. That the ample stock of tea now in the United Kingdom, together with very large exports from China afloat to this country, makes the present a most favourable time for such reduction of duty.

"4. That the duty, both with reference to the maintenance of the revenue and as a certain stimulus to increased consumption, should at once be reduced to 1s. per lb., as recommended by the committee of the House of Commons in 1847, in preference to a graduated scale, which disturbs the arrangements of the trade, and would not reach the mass of the people, who, in poor localities, make their purchase by the ounce.

"5. That the following memorial, embodying the views of this meeting, be now signed and presented by the chairman to the Chancellor of the Exchequer."

ARRIVALS NOT INCLUDED IN THE TABLE.—Feb. 23, at Texel, from Batavia, Anna; at Brouwershaven, from Pasaroeang, Metis; 25, at London, from Colombo and Tuticorin, Janet, Cowan; 26, at Deal, from Foo-chow-Foo, Sunda; 25, Off Portland, from Java, Mary Glover.

DEPARTURES.—Feb. 21, from Cardiff for Hong Kong, John Nicholson; 23, for Singapore, Northwind; 24, from Liverpool for Singapore, Earl of Shaftesbury; 25, from London for Cardiff and Philippine Islands, Henry Darling.

LAID ON.—At London for Shanghai, Clarendon. For Colombo, Charlotte Ann.

At ST. HELENA.—Dec. 31, from Hong Kong, Eveline, Bell.

Monetary and Commercial.

—o—

CITY, WEDNESDAY, FEB. 25.

The directors of the Chartered Mercantile Bank of India, London, and China have declared a dividend of five per cent., free of Income-tax, for the half-year ended the 31st December last.

The Agra and United Service Bank has declared a dividend at the rate of 10 per cent. per annum for the half-year ended the 31st of December last, with a bonus of £1 per share.

Three more ships belonging to the late Duncan Dunbar have been publicly sold at Lloyd's Captains'-room. The sale, which was ordered by the executors of the deceased, drew together a large attendance of shipowners and merchants. The result was as follows:—The *Dunphaille Castle*, described as 720 tons N.M., nearly a new ship, built at Sunderland in 1861, of teak, and classed A 1 for 13 years, fetched £13,450; Mr. John Allan, of Leadenhall-street, was the purchaser. The ship *Maida*, a clipper-built barque, 519 tons, built at Moulmein in 1857, and classed 13 years A 1, sold for £5,300, to Messrs. Ogleby and Moore, of the City. The third ship, the *David Malcolm*, 500 tons, launched in 1837, realised £2,810.

A deputation from the Salt Chamber of Commerce, consisting of Mr. Blackwell, chairman; Mr. Corbett, deputy chairman; Mr. Falk, and Mr. Hadfield, had interviews with Mr. Milner Gibson at the Board of Trade, and Earl Russell at the Foreign-office, on the subject of the admission of English salt into France and into China. The deputation was accompanied by Mr. Laird, M.P., Sir John Pakington, Bart., M.P., and Mr. Greenall, M.P.

The advices from America disclose some remarkable proceedings of the Washington Cabinet with regard to the republic of New Grenada and the Isthmus of Panama. The relations with that republic have not been on a satisfactory footing since the outrage committed on its independence last year by the transmission of Federal troops across its territory, and it now appears that, although General Mosquera has been *de facto* President of the country for nearly two years, and has brought it to a state of order and prospective prosperity, the Washington Government have within the past few months, in the face of all their protestations to Europe of the iniquity that would characterise any foreign intervention in their own domestic affairs, been actively engaged in endeavouring to induce the European Powers to sanction an intervention against the existing authorities in New Grenada in favour of the discarded President, General Ospina. The pretext on which the interference was suggested was the desirableness of preserving the safety and tranquillity of the Isthmus transit against all revolutionary movements; and the plan proposed was to send 300 United States' cavalry for that purpose, ostensibly in accordance with the terms of the Clayton-Bulwer Treaty, but really, as it would seem, to discourage and threaten the "revolutionary chief," General Mosquera, whose overthrow would have turned the Republic back to its old position of impotence and anarchy. Reviewing the entire correspondence, the *New York Evening Post* observes:—

"The French Minister rejected the proposition of Mr. Seward as promptly as did Earl Russell, and it is only wonderful that they did not take advantage of his conduct to turn the tables upon him, by asking him how he could now object to intervention on the part of France and England when their interests were so seriously affected, when he was ready to intervene in the affairs of New Grenada without any real reason whatever, when no treaty required any intervention, and, if it did, the event had not occurred by which it might be excused or palliated? If the French and English Ministers had chosen to take advantage of us, they might have done so, and put forth this precedent as authority. They might have easily sent a small force to join our own, taken possession of the Isthmus, and made use of the act to justify an immediate and even armed intervention in our affairs. What the people and Government of New Grenada will think when they come to read this correspondence—what this sister republic, having a trade with us of $5,000,000 per annum, that has granted an American railroad company one of the greatest franchises of the times, and that constantly seeks our friendship and alliance, will think—what President Mosquera will think of us when he learns that our Secretary of State was ready, without cause, and on the request of an unfaithful and discarded foreign Minister, to intervene with an armed force in the domestic affairs of Colombia, at the very time he was using all his eloquence and energy to prevent intervention on the part of England and France, remains to be seen."

The ratifications of a Treaty of Commerce and Navigation between the United States and the Republic of Liberia were exchanged in London by Mr. Adams, the American Minister, and Mr. Ralston, the Consul-General for Liberia. This is the first treaty and recognition of complete equality between the two countries. England recognised the Republic, and entered into a treaty fourteen years ago, and has since been followed by most of the other Powers, but the Washington Government have until now always held aloof from a step of this nature with a coloured community.

The following statement of the Confederate finances appeared in the *Daily News*, which, it must be remembered, is a Federal advocate:—

TO THE EDITOR OF THE "DAILY NEWS."

Sir,—We hear a great deal of the Federal finances, but rarely have any officially statement from the Confederates. By the last mail a copy was received of the financial statement presented to the Confederate Congress by the Secretary of the Treasury, which perhaps you may consider sufficiently interesting to reproduce. I enclose an analysis turned into sterling, and put in a distinct form.

It will be seen that at a moment when the currency is already at 60 per cent. discount, the Government are in immediate want of no less than £71,000,000, and with no resource but a further issue of notes.

To meet the emergency a very extraordinary measure is proposed. Experience has proved that the amount of notes which can be cancelled by voluntary conversion into bonds is very small, partly because there is a natural distrust of the stability or solvency of the Confederate Government, but chiefly because the holders of currency cannot afford to invest it. They want it for everyday transactions, and have not the means to turn the money in hand into stocks, however good or profitable these might be.

Under these circumstances the Secretary recommends that the conversion shall be compulsory. All notes issued prior to the 1st of December, 1862, must be brought in and converted into bonds before a certain date, after which they will cease to be currency, and become useless to the holders. When they are thus withdrawn, it is hoped that the new issue of 70 millions will float without further depreciating the value of the currency.

This amounts to a forced loan of the whole amount of currency now out. If practicable, it would be in the highest degree unjust, but it is impossible, or possible only by the utter destruction of the value of Confederate Government securities and notes.

In proportion to the relative population of the two sections of the American States, it would seem that the embarrassments of the Confederates are greater than those of the Federals. In fact the Confederate finances appear by this statement to be in a desperate condition.—I am, &c.,
Feb. 16. J.

CONFEDERATE FINANCIAL STATEMENT.

Presented Jan. 10, 1863, to Confederate Congress at Richmond, by the Secretary of the Treasury.

RECEIPTS FROM FEB. 19 TO DEC. 31, 1862.

Customs and miscellaneous	£1,368,000	
War tax	3,333,000	
		£4,701,000
Loans on call	£11,948,000	
	9,062,000	
		21,010,000
Interest bearing notes issued	£22,748,000	
Circulation issued (Treasury notes)	43,111,000	
		65,859,000
		£91,570,000

EXPENDITURE FROM FEB. 19 TO DEC. 31, 1862.

Debt owing on 19th Feb. on former account	£5,287,500	
War debt	68,202,500	
Navy	4,112,000	
Miscellaneous, civil service, &c.	2,734,500	
Interest on Bonds and redemption of old Treasury notes	8,345,000	
		88,681,500
Balance in Treasury (notes not issued and coin)		£2,888,500

ESTIMATE FOR HALF YEAR TO 1ST JULY, 1863.

EXPENDITURE.

Appropriations voted, but not yet paid (1862)	£16,376,000	
War Department, half-year	43,595,500	
Navy	3,389,500	
Miscellaneous and Civil Service	6,113,500	
	£74,474,500	
Deduct balance in hand	2,888,500	
Total to be provided before 1st July		£71,586,000

DEBT ON 31ST DEC., 1862.

Bonds and Stocks	£29,095,000	
Notes issued bearing interest	£26,478,000	82,126,000
Currency	£5,648,000	
		£111,221,000

NOTE.—The amounts are stated in round numbers at five dollars to the pound sterling.

The actual value in December, as stated in the intercepted despatches, was 5 cents currency to the 1d. sterling, equivalent to a premium of rather more than 150 per cent. on gold; and the paper dollar therefore was worth rather under 40 cents, or 60 per cent. discount.

The committee of Lloyd's have determined to close that establishment on the day of the marriage of the Prince of Wales, the 10th of March, and it is fully anticipated that the Stock Exchange, the Baltic, and Jerusalem Coffee Houses, and other places of commercial resort, will follow the same course.

Digitized by Google

It is expected that the budget will not be introduced until after Easter. Probably about the 17th of April may be about the date. Anticipations regarding reductions in the tea and sugar duties are becoming less sanguine, but after the evidence lately brought forward, it is difficult to believe that Mr. Gladstone can intend any longer to maintain the form of protection involved in the differential rates on sugar. The motion placed upon the notice paper in the House of Commons for a general alteration of these duties has taken the trade entirely by surprise, and the terms in which it is stated are so vague, that the parties interested have been unable to arrive at any clear conclusion as to its probable effect. Their uncertainty has been prolonged by the absence of Mr. Gladstone from his official post, owing to the death of his brother.

The biddings for £400,000 in bills on India took place at the Bank of England, the amounts apportioned being £236,800 to Calcutta, £160,000 to Bombay, and £3,200 to Madras. The declared *minimum* in each case was the same as on the last occasion, 1s. 11¾d. per rupee on Calcutta, and 2s. on Bombay and Madras, and the applications within the limits were for about £1,070,000. Tenders on Calcutta at 1s. 11¾d. will receive about 53 per cent., on Bombay at 2s. about 19 per cent., and on Madras at 2s. in full.

The report of the Southampton Dock Company, to be presented at the half-yearly meeting on the 25th inst., states the available balance at £10,636, out of which a dividend is recommended at the rate of 4½ per cent. per annum, leaving £2,528 to be carried forward.

An amalgamation has been made of the London banking firm of Messrs. Heywood, Kennards, and Co., with the joint-stock "Bank of Manchester." The arrangement will date retrospectively, to the 1st of January last, and the London business will continue without the slightest change, except of a formal character. The Bank of Manchester was established in 1828, and was the first that had the courage to enrol itself under the Limited Liability Act—a step which was attended by an accession of business, and which caused a number of the leading and most prudent persons in Manchester to become shareholders and to join the direction who would rightly have refused to connect themselves with any joint-stock bank whatever on the old system. The capital of the Bank of Manchester consists of 56,731 shares, of £10 each, on which £4 has been paid, making a total of 226,924; and Messrs. Heywood, Kennards, and Co. are to supply in their private capacity a similar amount, so that the shareholdings in London and Manchester will be equal. At present the Board of the Bank of Manchester consists of twelve directors. The number will be increased to eighteen, and Mr. J. P. Heywood is to be chairman and Mr. Coleridge Kennard managing director. At the last meeting of the Bank of Manchester the dividend declared was at the rate of ten per cent. per annum, and the reserve fund was stated at £45,638. A week ago the shares were at 3½ prem., and they have since advanced to 4½ to 5.

The report of the Oriental and General Marine Insurance Company will be found in another column. The accounts show that after having paid all the preliminary expenses incurred in the formation, as also all charges, salaries, expenses, &c., together with claims for losses, averages, and returns, adjusted to the 31st December last, there remains a surplus of £48,216. The directors recommend that £3,039 be applied to the payment of interest at the rate of 5 per cent. upon the paid-up capital of the company, and that the remainder be carried forward in the usual course. It will be seen that the directors have appointed agents in India and China for the adjustment of claims, and policies are now granted payable there. The agents in Singapore are Messrs. Cumming, Beaver and Co., and Messrs. Johnson and Co., of Hong Kong and Shanghai. The business of this office has been conducted with great prudence and success, and the appointment of Mr. Secretan as the underwriter has been attended with the satisfactory results we anticipated.

Telegrams have reached Lloyd's, from their agent at Alexandria, communicating the loss of another steamer belonging to the British India Steam Navigation Company, called the *Burmah*, 777 gross tonnage, which appears to have taken place on the 21st of last month, on the coast of Pulicat, to the north of Madras. The telegram states that she left Madras on the previous day for Negapatam, with passengers and a general cargo, and her going ashore at the place mentioned is attributed to a strong current setting in towards the coast. The spot where the ship is said to lie is a considerable distance to the northward of that where the *Jason* steamer was wrecked only a few weeks ago. The *Burmah* was an iron built steamer, 229 feet long, 29 feet beam, and 26 feet in depth in the hold. Her engines were of 160-horse power. She was built at Greenock in 1858, under special survey, and was classed in Lloyd's Register as A 1 for 12 years. The *Bussorah*, which foundered a short time since off the Isle of Islay, on her way to Bombay from Greenock, as reported in our last, belonged to the same company. The *Burmah* is reported to be fully insured at Lloyd's.

At the half-yearly meeting of the Bank of Egypt, the report, which was adopted, showed that the net profits for the half-year amounted to £10,157, which, added to £5,255 balance brought forward from the previous half-year, made £15,413 available for appropriation; £2,000 balance of preliminary expenses was written off, and a dividend at the rate of 7 per cent. per annum was declared, free of Income-tax, payable on the 25th inst. This left £4,663 to be carried forward.

The bar silver brought by the West India packet has been sold for India at 61¼d. per oz., showing no alteration from the price obtained for the last arrival. Transactions to some extent have, however, been effected in the interval at a fraction higher. Some Mexican dollars which arrived by the *Gipsy Queen*, from Matamoras, have been disposed of at 65½d. per oz. for shipment to China by the steamer just sailed.

The following is from the *New York Times*:—

"Among the arrivals at San Francisco was a ship from Shanghai, bringing as cargo 700 bales of cotton goods (drills and sheetings) from China. Considering the enormous prices of cotton goods in this country, this is not at all wonderful. Cotton can be raised in China cheaper than in any other part of the world, except the Southern States, owing to the great abundance and low price of labour; and from the same cause, it can be manufactured cheaper there than anywhere else, except in Europe and this country, where there is labour-saving machinery. Still, China has never produced enough for her own use, and has imported largely from the East Indies. But the temptation of the high prices ruling here is too much for the Celestials. When John Chinaman learns that cotton in New York sells at 90 cents per lb., he will ship every ounce of it he can find or raise, and, if necessary, go naked himself. If cotton goods keep up at their present price for any length of time, we should not wonder to see all New York during the coming summer dressed in nankeens. Nothing could be better for the warm weather, or more economical for the hard times. California will find this a fine beginning for that immense Oriental trade she so much covets, and is bound some day to enjoy."

The chief Customs' duties produced the following sums in the year 1862:—The duty on sugar, £6,641,231; the duty on tobacco, £5,714,448; on tea, £5,582,793; on foreign and colonial spirits, £2,622,728; on wine, £1,123,605; on corn, £962,482.

The *Mary Lee*, from Hong Kong, has arrived at Liverpool with a full cargo of cotton from China, the first full cargo which has ever reached Liverpool from Hong Kong.

A further portion of the plant and stock for the Singapore Gas Works is engaged to go out in the *Benvoirloch*, and a number of skilled mechanics will proceed by an early mail.

Gold at New York had risen to 155¾ and 156¼. Provisions steady; flour, 10c. to 15c. better. Cotton 91c. per pound.

The final arrangements for the proposed loan of £3,000,000, on the security of cotton, have been made between Messrs. Erlanger and Co., of Paris and Frankfort, and the Confederate Government, with the consent of Congress, and the particulars will probably be issued in a day or two.

The Board of Trade Returns for the month and twelve months ended December 31st, 1862, have been issued. The total declared value of the exports of British and Irish produce, &c., in 1862, as compared with the two previous years is as follows:—For the year 1860, £135,891,227; for 1861, £125,102,814; for 1862, £124,137,812. There has thus been a noticeable decrease in the value of last year's exports as compared with 1861, and a still greater decrease as compared with 1860.

To CHINA.—Cotton Yarn: The value of the amount exported in 1862 was £183,963 against £307,238 in 1861, and £410,416 in 1860. Cotton Goods: The quantity exported in 1862, reached in value £1,265,668 in 1862 against £3,177,048 in 1861, and £3,157,359 in 1860. Lead: Value of exports in 1862, £208,196 against £122,788 in 1861, and £114,035 in 1860. Woollen and Worsted manufactures: Value of exports £26[illegible],467, in 1862, against £330,528 in 1861, and £400,627 in 1860. Worsted Stuffs: Value of exports £425,755 in 1862 against £350,155 in 1861, and £450,417 in 1860.

To PHILIPPINE ISLANDS.—British and Irish produce and manufactures: Value of exports in 1862 £448,574, against £784,564 in 1861, and £674,235 in 1860.

To JAVA.—Cotton goods: Value of exports to Java in 1862 was £496,180, against £758,401 in 1861, and £1,061,372 in 1860.

To SINGAPORE.—Cotton goods: The value exported in December last was £34,408, exceeding considerably that of the export of December,

Digitized by Google

1861, amounting to £5,182; but the value of the exports for the whole year fall short of 1861, £576,349 representing 1862, and £616,189 being the value of the exports for 1861.

To CEYLON.—Cotton goods: Value of exports for 1862 was £310,562, against £302,673 in 1861. The value of exported quantity up to Dec. last, included in the preceding amount, was £49,332, against £2,369 in the concluding month of 1861.

The amount of bullion by the P. and O. Company's steamer *Pera*, from Southampton on the 20th inst., was—In gold, to Alexandria, £4,500; to Ceylon, £2,101; to Madras, £1,309. In silver, to Calcutta, £30,000; to Hong Kong, £43,080; to Shanghai, £9,921; to Hobson's Bay. £400. Total—in gold, £7,910; in silver, £83,401.

ARTICLES OF IMPORT.

TEA.—Our market during the past fortnight has not been quite so active, but a moderate amount of business continues to be transacted, and prices, on the whole, have been fairly maintained. The arrivals continue on a very large scale, and have generally been readily saleable, the probability of a reduction of duty still influencing our market favourably. Dusty and broken leaf kinds of Congou have sold to some extent at about previous prices; the leafy kinds have sold about ½d. per lb. lower. Good Common is scarce, and is quoted 1s. 1d. to 1s. 1¼d. per lb. Flavory kinds of old import have sold ½d. per lb. dearer; also good Ho-Hows and Ning Chows. The medium Kaisow kinds, ranging from 1s. 4d. to 1s. 7d., per lb., have been rather difficult of sale, and prices somewhat irregular; but latterly they have been rather more in request. The demand for second-class Monings, Wopaks, and Honams has been steady at fully previous prices. Good Kaisows have not been so much in demand. Fine to finest Monings have only been in limited demand. Fine to finest Kaisows are still asked for. Tayshans have met with a fair inquiry at former rates. Fair to good Oolongs have been heavy and prices rule rather lower; fine to finest have been rather more wanted. Souchongs of all descriptions continue saleable at very full prices. There has been some business in Flowery Pekoes, but prices are rather low. Common Scented Capers show no change: fair to good and fine have been more saleable at a slight advance. Fair to good and fine Orange Pekoes of Canton make are saleable at former prices. Foo-chow kinds have been in full supply, and prices have given way 1d. to 1½d per lb. Uncoloured Japans are in demand at 1s. 3d. to 1s. 5d. per lb. Assam and Cachar kinds find a ready sale at extreme prices. In Green Teas there is not much now to notice. Common to fair Young Hysons have been rather more saleable at former prices. Hysons continue in demand for export. Imperials and Gunpowders are also saleable at full prices, the fine Moyune kinds being scarce. Japan Young Hysons of old import remain almost unsaleable, the new seasons being better made, are taken rather more readily. Canton made Young Hysons and Gunpowders show no material alteration. The public sales comprised 17,527 packages, of which 4,358 packages were sold, including 2,577 packages offered without reserve.

SILK.—The report of this market will be found in our postscript in "Latest Intelligence."

SUGAR.—The firmness which characterised the market, has been followed by a slackening of the demand and somewhat easier prices. We now quote Siam and China, white 24s. to 29s.; brown and yellow 15s. 6d. to 23s. 6d.; Manila 19s. to 20s. 6d.; Muscovade 15s. to 16s. 6d.; Java from 26s. to 29s., according to quality. At auction 514 bags Bengal (Cossipore syrups), were bought in at 35s. 6d. to 36s. 6d. 491 bags low and middling yellow Penang sold at 34s. to 35s. 6d. Very little business has been transacted in refined sugar, but easier rates have been accepted.

COFFEE.—There is little activity in the market, but previous rates have been sustained; supplies scanty. Ceylon, Plantation, meets a fair inquiry, although transactions are necessarily limited by the small stock on hand; privately 150 casks have changed hands at 74s. to 74s. 6d.; native is firm at former prices, good ordinary, mixed to superior, 73s. to 75s. 6d.; fine picked, 78s.; superior garblings, 68s. to 69s. 6d. Our quotations are—Mocha, ungarbled, 60s. to 78s.; garbled, common to good, 80s. to 94s.; fine, 96s. to 103s.; Ceylon, native, good ordinary to fine, 72s. to 76s.; ordinary, 68s. to 71s.; Plantation, ordinary to fine ordinary, 73s. to 84s.; fine fine ordinary to middling, 84s. 6d. to 87s. 6d.; good middling to fine, 88s. to 94s.; Java, 67s. to 87s.; Singapore, ordinary and good ordinary, 58s. to 73s.; Sumatra and Padang, 57s. to 72s.; Madras and Tellicherry, 71. to 100s.

RICE.—Market quiet, but all descriptions are at about former rates. Transactions of a tolerably fair amount have taken place, namely, 30,000 bags, middling hard to good white Bengal, 11s. 6d. to 14s.; cargo sort and ordinary Ballam, 8s. to 8s. 3d.; fair to fine Rangoon, 10s. 3d. to 11s.; weavily Moulmein, 8s. 7½d.; and ordinary Nakrenzie, 8s. 6d. At auction, 4,252 bags Bengal were chiefly withdrawn, only about 1,500 bags Ballam finding buyers, common quality 8s. good 8s. 6d. to 9s.; 9,599 bags Rangoon were all bought in, weavily and low middling 8s. to 9s. Floating cargoes have attracted no attention.

PEPPER.—A firm tone pervades this market, and full prices have been obtained at auction. We quote Malabar at 3¾d. to 4¼d. per lb., Eastern, 3¾d. to 4d.; White, 5d. to 1s. 2d. per lb. At auction 778 bags Singapore Black, greyish to fair, brought 3¾d. to 3⅞d.; and 569 bags common to fair Batavia, 3¼d. to 3⅝d.; limited sales have also been made privately on similar terms. In auction, 464 bags Singapore White, middling quality, were sold at 5¼d., one lot bold 6¼d. per lb.

SAGO.—We quote this article at 16s. to 25s. per cwt. In public sale, 1,138 boxes were nearly all disposed of; extra large grain, 20s; good, 19s. to 19s. 6d.; bold medium, 18s. 6d. to 19s.; fine small medium, 20s. 6d. to 21s. 6d. Sago Flour: Transactions limited; prices range from 13s. 6d. to 14s. per cwt.

SPICES.—Cassia Lignea: Very flat; of 330 cases at auction, a few only sold at 98s. per cwt. for good second quality. Our quotations are 95s. to 100s. per cwt. Of Buds there is no supply and no business; quotations are 260s. to 280s. Cloves: Nothing doing in Penang. Zanzibar steady; 317 bags sold at auction at 3¾d. to 4d. per lb. middling to good. Retail lots of Zanzibar sold privately at 4d. per lb. Ginger: We quote Calicut and Cochin at £3. 5s. to £6. 10s., which is a decided advance. Of 54 cases at auction, a few sold at 70s. per cwt. for middling wormy; the common sorts of scraped are in request. Mace: No business of consequence. We quote first quality 1s. 8d. to 2s. 3d.; second quality, 9d. to 1s. 2d. Nutmegs: These have improved slightly. Of 78 cases Singapore, and 30 cases Penang, at auction, three-fourths sold at 2s. 11d. per lb. for fair bold, and 10d. to 1s. 5d. low small to medium. 73 boxes indirect limed sold at 1s. to 1s. 1d. We quote first quality, garbled, 2s. 6d. to 3s. 9d.; second and third qualities, 11d. to 1s. 8d.; Cubebs: £5. 5s. to £5. 15s. Dull; 60 bags at auction all retired. Dragons' Blood: In reeds, £11 to £15 per cwt.; in lumps, £4 to £11 per cwt. Quiet; 27 cases at auction retired Galangal Root: 25s. to 30s. per cwt. Flat; 252 bags at auction retired. Musk: 1st quality, 23s. to 28s. per oz.; lowest qualities, 12s. to 21s. per oz. Nothing doing. Cinnamon: We quote first sorts 1s. 2d. to 2s. 1d. per lb.; second, 1s. to 1s. 9d.; third, 10d. to 1s. 4d.; fourth and Jungie, 8d. to 11d. Moderate business privately upon fully the currency of the recent sales. Ginger: Bengal, native, we quote at 45s. to 50s. We continue without any supply of Bengal. This market has continued dull, and of 6,925 bales brought to auction, little more than one-half found buyers. Fine qualities supported. Tapioca: 129 cases yellowish white Singapore, at auction, were realised at 1¼d., one lot 1¾d. per lb. Cardamons: Malabar is 5s. to 7s. 3d. per lb. Auctions confined to 5 cases Malabar, and one bag Madras retired; and 3 bags Ceylon sold at 4s. 11d. per lb. Privately, improved prices have been realised; 6s. 2d. obtained for Alleppy. Aloes: Steady, and of 13 cases Hepatic, at auction, half sold at £8. 15s. to £9. 15s. per cwt. for middling to fair.

HEMP.—This market has continued dull, and of 6,925 bales brought to auction, little more than one-half found buyers; fine qualities supported, and only a small proportion sold, medium 10s. to 15s., and ordinary 15s. to 20s. per ton cheaper; range, £18. 15s. to £27. 15s. for very low to fine; very little enquiry privately. Arrivals and sales for this day:—Of 1,724 bales at auction, the whole were retired, but large business has been done privately, including floating parcels. Sales for this day:—Auctions confined to 70 bales Kurrachee, sold at £28 to £28. 17s. 6d. per ton. We quote jute at £20 to £28; Manila, current quality, at £23 to £27; Sunn, £15 to £30.

SALTPETRE.—A steady demand has prevailed since our last report, and transactions of good extent have been concluded at prices in some instances again 6d. per cwt. higher. The total sales privately being 1,200 bags Bombay on the spot, the bulk 50 to 30 per cent. refraction, 33s. to 33s. 6d.; a few 21 per cent. 34s. 6d.; also 2,000 bags Bengal, 8¼ to 6¼ per cent. refraction, 37s. to 37s. 3d.; 5 to 3½ per cent., 37s. 6d. to 38s.; and 1,200 bags for arrival at 38s. to 39s., for 5 per cent. refraction, with allowances. The parcels or Bombay at auction have amounted to 2,857 bags, which have been taken off at and since as follows:—53½ to 27 per cent. refraction, 33s. to 34s.; 17¼ to 10¼ per cent., 35s. 6d. to 36s. 495 bags Bengal, and 100 barrels refined were withdrawn. Privately, about 1,200 bags Bengal have been sold, 13 to 11 per cent. refraction, 36s. 6d.; and 2¾ per cent., 37s. 9d. cash.

COTTON.—The market has been dull and drooping since Friday last, and prices at the close are ¼d. per lb. lower, the sales on the spot being only 2,300 bales, middling fair to fair Dhollera (Surat), 15½d. to 16¼d.; fully fair Broach, 16s. to 16¾d.; fully fair Western Madras, 15¼d. to 16d.; good fair Tinnivelli, 15¼d. to 15¾d.; and middling fair to good fair Bengal, 12¼d. to 12¾d.; while, for arrival, business has been restricted to 530 bales. We quote Madras at 1s. 1¾d. to 1s. 3¾d. per lb., Surat at 1s. 1d. to 1s. 7¾d. per lb.

TIN.—Banca and Straits have remained firm and generally active, prices advancing 30s. per ton in the fortnight; business large in both descriptions up to our higher quotations; sales also made for arrival in Straits. English Tin advanced, on the 24th inst., £4 per ton. We quote Banca £122 to £123. 10s. per ton; Straits, £121 to £122. 10s.

JAPAN WAX.—Of 670 cases offered at auction, only part were disposed of at 72s., the rest being withdrawn at 75s.

MANCHESTER MARKETS.

The yarn market has been very flat, and we have scarcely had any business for any quarter. In some cases prices have been rather easier. There has been a trifling inquiry for some kinds of mule yarns for India, but the prices offered have been very low, and it has led to very little business. The dulness, in fact, almost amounts to a suspension of business. The total stock of cotton at Liverpool continues rather large compared with the present rate of demand. At the close of last week it was 415,000 bales, or equal to about twenty-six weeks' consumption at 16,000 bales per week. The quantity at sea (East Indian) was 182,000 bales, against 140,000 at the same time last year. Less than twenty weeks' supply was considered good when the production was fully equal to the whole consuming power of the country, and many of our spinners think the present stock should keep prices at Liverpool more in check. It is evident that consumers are buying very moderately at the present high rates, and many people think it is equally clear that with the heavy stocks of goods still on hand, the out-turn of the mills yet working is larger than will find its way into consumption at the present high range of prices. An illustration of the way in which dear calico is stimulating the trade in woollen fabrics (to say nothing of linen, silk, and mixed goods) has transpired in a local circumstance of some novelty. It has been long a custom (more peculiar to Lancashire and Yorkshire perhaps than to many other counties) to stuff beds with woollen flocks instead of feathers. In times when wool has been plentiful and cheap, it has no doubt occurred that wool of a very fair quality has been used for this purpose, and the fact referred to above is, that of late small dealers have been industriously engaged in hunting up woollen-flock beds, and either buying them from the owners, or giving a sum of money to be allowed to take out these flocks, and substitute for them cotton flocks, or some other material of less value.

FREIGHTS AND CHARTERS.

Outward Freights are firm, and vessels continue in good request. Homeward Freights remain active; the quotation for vessels from Manila is 77s. 6d. to 80s. per ton.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 30s. to 35s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 45s. weight, 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £40 and £1. 17s. 6d. For Shanghai: £50 and £2. 7s. 6d. For Manila, £1. 12s. to £1. 12s. 6d. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £26 and £1. 8s. For Penang, £24. For Galle, £26 and £1. 10s. 6d. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have offered the following Government stores for tender, viz:—8 tons (ball cartridges), and 6 tons light freight for Colombo, also 16 tons seamen's clothing to Trincomalee, both from the River Thames.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 45s. to 55s.; Shanghai, 35s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

CASUALTIES.

The Almelo, Tjebbes, from Tjilatjap to Amsterdam, had put into the Cocos Islands leaky, but was ready to proceed on 22nd Nov.

The vessel bound from Manila to Liverpool, which was abandoned 25th Jan., in lat. 34 N., long. 31 W., was the Persian of London, as before reported—Savage, master.

A collision took place at Marseilles on the morning of the 5th of February, between the French mail steamers Phase, which was coming in from Alexandria, and the Labourdonnais, which was getting to her berth. The bow of the Phase ran into the side of the latter vessel, and remained in that state the next day.

The Charles Henry, Ricknaers, from Antwerp for Manila, put into Portsmouth 15th Feb. leaky.

The Kestrel, from London for Shanghai, put into Simon's Bay 7th Jan. with damage to rudder.

At TABLE BAY.—Dec. 23, from Manila, Silver Cloud; 21, Orca; Jan. 4, Oriental; sailed Dec. 25 for China, Teresa; Jan. 2, for Ceylon, Liberator.

At SIMON'S BAY.—Jan. 9, from Hong Kong, H.M.S. Imperieuse.

At ALGOA BAY.—Dec. 23, sailed for Batavia, Kiandra.

At ST. HELENA.—Dec. 30, from Batavia, Anna, Bok, and sailed for Rotterdam.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG

WILLIAM McDONALD,

MARINE SURVEYOR, SHIP AND BILL BROKER AND COMMISSION AGENT, YOKOHAMA, JAPAN.

SURVEYOR TO LLOYDS.

ADAMS, 76, King William-street, London, E.C.

TWOFOLD EXTRAORDINARY CURE EFFECTED BY HOLLOWAY'S PILLS AND OINTMENT.—Mr J. Webb, Boot and Shoe Maker, Chapel-street, Cahirciwin, Ireland, writes under date Jan. 14th, 1863, that he had been afflicted for 17 years with a most dreadful asthmatic cough and shortness of breath, and latterly was also subject to benumbed sensations in his limbs, attended with heavy, drowsy feelings, which threatened an apoplectic fit. In alarm he consulted the most skilful of the Profession within many miles of his residence without avail, and fruitlessly used every means recommended by Friends. At last he heard of the repute of Holloway's remedies, and resolved, with Death staring him in the face, to give them a trial. These immediately relieved, and ultimately cured him.

THE JAPAN HERALD (the only Journal published in Japan) is rendered interesting to the general reader by the usual leaders and discussions on passing events, by its local intelligence, and by frequent notices of the People, their Government, Laws, Literature, and Manufactures, and of the natural productions of the country; whilst the Merchant and Trader will find his interests consulted by a carefully compiled statement of Exports of the two staples, Silk and Tea, of the current seasons, showing the comparison with the same time last year—also by authentic Market Reports of Imports and Exports, with the usual Shipping List of Arrivals and Departures, in Harbour, &c.

Published Weekly—Price 25 dollars per annum.

Files of this Paper may be seen at the following Offices in London, where orders for subscriptions and advertisements will be received, viz.:—LONDON and CHINA TELEGRAPH, George-yard, Lombard-street; Mr. F. Algar Newspaper Agency Office, 11, Clement's-lane; and Mr. George Street, 30, Cornhill, or such orders may be sent direct to the Proprietors of the *Japan Herald*, Yokohama, Japan.

LIFE DEPARTMENT.
(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world for which no extra premium is charged.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying an unchanging rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.
(Payable during the entire currency of the Policy.)

Age.	Without Profits.	With Profits.	Age	Without Profits.	With Profits.

THE ORIENTAL AND GENERAL MARINE INSURANCE COMPANY.

(Established 1861.)

DIRECTORS.

Elias Mocatta, Esq. | Moses Moses, Esq.
C. F. Picard, Esq. | Thomas B. Yule, Esq.
Thomas Cave, Esq. | John Rogerson, Esq.

UNDERWRITER.—Philip Secretan, Esq.

REPORT of the Directors presented to the First General Meeting of Shareholders, held at the London Tavern, on Thursday, the 26th day of February, 1863:—

The Directors submit to the Shareholders the Accounts and Balance sheet of the Company, showing the result of its operations from the commencement of business in October, 1861, to the 31st December, 1862.

These accounts, which have been duly examined and verified by the auditors, show, that after having paid all the preliminary expenses incurred in the formation of the Company, as also all charges, salaries, expenses, &c., together with all claims for losses, averages, and returns adjusted to the 31st December last, there remains a surplus of £48,216. 15s. 8d.

The Directors recommend that £3,039 be applied in payment of interest at the rate of £5 per cent. upon the paid-up Capital of the Company, and that the remainder be carried forward in usual course.

In accordance with the Deed of Settlement, the two following Directors retire in rotation:—C. F. Picard, Esq., and Thomas Cave, Esq. These gentlemen, being eligible, offer themselves for re-election.

The auditors, J. H. Wood, Esq, and I. Notman, Esq., holding office only until the present meeting, now retire, and being eligible, offer themselves for re-election.

The Directors are happy to be able to state that the business of the Company is steadily increasing, and that they entertain well-founded hopes of its permanent success.

The Directors have much pleasure in announcing that they have completed arrangements with the under-mentioned firms, to act as Agents for the Company at the following places in India and China, viz.:—

BOMBAY	Ritchie, Steuart and Co.
CALCUTTA...	Grant, Smith and Co.
SINGAPORE	Cumming, Beaver and Co.
HONG KONG	Johnson and Co.
SHANGHAI...	Johnson and Co.

where in future losses and claims can be made payable on policies granted by the Company.

By order,
JOHN SCOTT, Secretary.

London, 16th February, 1863.

SEA FRONTAGE.

AT

HONG KONG.

FOR SALE.—IMPORTANT and VALUABLE BUSINESS PREMISES on the Harbour of "Victoria, Hong Kong," situate near the centre of the City, having Extensive Frontage (of upward of 250 feet each) to the "Praya or Wharf" and "Queen's Road," by nearly an equal depth, comprising Marine Lots No. 65 and 65A, upward of 62,000 square feet area, held by lease from the Crown for a Term of 999 Years from October, 1844, at an annual ground rent of £160 per acre, and will be SOLD by PUBLIC AUCTION at Hong Kong the first week in June next; and possession given on completion of the purchase not later than Midsummer, 1863. A portion of the purchase money can remain on mortgage if required.

This desirable property offers to the Merchant or Public Company a most eligible building site, bounded by Public thoroughfares, suitable for the erection of warehouses with extensive vaults (the latter partially completed); or the whole of the buildings at present erected could be demolished, and a large Steam Boat Depôt, Tea Hong, or Mercantile Offices erected in their stead, with the material (100,000 cubic feet of hewn granite) now on the land; or to suit persons with smaller pretensions, the land might be divided into two pieces. There is sufficient depth of water for ships close in shore; moorings already laid down, and a stone Jettie or Public landing in front.

"Victoria" is a Free Port, offering special advantages to the Merchant seeking an Insurable Depôt for his goods; it is convenient to the Great Marts and disturbed Provinces of China, quite safe from "Rebel" and "Imperial" attack, and the Port where the teeming Traders and Mercantile Marine from those Marts and Provinces carry on a peaceable thriving trade, similar to that yearly developed between "Singapore" and "The Eastern Archipelago."—Further particulars may be had of the Auctioneer, "Victoria Exchange," Queen's-road, Hong Kong.

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PERFUME—a most delicate perfume of exquisite fragrance.

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.
12, THREE KINGS COURT, LOMBARD-STREET LONDON.

TO PARENTS AND GUARDIANS.

A LADY residing near the Crystal Palace, in every way qualified for the CARE of YOUNG CHILDREN, wishes to take CHARGE of TWO, between the ages of Four and Seven years, to train and educate with her own children, and share in every comfort and attention of a well-ordered, cheerful, and happy home. Terms, fifty guineas per annum. Parents residing abroad, and wishing to leave their children in England, will find this specially suitable, the Advertiser being fully conversant with India life, having resided in the East.—Address, EDUCATION, Office of this Paper 12, George-yard, Lombard-street, London, E.C.

FOR BATAVIA, the Fine Fast-sailing barque WILLIAM SIMPSON, A 1, thirteen years, 396 tons per register, coppered and copper-fastened th oughout. DAVID NAPIER, Commander. Lying in the St Katharine Dock. Has superior accommodation for passengers.

For Freight or Passage apply to the owners, Thornton and Wests, Old Swan Wharf; or to Rangel, Woollett and Co., 1, Lime-street-square.

ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Solent ...	W.I.D.	March 2.
Shanghai	Fairlight ...	W.I.D.	With des.
Kanagawa (Japan) ...	Esperanza ...	W.I.D.	March 5.
Manila	Manila ...	W.I.D.	With des.
Singapore & Penang...	Daylight ...	W.I.D.	With des.

London, 5, Newman's-court, Cornhill; or York-chambers, 55, King-street, Manchester.

PREPARATORY EDUCATION, BRIGHTON.

A LADY residing in a healthy locality of Brighton, receives a limited number of BOYS for EDUCATION, and offers superior advantages on moderate terms. Parents who reside abroad would find this a desirable home for their children from 3 to 11 years of age. Satisfactory references given. Address to "Alpha," at the office of this Paper, 12, George-yard, Lombard-street, E.C.

H. FOGG & CO.,

SHIP CHANDLERS, GENERAL STORE-KEEPERS, AUCTIONEERS, AND GENERAL AGENTS, SHANGHAI.

Agents for The London and China Express, and The London and China Telegraph.

NOTICE.

DELFINO, NORONHA, PRINTER, OSWALD'S-TERRACE, VICTORIA, HONG KONG (Established 1847), begs to inform the community that being amply provided with printing materials of all kinds, from the best London tradesmen, he can undertake every variety of job-printing, and execute the same with neatness and despatch, upon moderate terms.

Overland prices current, embracing tabular work, executed on the hortest notice.

AMOY DOCK COMPANY.

VESSELS DOCKED and REPAIRED on the most reasonable terms. A large stock of Timber, Spars, Lumber, Copper and Metal Sheathing, Iron, Naval Stores, Blocks, Rope, Canvass, Chain, Paints, and all requisites for Repair of Vessels, constantly on hand.

EVERY DESCRIPTION OF SHIPSMITH WORK.

All work executed under European Superintendance, either at the Dock Yard or Afloat.

The Dock is built of Granite, has a Caisson Gate, and can receive Vessels of heavy draught, not over 300 feet long.

NOTICE.

THE undersigned has this day established himself as Public Tea Inspector at this port. Temporary Address—Messrs. Smith, Kennedy, and Co.

HUGH INNES.

Shanghai, September 15th, 1862.

TELEGRAPHIC COMMUNICATION BETWEEN ALEXANDRIA AND ENGLAND, And the Continent generally.

MR. E. ST. JOHN FAIRMAN, Merchant, Alexandria, Egypt, will undertake to receive and Forward Telegrams, &c., &c., for account of Firms abroad.

COWASJEE DINSHAW,

Close to the Landing Place Depot of EUROPEAN, CHINA, AND INDIAN WORK.

WINE, BEER, CHAMPAGNE, and SPIRITS of the best quality. Bombay-made Soda Water and Lemonade. Perfumery, Confectionery, Oilman's Stores, and Stationery of every description. Sola Topees and Canvas Shoes, &c., &c., &c.

STEAMER POINT, ADEN.

Drawing and Reading-room free to Passengers.

THE "LONDON AND CHINA EXPRESS" SOLD HERE.

THE LONDON AND CHINA TELEGRAPH.

THE FOURTH Volume of this JOURNAL was completed on the 14th Nov. 1863 The Subscription is 18s. per annum, or 6s. per quarter, not including Postage, and to the Export Supplement 12s. Terms for advertising, 2s. 6d. per five lines; and 6d. for each additional line.

List of Passengers.

PASSENGERS INWARD.

By this Mail, to Marseilles, per Euxine, arrived 13th March.—From Hong Kong: Mr. and Mrs. Johnson, Mr. and Mrs. Haucock, two children, and native female servant.

To Southampton, per Pera, expected to arrive 18th March.—From Galle: Mr. Lackland.

To Suez, per Bombay, arrived 4th March.—From Galle: Mr. Rose. To Alexandria.—From Hong Kong: Captain Brigg. To Malta.—From Galle: Mr. Morris.

To Galle, per Norna, arrived 16th Feb., and proceeded *via* Bombay, from Hong Kong.—For Marseilles: Mr. Deacon. For Gibraltar: Governor and Lady Gummarcies, Miss Loureira and two servants. For Southampton: Capt. Stewart, Messrs. Whitley, Mac-O'Millan, Fergusson, and Colquhoun. From Singapore.—For Marseilles: Messrs. Wilson and Cooper. For Gibraltar: Mrs. D'Almeida, children, and servants. For Southampton: Mrs. Robinson and children.

PASSENGERS OUTWARD.

By this Mail, per Ripon, March 4, from Southampton.—To Shanghai: C. Wright wife, and two children, Messrs. King, T. Walters, C. F. R. Allen, E. Sobe, J. W. Smith, and E. Sharp, W. McCorsie. To Hong Kong: Mrs. Pauncefote, infant., and European female servant, Mr. R. Coen, Surg. Snell, Lieut. Kinahan, J. B. Morris, Mr. F. C. Bishop, Mr. W. R. Robertson. To Singapore: Maria Lowe, J. Amess. To Ceylon: Mr. Wilson, Mrs. and Miss Wilson, Mr. Leechman, Mr. and Mrs. Churchill, Mrs. King Mr. A. H. Baillie, Mr., Mrs., and Miss Macartney. To Calcutta: John Sydenham and wife, Lieut. Trevenen, Mr. Bonzom, Miss Anderson, Mrs. Foster, infant., and native female servant, Mr. W. J. Elwes, J. Phelps, J. Wilson, Eliza Ward, Capt. T. John, Armourer sergts. J. Trotter and G. Tyler, Mr. Donaldson, John Cooper, William Shave, William Firby, R. Davies, Mrs. Davis's two daughters. To Madras: Mrs. Walhouse, infant., and European female servant, Thos. Timmins, Armourer sergts. H. W. Eve and J. Kydd, E. Granazki, Lieut. Auchinleck, Mrs. Allardice's native female servant. To Alexandria: Mr. C. T. Doddrell.

From Marseilles, per Vectis, to leave 12th March.—To Shanghai: Mr. A. Toulouse. To Hong Kong: Mr. and Mrs. Lay, infant, and nurse, Don Pedro Rodriguez and wife, Mr. R. Brett. To Singapore: Mr and Mrs. W. W. Cook. To Ceylon: Mr. J. R. Hine. To Calcutta: Messrs R. Stewart, F. Davidge, and G. Schweitzer. To Madras: Mr. H. D. Phillips, Mr. and Mrs. Ferrand, Lieut. and Mrs. C. Bowen.

Per P. and O. str. Poonah, 20th March, from Southampton.—To Hong Kong: Mr Despard, Mr. Wm. Keswick, Mr. Youel, Mr. W. N. Payne. To Shanghai: Mr. T. W. Walker, Mrs. Wilgoss, Mr. Higginbotham, Mr. Henry Hutchings, R.N., Mr. S. Moriarty. Mr. Shanks, Mr. Bowra To Singapore: Mr. T. R. Schofield. To Ceylon: Mr. H. Durand, Mr. L. Carey, Mr. S. Dobree, Mrs. Sabonadiere, Mr. F. W. Gill, From Marseilles, 28th March.—To Hong Kong: Mr. R. H. Chambers, Mr. R. C. Antrobus. To Shanghai: Mr. H. Lloyd, Mr. James Duncan Campbell. To Singapore: Capt. and Mrs. J. Burn. To Ceylon: Rev. C. C. and Mrs. McArthur and infant, Mr. and Mrs. George John, Mr. and Mrs. George Francis. From Suez.—To Hong Kong: Mr. Francis.

Per P. and O. str., 4th April, from Southampton.—To Hong Kong: Rev. R. K. Edwards, R.N. To Ceylon: Mr. C. Featherstonhaugh.

Summary of News from the Far East.

—o—

JAPAN.

The news from Japan by this mail is, in one respect, precisely similar to the news which has reached us again and again during the last three years. We are told that Her Majesty's Chargé d'Affaires has been informed that lawless persons are meditating disorders in Yokuhama, and that he is occupied in remonstrating with the Japanese Government against this condition of affairs. We know perfectly well, from the painful experience of the past, how much such remonstrances are worth, and we shall not, therefore, be surprised to learn that Colonel Neale's occupation, so far as it is confined to remonstrances, has proved as utterly fruitless as the reiterated and verbose protests of Sir Rutherford Alcock. The Japanese have an infinite contempt for verbal warfare; moreover, they view every concession as an acknowledgment of weakness. At present we have given them too much of both. The following is the notification issued by Colonel Neale:—

"Yokuhama, Jan. 3rd, 1863.

"A Governor of Foreign Affairs came at a late hour last night to Her Majesty's Chargé d'Affaires, and communicated to him that further reports had reached the Gorogio which had occasioned them much anxiety respecting lawless persons meditating disorders in Yokuhama. A band of Loonins are reported to be seeking in the first place an opportunity of assassinating the foreign representatives. The Japanese Government in making this communication declare that they are occupied in tracing this threatened danger to its source, and in adopting all other means in their power to restore security; in the meanwhile they beg that great caution and discretion may be exercised by the foreign community in respect to exposing themselves on the Tokaido and the neighbourhood.

"Her Majesty's Chargé d'Affaires is occupied in remonstrating with the Japanese Government against this condition of affairs, and adopting such measures of precaution with the naval and military authorities as are at present practicable, and which will consist in the arrangements as announced in the previous notification of the 16th ult.

"By order of H. B. M.'s Chargé d'Affaires, &c.

"ABEL A. GOWER."

The following act of violence is recorded in the *Japan Herald* of January 3rd. :—

"On the night of Tuesday last, about half-past eleven o'clock, Captain Reid, of the ship *Wynaud*, on going to his ship, observed a native boat lying alongside; his suspicions as to some theft being committed were aroused, but on going on deck he there found a man named Edward Hassard, who had been discharged and paid off two or three days previously. He asked him what he was doing there? when immediately he felt himself wounded in the side by some sharp instrument; he then drew a belaying pin with which he struck his assailant, who immediately made for over the side, but the boatmen—it is presumed, being alarmed at the noise on deck—had cleared off, and he was obliged to return on deck, where he was promptly secured and taken off on board H.M.S. *Centaur*. The surgeon of the *Centaur* immediately attended upon Captain Reid, who was found to have received a deep wound in the left side, which, however, had been fortunately deprived of part of its severity by the murderous instrument coming in contact with a book in his pocket. Captain Reid has received every available medical assistance, but we regret to learn, continues in a very precarious condition."

The following "copy and true translation of a protest, signed by many high officials, to the Miako Government against the Tycoon's Government at Yedo" appears in the same journal;—

"When you consulted us about the new relations into which we were to enter with foreigners, you told us, upon the authority of a certain Harrisoo (Mr. Harris). the American, that the treaty would give us plenty and abundance. Both you and Harrisoo said that cotton would be sold for a mere nothing, and that silk and manufactured goods would not cost us anything. The daily necessaries of life would be brought to our country from all quarters of the globe, and our farmers would not be re-

Digitized by Google

quired to sow and reap. We anxiously expect these miracles, and at present we enjoy advantages which you never mentioned, namely, that those articles which you and Harrisoo promised to give at very low prices are now three times as expensive as they formerly were. You told us that our Treasuries would always be open to receive the enormous riches which our intercourse with foreigners would procure us. It is an undeniable fact that our Treasuries have been continually open, but, instead of receiving money, we have been called upon to sacrifice the little we possess. You monopolise the import and export duties completely, and we had a right to suppose that those duties which according to your statement and those of your financier Harrisoo would enrich the Japanese nation, ought to cover expenses such as building fortifications and buying men-of-war, which you say must inspire the barbarians with the respect due to our great country. But what have you done for the last three years? What has been the tenor of all your despatches? Japan must be fortified, fortifications must be built, the artillery and navy increased. Money is required. If we could only see those fortifications, those men-of-war, we would complain less about the expenses, but everything is proposed and nothing executed. You think that drawings and plans will scare foreigners, and cause them to flee from our country, but we doubt it, for they nearly equal us in this art. You sometimes talk to us about political economy; we candidly own you give us excellent advice, unfortunately we have numerous proofs that you do not follow the precepts you give us. Why was such an incredible sum of money spent for all the vain and useless pomp which accompanied the sister of the Mikado on her journey to Yedo, preparatory to her marriage with the Tycoon? Why was so much money wasted in rebuilding the palace of the Tycoon? We shall not mention the various ways in which the public money is wasted, as this would cause our nation to blush, and the Mikado to mourn. As you always remind us of the great principles of political economy when you demand pecuniary supplies, pardon us for making the following remark. Owing to the troubled state of the country, the presence of the Daimios at Yedo was formerly very necessary. Now this is not the case at present, and still our Lords are always travelling to and from the capital. The personal fatigue, the vexation, the expense of the immense retinue which always accompanies them, can no longer be supported.

"The time has come that these ruinous journeys should cease, and the Lords of Japan declare themselves unable to defray the expenses which you impose upon them. As foreign trade has nearly ruined us, and as fortifications and numerous other unforeseen expenses are deemed necessary in all the ports which have been opened to the barbarians, we not only demand that the new ports Osaka, Neegata, and Yedo shall not be opened, but that Kanagawa be closed. You always assert that we are opposed to friendly intercourse with foreign nations, but this is utterly false. We willingly consent to open the whole of Japan, if this step does not occasion expenses which surpass our means. We have not murdered our servants who were favourable inclined towards the opening of Japan to foreigners. We never spread insulting libels against foreigners among our people. We never called Harrisoo a fool. Arookoo (Mr. Alcock) a ————, and Borrookoroo (M. de Bellecourt) a ————. We never called the Consooroo (Consuls) drunkards, and foreign Akindo (merchants) thieves. You teach the young to despise and insult foreigners, and although you always tell us that the foreign nations are powerful, and greatly to be feared, a high functionary of the Tori lately said that 'with the exception of one of the nations, all the foreigners could be insulted with impunity.'"

The protest is signed by some of the very highest officers of many powerful princes.

CHINA.

PEKING.

There is no news of any importance from the capital, but the quiet state of affairs may be regarded as a token of success and progress. It is evident (says the *China Mail*) that the administration of Mr. Bruce is conceived in a judicious and intelligent spirit. The new policy he has commenced, of patiently submitting under protest to wrongs which do not affect the immediate security of life and property, is likely to keep us out of numerous petty troubles and false positions. Under the old plan, any refractory mandarin demanding more than the proper duties, and perhaps detaining foreign vessels until payment, was dealt with by the production of a gunboat with a sharp message from the lieutenant in charge. Mr. Bruce directs this form of redress to be discontinued; and reasonably enough, because the jurisdiction for which the old form is to be exchanged, though not quite so summary, is much more safe and effective, as well as more dignified and humane. Our Minister at Peking has now promoted friendly relations with the Emperor's Government to such an extent, at least, that redress is readily accorded in cases where mandarins and other officials take it upon themselves to act in an arbitrary manner. So long as the Emperor of China can degrade or supersede his officers at places of trade or elsewhere, we need not despair of eventually recovering all losses sustained through disregard of treaty stipulations on the part of the mandarins; and it will perhaps be found that our interests are better protected by an Ambassador at the capital than by gunboats on the spot where the injustice is done.

The Emperor of China is said to have notified his intention of issuing medals to the officers who have served in the late campaigns against the Taipings.

SHANGHAI.

Burgevine declines to consider himself dismissed until so informed from Peking. It does not appear that the charge against him, of having illegally seized the $40,000 distributed by him to the troops, can be substantiated, since the General had been requested to come to Shanghai for it. The Ward Corps is now commanded by Captain Holland, of the Marine Light Infantry, who takes the rank of Brigadier-General in the Chinese service. His appointment has satisfied the corps, who have also received their arrears of pay, and are ready for any service. A native coadjutor to General Holland has been appointed; he is not likely to have much influence, as the soldiers prefer being commanded by Englishmen. The Nanking expedition will, probably, be at once reconstructed, and preparations will doubtless be made to hold the city, as the Taipings are fully aware of all that is being done by the other side. There are still predatory bands within the thirty miles radius, but reconnoitring parties of troops go out from time to time and keep the country clear. Beyond the "radius," the Taipings, it is said, consider themselves safe.

General Burgevine's own statement is as follows concerning the late occurrences in Shanghai:—

"On Friday, the 2nd inst., I came to Shanghai from Sung-kiang for the purpose of receiving money promised on that day for the payment of the men. On landing I was informed that it was all ready, in fact, I supposed it at that moment on board one of the steamers about to start. I went at once to Takee's to thank him for so punctually keeping his promise, but was met with language so abusive that I determined to return at once to Sung-kiang, and have no more personal dealing with him. I found that place in almost a state of mutiny; proclamations posted that the men would have the heads of the mandarins, that they were starving, that they would dispose of their arms and clothing to procure food, and were ripe for an *emeute*. I ordered a general parade at 2 P.M., for the purpose of explaining why they had not been paid. Previous to this, however, I received a letter from Takee, saying the money was all ready, and urging me to send for it immediately. Captain Holland received a letter to the same effect. On the strength of this promise I guaranteed that the troops should be paid in two days. I left at once for Shanghai, but on my arrival there next morning, was coolly informed that Takee had not only denied writing the letter, but still refused to send the money. There was no forcible entrance, no confusion, the men standing quietly at "order arms" while Takee's Comprador removed the money. I was aware of the responsibility of the course I was taking, but felt justified in so doing by the critical state of affairs in Sung-kiang. There was no time for deliberation, it was truly a question of money or the existence of the force and the lives of the European officers. The money had been appropriated for the use of the troops and was immediately paid to them on its arrival at Sung-kiang. The only part of the affair I regret, is having struck Takee. In regard to the Nankin expedition, had the Chinese authorities kept faith with me in furnishing funds necessary to insure its success, the expedition would have started long since. It would have been madness to have appeared under the walls with men without winter clothing, and guns without ammunition. Moreover, the English and French authorities, both naval and military, protested against withdrawing so large a force from Sung-kiang. The troops being in arrears and discontented, and large amounts unpaid for arms, ammunition, and supplies for the expedition. I made it a point that all these claims should be paid before our departure. On this being refused, the expedition was still further delayed, and the Chinese authorities finally crushed it by withdrawing all the chartered steamers in so hurried a manner that there was not time to remove all the guns and stores on board. There was no intention on my part to deceive the Chinese Government in this matter, and I should have most assuredly carried out the plan, except for the opposition and obstacles thrown in my way. So far from there being unanimity among the Chinese authorities, nothing has pleased the Governor more than the failure of the expedition. He has long been jealous of the growing power of the force, and it has been his avowed intention to crush it, or else put a Chinese officer in command, over whom he would have unlimited control. The misunderstanding between the Chinese and myself has been still further augmented by my refusal to allow them to form the plan of campaign. The force at the present time is in a very efficient state; the men are well armed and clothed, and under good discipline. The artillery particularly

Digitized by Google

is in a splendid condition, both as regards men and guns. The cause of all these troubles has been the delay of the authorities to furnish the necessary funds.

"With reference to the notice in the paper of my dismissal, it was premature, as I had not received any official communication to that effect. As my commission proceeds from the Imperial Government at Peking, I do not recognise the right of the local authorities to deprive me of the command without the sanction of the Emperor. In the meantime I only consider myself off duty until the decision from Peking has been received. The printed notice could not have been worded in more offensive terms, and was evidently prepared with the intention of injuring me in the estimation of the public.

"Shanghai, Jan. 10th, 1863. H. A. BURGEVINE."

The *North China Herald* writes as follows with regard to the expedition against Nanking, and the conduct of General Burgevine :—

"Upon taking a dispassionate view of the whole circumstances of the case, we are of opinion that the Chinese Government have well founded grounds of complaint at the present aspect of affairs, and that the local authorities are deserving of sympathy and support. Here is a costly expeditionary force fitted out in conformity with orders received from the Imperial Government at Peking, completed and ready for action; a fleet of steamers has been hired from foreign merchants under heavy charters; an enormous debt has been incurred to the British Government for warlike supplies; in fact, nothing has been wanting in men and material, which means could procure to render this expedition complete, excepting one thing, and that was the *bona fide* intention of General Burgevine ever to carry out the plan of operations which the Chinese Government had confided to his command; and which it will be seen by the statements elsewhere, he excuses himself for, by throwing the onus on the allied commanders, who are represented as having given orders directly opposed to it. If Burgevine really intended to abide by the advice of others, who had expressed themselves against the campaign, he ought to have at once stated to the Chinese Government his intentions of so doing; and thus in some degree averted the enormous loss they will sustain in connection with this mismanaged affair."

The conduct of the Chinese authorities towards General Burgevine, has produced the following protest :—

"We, the undersigned officers of the Ward Force, commanded by General Burgevine, do hereby protest against the late action of the Chinese authorities in his affairs.

"We are perfectly satisfied that he has always acted in a straightforward and open manner, and he has never been accused of the slightest offence against the military laws recognised by European Powers; we do not now, nor did we ever consider ourselves liable to punishment by any others.

"In reference to the late occurrence in Shanghai, we know nothing more of that affair than that it was absolutely necessary to obtain the money immediately for the preservation of the force and the safety of the European and the Chinese officials.

"We also protest against the brutal attempt of the Chinese authorities to obtain the head of General Burgevine—50,000 taels being the sum offered for it, or for his secret apprehension. Should such a thing take place, we solemnly pledge ourselves, not only not to serve the Chinese authorities any longer, but to make such representation to the Imperial Government at Peking as would lead to the just punishment of his murderers."—Signed by nine majors, thirty captains, three lieutenants three gunners, and divers clerks and storekeepers.

The following account of the ratification of the Treaty with Prussia appears in the *North China Herald* :—

"The exchange of the ratifications of the Treaty made at Tien-tsin on the 2nd September, 1861, between Prussia and the Zollverein States of Germany on the one part and China on the other, took place on the 14th January at Shanghai, after negotiations regarding the various articles of the Treaty had gone on for several months between the Prussian Plenipotentiary and the Chinese authorities.

"The ceremony was performed within the precincts of the walled city of Shanghai, at the yamoon of the Imperial Commissary Leou, also holding the offices of General Treasurer and High Judge. The Prussian Plenipotentiary and Councillor of Legation, Baron Rehfues, accompanied by the Secretary of Legation, Baron Radowitz; the *attaché* Prince Wittgenstein; the Hamburg Consul, J. W. Schwemann, Esq.; the Prussian Vice-Consul Theodore Probst, Esq. (hitherto Acting-Consul for Hanover and Oldenburg), and the interpreter of the French Consulate M. Lemaire, having repaired to the above residence, were received by the Commissary Leou and the Taoutai of Shanghai. The exchange of the original treaty documents, ratified by His Majesty the King of Prussia and the Imperial Chinese Regency, also the signature of the minute recording these proceedings, took place in the usual way.

"After this ratification of the Treaty of Tien-tsin, the Prussian authorities take over the representation of all German subjects in China; the free Hanseatic towns only have reserved the right to be represented by their own Consuls.

"Baron de Rehfues and the other members of the Legation will reside for a while in Shanghai, and take charge of the Prussian Consulate-General for China. The Baron has also been charged with the exchange of ratifications of the Prussian Treaty with Japan, and will proceed to Yedo in a Prussian frigate, expected here in April next. He will afterwards return to China, where the frigate will also be stationed and remain at his disposal."

We have extracted the following statement from the *Friend of China* :—

The *Hong Kong Daily Press* of the 23rd Dec. contains a law report of considerable importance to commercial men at Consular ports, and will have a special interest here at Shanghai where the subject-matter grew. Messrs. Johnson and Co., merchants of this port, obtained from the Customs to permit to land eighty bales of grey shirtings, and had twenty-two of them on shore when the said twenty-two were seized. A bale of shirtings consists, as a rule, of 50 pieces, so that the permit intrinsically was good for 4,000 pieces. In penning the application, however, the clerk wrote, inadvertently, 80 bales, or in all 2,000 pieces; the presumption in regard to this error—Custom-house assumption—being, that Messrs. Johnson and Co. wanted to defraud His Imperial Majesty's revenue in the sum of one hundred and sixty taels. As Messrs. Johnson and Co.'s assurance that they had no intention to defraud was taken no notice of by the Superintendent of Custom, Mr. Consul Medhurst was applied to to aid in the matter; but all that that officer would do was to promise that he would represent the case to Her Maiesty's Minister at Peking; and thereupon the Taoutai completed the spoliation by selling the goods. We call it at once an act of spoliation, because it will be seen from this short recital that even if Messrs. Johnson and Co. were attempting to defraud, the deed was not consummated. Twenty-two bales, of 50 pieces each, make 1,100 pieces, and giving the Customs their own construction of what is the content of a bale, they had granted a permit to land 900 pieces more than were already on shore when the seizure took place. Let it be borne in mind, moreover, the tariff attached to the treaty makes no mention of bales of piece goods. The duty is to be levied, after certain rates, in candareens on pieces of certain widths and lengths. We assume, for the purpose of arriving at an approximation, that the duty payable by Messrs. Johnson and Co. was eight candareens a piece, and that, as we have said, would give the figures of the intending (?) defraud as 160 taels.

Messrs. Johnson and Co. were not disposed to wait for the result of Mr. Medhurst's application to Mr. Bruce, and the case reported in Hong Kong was the argument on a rule granted by the Court to show cause why Mr. Walter H. Medhurst, H. B. M. Consul at Shanghai should not be compelled by mandamus, to abjudicate directly in the matter of the confiscation by H. I. M. Customs of 1,100 pieces of Grey Shirtings, the property of Messrs. Johnson and Co.; Mr. Pollard being for the plaintiffs; the Attorney General with Mr. Owen for the defendant. A good deal of time is saved in modern practice by counsel for defendant opening the case, and showing what he knows is charged; and in this we have the Attorney-General commencing by explaining what is the nature of a mandamus. According to Blackstone, the learned gentleman said, a mandamus can only run in the Queen's dominions—but here was an application for a writ to enter the dominions of the Emperor of China. It is true that British Consuls exercise judicial authority over Englishmen in China; but there is no clause in the treaty by which it is stipulated that a mandamus, which by its nature implies sovereign rights, can run over the land.

Mr. Pollard was then called on to show on what article of the treaty he relied. His answer was, the Act of Parliament, 67 Vict. chap. 94, which shows Her Majesty's jurisdiction in China.

That Act, the Attorney-General replied, applies only to dealings between one British subject and another; and by the affidavit of Mr. F. Bulkeley Johnson, the Taoutai of Shanghai (a Chinese, not an Englishman) is specially charged with the act complained of

This objection was fatal to the application. Had Mr. Commissioner Fitzroy been charged instead of the Taoutai, we might have heard more of it.

The Judge cut the matter short, however, by saying that the Queen has no jurisdiction in Shanghai—that is to say no territorial jurisdiction. She cannot sue a Chinese in Chinese dominions, and, further, that his, the Judge's, power is limited to Hong Kong and its dependencies. And so the matter ended. Mr. Attorney-General, on behalf of Consul Medhurst, declaring that they would not have come to Court at all, had not a refusal been liable to construction as a mark of disrespect. Notwithstanding an expression by the Court that Mr. Medhurst could not have acted differently, there is evidently something wrong in the state of the law, by the Crown having to bear the expenses to which the consul was put by the application.

HONG KONG.

In a leading article on Mr. John Dent, as representative for Totnes, the *China Mail* says :—"If personal good qualities could recommend a man to a Totnes constituency, if manliness of character, liberality of feeling, a large generosity, and stainless personal honour weighed in a candidate's favour, then Mr. Dent ought not to have much difficulty in entering Parliament. As the head of a wealthy commercial house in China, that gentleman has long occupied a position of some eminence. But it is less for the position he has occupied than for the remarkably happy manner in which he acquitted himself of its duties and courtesies, that he will be long remembered by residents in China and by strangers who have visited the country."

Messrs. A. Shortrede and Co.'s *China Directory* for 1863 is considerably more bulky than its predecessor, owing to an increase of matter. The Directory proper occupies ninety-seven pages, being twelve more than last year; and the Appendix, which consisted, in 1862, of a dozen pages, has this year swelled to upwards of six times that bulk. Some features in the Appendix are deserving of particular notice, as they are evidently the result of careful information from special sources. Such are the tables headed "Trade terms for Opium in use at Canton and Hong Kong," "Chinese Cycles," "Customs Tariff, in English and Chinese," the latter covering about a dozen pages, and giving the names, in both languages, of all items both of import and export, together with the precise duty on each article These tables are likewise furnished with a column pointing out where the different articles are to be found in the Chinese Treaty. Another of these Anglo-Chinese tables gives the names and titles of the Chinese authorities at the ports open to foreign trade, and also the names of Viceroys and Governors of provinces not open to foreign trade. Thirty-four pages of small type contain the Ordinances passed by the Legislative Countil of Hong Kong from 1854 to 1862 inclusive, that is to say, for the last nine years. These are given *in extenso*, and will be handy for easy reference. In the work itself there is no striking change, completeness and accuracy alone being aimed at.

A remarkably quick passage is recorded from London to China. The *Fiery Cross* came into Hong Kong harbour on January 28th, having been only eighty-five days from pilot to pilot.

A notification about the Volunteers, of which the following is a copy, had been issued by Lieutenant Dodd :—

"1. In consequence of the races, morning drills will cease till the 25th February inclusive.

"2. The whole of the corps will, from Monday the 2nd of February to Saturday the 14th February, parade in North Murray Barracks daily, at 4.40 P.M. (Sundays excepted), in forage caps, with arms and accoutrements; and it is to be hoped that private amusements will not be allowed to interfere with the attendance.

"3. Special notice will be given of full-dress parades, with busbys and gloves.

"4. Each member of the corps will provide himself at once, if he has not already done so, with new accoutrements, busbys, and buckskin gloves.

"5. All old accoutrements to be at once returned to Corporal Goodal, R.A.

"6. The Presentation to the Corps of Colours and Bugle, will take place (weather permitting) on the parade ground, on Monday afternoon, the 16th February, when, by kind permission of Colonel Reeves, C.B., Commander of the Garrison, and his officers, the band of the 99th regiment will attend.

"7. The Inauguration Dinner of the Corps will take place the same evening at St. Andrew's school-room, when, by kind permission of Major Beale and his officers, the band of the 22nd regiment will attend.

"8. The Rifle Shooting for Marksmen under the direction of Lieut. Tanner, 99th regiment, will come off on the 26th, 27th, and 28th February.

"9. A Rifle Squad, for passing members of the corps in rifle drill, will be formed under the direction of Lieut. Tanner, 99th regiment, who has again volunteered his services from the 2nd March.

"10. The Competition for the National Rifle Association Medal, will, with the sanction of his Excellency the Acting-Governor, come off on the race-course about the 17th of March, On that day, as at Wimbledon, there will be separate targets for a rifle 'Derby' and 'Pool'—target open to all comers. Further details will be duly announced."

The fine steamer *Cadiz* belonging to the P. and O. Company had a narrow escape on Saturday, the 10th January. She caught fire in the forehold, from some cause as yet undiscovered, just as she had got outside of the Ly-yu-moon Passage on her way to Shanghai; she was scuttled on Kow-loong shore, her cargo transferred to the *Benares*, which sailed about thirty hours afterwards; and the *Cadiz* herself so far repaired within the same time as to be able to proceed to Whampoa Dock. The expedition shown was much admired by the community. The Superintendent in Hong Kong of the P. and O. Company, publicly thanked the men from the Garrison and from H.M.'s vessels, as well as others who had come to the assistance of the *Cadiz* and helped to clear her.

The *China Mail* gives its annual summary of events in China and Japan in a long and able article, the conclusion of which is as follows :—"We cannot look forward to coming events without considerable doubt and foreboding. The position we are in with the French on the one hand and the Russians on the other, is calculated to give our authorities uneasiness; but, on the whole, and judging from the past, we cannot help feeling that our difficult policy is well-directed. Mr. Bruce has shown himself to be a man of higher ability than was at first imagined by those who did not know him well. And so another year opens in China; the future is dark and doubtful, although in one respect not uncertain; nothing but a manly, even, and honourable policy will conduct England with dignity through the eddies and currents likely to arise from combined foreign operations, and divided diplomatic interests at the Court of Peking."

Mr. Duddell's comprador tells the following strange story. Some time ago his two daughters, living with him in Hong Kong, aged about twelve or fourteen, and his son, an infant of a few months, were stolen away while he was absent from the house. He was naturally much excited by the circumstance, and at once abandoned all else in his inquiries as to their whereabouts. At last he learned that they had been taken to Canton, whither he immediately proceeded. After many inquiries in that city, information was conveyed to him that both the girls had been sold, and that he might have the boy on payment of $400. Later news states that the boy had been recovered, but we hear no more of the fate of the girls.

At about noon, on Jan. 30, Mr. James Johnston, of H.M.'s *Sphinx*, while on his way from Sheak-pai-wan to Victoria over the hills by the No. 3 Police-station, was attacked by several Chinamen armed with bamboos, who severely wounded him on the head and other parts of the body, and robbed him of a uniform jacket, a gold finger-ring, and other property. After he had recovered from the loss of blood, he managed to stagger back to Sheak-pai-wan. Information was brought into Victoria by Captain Baker of the steamer *Undine*. The mounted police were immediately despatched to make inquiries, and a party of Chinese police sent over the hills. One Chinaman has been apprehended on suspicion of being concerned in the robbery.

A hurdy-gurdy has made its appearance in Hong Kong, it is played by an Italian, with what pecuniary success is not known.

CANTON.

Liu, the successor to Laou as Governor-General of the Two Kwang, was expected to arrive at his post early in February. It is stated that the vexed question of the Shameen Wall has at last been amicably settled. The three clergymen who made an excursion from Canton lately, and were robbed of their effects, including five ponies, are likely to get back some of their goods; already, four of the ponies have been recovered from the robbers.

A gang of thieves had made an attempt at robbery, at Whampoa. Some workmen gave the alarm, and the attempt was frustrated. It was the house of a Chinese who is known to have some money, that the gang wished to rob. They appear to be getting very bold. The people grumble at not having a gunboat constantly stationed at Whampoa.

MACAO.

After a residence of thirteen years in the East, his Excellency Governor Guimarães, of Macao, has returned to Lisbon by the present mail.

THE PHILIPPINES.

MANILA.

The "Council of Administration" was inaugurated on the 2nd January with the due formalities; and the Supreme Court ceases to be the consulting body on Government Administrative measures.

A subscription had been made in aid of the Lancashire distress. About $1,600 were collected. A few Frenchmen, Germans, and Spaniards have subscribed.

An Exchange-room was opened on the 5th January under the title of the "Circulo Mercantil." It is supported by the members who pay $5 on entry and $5 monthly subscription in advance.

On the 23rd Dec., the birthday of the Prince of Asturias, heir apparent to the Spanish crown, was celebrated with considerable pomp. In addition to a review of the troops there

Digitized by Google

were a *Te Deum*, mass, and levée at the palace in the morning. Admiral Kuper is expected to visit Manila in the *Euryalus*.

It is stated that an English scientific gentleman, after some years of study, has been successful in inventing a machine for cleaning the "Mana hemp," to supersede the clumsy, expensive, and imperfect mode of cleaning with the hand at present in use, which produces an article of unequal quality and at too great cost. Such a machine has long been a desideratum, and various attempts have been made from time to time in this direction, all of which failed. This matter is to be laid before the leading commercial houses in the hemp trade at Manila, so as to secure their continuance and support, with the view of introducing the invention into the hemp province.

MALACCA STRAITS.

SINGAPORE.

The statement of the trade of Singapore shows that the imports in 1862 were estimated at $26,208,528, being an increase, as compared with 1861, of $2,215,658. The exports in 1862 were valued at $18,805,102, showing a decrease from those of 1861 amounting to $1,593,305.

The imports took place as follows :—

By 1,069 square-rigged vessels	$22,634,471
By 2,167 junks and prahus	3,574,057
	$26,208,528

The exports were made as follows :—

By 1,108 square-rigged vessels	$15 607,470
By 2,198 junks and prahus	3,197,632
	$18,805,102

The trade of Singapore during 1862 shared in the depression caused by the continuance of hostilities in America, and the derangement thereby produced in the cotton trade.

With reference to the levy of port dues, the *Singapore Free Press* writes :—"The Supreme Government has directed the Hon. the Governor to submit to the Chamber of Commerce for their opinion, a Bill to authorise the Levy of Port Dues in the ports of the Straits Settlement. The opinion of the Chamber, we believe, is very unanimous and decided, that the measure is totally uncalled for, and that if persevered in it will be highly damaging to the welfare of the ports in the Straits, which will thenceforth lose all claim to be called "free ports." The proposal is a favourite one with the Indian Government and has been frequently mooted by it, but as often been discountenanced by higher authorities at home. The last occasion was in 1857, when the Court of Directors objected to the levy of port dues in the Straits, and since that time we have heard nothing more of the subject until now. It is probable the Secretary of State has withdrawn the prohibition given by the Court of Directors, in which case the Indian Government will doubtless try to carry the measure through. The Governor-General showed himself so obedient to the orders of Sir Charles Wood, in the matter of the stamp act, that we have considerable doubts of his listening to any objections against the present measure, however well founded they may be. The best plan will therefore be to appeal to the home authorities and Parliament at once, and if this is done we have little fear of the threatened infliction being allowed to fall upon us."

CEYLON.

The extraordinary state of the weather is causing considerable injury at Colombo. Owing to the extreme wet, it is said that "roads are bad, cattle are dying, transport scarce and dear, cart-owners despairing, planters angry, Government unpopular—and coffee delayed on the estates."

The *Colombo Observer* gives several valuable statistics with regard to the coffee crop, and we are glad to transfer to our columns the following observations founded upon them." The figures for the past ten years are indicative of uninterrupted progress. Those for the quarter century display the vicissitudes of the years about 1847, but the result of the whole is progress such as few colonies of Britain, with the exception of the gold countries, can show. The great problem for solution is, can coffee estates be kept in heart, or renovated by high cultivation and manure, at a cost which will leave a profit to the cultivators? At present we have striking examples in the affirmative, as well as the negative, and we lean strongly to the belief that the exercise of enterprise and science will secure the permanency of the coffee culture in Ceylon at fairly remunerative profits. Certainly so, i; the present prices, or anything approaching them, can be maintained. The confidence at present felt in the prospects of Ceylon as a coffee-growing country is shown by the immense rise in the price of land. The average for the year just closed is £2. 8s. per acre, and the demand continues so as to encourage the exploration and survey of forest in situations heretofore deemed unsuitable for coffee."

From the same journal we take the following paragraphs :—

"The cultivation of the *Chinchona* in the Government Botanical and Special Chinchona Gardens has been pretty successful in Ceylon. A limited number of plants of the *Chinchona succirubra* (red bark) are now ready for distribution amongst private parties at a cost of 5s. each.

"In connection with Her Majesty's navy, it now becomes our melancholy duty to announce that one of its officers who disgraced his commission when here—Captain Pritchard, late Master Attendant of Colombo—has condoned his offences by dying at sea. A great contrast is presented by the case of Captain Pritchard's predecessor, Captain Higgs, of whose death all who knew him must have heard with sorrow.

"The Master Attendantship, rendered vacant by Captain Pritchard's death, will, we have little doubt, be conferred on Captain Donnan; Mr. Mackay, Chief Officer, being the most likely person to succeed to the command of the *Pearl*."

"The Governor reached Colombo,on Feb. 2, after his tour of inspection through the Southern Province.

"The Customs collection at the port of Colombo in January last was £18,204. 6s. 10d., against £14,209. 0s. 7d. collected in January, 1862, showing an increase of nearly £4,000.

"The *John Vanner* took away from our shores several well known residents, including Mr. Louis Bird, one of our eldes and most respected planters; the Rev. Mr. Dean, of the Wesleyan mission, &c. By the French steamer went as passengers three members of the planting body :—Mr. T. Pride, Mr. P. Ryan, and Mr. A. W. Green. And by the P. & O. steamer *Bombay*, which takes these mails, another well-known planter and merchant, Mr. Wm. Rose, who leaves us in search of renewed health and vigour in his native clime.

"The French Company are doing their best to attain a name for speed. Their steamer the *Camboge*, has, we see, just made the fastest run on record from Singapore to Galle. She arrived at Galle on Monday evening, having performed the distance in five days and three hours. We hear good reports of the cleanliness prevailing on board these steamers; but the cookery is said not quite to suit English stomachs. We hope, for the credit of their country, that the P. and O. Company will not allow themselves to be beaten in any way by our French neighbours."

"We learn that the export of cotton, grown in the Island, to England last year was only 56 cwt., against some 350 in 1861. This must seem very discouraging to those who expect Ceylon to become a great cotton-growing country; but perhaps the native manufactures at Batticaloa, where the greater part of the raw material is produced, may have taken a fresh impetus, and so increased the home consumption at the expense of our exportation."

A report was in circulation in Colombo that the seat of the Government was to be transferred to Kandy, and that the port of call for the mail steamers would be Trincomalee, but it appears to be without foundation. A newspaper correspondent, however, says :—"When the railway between Colombo and Kandy is constructed, the line of electric telegraph from Kandy to Trincomalee (£5,000) completed, and when the Governor has made the Pavilion his chief residence, the rumour may turn out to be true."

THE CURRENCY OF HONG KONG.

We have just received a copy of the recently printed correspondence on the currency of Hong Kong, between the Secretary of State for the Colonies and the Governor of Hong Kong. We have netiher space nor time to discuss this important subject in our present issue, but may just mention that the measures adopted by the Government have been based on the recommendations made by Sir H. Robinson, and that the new issues of mils, cents, and ten cent pieces are now in progress at the Mint, and will be ready for transmission to the colony in about six weeks.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ANTROBUS—On the 5th inst., at 65, Eaton-square, the wife of H. Lindsay Antrobus, Esq., of a daughter.

BRAGA—On the 24th January, at Hong Kong, the wife of V. E. Braga, of a son.

CARTWRIGHT—On the 5th inst., at 16, Green-street, Lady Elizabeth L. M. Cartwright, of a son.

Digitized by Google

DANDO—On the 3rd inst., at The Elms, Acton-green, the wife of Nathaniel Dando, jun., Esq., of a daughter, which survived its birth but a few hours.
ENTHOVEN—On the 3rd inst., at 26, Abercromby-square, Liverpool, the wife of John Enthoven, Esq., of a daughter.
SALWEY—On the 24th ult., at Ryde, the wife of Commander Salwey, H.I.M.S. *Amoy*, of a daughter.

MARRIAGES.

BERRENGER—ALBRECHT.—On the 26th Jan., at Pusilawa, by the Rev. R. Phillips, Mr. George Berrenger to Miss Barnetta Angeltina Albrecht, of Delta.
DE SILVA—DE SILVA.—On the 15th Jan., at Caltura, by licence, by the Rev. J. Dart, of St. Thomas's College, the Rev. J. De Silva, Missionary S. P. G., to Miss F. W. De Silva, daughter of the late Interpreter Modliar of the District Court of Caltura.
DISSANAYEKE—DE SILVA.—On the 7th ult., at the Emmanuel Church, Morottoo, by the Rev. A. Mendis, Charles Henry D. Soysa Dissanayeke, the son of the late Jeronis D. Soysa Dissanayeke, Modliar of the Governor's Gate to Catherine De Silva, daughter of Mr. Jusey De Silva, of Morottoo.
GUNTHER—PENNY—On the 22nd January, at Shanghai, by the Rev. W. M. Farnham, G. Gunther, sailmaker, to Isabella, daughter of J. F. Penny, master of the American schooner, *J. B. Ford*, and late of California.
JENKINS—JONES.—On the 23rd Dec., at Yokuhama, by the Rev. M. B. Bailey, Consular Chaplain, G. R. Jenkins, M.D., Her Majesty's Legation, to Mary Annie, daughter of the late Edmund William Jones, of Holt, Chester.
KUSTERMANN—KOLL.—On the 14th ult., at St. George's, Hamburg, by the Rev. Mr. Detmer, Franz Küstermann, of Penang, to Bertha, second daughter of the late Johann Nicolaus Koll, of Hamburg.
SOYZA—SILVA.—On the 4th ult., at the house of Lindemullegey Jusey Silva, Morottoo, by the Rev. E. Milliani, Warnesehennedigey Charles Soyza to Lindemullegey Catherine Silva.
THOMASZ—RAFFEL.—On the 12th ult., at the Wolfendhal Church, by the Rev. A. Young, M.A., Mr. Charles Morgan Thomasz to Miss Eugenie Lucretia Raffel.
WIJEYERATNE—PERERA.—On the 11th ult., at St. Lucia's Cathedral, Colombo, by the Rev. Z. Godinho, Miss. Apos., Gabriel P. Wijeyeratne, of Kaigalle, to Isabella Perera, only daughter of Paramanepatteregey B. Perera.

DEATHS.

ADAMSZ—On the 30th January, at Kandy, Mr. J. R. Adamsz, aged 72 years.
DE SOYZA—On the 3rd February, at Kandy, Georgiana Merciana Earde, the beloved wife of Mr. L. W. De Soyza, of Ambamaua Estate, aged 28 years.
DOUGHERTY—On the 14th January, at the General Hospital, Hong Kong, Andrew Dougherty, private, 67th Regiment, aged 40 years.
HERFT—On the 6th February, at Colombo, Miss Abigail Susan Herft, the only daughter of the late Mr. Patrick William Herft, aged 17 years and 9 months.
KING—On the 17th January, at Swatow, of fever, Richard King, late of the Imperial Customs, aged 28 years.
MCCLEVERTY—On the 1st inst., at Florence, of inflammation of the lungs, after a few days' illness, Captain James Johnston McCleverley, C.B., R.N., youngest son of the late Major-Gen. Sir Robert McCleverty, C.B., and K.C.H.
MCKENZIE—On the 17th January, at the Civil Hospital, Hong Kong, John McKenzie, seaman.
PARSONS—At Benares, Amelia Baynes Parsons, the beloved wife of the Rev. John Parsons, Baptist Missionary.
PRITCARD—On the 12th September, 1862, at sea, on board the *Lettice Catherine*, Commander John A. Pritchard, R.N., aged 47.
ROSAIRO—On the 8th February, at Colombo, Mrs. J. P. Rosairo, aged 27 years, 7 months, and 17 days.
ROWE—On the 15th January, at Hong Kong, on board H.M.S. *Melville*, James Rowe, H.M.S. *Beagle*.
SIMPSON—On the 4th January, at the General Hospital, Hong Kong, William Simpson, sergeant, Commissariat Staff Corps, aged 32 years.
VACHER—On the 22nd ult., at No. 22, Palace-gardens-terrace, Kensington, William Edward Vacher, eldest son of W. H. Vacher, Esq., of Shanghai, aged five years and a half. Distant friends will please to accept this intimation.
WILLS—On the 12th January, at the Civil Hospital, Hong Kong, Otto Wills, seaman destitute.

COMMERCIAL REPORT.

CHINA EXPORTS.

CHINA.—TEA.—Exporters have shown no systems of any intention to enter the market, nor have teamen betrayed any desire to lower their demands, notwithstanding the proximity of the Chinese new year. They are probably aware that the rates asked are so much above the ideas of buyers, that a panic would ensue if any attempt were made on their part to accommodate matters. The few settlements of Congou show a decline of one tael in the middling kinds; the finer sorts maintain themselves. The very small business done in scented teas has been at previous rates. The transactions in Oolongs, Canton, Young Hyson, and Country Greens have been principally if not entirely for the New York market. The following are the reported settlements for the fortnight:—Congous: 3 chops Oonams (whereof 2 were hf-ch.) at 19½ to 22 taels. 2 chops Oopacks at 24 to 29 taels; 300 hf-ch. Canton packed at 22 taels; 700 hf-ch. Tyshaan to 19 taels. Oolongs: 3,200 hf-ch. medium at 24½ to 27½ taels. Pouchong: Canton 350 hf-ch. at 19 taels. Scented Teas: 4,000 boxes Caper, at 14 to 17 taels for Com. to fair, and 19 to 20 taels for mid. to good; 800 boxes Orange Pekoe at 19 to 20 taels for fair. Canton Greens: 150 boxes Gunpowder, medium at 22 taels; 1,600 hf-ch. Young Hyson, mid. to good, at 18 to 25 taels. Country Greens: 7 chops equal to 2,200 hf-ch. at 44 to 48 taels for Gunpowder; 32 to 42 taels for Imperial; 29 to 39 taels for Young Hyson; 32 to 40 taels for Hyson; 25 taels for Twankay; and 21 taels for Skin. The remaining stock upon the market is thus estimated:—Congous 86 chops, Oonams and Oopacks, and 4,700 hf-ch. Canton packed and Tayshaans; 2,000 hf-ch. Oolongs; of Scented Teas the supply is heavy; the quantity of Canton Greens is uncertain; of Country Greens there remain 13,500 hf-ch. new, and 1,890 ditto old.

SHANGHAI.—Black: Immediately after the departure of last mail there was a rather better demand, and eight chops were settled at fully previous rates, when the news by the 26th November mail was received reporting a further decline in the home markets, buyers held back and would not operate unless at lower prices. Stocks are considerably reduced, and holders are not anxious to realise, as supplies from Hankow continue to fall off. The settlements for the fortnight are reported at 5,068 chests; reshipments on owners' account during the same period, 4,250 do.; together for the fortnight, 9,318 chests; making a total for present season to date of 266,023 chests, against 186,858 chests same period last season. The present unsold stock is 5,000 chests Congou, and 1,500 do. Flowery Pekoe. The quotations are—Hohows, 19 to 23 taels; Oonams, 20½ to 26 taels; and Oopacks, 25 to 28 taels. Greens: Before the arrival of the mail a considerable business was done in country teas at a slight decline on previous rates; but since then the market has been very depressed, and sales cannot be effected unless at a decline. Shanghai packed and Japan teas have been taken to a small extent at prices showing a reduction of 2 taels. Settlements and reshipments for the fortnight 26,225 half-chests China, and 1,672 half-chests Japan, making total to date of 210,815 half-chests and 16,861 half-chests, against 156,834 half-chests and 22,805 half-chests respectively same time last year. Stocks on offer are estimated at 13,000 half-chests.

FOO-CHOW-FOO.—A large business has been done in Congous since the date of last report, quotations having advanced one tael. The teamen met the market freely or the demand would certainly have further elevated rates. Oolongs, on the other hand, have been neglected, and being in no demand for the United States, have receded 3 to 4 taels from the quotations of a couple of months ago. The settlements of the fortnight are reported as follows:—Congou: 27,100 chests and 12,000 half-chests; do at 5½ to 13½ taels for ordinary and broken leaf; 13 to 17½ taels for good common to 2d. better; 18 to 20 taels for good flavoury; and 19 to 20½ taels for Souchong and Kysow kinds. Souchong: 1,300 chests at 17 to 23 taels for fair. Oolong, 4,000 half-chests and 2,000 boxes at 14 to 16 taels for fair cargo to superior. Scented Teas: 2,200 boxes at 17 to 18 taels for fair. Stocks are thus estimated: Congous 53,100 chests (say, 23,000 chests ord., 23,900 good common to 2d. better, and 7,100 good flavory to Kysows). Souchong 300 chests. Flowery Pekoe 1,200 ditto. Oolong 45,300 half-chests. Scented Teas 11,600 boxes, and Green Tea 650 half-chests. The supplies of Congous for the present season to date, inclusive of contract teas, are estimated at 563,100 chests against 498,100 chests at corresponding period of last season.

KEWKIANG.—Rumours of incursions of the insurgents into the green tea districts agitate the market—at one time these reports are alarming when the market hardens, at another the retirement of the rebels is announced, when the teamen more readily meet the market. Foreigners are less anxious to buy than they were, and the market certainly tends downwards. The settlements of the fortnight are reported at 4,300 half-chests green—namely, 1,000 half-chests Moyunes, at 27½ to 30 taels, and 3,300 do. Fychows and Twankays, at 22½ to 26 taels. The stock on the market is estimated at 50,000 packages, yet, notwithstanding the falling off in the demand, the teamen are very firm. In black teas no business has been done.

YOKUHAMA.—An extensive business is being done; during the month of December fully 20,000 pls. were purchased for shipment to London and Shanghai. Rates tended up, but had not materially advanced, the quotations being, for trash $1 to 5 per picul; common, $7.50 to 12.50; middling, $15 to 20: good, $22.50 to 27; finest, $30 to 35. The total export of the present season from 1st July to 31st December amounted to 2¼ million lbs. against 5¼ millions corresponding period last season. The stock is ample, say 7,000 pls.

RAW SILK.—SHANGHAI.—A fair business continued throughout the fortnight, without any alteration in prices. Owing to a tight money market some of the dealers seemed anxious to meet buyers, and from this cause at one time there were signs of weakness, but the mail news of the 26th November checked the downward tendency, and fully former rates have since been paid. The receipts from up country have been insignificant, and it seems almost certain that nearly the whole crop has reached this market. About 1,300 bales have arrived from Japan, and future supplies from that quarter are expected to be very limited. The sales of the fortnight are reported at 3,000 bales, against 3,500 for corresponding fortnight of last year, and a like quantity for the corresponding fortnight of the year before. The total settlements of the present season to date are 56,500 bales, against 54,500 same time last year, and 67,000 the year before. The present unsold stock is 4,000 bales; last year at same time it was 8,000 to 10,000, and the year before 6,000 to 7,000 bales. The following are the current quotations:—Tsaltees, No. 1, tls. 480 to 490 per picul; 2, 460 to 470; 3, 440 to 450; market, 3, 425 to 435; 4, 410 to 420; 5 and com., 390 to 400. Taysaams, No. 1, 405 to 415; 2, 375 to 395; 3, 350 to 370; 4, 5, and com., 310 to 345. Yuenfa, No. 1, 440 to 450; 2, 410 to 430; 3, 385 to 400; 4 and com., 370 to 380. Hainings, 370 to 440; Sewhings, fair to good, 330 to 350; mid. to inferior, 300 to 320.

CANTON.—The yield is small and the article is wanted. There have been no settlements during the fortnight. The total shipments of the season to date are estimated at 3,500 bales for Bombay and 2,500 for Europe. The quotations, which are purely nominal, are given as under. Cumchook, rereeled, $475. Gewkong, No. 3, $400 to 410. Loonkong, Nos. 1 and 2, $440 to 425.

YOKUHAMA.—On the receipt of advices by the London mail of 26th October, the market advanced $40 per picul, and prices reached a point hitherto unprecedented. The present quotations are, Dyepots, middling, $500 to 525; best, $540 to 550; Sodais, $325 to 475; Mybash, $500 to 550; Oshios, $450 to 525; Coshios, $425 for inferior, up to 500 for the best; Hadsojee, $350 to 360. (These quotations are in Mex. dollars.) The settlements for the month of December are reported at 1,500 bales. The total shipments this season from 1st July to 31st December amount to 13,750 bales, against 4,850 bales corresponding period of last season. The stock is reduced to 250 bales, and supplies come in but slowly.

DRUGS, &c.—The Canton market is thus reported on:—Cassia Lignea quoted £15.75 to 16.25; no sales, stock 500 piculs. Cassia Oil quoted $210 to 220; no sales, stock small. Cassia Buds scarce, and wanted at $48 per picul. Star Aniseed is quoted $22½ to 23 per picul; no sales, stock 50 piculs. Rhubarb: No demand, the best is quoted $50 to 55; stock 50 piculs. Gamboge scarce, and $40 to 50 per picul. China Root: The stock is reduced to 100 piculs, for which $4 are asked. Galangal is quoted $3.75 to 4.25; stock 250 piculs. Galls are worth $13.50 per picul; stock only 100 piculs.—Shanghai.—Hemp: Large shipments of this article have lately been made to England. It comes principally from Hankow, and is packed at Shanghai, where the present stock is about 2,500 pls. the quotations being 7½ to 8 taels for Green, and 9½ to 10 taels for White. Wool is scarce and saleable—the few parcels which arrive find ready buyers at 8½ to 9 taels for common, up to 12 taels for the best. Rhubarb—Common is plentiful, and can be had at 10 to 12 taels per picul. Fine is scarce and wanted—the little there is on the market is held at 40 to 45 taels per picul.

SHANGHAI—COTTON.—The supply has fallen off, and for the moment would appear unequal to the demand. The tightness in the Money market, the late heavy rains, and the approach of China new year, may

Digitized by Google

fully account for the falling off in supplies, especially when it is considered that hard silver has to be sent into the country to buy the article. There has not been much done during the fortnight on foreign account—a good deal has been shipped to the Southern ports. The quotations are about the same as last given—say 11 taels per picul for common, up to 12 taels for the best. There still continues a demand for shipment to Bombay.

EXCHANGES IN LONDON.

[For dates, see first page.]

			Bank.	Private.
At Shanghai (per Tael.)	6 months sight.		6s. 2d. to 6s. 2¼d.	6s. 3d. to 6s. 4d.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cent and is divided into decimal parts of ten.

SAILED SINCE 31st DECEMBER, 1862.

For London, Napoleon III., from Shanghai, 802,699 lbs. tea and 70 bales silk.

For Liverpool, William Fairbairn, from Shanghai, 37,333 lbs. tea.

For London, Marquis of Argyle, from Foo Chow, 625,000 lbs. tea.

For London, from Shanghai, Empress of India, 518,985 lbs. tea and 10 bales silk; W. W. Smith, 769,707 lbs. tea; Appollina, 357,417 lbs. tea and 56 bales silk.

From Canton, Victory, 357,415 lbs. tea, and 56 bales silk.

For New York, Golden West, from Shanghai, 639,859 lbs. tea.

From Foo-Chow, Samuel Russell, 717,060 lbs. tea.

From Shanghai, Oneida, 483,064 lbs. tea.

From Amoy, Surprise, 978,066 lbs. tea.

SHIPPING INTELLIGENCE.

ARRIVED.

At HONG KONG.—Jan. 15, Rapid from Cardiff; 20, Gerard (str.) Greenoch; 21, Notre Dame des Victoires from Cardiff, Lauderdale from London, Mary Ross from Cardiff; 24, Orient from Sunderland, Cornelia, Mathilda, John N. Cushing, Rachel from Cardiff; 28, Fiery Cross from London; 30, H.M. (str.) Rattler from Portsmouth.

At SHANGHAI.—Jan. 14, Broadwater from London; 17, Albuera and Celestial from London, and Thames from Sunderland; 19, Star of Peace from Cardiff; 20, Johanna from Cardiff; 21, Apollo and Gazelle from Newcastle.

At SINGAPORE.—Jan. 24, M. Weuzell (Adstm.) from Sunderland; 24, Latona from London; 30, Triton (Brem.) from Newcastle.

At BATAVIA.—Jan. 19, Java Packet and Australia from Amsterdam; 28, Maria Elise from Amsterdam.

At MANILA.—Dec. 12, Senburg from Newcastle; Jan. 9, Encarnacion from Cardiff; 10, Lady Head and Cossipore from Cardiff; 18, Casas from Liverpool, and Elias from Cardiff; 20, Anne Britagne from Cardiff.

SAILED

From SHANGHAI.—Jan. 8, Heroes of Alma, for London; Juanpore, for Liverpool; 9, Gorilla, for Liverpool; 10, Empress of India, for London; 13, Dowthy, for Liverpool; 17, Bombay, for Liverpool; W. W. Smith, for London; 19, Radnergore, for Liverpool; Apellina, for London; 21, Stornoway, for London; Brierly Hill, for Liverpool.

From HONG KONG.—Jan. 21, Speedwell, for London; 26. H.M.S. Sanspareil and Snake, for Portsmouth; 30, Storm King, for Liverpool. From Whampoa: 17, Victory, for London.

From SINGAPORE.—Jan. 23, Odin, for Gibraltar; 26, Frederica, for London; Feb. 1, Eastward Ho, for Falmouth; 7, Empress, for Liverpool.

From MANILA.—Dec. 10, Sky Lark and Agamemnon, for Liverpool; 11, War Hawk, for Cork; 26, Paradise, for Falmouth; 28, Fearless, for New York; 29, Shand, for Cork; Jan. 14, Ceylon, for Cork; 17, Canaan, for London; 23, Victor Emmanuel, for Cork.

LOADING

At SHANGHAI.—For London: Lord Raglan, Neville, Queen of the North, and Robert Henderson. For Liverpool (Cotton): Blackburn, Geelong, Gresham, Monsoon, Badnagore, Southern Cross, and Zealandia. For New York: Almena, Vision, and Behring. For Montreal: Cæsar and Helene and Rapido.

At FOO-CHOW-FOO.—For London: Unrivalled. For New York: Hotspur.

At CANTON.—For London: Antipodes, Burman, City of Durham, and Kate Karnie.

At MANILA.—For London: Commodore. For Cork: Caprera, Mary Fry, Saletie, Viola. For Boston: Aurora. For Cadiz: Cervantes and Gertrudis.

FREIGHTS AND CHARTERS.

HONG KONG.

The settlements have been for Great Britain: Omega, British ship, 765 tons, Manila to London, £2,500 in full. Unrivalled, British ship, 812 tons, on the berth, from Whampoa to London, at £4. For United States: Boanerges, British ship, 1,237 tons, hence to San Francisco, £4,000 in full. Spirit of the Times, American ship, 1,206 tons, hence to San Francisco, $2,000 in full. Old Colony, American ship, 899 tons, hence to San Francisco, $8 per ton. For Colonies: Amelie, French barque, 283 tons, hence to Melbourne, £1,100 in full.

SHANGHAI.

The amount of shipping in harbour is sensibly decreasing. The quantity of produce under shipment to England in the shape of tea, hemp, and cotton is considerable, and rates have advanced. For New York there is little doing, the ships on the berth having some difficulty in filling up. There has been a fair amount of business done during the fortnight, as will be seen on reference to the list of settlements given below. Latterly, however, transactions have been restricted, owing to the custom prevailing amongst the Chinese of keeping their accounts close in the proximity of the new year. After the holidays a spirited business may be expected. The current rates are as follows:—To London and Liverpool, tea and cotton, £3. 15s to £4 per ton of 50 feet. To New York: $12 to $12 50 for tea per ton of 40 feet. To Nagasaki: $4 per ton of 40 feet, and 25 cents per picul dead weight. To Kanagawa: $5 per ton of 40 feet, and 25 cents per picul dead weight. To Foochow: $4 per ton of 40 feet, and 10 cents per picul dead weight. To Amoy: $1.25 per bale of cotton. To Hong Kong: $4 per ton of 40 feet, or $1.25 per bale of cotton.

AMOY.

There has been more demand for vessels for the Straits, but settlements have shown irregular rates. Time charters are lower, coast charters higher. The amount of shipping in port is much reduced. The following are the settlements reported:—Margaretha, 3,800 pls. for 3 months at $1,000; Flencoe, 3,600 pls. for Shanghai for $2,400; Wodan 5,000 pls. for Shanghai and Java for $2 600; Roska, 5,300 pls. for Formosa and back for $2,400; Augusta and Meline, 7,000 pls. for Singapore for $1,400; Johanna Cæsar, 7,000 pls. for Singapore and Penang for $2 150; Amazone, 8,000 pls. for Straits and Java for $3,600; Picciola, 7,000 pls. for Saigon for $4,000; Therwaldsen, 3,800 pls. for 4 months at $800; Bonito, 6,000 pls. for Singapore and Penang for $1,900.

KEWKIANG.—Freights to Shanghai active at 8 taels per ton per steamer.

HANKOW.—To Shanghai, tls. 8 per ton.

YOKUHAMA.—To Shanghai, per sailing vessel, for silk $2½ per picul; measurement, $4. Per steamer, for silk $3 per picul; measurement, $6 per ton. To London: Measurement, £4. 10s. per ton of 50 feet; silk, £6. 10s. per ton.

MANILA.—A few hemp engagements were made shortly after last mail left by vessels loading for the United Kingdom at £5 per cwt.; but as tonnage has since become more abundant the rate has declined to £4. 5s., at which two or three vessels have engaged all the hemp they require. The English barque Commodore has been fixed for London, with 500 tons clayed sugar, at £3 per 20 cwt.; filling up with hemp at £4. 5s. The Lady Head has been taken up for Liverpool at £3 for 650 tons unclayed sugar, and £4 per ton for about 300 tons hemp. The Encarnacion (Spanish) has been chartered at 35 cents per picul for a cargo of sugar to Hong Kong.

SINGAPORE.—There is a fair demand for vessels, and the following charters have been effected:—Lotona, 693 tons, hence to Shanghai at 70 cents per picul for rice; Gloucester, 530 tons, hence to Rangoon and back with rice at 45 cents, or 47½ cents from Bassein; Triton, 288 tons, from Penang to Ningpo and Shanghai for $3,500 in full; Jane Morice, 250 tons, to load rice at Rangoon for this at 45 cents per picul; Homer (American), 420 tons, has been sold for $10,000; Ceylon, 590 tons, has been laid on for Liverpool at £3. 10s. to £4 per ton; Wilhelmsburgh, (Hambro'), 870 tons, to load at Penang for London—sugar, £3. 17s. 6d.; tin, £3. 10s.; light freight, £4. 5s.; measurement, £4. 14s.; rum, 4d. per gallon; Rainbow (American), 550 tons, to load at Penang for this at 48 cents per picul—40 days for loading and discharging. The Chaturanga is loading for London; Crescent City for Liverpool; Fils Unique and Lormont (French) for Bordeaux.

PASSED STRAITS OF SUNDA.

From China to England and Continent, Jan. 12, Crest of the Wave; 14, Express; 15, Orissa; 18, Queen's Own; 21, Marquis of Argyle; 25, William Fairbain. To New York, Jan. 8, Mermaid; 10, Sarah H. Snow; 24, Golden West. From Singapore to England, Jan. 13, Spanker. From Melbourne to Batavia, Jan. 16, Docima.

A DUTCHMAN'S VIEW OF SINGAPORE.

Mr. A. Loudon, Chief Secretary to the Netherlands India Government, who visited Siam last year to exchange the ratifications of the Treaty between Holland and that country, has published an account of his voyage in one of the Batavia scientific periodicals. The following remarks of Mr. Loudon on Singapore will be read with interest:—

"The manner in which the European residents of Singapore divide their time, appears to me less suitable for these tropical parts than that which prevails with us. The day can only be said to begin with them about nine o'clock in the morning. They then partake of a very plentiful *dejeuner a la fourchette*, with tea, wine, and beer, and afterwards, about ten, betake themselves to their offices, or pay visits until three o'clock. At one o'clock many have luncheon, consisting of bread, some fruit, cheese, &c. They take no *siesta*, but retire to rest about nine or ten o clock—if there is a dinner party, which is generally about seven, then the hour is rather later, but seldom much later.

"The traffic in the town is as great as in the largest commercial towns in Europe. We see here the same bustle of merchants, workmen, porters, cabmen, &c., pressing hither and thither; an Eastern tinge pervades the whole from the number of Asiatic races we see crowding together. Arabs, Chinese, Bengalees, Klings, Malays, Javanese, Siamese, are heard addressing each other or rather shouting in their several languages. The quarters of the different Asiatic foreigners are well and regularly built. They cover the greatest part of the town. The peculiar neatness of ours is however almost wholly wanting. At the quays lie hundreds of boats and cargo boats which keep up the communication with the harbour crowded with ships; these are mostly manned by Klings, who speak English, however imperfectly. Many of them also speak French.

"It is reckoned that there are 75,000 Chinese on the island, amongst whom a constant mutation, caused by arrivals and departures, takes place, a circumstance which naturally interferes very much with the maintenance of good police among them. The Chinese quarters are regularly built; they are so commanded by the forts on the hills that by a few hours cannonade they could be destroyed. The probability that such a measure might be found necessary, does not seem to have been lost sight of by the English. And with justice, for a more unruly set than the Chinese of Singapore it would be difficult to meet with elsewhere.

"The Chinese are the only persons who attempt a little cultivation. They are here the only vegetable gardeners; potatoes and cabbages are imported in large quantities from Batavia.

"The roads which intersect the town and the environs are well laid out, but are not so well made; they are deficient in hardening material, so that in rainy weather they are soon reduced to the state of pools of mud and in very dry weather they are, as it were, blown away.

"The public works are maintained by convicts. The work done by them well merits attention. The fortifications and the church are specimens of it. The work turned out by these convicts is of first-rate quality. There ought to be 2,000 of them, but at present there are only 1,000. Their numbers are now kept up, because people at Singapore have declared against the importation of convicts, in consequence of which the Andaman islands were selected as a place of banishment.

"The inhabitants of Singapore are now beginning to repent of their opposition. The convicts are the best workmen, much cleverer than the Chinese, who obstinately adhere to their own way of doing things.

"The garrison, which is chiefly composed of native troops, is too weak, but a European regiment is expected very soon. The naval station, consisting of one steam man-of-war, is also too weak. Complaints have been made on the subject, because people were not without apprehension from the extension of French influence in this part of the world. In its present condition Singapore could not defend itself, and could be easily taken by a *coup de main*."

MR. RUSSELL'S CHINESE PORCELAIN AND BRONZES.

Messrs. Christie and Manson have just sold, the most extensive collection of Chinese porcelain, bronzes, carvings in ivory and jade, lacquer work, and other curious objects of art-work amongst that people that has, perhaps, ever been got together by any private individual. The catalogue consisted of 1,319 lots. Mr. William Russell, to whom the collection belongs, is well known as an enthusiastic *virtuoso* in the study of Oriental art, and it is said that he has been engaged for the last thirty years in forming this extraordinary museum. It would be impossible to attempt anything like a description of the many beautiful specimens of the choicest colours and most elegant forms in the vases, bottles, and smaller objects, some of which are unique. We may mention particularly a sea-green crackle jar, sixteen inches high, formerly in the celebrated Fonthill collection of Mr. Beckford; a complete tea service, of old egg shell china, also from the Beckford collection, consisting of nineteen pieces. This was of the rare crimson, with white medallions, containing groups of flowers engraved in Indian ink, edges of gold, and other parts touched in colour. This choice set was sold in separate lots, which averaged about five guineas. A mottled vase, in patches of bright colours, the neck in imitation of lacquer, with mother-of-pearl inlaid, twenty-one inches high; a curious stand, in the shape of a vampire, formed in China, coloured crimson and purple; a crab, exactly modelled in China, and coloured like the life, with moving eyes, and many other excellent figures of birds—cranes, storks, ducks, cocks, parrots, with cats, dogs, and rabbits, all showing the great imitative faculty of the Chinese. Two quails, minutely carved in ivory, and stained to imitate the colour of the bird, were another singular example of the kind. The enamels on copper are also equally fine specimens, some being extremely rare in quality, and well preserved, considering the date at which it is conjectured they were made. Lot 332. A deep dish or basin, enamelled, with turquoise and lapis lazuli ground, on which are figures of ladies playing musical instruments, is a rare example of the earliest kind. 337. A bowl, ornamented with flowers, birds, and fish, in very bright colours, has rather a Persian character, and is a piece of rare quality. 350. A basin in fine colour flowers on the imperial yellow, is another noticeable specimen; and there is a very gorgeous capstand for the table, which was brought from the Summer Palace. This is a much more modern specimen, and has none of the good work of the old enamel about it. The bronzes are extremely interesting, on account of their admitted antiquity. Some of the sacrificial vessels, the wine-cups, and the incense burners, are attributed in the catalogue to a period 1,200 years before the Christian era, but this is rather a romantic guess. That they are ancient has been determined by the researches of M. Stanislaus Julien, who gives 163 years B.C. as the date of the earliest. It is incredible that these bronze vases should have been preserved so much better than those of ancient Greek workmanship, of which it is extremely rare to see any but in the most delicate state of decay. Most of these Chinese vessels are as fresh as when they were made. Probably this may be due to the ancient museums which were formed, according to Confucius, by the *virtuosi* before his time; but the date of 1,200 years before Christ is mythical. Much of the ornament upon these vases is very ingenious, though it is singular to observe how little variety there is, and how the earliest forms seem to be repeated even down to the pattern of the Imperial capstand from the Summer Palace.

A SUM of £250, collected at Hong Kong and Shanghai, has just been handed to the treasurer of the National Lifeboat Institution.

An engraving of the China Mercantile Steam Navigation Company's steamer *John Bright*, which left Gravesend on the 22nd of August last, appears in the *Illustrated London News* of March 7.

A DECREE of the Chinese Emperor, dismissing General Tienn from the service for the murder of the Abbé Neil, has been published in the *Moniteur*.

MR. H. N. LAY, the Inspector-General of Chinese Customs, has left London for China.

A NEWSPAPER correspondent affirms that at his recent visit to the Court of Burmah, Colonel Phayre disgraced himself by performing "Kow-tow," and that this is the third time he has done so.

Parliamentary Intelligence.

HOUSE OF COMMONS.

BURMESE PRIZE MONEY.

(Feb. 26th.) Colonel NORTH inquired why the prize money earned in the Burmese war, which terminated ten years ago, had not been paid.—Sir C. WOOD said the Government had every reason to suppose that the money was in process of distribution till they discovered accidentally last September that the prize roll of the men had not been received. The list of men who had received medals, which was substantially the same, was at once sent out, and he had no doubt it would answer the purpose. He could not at all account for the manner in which the mistake had occurred, no representations concerning the non-arrival of the list having reached the Home Government. He hoped there would be no further delay.

TRANSMISSION OF TEXTILE FABRICS TO INDIA AND CHINA.

(26th.) Colonel SYKES asked the Secretary to the Treasury on what grounds British manufacturers and others were prohibited from transmitting to India and Hong Kong specimens of textile fabrics of British manufacture under the book post restrictions, as they were permitted to transmit them to France and elsewhere.—Mr. F. PEEL stated that, with the single exception of France, with which country special postal arrangements were made in the beginning of 1861, the Post-office did not undertake to carry specimens of textile fabrics or other trade patterns; and he was informed there were considerable difficulties in the way of the general adoption of a pattern-post.

NAVAL ESTIMATES.—GUNBOATS, &C., FOR CHINA.

(26th.) Mr. WHITE, in a Committee on Naval Estimates, asked by what authority gunboats, stores, and ammunition belonging to Her Majesty's Government had been handed over to the Emperor of China. If these had been paid for, an account of the money ought to be furnished.—Lord PALMERSTON: The arrangement to which the hon. member refers was one sanctioned by Her Majesty's Government upon considerations which they deemed sufficient, it being very desirable, with a view to the security of our commerce and the safety of British subjects, that tranquillity should be restored in China. The whole expense of the operations to which the hon. member refers will be defrayed by the Chinese Government, and will not entail pecuniary liabilities on Her Majesty's Government.

TREATIES WITH INDIAN PRINCES.

(26th.) Mr. H. BAILLIE moved the following resolution:—"That whereas by a Royal Proclamation addressed to the native Princes and peoples of India, published the 1st November, 1858, it is stated 'That we desire no extension of our present territorial possessions, and while we will permit no aggression upon our dominions or our rights to be attempted with impunity, we shall sanction no encroachments in those of others;' and again, 'We hereby announce to the native Princes of India that all treaties and engagements made with them by or under the authority of the Hon. East India Company are by us accepted, and will be scrupulously maintained;' so, in the opinion of this House, where differences of opinion have arisen with respect to the interpretation of such treaties, the questions at issue ought to be referred for decision to Her Majesty's Privy Council." In justification of his motion, he entered upon a long and minute exposition of the case of the Nawab of the Carnatic, supported by documentary evidence, observing that this was not a solitary instance of violation of treaties and spoliation of territory in India.—The motion was seconded by Mr. SMOLLETT, who cited as additional instances of alleged violation of

Digitized by Google

treaty obligation by the British Government in India, the cases of Sattara, Nagpore, Oude, and Tanjore.—Sir C. WOOD observed that the Government did accept all the treaties and engagements made by the East India Company, and would scrupulously maintain them; and, in the interpretation of those engagements, they acted upon their own responsibility, subject to the opinion of Parliament. He reviewed the main features of the cases cited, remarking that, in his opinion, the Proclamation was a very wise and politic measure, and that he did not think he was called upon to undo what had been done by the Government of the day years and years ago.—The motion was negatived, upon a division, by 104 to 24.

CHINA PRIZE MONEY.

(March 2nd.) Colonel W. STUART asked the Secretary of State for War whether any prize money was coming to the troops engaged in the China expedition of 1860, from the sale of guns, &c., captured from the enemy; and, if so, whether it was likely soon to be distributed. – Sir G. C. LEWIS said the commander-in-chief on the spot determined the question practically by collecting the loot, selling it by auction, and dividing the proceeds among the troops. That course was not in strict accordance with the rules of the service, but it was subsequently sanctioned and approved by the Secretary of State. He believed some guns, which were not included in that sale, still remained; but it was not intended to make any fresh distribution of prize money.

ARMY ESTIMATES.—FORCES IN CHINA.

(9th.) Sir G. C. LEWIS, after stating some of the changes which the army estimates of this year had undergone, and that the estimate would be as nearly as possible £1,000,000 less than it was last year, said:—In the present year there was a considerable extraordinary expense for the army on certain foreign stations, and therefore this could not be considered an ordinary year of peace expenditure, in consequence of the sums which were charged on account of China, New Zealand, and British North America. In 1858 the military charge for British North America was £285,000; this year it was £887,000. In 1858 the charge for New Zealand was £86,000; the estimate for the present year amounted to £347,000. In the four years from 1853 to 1857 inclusive the military expense for the China station were £84,000., while the estimate for this year was £334,000. Taking these three items together, they had a comparison of £455,000 with 1,568,000, showing that in the present year they voted certain extraordinary charges in respect of those three foreign stations. He referred to the departments in which reductions had been made, and then came to the strength of the army. The total number of men which he asked the committee to vote was 148,242, as compared with 152,403 last year, making a diminution of 4,061 men upon the strength of the army. That diminution had been effected by reducing the number of men in each battalion. There was no reduction in the number of battalions, but it was proposed that there should be a reduction of 100 rank and file in all battalions serving at home and in the colonies, except at Ceylon, where there was generally only one battalion, and also excepting the battalions serving in China and New Zealand, and the first five battalions for foreign service. It was impossible for any person to form a correct notion of our military system unless he paid attention to the distribution of our army. In 1862-3 the battalions of infantry were distributed as follows:—At home, 40; in the colonies, 45; in India, 56. There was a striking difference in this respect between our army and the armies of the continental Powers, some of which, like those of Austria and Prussia, never went beyond their respective kingdoms. The right hon. baronet concluded by moving that 148,242 men be voted for the ensuing year.—General PEEL said the rule he had formerly laid down of adding two 0's to the number of men, it would be found, would enable them to arrive pretty nearly at the cost of the army. This year they would find that that calculation was affected by two regiments of infantry being employed in China, which were not included in the total force. It was of very little use to deal with the estimates when they had once voted the number of men. The exception to the forces included in the appendix was the charge relating to the native Indian troops employed in China, the numbers or any detail of the expense of which there were no means of ascertaining. They were told that they were paid out of the military chest in China, but the number of men varied from 3,000 to 10,000, and it was impossible to tell at what it stood at any time. Year after year he had asked that this charge might be brought under the annual estimates, and though he admitted that the present accounts were clearer than they had been hitherto, he found that while the charges for the force in China appeared in the total estimate, the number of men was not included. He wished also to draw attention to the advantages possessed by officers in China over the officers of other regiments in consequence of their receiving the Indian pay and allowance. A major-general commanding in China received four times the amount received by any major-general employed elsewhere, and his aide-de-camp, who might be a subaltern officer, received actually more pay than a major-general elsewhere. The major-general commanding at Hong Kong received £2,535, and his aide-de-camp £697; while at Ceylon the major-general received only £691, and the aide-de-camp £173. He wanted to prevent the Government having the power of employing any troops beyond those which were included in the estimates, and it was therefore his intention to move that the total number of men proposed to be voted should be increased by the strength of the China regiments.—Sir G. C. LEWIS said he had considered the subject referred to by the right hon. gentleman, whether or not to increase the number proposed in the estimate by those two Indian regiments employed in China, and he had come to the conclusion to take the course which he had adopted. In the first place, there were no materials at the War-office by which they could ascertain the precise numbers of the two Indian regiments; and at all events he had followed the course which had been pursued for many years with respect to the force at Labuan. The sum proposed to be voted in the present year for the force at Labuan was £4 500, and he proposed in this case, as well as that of the two Indian regiments, the expense should be voted by the House. In former times the money was supplied by the Indian treasury, and periodical settlements took place with the War-office, but in the present year they had been brought upon the estimates.—Colonel SYKES said the question before the committee was whether they should pay this year for 148,000 men or 150,000 men. It seemed to him that the tax of £10 per man in the Indian army acted as a direct premium in keeping up the force at the highest possible strength. But what was the meaning of this? It was draining the country of its very life blood—for the flower of its youth had to be sent out to keep up the troops at their proper quota. It was said that the number of men in China could not be reduced; but if it were not for our perfidy and our meddling policy, 1,000 men instead of 5,087 would be amply sufficient.—Mr. BUXTON was disappointed that the Government had not instituted any inquiry with a view to the reduction of the forces employed in the colonies. He wished that more attention were paid to the number of European troops employed in India, for the number had been increased from 40,000 before the mutiny to 70,000 now, with a greatly reduced native force to keep in check.—Mr. CHILDERS considered that for any reduction that might be proposed in the number of men, they must look to the expenditure for the East and West Indian colonies (Ceylon and Mauritius), which was estimated at £502,000, or to the expenditure for the establishments in New Zealand and the Cape, for which they were asked to vote £575,000. Some explanation was required as to why nothing had been done towards making the colonies contribute more largely to their expenditure, as recommended by the committee. The revenue of Ceylon was £767,000 a-year, its expenditure was only £700,000. He was aware that Ceylon contributed to the allowances of troops and also to their commissariat charges, but he thought the colony should pay more than £24,000. The Mauritius cost us £150,000; its revenue was between £500,000 and £600,000; and he doubted whether it contributed more than 1-16th of its revenue. He thought at least £100,000 ought to be advanced by these two plantations.—Mr. SEYMOUR regretted the hon. member had not given notice of his motion. He entertained no doubt that 10,000 men might be struck off the votes, considering the unusually large number of men voted for the navy. Even in the yeomanry and volunteer votes he thought a reduction was desirable, and that the yeomanry force might be made more efficient. In the administration of the army he found there were two enormous departments which were notorious for being in a disorganised state. Their united cost was £213,000. Then, again, there were other colonies besides those mentioned by the hon member for Pontefract. In China we had nearly 6,000 men; he wished to know what was the necessity of this permanent force among a race of men so peaceable as the Chinese. This force cost £560,000. No doubt while the present administration of the army lasted, some of those charges were inevitable, but why should not the system of administration be changed? But though he should be glad to see those reductions, he was not prepared to vote for the amendment, inasmuch as it had been prepared without notice. – After a few words from Mr. TREFUSIS, the committee divided: – For the vote, 77; for the amendment, 19—majority, 58. The vote was agreed to. On the vote of £5,709,733 for the general staff and regimental pay, allowances, and charges, General PEEL said he felt bound to propose a reduction in this vote of the sum of £38,000 proposed for "the re-payment to the Indian Government for the pay and clothing of two regiments of native infantry employed in China." The right hon. gentleman complained of the employment of these troops in China, and said the only way to prevent it would be by negativing the sum altogether.—Sir G. C. LEWIS said it would be very inconvenient to disallow this sum, and if it were done the Government would have to send out two European battalions, which would cost as much money to the country. He trusted that it might be in the power of the Government to reduce the number of troops in China, but they could not reduce the native troops at present. If this motion should be unhappily agreed to, the Government would have to revoke the orders issued, recalling the troops at Shanghai, and they would have to send out others. The vote was regular both in form and substance.—General PEEL said exactly the contrary the right hon gentleman has told the committee to that stated by him on previous occasions. His (General Peel's) object was to prevent any Government from employing a native Indian army in China by money of this country without the House having complete control over the expenditure. He had specified the force which he wished to reduce, and he thought the best thing that could be done would be to get rid of all the troops which were in China.—Mr. W. FORSTER said the committee ought not to vote money for men which they had not voted.—Mr. WILLIAMS supported the amendment on the ground that the proceeding was unconstitutional.—Sir G. C. LEWIS said there was not the smallest force in the objection to the vote on the ground of its being unconstitutional; nor could he understand why the gallant general should desire to substitute European troops for native Indians. The Government were desirous of withdrawing all the troops from the coasts of China, and were making great efforts to do so. The motion was somewhat capricious, because the gallant general did not object to the sum of £4,500 for the pay of troops at Labuan, which was in the same category. It would not improve the service or promote economy by negativing this sum of £38,000.—Mr. WHITE supported the amendment.—Mr. DODSON said the amendment was one more of form than of substance. The regiments in question could not be included in the 148,000 men voted, because the exact number of men composing them was not known. It would perhaps have been more correct if they had appeared not in the estimates, but on separate sheets.—Sir G C. LEWIS observed that if the two regiments had been included in the total number of men voted, they would have been made subject to the English Mutiny Act.—After some observations from Mr. KINNAIRD and Mr. H. BARING, the House divided, and the amendment was lost by six votes. On the vote of £5,709,733 for the general staff and regimental pay, allowances, and charges, General PEEL wished to put a question, which probably could be best answered by the Chancellor of the Exchequer, namely, whether this capitation rate was a fixed payment from the Indian Government to the Treasury, or whether it is merely matter of account, in which the Indian Government had the power of setting off any claim they might have for services rendered to the Imperial Government? He recollected it was stated before the military organisation committee that there were at one time five open accounts with the Indian Government on account of Chinese and Persian wars. The consequence of this system was that the House of Commons had no power over the expenditure, and that was distinctly stated by no less an authority than the late Lord Herbert, in his evidence before the committee.—The CHANCELLOR of the EXCHEQUER said the best answer he could give to the right

Digitized by Google

hon. gentleman would be to state that ever since he had been in office the attention of the Government had been given to the public expediency, and almost necessity, of winding up the complicated pecuniary relations that had grown up between the Indian Government and the Government at home. He trusted when making his financial statement to be able to show that there were no outstanding claims of any importance.—General PEEL said the right hon. gentleman had not answered his question. What he wished to know was whether, if Indian troops were employed in China or elsewhere, they must be paid for out of the grant voted for army purposes, or whether they might be paid for by a set-off of claims on the part of the Indian Government against the Home Government. All he wanted was that the vote should be submitted to the House as it stood, and that the charge should not be transferred from one vote to another.

AFFAIRS IN JAPAN.

(13th.) Mr. H. SEYMOUR called the attention of the House to recent occurrences in Japan, and moved for papers. He said he thought that the Government ought to be very careful in their selection of agents to be sent to Japan. Since the opening of the ports, in 1858, he believed that two British agents had been recalled for misconduct. First, Mr. Hodgson was recalled; and then Mr. Morrison had been sent home to answer some accusations which had been made against him of conduct which, to say the least of it, was very indiscreet. From the papers which had been laid on the table, it now appeared that Colonel Neale also was at variance with part of the population there. He did not wish to cast any blame upon Colonel Neale, but he wished to know whether any further despatches had been sent home than had yet appeared, and which seemed to be referred to in the papers published. Or if Colonel Neale had not written any further despatches, would his hon. friend state so publicly. One further question he had to ask was, what steps the Government intended to take in consequence of the outrages which had been perpetrated on British subjects in Japan.—Mr. LAYARD, in reply, said that his hon. friend had been very much misinformed with respect to Mr. Consul Morrison. That gentleman was not sent to this country to have his conduct investigated, but he came home after a considerable residence in Japan, during which his health had become impaired. It was quite true that charges had been made against him in the Singapore papers, and when those charges were brought to the notice of the Foreign-office, they immediately instituted an inquiry, and the result was the entire acquittal of Mr. Consul Morrison. It was true that Mr. Morrison had struck a Japanese, and the Government had thought it necessary to express its disapprobation of his conduct on that occasion, and it was to be hoped that when he returned he would be more careful in his dealings with and treatment of the natives. But at the same time he (Mr. Layard) must be allowed to say that Mr. Consul Morrison was one of the ablest public servants we had got in the East, fully acquainted with his consular duties, and enjoying the entire approval of British residents in Japan. As regarded the instructions sent out in consequence of the barbarous murder of Mr. Richardson, the House might be perfectly certain that the Government would take such steps as were right to obtain satisfaction for that outrage; but as the instructions sent out had not yet been carried into execution, he could not with propriety lay them upon the table. The hon. gentleman had asked whether Colonel Neale had sent to England any observations in reference to the accusations made against him by the merchants in Japan, and the answer was that no such statement had been sent to England by Colonel Neale. He believed that after the despatch printed in the blue book had been written a good understanding was restored between Colonel Neale and the merchants, and therefore the colonel very wisely thought it better not to carry on the controversy.

MUTINY OF THE CHINESE TROOPS.

(13th.) Colonel SYKES asked the Under Secretary of State for Foreign Affairs, whether the Government would communicate to the House any further papers, in continuation of those of the session of 1862, respecting the progress of affairs in China, particularly in regard to the recent mutiny of the drilled Chinese troops under General Burgevine: the accusation of treason and robbery against that officer; his removal from his command, and the issue of a proclamation by the Footae of Shanghai, offering a reward of 20,000 dollars for his head; the appointment of Captain Holland, of the Royal Marines, by Major-General Staveley, commanding the British force at Shanghai, to the temporary command; the refusal of the Chinese troops to accept him as their commander; and any information of the proceedings of Captain Dew, R.N., at Ningpo.—Mr. LAYARD stated in reply that all the papers which the Foreign office possessed on the subject of our relations with China had been laid on the table of the House.

Continental Intelligence.

FRANCE.

Commander Bedford Pim, of the British Royal Navy, has had an audience of the Emperor. He was received in the most satisfactory manner by His Majesty, and an interesting conversation ensued on Captain Pim's projected transit through Nicaragua. The Emperor accepted his book, "The Gate of the Pacific," and said he took much interest in the subject. He also observed that he should be most happy to assist him in every way he could, and added that he highly approved an English and French company being formed to carry out "this great highway" in European interests. He offered Captain Pim to put him in communication with some of the leading capitalists in France, and he at once gave him a letter to the head of a well-known French company. During the interview with Captain Pim, which lasted more than half-an-hour, the Emperor inspected the maps and plans in the volume presented to him. In a word, nothing could be more gracious than the manner in which this English officer was received by His Majesty.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 6, 1863.

H.R.H. the Prince of Orange Nassau, Crown Prince of the Netherlands (born September 4, 1840), is betrothed to his cousin, the Princess Marie, second daughter of H.R.H. Prince Frederick of the Netherlands, Field Marshal, and Admiral of the Dutch Navy. The Princess was born July 5, 1841, and is consequently in her twenty-second year. The ceremony of betrothal was performed at the Palace, at the Hague, on the 28th ult., the birthday of the father of the *Fiancee*.

The new Colonial Minister has withdrawn the Bill on the culture system in Java, introduced by his predecessor, in order to make some alterations in it. It was generally expected that he would have made use of the opportunity to give to the house and the country a statement of his political tenets, and what measures he intends to propose, but in that they were disappointed, and nothing of the sort took place. But a still better and more natural opportunity will be afforded him very shortly, when he brings in the new Colonial Budget, which was the cause of the late Minister's shipwreck and his own accession to office, or the Bill for regulating the disposal of the surplus colonial revenue, both of which will probably be brought in before Easter. It is devoutly to be hoped that the question of the colonial system will soon be settled in a definite and lasting manner, and thus put a stop once for all to the agitation that has prevailed for so long a period; for it cannot be denied that the present uncertainty on the subject acts most injuriously on the commercial and other interests connected directly or indirectly with the colonies. Among other things it is this state of uncertainty that has caused the execution of the new tariff for Netherlands India to be delayed. Mr. Rochussen projected it as far back as 1858, Mr. Loudon accepted it in 1860, so that this uncertainty has been pending for five years. The misfortune is that since 1858 we have had in this country no less than five Colonial Ministers, each of whom had his own ideas on the subject, and tried to carry out his own plans in opposition to the wishes of the nation and the majority in both Chambers of the States-General.

A treaty of amity and commerce concluded between this country and the Sandwich Islands has been ratified by the Chamber. As it is based on the principle of perfect reciprocity, it contains nothing that can be of interest to foreign nations; because, according to the system in force in Holland, no commercial advantages can be granted to any one nation without becoming the general property of all with whom this country has existing treaties.

The Government has brought in another Bill to prevent a great injustice that threatened a large number of the inhabitants of Java, it having been proposed to make the sons of Europeans settled on that island liable to the military conscription, and oblige them to serve in the army if drawn. By the new Bill they will be declared exempt from military service.

Many of the German Governments are very indignant that the introduction of the new commercial code of laws has been declined in the Grand Duchy of Luxemburg, and protests and representation on the subject have been made by some of the ambassadors at those States at the Hague, calling on this Government to enforce it as in most of the other States belonging to the German confederation. The demand, however, is as unreasonable as it is unconstitutional; for Holland has no right to interfere in the question, Luxemburg having its own separate Parliament and autonomy, its only connection with this country being a personal union, the King of the Netherlands being at the same time Grand Duke of Luxemburg.

A considerable number of soldiers belonging to the cavalry and artillery of the home service have arrived at the Colonial Military Depot at Harderwyk, having volunteered to join the Indian army for six years, for which they each receive a bounty of 150 florins.

Amongst seventeen new Bills brought in by the Government is one for confirming the decree published last year by the Governor-General of Netherlands India, ordaining the free importation of paddy and rice in Java and Madura, and the abolition of customs duties on all other articles of food in the Dutch possessions in the Eastern Archipelago.

Messrs. D. Christie and Son, of Kralingen, have undertaken a contract with the Colonial Department for the construction of a small iron steamer for service in the East Indies. The contract sum is 3,350 florins.

A fine new vessel of 1,440 tons, built by Messrs. F. H. and C. van Lindern at Alblasserdam for account of a ship-owning

Digitized by Google

partnership under the management of Mr. F. H. van Lindern, has been christened "The New Water Road" (*Nieuwe Waterweg*). She is intended for the East India trade.

During the month of February the number of vessels that arrived with cargoes from the East was 34 (against 53 in January, 14 in December, and 10 in November), 14 of which discharged at Amsterdam, eighteen at Rotterdam, one at Middelburg, and one at Dordrecht. Twenty-one brought cargoes for the Netherlands Trading Company, and thirteen for the private trade. Nineteen came from Batavia, six from Samarang, two from Passaroeang, one from Cheribon, two from Sourabaya, one from Tjilatjap, two from Padang, and one from Foo-chow-Foo. These vessels have brought 151,672 bags of coffee, of which 105,638 for the Company, and 46,034 for the private trade.

The Minister of War gives notice that in the month of June there will be a competitive examination of candidates for entrance as cadets in the Royal Military Academy at Breda. Applications to be sent to the War-office, up to the 1st of May. The number of cadetships open is as follows:—A. For the home service. Infantry 30, Cavalry 2, Artillery 12, Engineers 5. B. For the East Indian Army: Infantry 12, Cavalry 2, Artillery 8, Engineers 4. C. For service in the West Indies: Infantry 2, Artillery 2.

In one of my former letters I informed your readers of the intention of the Dutch Government to send a military expedition to Passir (situated in Borneo, eastward of Banjermassing), to punish the Sultan of that country for the assistance he rendered to the rebels in the late war. It is a part of the usual Oriental policy always to leave a back-door open to escape by in case of need. Such a course has been followed by the Sultan of Passir in this instance, and under the plea of his having taken up arms in consequence of a misunderstanding, has sent in his submission, and concluded a fresh treaty of peace, thus again obtaining the protection of the Dutch flag. The Pangarong Moedah, a neighbouring chieftain, who acted as the Sultan's emissary, has been suspended from his functions, and sent to Samarang, where he will be kept as a sort of hostage.

Personal.—Mr. P. M. Kamerling, Assistant-Resident and Commandant of H.M.S. Fort St. Anthony, at Axim, will sail for the Gold Coast in a few days, having taken his passage on board the Dutch brig *Governor Schomerus*, Captain Zillisen.

Lieut. H. J. Broekhuyzen, R.N., is appointed to the guardship *The Rhine*, 50, at Helvoetsluys, Vice-Lieut. E. Bonn, transferred to the new screw corvette *Stavoren*, 10, just commissioned.

Lieut. J. Arnoldy, of the E. I. Army, and Mr. T. W. Neuhaus, Military Apothecary of the same service, have embarked at Nieuwe Deep on board the *Indian Packet*, Captain G. Diepernig, for Java.

H. M. has conferred the distinction of a Knight of the Order of the Netherlands Lion on Younker J. L. C. Pompe van Meerdervoort, Medical Officer in the Dutch Navy.

Mr. P. C. W. Anemaet, Inspector of the Naval Administration in Netherlands India, is permitted, at his own request, to retire from the service, with a pension for life.

The King has appointed Mr. D. J. Crol and Mr. A. Lucardie to be Officers in the Forest Department in Netherlands India.

Mr. J. van den Bosch, Military Sub-Intendant of the First Class, has been placed, at his own request, on the list of non-active officers.

The King has accepted the resignation of Brevet Rear-Admiral S. R. van Franck as one of His Majesty's Naval Aides-de-Camp, and granted him a pension of 1,800 florins, in consideration of his long and meritorious services.

Capt. Lieutenant J. F. Koopmann, R.N., is appointed Aide-de-Camp to the King, *vice* Rear-Admiral S. R. van Franck, resigned.

Mr. J. Groll, Engineer of the Government Telegraphic Department in Netherlands India, now in this country on leave of absence, has tendered his resignation, which has been accepted, and a retiring pension awarded him.

The East India Government has engaged Mr. van Kinsbergen for the period of three years, for the purpose of making photograms of the antiquities in Java. For this service he is to receive £800 for the first year, £900 for the second, and £1,000 for the third, together with an outfit, and his travelling expenses out and home.

Mr. J. A. L. Steyn-Parve is appointed Assistant Resident of Ponorogo, and Mr. J. H. Coster to be Judge of the Court of Justice at Batavia.

PASSENGERS ARRIVED.

Per *Maria Adriana*, Captain van der Held, at Rotterdam from Batavia, Mrs. Widow Halberts.

Per *Henrietta Maria*, Capt. Tjebbes, at the Texel from Batavia, Mr. and Mrs. J. de Bode and child, Captain G. de Poll, of the E.I. army, wife and two children, Lieut. J. Habets, R.N.

Per *Vier Gezusters*, Captain Bik, at Rotterdam from Batavia, Mis Kornfeld, Messrs. Gevelaer, Haentjes-Dekker, C. Schaap, Laros, and twenty passported soldiers.

Per *Krimpenerwaard*, Captain van Heyningen, at Rotterdam from Batavia, Lieut. J. L. Nierstratz, R.N., Mr. C. A. Neve, medical officer and lady, Mrs. Bruigom and four children.

Per *Columbine*, Captain Malbranc, at Rotterdam from Batavia, Rev. r. van den Berg, Messrs. W. F. Kohl, H. F. Brandes, P. J. Hartel, n Kerk, and twenty passported soldiers.

Per *Stad Dokkum*, Captain Jaski, at Amsterdam from Batavia, Lieut. Fleenhuyzen, Mr. J. Boers and Mr. J. Mulder.

COMMERCIAL.

COFFEE fully maintains its previous attitude of firmness, and since last mail the business done has been very extensive. Company's good ord. Java is not to be had under 45½ cents, and for small parcels as much as 46 is paid. The samples of the company's spring sale are now on show, and the valuations been made by the brokers. A great cry out of an attempt to rig the market has been made, as the brokers are accused of having taken the price of 45 cents for good ord. Java as the basis of their valuations, which is considered too low, and consequently unfair. However, it is a great question whether purchasers will permit themselves to be influenced by this fictitious price, and not see through the manœuvre. The assortment exhibits an almost total absence of coloured coffees, especially in the good ord. up to fine descriptions. This was also the case in the last autumn sale. Blue Cuba imitations are wanting altogether, and of high coloured there are only 1,193 bags (No. 10). Nos. 11 and 12, together 14,737 bags, contain the whole assortment of high coloured middling; and Nos. 16 and 17, together 16,502 bags, all the good ord. green that will be offered for sale. It is therefore to be expected that these numbers will fetch a comparatively very high price. On the other hand, there is a large assortment of pale and bright descriptions. No. 25 (7,359 bags), No. 26 (13,279 bags), and No. 27 (11,400 bags), are not of clean taste, No. 28 (7,151 bags), and No. 29 (2,967 bags) are sticky.

Among the sales by private trade importers are 1,883 bags of Java, ex *James Graham*, at 45 to 46, and 529 bags, ex same ship, at 46; 1,000 bags of Padang, second quality, at 36½; 288 bags of green Java, ex *Princess Amalia*, at 44½; 1,245 bags of Padang, ex *Catharina Maria*, at 45 to 45½; 1,015 do., second quality, ex same ship, at 36½; 4,500 bags of Java, ex *Alblasserwaard*, at 45½ to 46; 3,216 bags do., ex *Benvoirlich*, at 45½, 46, and 47; and 600 bags of Padang, second quality, at 36½. The deliveries in February were 24,809 bags, which is about the same as last year. The disposable stocks of company's goods on warrants are 67,413 bags, against 35,909 last year. The unsold coffee in the company's warehouses is 551,940 bags (including the quantity for the spring sale), against 509,047 in 1862.

TEA.—The sale by auction of the cargo, ex *Crouch Brothers*, from Foo-chow-Foo, was well attended, and went off with spirit, realising full prices. Only a few lots were bought in, but they were disposed of by private contract immediately after the sale.

SUGAR.—The raw market is giving evident signs of recovery from its late depression. There has been a lively demand both for home refiners and exportation, and prices have rather improved. Among the sales were 208 kranjangs and 739 mats of Samarang, No. 19, fine steam made, at 37½ fl.; 425 kr. of Cheribon, No. 10½ to 15, at 26½ and 33 fl.; 445 kr. of Passaroeang, No. 15½, fine steam, at 34½ fl., to be received on board; 2,139 kr. of Passaroeang, ex *Star of the North*, No. 12½, fine quality, at 30½ fl.; 622 kr. of ditto, ex same ship, No. 17¼, fine steam, at 31 fl.; 590 kr., No. 14, at 32 fl.; 888 kr., No. 18½, fine steam, at secret prices; and 546 kr., ex *Metis*, No. 13½, very fine steam made, at 31¾ fl.

The valuations made by the brokers for the Company's sale of 62,300 kr. of Java on the 11th inst. are as follows:—

No. 6	22 fl.	..	No. 11	28¾ fl.	..	No. 16	35 fl.	
7	23½ „	..	12	30 „	..	17	36 „	
8	25 „	..	13	31½ „	..	18	37 „	
9	26¼ „	..	14	32½ „	..	19	38 „	
10	27½ „	..	15	33½ „	..	20	39 „	

In the refined market a better opinion prevails, and some extensive purchases have been made of B and H for delivery in April, after which the market became firmer, and purchases cannot now be made under 32½ for No. 1, and 31 for No. 2.

RICE.—There have been no fluctuations in the prices of this article, which remain exceedingly steady. Among the sales may be noticed 5,311 bags of Java table rice in the husk, ex *L. A. Banq*, at prices that did not transpire; the remainder (1,300 bags) of the cargo of beautiful uncleaned table rice, ex *Wave Queen*, at 18 fl., and several parcels of cleaned grain at 21 fl.

SPICES.—Java Cinnamon, No. 3, is in considerable favour, and a large business has been done at rising prices, commencing at 71 and leaving off at 73 cents, at which latter figure there are still purchasers. In other spices but small business done, and no alteration in values.

TIN.—The late rise in Banca is well supported, prices remaining steady at 73 fl., at which figure some 5,000 blocks have been sold

COPPER.—About 10,000 kilogr. of Company's found purchasers at 52 fl. The Company advertises a public sale of 300,000 kilogr. of old E. I. copper coins, melted into tough cake, for the 12th inst., at Rotterdam.

HIDES have experienced a fair sale. Among the sales are 6,173 ox, and 1,664 buffalo, by tender, and 500 buffalo, ex *Gevalia*, for exports Prices are firm. The stocks of Java in importers' hands are 13,256 buffalo, and 10,093 ox.

INDIGO.—The fall in London has lowered the prices here 50 to 60 cents on October values, but a lively business has ensued in consequence, about 500 chests of Java having been sold.

LONDON, MONDAY, MARCH 16, 1863.

BRITISH INTERESTS IN CHINA.

IN a pithy and suggestive pamphlet lately published under the title of "England's Mission in the East," Mr. S. LAING explains the recent restoration of Indian Finance, and endeavours to show what a brilliant prospect there is for British India in the future. He does not consider that there is the least probability or even possibility of another mutiny; he affirms that the mass of people in the independent States would prefer being under British rule; he notes the extraordinary growth of public opinion within the last few years, and that this opinion is favourable to our interests; he points out the establishment of Legislative Councils with open discussion as a great turning-point in the history of India, and expresses his views on several topics—such, for example, as the Rent and Indigo Questions. and the Law of Contract—which have recently excited attention, "England's Mission in the East" naturally involves some discussion of our relations with the Chinese, and Mr. LAING shows how intimately the prosperity of India and the course of trade between India and England are affected by the commercial relations between India and China. "Close China (he says) to "the trade of India, and in the first place India loses £5,000,000 "of revenue derived from opium, which must be replaced by "oppressive taxation; in the next place, it becomes impossible "for India to remit to England the annual balance of £10,000,000 "which she owes for expenses of the Government; and lastly, "the export trade of English manufactures to India is crippled "by the inability of India to maintain her usual imports. So "intimately are the most distant nations linked together by the "complex ties of modern commerce, that the sacking of a "Chinese province by a horde of Taipings may lead to a drain "on the bullion in the Bank of England and a stoppage of work "in the looms of Lancashire. Such is the indirect effect of our "commerce with China; the direct effect is even more obvious. "A single Chinese article of export—tea—gives the English "Treasury £4,000,000 of revenue, and supplies what has "become a necessary of life to our whole population."

There is no denying these statements, and on the strength of them Mr. LAING goes on to defend the course recently adopted by our Government and the policy of assisting the Imperialists, by allowing them to engage the services of English officers and civilians. Mr. LAING urges the plea of necessity for the policy he advocates. The Taipings are simply land-pirates—as pirates then let us treat them; the Chinese Government must either be regenerated or perish; let us, through the help of Mr. LAY and Captain SHERARD OSBORN, attempt its regeneration; the extension of our trade will infallibly involve us in difficulties if anarchy is suffered to prevail; let us strike at the root of it by creating a respectable force, and reorganising the financial administration, "so as to enable the Chinese Government to "suppress the Taiping rebellion, and maintain peace, order, and "its own independence."

Of course Mr. LAING'S main position, like that necessarily occupied by the Government in all discussions on Anglo-Chinese policy, is the maintenance and strengthening of our commercial interests in the Far East. With all our hearts we say "Amen" to any course which keeps that end in view, provided it be based on sound principles, and is not hastily sanctioned to obviate a present inconvenience. We do not say that the recent policy of the Government may not ultimately be the wisest, considering the vast interests we have at stake in China; but we do say that the result to which it will eventually lead is so stupendous, that before receiving official sanction it ought to have been discussed and ratified by the Legislature of the country.

THE PROPOSED REDUCTION OF THE TEA DUTY.

POLITICS are in this respect less ennobling than religion, that no man is willing to be a martyr to them, so far as facing a Budget debate in the House is concerned. Even the great Conservative split which divided that renowned party into Free Traders and Protectionists, did not and has not yet produced one single man who dares to look the principle of Free Trade in the face, and boldly follow it out to its utmost practical results. To maintain that, in the present stage of civilisation, it is the duty of any disciple to push any mere *doctrinaire* theory to its extreme logical conclusions, is to insist upon his converting, or possibly subverting, society. We are but paying for the erroneous policy of our ancestors, as well as our own, in having to tax all manufactures, no matter how roughly manipulated, at the very moment that we are preaching unlimited free trade, and the sneer is always ready that we are willing enough to admit, duty free, the raw material which we no longer produce, but that we are yet more ready to hamper by excessive import duties the operations of capital, both at home and abroad. There is some little justice in the sarcasm, especially in the case of the tea duty, which actually amounts to 100 per cent. on the average price in bond; but this proceeds chiefly from the apparent inability of the general public to comprehend how it may happen that a principle may be essentially sound, but may not be susceptible of a crucial test in practice. Such is the case with Free Trade. We read BASTIAT'S *Sophismes Economiques*, or Mr. COBDEN'S, or Mr. VILLIER'S Free Trade Hall speeches of twenty years since, and we wonder how it is possible to gainsay them. We turn to our Free Trade CHANCELLOR of the EXCHEQUER in 1862-63, and we find him imposing a duty of 1s. 5d. per lb. upon tea, or in other words a war-tax upon what has now become an article of prime necessity, and ought, therefore, by every analogy to be classed with raw material. That represents, in the present instance, the measure of the mulct which our China trade has to pay for our ignorance in past times of the principles of political economy.

Now, this is manifestly unfair. The China trade has been built up almost entirely within the Free Trade Era, and it seems hard that enterprise should be hampered, and ventures jeopardised, by the uncertainty that must always prevail when any article of enormous and ever-increasing consumption is taxed at war prices. Whole markets are deranged by the bare announcement of what ought to be a blessing—a financial surplus admitting of a material reduction of general taxation! Where and how ought such a measure of relief to be distributed, according to every rule of common sense and even common justice? Surely among those articles which are confessedly taxed at war rates. But if, on the contrary, a surplus is announced, and there is no definite understanding in what direction taxes are to be reduced or removed, the utmost agitation must always unhinge the market; and hence the important meeting of merchants and others interested held on the 25th ult., of which a brief summary appeared in our last issue. Mr. GLADSTONE, though a staunch free trader, seems reluctant to acknowledge the fact that in proportion as you forestall a genuine *Demand* by reduction of taxation, or opening new fields of enterprise, or affording additional facilities of transport, in that same ratio you promote the prospects of every branch of trade concerned in the business of *Supply*. London has increased about fifty per cent. of population within the last thirty years, yet the traffic has increased above 2,000 per cent., owing to the systematic substitution of lines of cheap omnibuses and carefully regulated cabs, and subterranean lines of rail, and penny steamers, for the expensive, dirty old hackney coaches, and neat but exorbitant wherries, which were all we had at the former epoch. Railroads have far more than quintupled the traffic over even great distances. Letters actually contribute more to the revenue now than they did in the days of eightpenny postages, and that despite an infinitely greater proportional increase of staff expenses. In a word, the great lesson of the last twenty years is, that you may develop a sound trade,—by which we mean one not dependent on fashion, or a precarious staple,—almost illimitably, provided you restrain it within those slight limits alone which are necessary to enable it to pay its own way.

Tea, sugar, silk, and tobacco, however, are the principal stand-bys of sorely badgered Chancellors of the Exchequer.

Digitized by Google

The meeting was aware of this, and consequently did not demand that Mr. GLADSTONE should forego all return from the tea duties. It felt that, however undeservedly, the tea trade must contribute more than its proportion to the Imperial Revenue, and all it asked was that the CHANCELLOR of the EXCHEQUER should not nibble at any alteration he may propose, but give the public the full benefit of such a decided reduction as shall at once make itself appreciable in the market. When a tax is producing a sum of £6,000,000 per annum, it is a severe temptation to an orator like Mr. GLADSTONE to obtain financial reputation by such apparently inappreciable differences as 1d. for 2d. per lb. We beg to inform Mr. GLADSTONE that, however conducive to his self-esteem such veritable *leger-de-main*—such dexterous light-fingeredness—may prove, the public, of whose verdict Lord PALMERSTON'S Cabinet openly professes to be the exponent, will not thank him for any such paltering with their comfort, and with a great interest. There was not a man at the meeting already alluded to whom any slight alteration in the tea duty could affect otherwise than beneficially; for the public will insist on having tea at even pence, and any profit therefrom involved in an alteration upon so small a scale, must virtually go into the pockets of the "teamen" in China, or the retailer at home, so that the great houses represented would simply be shipping more tea upon much the same terms. The Chairman stated that when tea was taxed at 2s. 2d. per lb., the Exchequer benefited to the extent of £5,100,000; when the duty was reduced to 1s. 5d. per lb. the increase rose half a million, the duty for 1862 figuring for £5,600,000. A uniform duty of 1s. would, we verily believe, raise the revenue from that source far above £6,000,000, and would enable the public to benefit in a manner so decided, as to render it extremely probable that the now proverbial expansibility of the trade would ere long run the revenue up to an almost fabulous figure.

In fact, the proposed reduction, supposing the new fields rapidly opening in Assam, Java, and Japan do not materially affect the market, would still represent a duty of 60 per cent. upon the assumed average price in bond of 1s. 5d. per lb., upon which the duties are based; and it would indeed justify cavil to find a Free Trade CHANCELLOR of the EXCHEQUER professing Liberalism by a reduction of 40 per cent. as a sop, and a spurious Conservatism by the retention of 60 as a fact. Yet such was the position most clearly proved by Mr. THOMAS BARING, and which, we say, amply justified the motion that such an import duty "interferes with the extension of our commerce with China, as also with the consumption and daily comforts of the community."

These last words open up a most prolific field of argument, connected with some of the most important social questions of the day. If ever the demon of intemperance is to be struck down in this country, it will be when a wise and economic system of taxation reduces imposts upon articles of primary necessity for the working classes. The expense of the administration of justice in all its branches last year represented a sum of no less than £1,900,000, including criminal labour, which ought not to compete with free labour. How much would be saved on this one item were "the cup that cheers but not inebriates" brought home to every poor man's cottage, and enabled to rival the flaunting gin-palace at the corner of the squalid London alley? We cannot, if only on this ground, agree with Mr. CRAWFORD'S reservation in seconding Mr. BARING'S motion, that "he must wait till he heard what the CHANCELLOR of the EXCHEQUER proposed to do with the sugar duties." The very fact that the two duties are, as he truly said, intimately connected with each other, should have shown him that such an argument was, if not futile, at least only equivalent to saying that half a loaf was equal to a whole one. To reduce the tea duties, and leave the sugar duties untouched, seems to us the very height of inconsistency. For every additional cup of tea that is drunk, a proportionate quantity of sugar is consumed, so that anything that increases the consumption of the one must increase that of the other, while any relief of one must be only partial, unless the other share alike. However, half a loaf is better than no bread. We are glad to find the question mooted so temperately and reasonably, and trust the action taken by the meeting will have its legitimate effect upon the calculations of Mr. GLADSTONE, so that the Budget of 1863-64 will see this great boon conferred upon the toiling millions of our fellow-countrymen, to the hardly less immediate relief of our middle-class merchants, who are building up our mercantile repute in the Far East.

THE TRADE OF THE FAR EAST IN THE PAST YEAR.

WE proceed, as is our custom, to pass under review the trade of the Eastern countries of which our journal takes cognizance, now that we are in possession of sufficient data to enable us to institute comparisons, and we commence with a retrospect of the trade of Singapore and Siam. Looking first at the imports of Singapore from Great Britain, we are necessarily struck with the large decline in the imports of Manchester goods, shirtings, madapollams, chintzes and prints, and dyed cloths—a circumstance attributable to the high prices prevailing on this side. The only textiles that have kept up to the quantities of the previous year are domestics, cambrics, and Turkey red cloths. In the import of beer and wines there is a material decline shown. The imports of metals show a large increase. The trade in muskets seems now to be monopolised by the Continent.

The declared value of our exports of British manufactures to Singapore, which averaged about one million in 1857 and 1858, rose in 1859 and 1860 to £1,500,000, and fell in 1861 again to one million. The chief decline is in cotton manufactures and woollens. The imports it is satisfactory to see have gone on steadily increasing, as is shown by a progressive increase in the computed net value from £763,489 in 1858, to £1,913,425 in 1861. While gutta-percha is scarcely increasing (although there was a recovery last year), there is a large increase in the production of india-rubber from the East. The average imports of gutta-percha have been 19,000 cwts. in the last four years. In 1861 we received 13,357 cwt. of caoutchouc from Singapore. The imports of sago keep uniform at about 150,000 cwt. in the last four years. The exports of pepper from Singapore to Great Britain show a steady increase. In 1861 the shipments were large, 55,500 piculs; but in 1862 the exports were nearly 67,000 piculs of black pepper, besides 12,578 piculs of white; of nutmegs and mace the exports last year to the United Kingdom were 585 piculs, and 802 piculs to other quarters. There was an increased export of sticlac, 5,883 piculs against 2,262 piculs in the previous year. In coffee there is a decline of 7,400 piculs, but in sapanwood there is an increased export of 1,200 piculs. The trade in gambier still keeps large—this being the exclusive product of the island of Singapore—156,270 piculs were shipped to Great Britain, 9,138 to India, 77,142 to Europe, and 30,461 to the United States. The only other articles sent to this country deserving of notice are pearl shells—904 piculs, an increase of 200 on the previous year; tortoiseshell 3,176 catties, a small increase; camphor, 2,177 piculs; gum benjamin, 658 piculs; and gamboge, 205 piculs. The export of antimony ore has ceased, and tea shows a decline of 6,300 piculs as compared with 1861, when our imports were unusually large, 60,058 cwts. The direct trade with the Continent of Europe shows a decline on almost every article in quantity as compared with the previous year. The rice trade shows imports for 1862 amounting to 1,078,733 piculs, of which 450,559 were re-exported. The sugar imports were 77,832 piculs, and the exports 47,797 piculs. With China the export trade is chiefly restricted to opium, which took 810 chests, cotton 534 bales, pepper 30,528 piculs, betel nuts 25,839 piculs, rice 167,787 piculs, rattans 44,848 piculs, ebony 5,478 piculs, and sapanwood 7,368 piculs. The chief imports from China were tea 4,633 piculs, tobacco 8,743, silk 772, alum 2785, cassia bark 1,246, and camphor 3,868 piculs. The trade of the year was carried on in 2,167 punts and boats, and 1,069 square-rigged vessels, importing goods to the value of $26,208 528; and 2,198 native craft, and 1,108 square-rigged vessels, which exported merchandise valued at $18,805,102, making an aggregate trade of upwards of nine millions sterling. Although this is a less aggregate trade than on some previous years at this great *entrepôt*, yet it must be borne in mind that European trade and commerce generally were very dull last year. The American war and the Manchester distress having greatly interfered with shipments.

We pass on now to a consideration of the commerce of Siam—a country with which we hope to see a much larger trade carried on before many years are over. We are glad to perceive that although our import trade from Siam does not increase, our exports of British manufactures are progressing. The value of the imports of Siamese products have declined from £96,394 in 1859, to £75,240 in 1860, and £25,138 in 1861. Last year's returns are not yet published. In 1860 we sent out home goods to the value of £13,203, and in 1861 £35,979, of

Digitized by Google

which £15,411 was machinery, and £3,585 iron. The articles we take from them are but few: the principal ones being hides, pepper, rice, sapanwood, sugar, teak, gum benjamin, oil, seeds, and a few other minor products: metals, machinery, and military stores are the principal articles sent in exchange. Cottons, earthenware, beer, and a few other small items make up the remainder of the balance-sheet. A considerable export trade is, however, carried on from Bangkok with the surrounding countries, as the trade returns of last year show.

The export trade in pepper from Bangkok has been steadily on the increase of late years. The shipments are made principally to China, the Straits, and Batavia. The total exports last year were about 25,000 piculs, of which the bulk, 20,172 piculs, went to China. The sugar export is steady, but not equal to the large shipments which were made in 1860. Last year 102,576 piculs were shipped, in 1860 150,875, but a very small quantity is now shipped to Europe and America. About 24,000 piculs on an average go to China and Manila, and 67,000 to Singapore, India, and Batavia. Of rice, which is the principal crop and the largest staple of trade, the shipments last year reached 1,555,664 piculs. Of this quantity China takes the chief portion, a little going to the Straits and India, and about 20,000 piculs to Europe. The exports of paddy are small, only about 10,000 piculs annually. In sapanwood and teak there is also some considerable trade carried on. Teak logs, planks, timber and ship's knees are in demand, and about 75,000 piculs of sapanwood were shipped last year. It is much in demand for China for dyeing. Teakwood is becoming more scarce yearly. Of hides the shipments were 3,500 piculs, of which less than 1,000 came to Europe. Of buffalo and deer horns nearly 2,000 piculs were exported; 1,715 piculs of cardamans were sent to China; of gum benjamin 140 piculs were exported, chiefly to Europe. An increasing trade is noticeable in teel seed (sesame), which yields a fine bland oil, a good substitute for olive; 11,500 piculs were shipped in 1862, against 7,182 in the previous year. We observe a new article of export in the list last year in 250 piculs of rosewood—what description of wood this is, however, it is impossible to define, as the name varies so in every country, while in some it is supplied for the odour, in others for the colour. The imports of cotton comprise only a few piculs, although it is of very fine quality. It is to be regretted that the Siamese cannot be induced to cultivate it more extensively. In sticlac there is a large increase, the exports having been 11,328 piculs against 4,281 in the previous year. Very little of this, however, comes to Europe, the bulk going to India. The United States, which did a little direct trade with Siam in the two previous years, carried on none in 1862.

THE OPIUM MONOPOLY IN JAVA.

No. I.

Amongst a great mass of Parliamentary papers lately presented to the States-General of Holland are several important documents sent in from Java, which give a lively picture of the past and present state of the opium trade in that island. It is well known that this poisonous drug is a monopoly of the Government, and the sale subject to very onerous restrictions. The right of retailing opium is put up to public auction in each district, and farmed out to the highest bidder. In some parts of Java, as in the Preanger Regencies, the importation and sale of the article has been prohibited for several years past, and is in consequence but little in use, and consumed only in secret. The cultivation of poppies, from the seed-heads of which the opium is prepared, is prohibited altogether in Java and Madura, so that the Government are totally dependent on other countries for the supply; and the laws against smuggling it are exceedingly severe, not only involving the confiscation of the article, but punishing the offenders with heavy fines and penalties, or the alternative of imprisonment in chains, with hard labour, for a long term of years.

But beyond this general principle of a Government monopoly, which has always been and still is in force, a great diversity of Legislative enactments have been pursued by the different administrations of succeeding Governors-General; and it happens but rarely that the annual contracts have been farmed out under the same conditions for more than three or four times consecutively. The object of these frequent alterations appears to be of a two-fold nature—firstly, to lessen the consumption of the deleterious drug; and secondly, as it is found impossible to put it out of use altogether, to make it as productive as possible to the revenue. Perhaps the latter object is of more importance than the former; but be that as it may, it is absolutely necessary to keep a vigilant eye and control on the farmers—mostly Chinese—who being licensed to sell the article, find it profitable not to confine themselves to the sale of the limited quantity doled out to them every month, but to extend their operations by patronising the smuggler, and buying from him at a cheaper rate than they have to pay the Government.

Previous to the year 1833, the contracts were knocked down to the highest bidders without any limitation of the quantity, so that these latter were placed in the enviable position of enjoying the protection of the Government against smugglers, and were enabled, not only to open as many shops as they liked, but to make their own price to the consumer, and adulterate the article to their heart's content. In 1834, when Mr. Baud was Governor-General, this principle was abandoned, and a new one introduced, fixing the price to be paid, making it imperative on the contractor to purchase exclusively from the Government, and limiting the quantity to be delivered. The object of this alteration was to secure as much as possible to the Treasury the profits arising from the opium trade, and to control the quantity used for consumption. In the following year they went a step further, as it was then stipulated that the same price should be paid for each monthly quantity all the year round. From that period may be dated the introduction of the distinctions of *tiban* and *siram*. The former was the quantity the contractor agreed to take every month, and for which he was to pay at the rate of 120 florins per catty of $1\frac{1}{4}$ kilogr. each; the siram was an additional quantity that the Government were bound to deliver to him, if required, at the reduced price of 50 florins per catty, but only to the extent of one-fourth of the tiban. For any further supplies he was again to pay 120 florins, as above.

When the opium contracts were put up to competition in 1836 and 1837, another alteration was made in the conditions. For each local district or division of the island the minimum price of tiban was fixed by the Government at 120 fl. per catty, whilst the siram was to be the same, and the highest bidder above this figure obtained the contract.

In 1838, under Governor-General de Eerens, we find the minimum quantity of tiban fixed for each district, and amounting for the whole of Java and Madura to 3,495 catties per month. The price to be paid to Government by the contractors both for tiban and siram was fixed at 125 fl. copper for Bengal, and 120 fl. for Turkish. These were also the conditions for 1839 and 1840. A fresh alteration was made in 1841, the price of both descriptions being equalised, and fixed at 120 fl. copper for tiban, whilst the contractor could obtain siram to the extent of one-fifth at 100 fl. If he required more he was again to pay 120 fl. for all above the siram. This was also the case in 1842.

For the triennial period 1843, 1844, and 1845, the then Governor-General Merkus raised the price of tiban and siram to 210 fl. copper, but abandoned the monopoly of a contractor, and sold at that figure to anybody. The result of this experience was that the new regulation gave great discontent, so much so that, in the following year, the contracts were given to those who, in each district, sold the greatest quantity above the minimum, which was fixed at 3,483 catties per month for the whole of Java and Madura. For 1847 the minimum of tiban was raised to 3,500 catties, and the price fixed at 175 fl. currency. This was under the administration of Governor-General Rochussen, who, however, introduced a new system the following year, according to which the whole of the opium was farmed out to one contractor, and the price of tiban fixed at 100 fl. per catty, with a minimum of 3,500 catties per month, whilst siram, not exceeding one fifth of the tiban, was reduced to 35 fl. The object of this great reduction was evidently to lessen the incentive on the part of the contractor to smuggle. In 1849 the price of siram was further lowered to 25 fl., and the quantity raised from one-fifth to one-fourth of the tiban. In 1850 and 1851 more alterations were made, the siram being reduced to one-eighth, though raised again to a quarter in 1852 and 1853, but the minimum of tiban was reduced from 3,690 to 3,264 catties per month. During those four years the price of tiban remained at 100 fl., and the siram was delivered to the contractor out of the Government warehouses at cost price.

After all these various arbitrary changes of system, emanating from the prejudices, caprice, and personal feelings of the Governor-General of the day, without any regard to the higher motives of policy or the welfare of the native population, Governor-General Duymar van Twist is entitled to the credit of

Digitized by Google

having originated the regulations in force at present, with but little alteration (published at full length in the *Indian Staats-Blad* for 1853, No. 27). He fixed the tiban at 100 fl. currency, and the siram at 25 fl., the minimum of the tiban being 3,420 catties per month, and the maximum of the siram one-quarter. But a short experience convinced that Governor-General that even these favourable conditions were not strong enough to prevent the contractor from purchasing smuggled goods, and he therefore altered the conditions for 1855 and 1856, reducing the price of siram to 12 fl., and without limiting the quantity.

Governor-General Pahud enforced the same system with but little alteration, simply raising the price of the siram to 18 fl., and thus it has remained from 1857 down to the present time, the minimum quantity of tiban being 3,466⅔ catties per month.

In the meantime the sale of this poisonous drug brings an enormous and annually-increasing sum of money to the Treasury, as the following figures for the last few years abundantly testify :—

Year.	Revenue from Opium.	Amount of Siram.
1857	7,370,100 florins	43,127 catties.
1858	8,496,636 „	49,870 „
1859	8,972,608 „	58,336 „
1860	9,260,688 „	63,939 „
1861	11,135,580 „	
1862	12,000,000 „ (as estimated in the Budget.)	

It cannot, however, be demonstrated from these figures alone with any degree of certainty that the consumption of opium has undergone a proportionate increase, as the quantity smuggled is reduced to minimum, and on the other hand speculation and secret exports may have had some effect on the market. There is, however, strong presumptive evidence of an increase in the consumption, and to the credit of the Indian Government it must be confessed they are unremittingly occupied in their endeavours to put it down. In 1858 the prohibition against the importation of the drug was extended to a part of the Residency of Cheribon, and through the operation of several administrative measures taken by the Government for the regulations of the *kitts* or public houses licensed for the sale and consumption of opium on the premises, the number of these kitts has been considerably reduced during the last ten years, as the following returns, made every other year, officially prove :—

Year 1851..	No. of kitts 2,664
„ 1853..	„ 2,384
„ 1855..	„ 2,321
„ 1857..	„ 2,293
„ 1859..	„ 1,980
„ 1861..	„ 1,858

In comparing the foregoing statistics with the figures of earlier periods, there is no reason to believe that the consumption of opium has increased to any great extent in Java, though we know that there has been a very large increase in the population of the island ; for we find that in the year 1760 the former Dutch East India Company delivered to the contractors of the day—the Opium Company at Batavia—174,000 Amsterdam pounds, equal to 139,200 catties, being 34,000 catties more than the quantity sold by Government in 1860. A part of the deliveries in 1760 might, however, have been exported to some of the other islands of the Indian Archipelago. But, be that as it may, there is certainly no proof that the people of Java consume at present more opium than they did at former periods, though it cannot be denied that even their present consumption is much more than is good for them.

Literature.

A translation of "M. Pietrowski's Exile in Siberia and his Perilous Escape" will be published shortly, we hear, by Messrs. Routledge and Co.—Mr. Carlyle has completed the fourth, and half of the fifth and concluding volume of the "History of Frederick the Great." He dwells with less amplitude upon the latter part of his hero's career than he did upon its commencement.—The second part of Bishop Colenso's book is selling rapidly. The first impression, we understand, consisted of 6,000 ; this number was immediately found to be insufficient for the demand, and an additional 2,000 was struck off. Within three weeks of publication more than 7,000 copies had been dispersed "The Gate of the Pacific," by Captain Bedford Pim, R.N., has issued from the press of Messrs. Lovell, Reeve, and Co. The author's object is to demonstrate the advantages of establishing an Atlantic steam line to the Isthmus of Panama, with connecting steamers on the Pacific to run to China, Australia, New Zealand, and British Columbia. Commander Pim would have a railway track laid across Nicaragua, taking advantage in the route of the great inland lake, which is suitable for steam navigation. "Macmillan's Magazine" for this month contains a remarkable article on the Russian Political Press, by a writer who is evidently thoroughly conversant with the subject. Already the press has become a great power in the country, and besides the recognised organs there is a secret press devoted to the propagation of revolutionary ideas. Mr. Kingsley's tale of the "Water Babies" is finished in this number.—The fifth and concluding volume of the "Orations of Demosthenes," translated by Charles Rann Kennedy, has just appeared in Bohn's Classical Library. To those who are unable to read these matchless compositions in the original, Mr. Kennedy has rendered an essential service.

Recollections of Tartar Steppes and their Inhabitants. With Illustrations. By Mrs. ATKINSON : John Murray.

THIS is one of the liveliest and pleasantest woman's books it has been our lot to read for many a day. It is so full of womanly observations and illustrations, of graphic sketches, of slight but characteristic incidents, that we gather from the correspondence which forms the volume, a most fresh and life-like picture of Tartar life. The book, indeed, forms an admirable supplement to Thomas Witlam Atkinson's more extensive and elaborate works on "The Upper and Lower Amoor" and on "Oriental and Western Siberia." As we read Mrs. Lucy Atkinson's account of the severe labours she underwent and of the privations she endured, of perils encountered, and of dangers that appeared imminent, we scarcely know how to believe that so much was braved by an English lady. Indeed, we should feel half tempted to suppose, with the Cossacks, that she had something supernatural about her, were it not for the thoroughly feminine manner in which she records her adventures. Mrs. Atkinson started on her six years journeyings in Tartary, in the springof 1848. Picture her after leaving the military station of Sandyp, armed with pistols, riding *en cavalier*, and wearing boots which reached above the knees. All the women turned out to see her off, declaring that no lady had ever attempted the journey before. Long days of riding on horseback followed, sometimes wading through deep waters, sometimes winding round frightful precipices and resting at night under the open sky, or in improvised tents, or in quiet Kalmuk villages. One night she relates how she awoke drenched to the skin, and how, with the rain pelting down, she turned to sleep again ; on another night they would pitch their tent on the snowy mountains, a bleak cutting wind penetrating to the very bone, or they would encounter greater annoyances still under the hospitable but dirty roofs of their nomadic friends.

After reading of the toils encountered, we are not surprised to learn that Mrs. Atkinson, who was expecting "a little stranger" in the coming winter, was delivered of a boy two months before the proper time. He was christened Alatau Tamchiboulac, the former being the name of the mountain at the foot of which he was born ; the latter of a dropping spring close by. Although thus hastily brought into the world, the little fellow proved vigorous, employed his whole time in sleeping and eating, and, until he was nine months old, never had a tear in his eye. When two months old, a visitor called one day, and proposed that Alatau should be baked. Mrs. Atkinson's surprise may be imagined when she heard that it was quite a common custom, and that if she did not like to place him in an oven, she could cover him with a crust and put him on the hot stove, when hairs would come out on his back. The Siberian mothers, it seems, make a crust of rye flour and enclose the child in it, like a fowl in a pasty, leaving a small aperture for the breath ; then it is placed in the oven for a few seconds with the door closed. This process is supposed to cure a disease to which the children are liable.

In the Isle of Man cats are understood to be without tails ; among the Kirghis, sheep are frequently blessed with four horns. Another curious fact which Mrs. Atkinson notes in her account of these people is, that while wild fruit of all kinds abounds—gooseberries, peaches, apples, strawberries, currants, &c.—the Kirghis never eat them. Another is that, the hotter the weather the more clothing they put on. Very strange, too, must it be to see boys of ten years old feeding from the mother ; and stranger still to hear that whipping on the part of the husband is regarded as a proof of affection. The men will go two, and sometimes three, days without eating, and then

Digitized by Google

they eat enormously. "I was told," says Mrs. Atkinson, "that a man can eat a sheep at once; on making the inquiry among the Kirghis, one of them offered to treat me with the sight if I would pay for it, but I declined witnessing the disgusting feat."

At Choubachac the travellers reached Chinese territory, and Mrs. Atkinson saw Chinamen for the first time. They were told that they could not enter the town until a despatch had been sent to the Emperor. The horrors of Siberian exile are touchingly depicted by Mrs. Atkinson, and her remarks on the Poles have especial value at this time. But our space will not permit us to dwell on this topic, nor on many others of equal interest.

THE FOREIGN INSPECTORATE OF CHINESE CUSTOMS

(FROM "BLACKWOOD'S MAGAZINE.")

"It might be well, if it were possible, to leave the Chinese to work out their own regeneration; but, unfortunately, our commercial interests and revenue are so interwoven with the well-being of China that we cannot afford to wait the time that might elapse before the restoration of order. In our opinion there is in view of the interests of all European Powers but one mode of giving aid to the Chinese Government—to wit, encouraging officers of character and respectability, subjects of those Powers, to enter the service of the Chinese Government.

"We have with China an enormous and profitable trade; we want it guaranteed and developed. This duty properly devolves upon China, but she is as yet unable to discharge it. It is by the aid of men who possess both character and status, the guarantee of good behaviour, that she will acquire strength and knowledge to fulfil her obligations, and through their influence be induced to adopt the results of European science and skill - the steamship, railways, and electric telegraph—thus insuring progress profitable to herself and the world at large. This end, we take it, should be our object in giving help to China. She should not be strengthened out of hand, but by a slow process with a small force, whose action should be spread over a period sufficient to enable us to open the country, throughout its length and breadth, to Christianity and commerce.

"No one will deny that the task about to be undertaken is an arduous one; yet, after having carefully weighed all its difficulties, we cannot help feeling sanguine of a successful issue. A good maritime police is the secret of Government in China. If the water-ways of China are in a state of security and order, peace will re-establish itself everywhere. The rivers, the seas, and lakes and canals, within the area of the empire, cut it up into such sections that rebellion will be destroyed in detail, or rather starve, directly a strong executive is placed upon the Emperor's waters. The Taipings and other banditti spread over the area they have devastated, by availing themselves of the extensive water communication. The Government of Peking, if it is wise, will pursue the same course in its measure of repression. The steam gunboat and the electric telegraph, by their very appearance in the disturbed districts, will re-assure those who have almost ceased to believe in any Government, and frighten away the evil-doers; whilst the fall of Nanking will break the neck of a scourge which is on its last legs. The fleets of piratical junks which now infest the coasts of China, and whose depredations are known only to the natives, will, we hope, disappear before the vigorous operations of a steam flotilla under the Imperial flag. These 'vikings' of the East occupy every creek between Canton and the borders of Cochin-China; they have quite cut up the native trade of the whole seaboard, and occasionally pirate even European traders. It is mainly owing to these gentry that we have been unable as yet to establish relations and open a Custom-house at Kiung-Chow, in the Island of Hainan, a point which we hope one day to see the centre of an enormous trade. Lastly, we see every reason to expect most important results from the information the officers of the European-Chinese flotilla will be able to gather of the interior of the Chinese empire, and of the commercial advantages likely to flow therefrom. As employés, though merely temporarily so, of the Emperor, they will have access to every part of that vast country, and excite no fears or jealousy; their opportunities will be immense, and we have reason to believe that they will bear well in mind the duty they owe to their fellow-men of gathering and storing well every crumb of information, geographical and otherwise. What they may effect for the benefit of our commerce we may estimate from the fruits that have already followed in the wake of their brethren of the navy of England who first penetrated to Shanghai in 1842, and to Hankow in 1858. There are cities as rich as the former, rivers as large as the Yang-tse, and lakes equal to those of Canada, to be re-discovered. Those almost unknown provinces of the interior are not wastes profitable only to the geographical enthusiast, but countries equal to States of Europe, thickly dotted with cities, and densely populated, with a people second only to ourselves in commercial energy and respect for law and order. England for years has spent wealth, energy, and precious lives in opening China to western influence and civilisation. To-day her success is certain. The Government and people of China both ask us to aid them in their hour of trouble, and in return they will assuredly grant us that access and commercial freedom for which we have so long laboured and so often fought. The portals of ignorance and heathenism are opening. Shall we, who are in the vanguard of nations, hesitate? No—assuredly not! Our motto must ever be 'Forward;' and will not all enlightened Christendom join us in wishing 'God speed' to those about to put forth in this fresh enterprise to the land of Cathay?"

Naval and Military.

BANQUET TO REAR-ADMIRAL SIR JAMES HOPE, K.C.B.

The members of the United Service Club gave a splendid entertainment on the 4th instant, at their club-house in Pall-mall, to Rear-Admiral Sir James Hope, K.C.B., late commander-in-chief on the East Indies and China station, on his return home from China, and in compliment to his eminent services while in that naval command. Field-Marshal his Royal Highness the Duke of Cambridge, K.G., presided, and Viscount Palmerston accepted the invitation of the Club. The banquet was served in the coffee-room, and covers were laid for 124 persons. His Royal Highness the Duke of Cambridge, attended by Colonel Clifton, arrived early, and joined the company in the library. Viscount Palmerston did not reach the Club until late, so that the dinner was not announced till a quarter past eight, when the members and friends descended to the banquetting-room. The Duke of Cambridge presided; Admiral Sir James Hope on the right, and Viscount Palmerston on the left, supporting his Royal Highness. The Duke of Somerset, First Lord of the Admiralty, Sir Harry Parkes, Commander Douglas, R.N., the Hon. Arthur F. Kinnaird, M.P., and Mr. Ashby, naval secretary to Sir James Hope, were visitors on the occasion. Major-General A. Anderson, Lieutenant-General E. Gascoigne, Captain George S. Hands, R.N., Vice-Admiral R. H. Manners, Captain John Seccombe, R.N., and Captain Sir W. S. Wiseman, R.N., discharged the duties of vice-presidents at the different tables. The following were among the members of the club who were present at the entertainment:—Field-Marshall Lord Clyde, Rear-Admiral Lord Clarence Paget, Vice-Admiral Sir Michael Seymour, Captain B. J. Sullivan, R.N., Lieutenant-General the Hon. Sir James Yorke Scarlett, Lieutenant-General Sir Frederick Smith, the Earl of Selkirk, Vice-Admiral the Earl of Shrewsbury and Talbot, and Rear-Admiral the Marquis of Townshend. After dessert was commenced, the Duke of Cambridge proposed "The Queen," followed by "His Royal Highness the Prince of Wales and the Royal Family." His Royal Highness after these loyal toasts gave "The Navy and the Army," and other toasts. Admiral Sir James Hope, the Duke of Somerset, Lord Palmerston, &c., were among the speakers.

The report that Admiral Kuper has tendered his resignation, has been contradicted at the Admiralty.

On board the Royal Oak, iron-cased frigate at Chatham, every exertion is being used by the crowd of mechanics, shipwrights, and other artisans who swarm her decks, to have her ready for undocking by the date announced by the Secretary of the Admiralty—the 19th inst. All the hands have been removed from the paddle-wheel steamer Salamis—the only wooden vessel now in progress at Chatham dockyard—and most of them have within the last two or three days been transferred to the Royal Oak, the dockyard officials being determined that nothing shall be wanting to have the iron-cased frigate out of dock by the date stated. A commencement has just been made to sheath the bottom with Muntz's patent metal, which is to be used instead of copper, the metal being prepared in the metal-mills, under the superintendence of Mr. Magle, the head of that department. The first of the elliptical 4½ in. plates for encasing the turret which is now being erected on the fighting deck was fixed in its place yesterday, and the tower is now ready to receive the remainder of the armour-plates as fast as they can be prepared in the factory. The guns, shot, and shell for the Royal Oak will not be placed on board until after she has been undocked, in order that her draught of water may not be increased while being floated out.

There was a general official inspection of the officers and men of the Royal Naval Reserve on board the President, drill-ship, in the West India Docks. The ship was moored off the south quay. Lord Clarence Paget, the Secretary to the Admiralty, was unavoidably absent; but Capt. Carnegie, R.N., the Inspector-General of the Royal Naval Reserve, together with the Right Hon. E. Cardwell, Lieuts. Hybert, the Hon. A. C. Dando, Comyns, Powell, and Riddle were present. The men mustered on deck shortly after two o'clock to the number of about 250, and were put through the ordinary movements of calling to quarters, going through the gun practice, firing at supposed enemies in broadsides, &c. The manning of the guns, the shifting of them in different positions, and other movements, were carried out with great activity and readiness, showing in many instances an amount of ability and efficiency equal to that attained by the men in the Royal Navy. At the conclusion of the drill the men were inspected by Capt. Carnegie, R.N., who expressed to the commander of the President (Commander Mould, R.N.) his satisfaction at the state of efficiency to which the men had arrived. Mr. Mayo, the Registrar-General of Seamen, was present during the proceedings.

Imperieuse, 51, screw frigate, Captain Robert Gibson (acting), arrived at Spithead on the 7th inst. from China, having been upwards of three years in commission. She will come into harbour, and be paid off.

THE ANGLO-CHINESE FLEET.

The ensigns of the Anglo-Chinese Fleet having been duly recognised by the formal announcement of last week in the *London Gazette*, Commodore Sherard Osborn has been already able to despatch H.I.M.'s ships Amoy, China, and Peking. The Amoy (late Jasper), 2 guns and 60 men, is commanded by Commander Arthur Salwey (Lieutenant, R.N.), and the following is a correct list of her officers:—Sub-Lieut. Alfred F. Pearse (Second Master, R.N.), Assistant-Surgeon Edward Gardner, Engineer in Charge Horace Brown, and Assist.-Engineers James Burgess and Henry Ball. The China (late Her Majesty's ship Africa) carries 2 pivot and 4 broadside guns; she is commanded by Commander Noel Osborn (Lieutenant, R.N.), and her officers are Senior Lieut. Geo. Morice, R.N., Second Lieutenant Augustus Clarke (R.N.R.), Surgeon Henry Fegan (Assistant Surgeon, R.N.), Sub-Lieutenant E. Pratt, Engineer-in-Charge Thomas Marsden, Second Engineer W. Billington, Third Engineer J. C. Clark, Gunner W. Pearse, Carpenter Neil Barr, Midshipman William Cartwright. In forthcoming numbers we will give further particulars of the force, and lists of the officers of the Peking, Tien-tsin, Kwang tung, and the flag-ship Keangsoo.

The two vessels now proceeding to China have long been ready, waiting for the will and pleasure of the Foreign Office, to authorise the Admiralty to gazette the colours under which the force could alone legitimately navigate the high seas. The delay has, however, been of advantage in giving time for the equipment and organisation to be perfected. The system of a general mess has been adopted throughout, and the increased accommodation and comfort for all the officers is very remarkable. The captains and commanders are to be held alone responsible for the navigation of the ships. The master's grade has been abolished by Commodore Osborn, but

Digitized by Google

the captain has the power of authorising an officer to assist him in the navigation and pilotage, and that officer is to be granted an extra remuneration for his zeal and labour.

The vessels of the European-Chinese force are armed throughout with Whitworth's rifled cannon, and the ordinary sea-service smooth-bore ordnance in use in Her Majesty's Navy. The obstructive torpor of the subordinates in the Foreign-office occasioned so many impediments to the supply of Armstrong guns, that Commodore Osborn decided upon taking Whitworth's alone, and thus an excellent opportunity has been lost of testing the sea-service Armstrongs in actual warfare. The 12-pounders used in China during the foray upon Peking were simply land-service pieces.

The Thule, a beautiful and fast schooner, is being despatched from Southampton; she will be a tender to the Keangsoo; and the Ballarat, now loading in the East India Docks, is to be sold to the Chinese Government on her arrival at Shanghai, as a store-ship for the force. She takes out the machinery for a complete factory, for steam-engine repairs, and for the production of Whitworth projectiles. We feel assured that the Navy generally will be glad to hear that the Admiralty have raised no objection to the appointment of Commander T. B. Nicolas to the command of the Tientsin. The extraordinarily severe sentence passed upon him for an error in judgment will be in the recollection of most of our readers; and we doubt not that Commander Nicolas will show in the Chinese service that he was no unworthy member of the Royal Navy, and a true son of his well-known and heroic father, the late Toup Nicolas.

Mr. H. N. Lay, Inspector-General of Chinese Customs, having perfected the important duties with which he was charged by Prince Kung, returns to his post in China; and directly the last ship has been despatched, Commodore Osborn will likewise hasten overland to China, so as to meet the first of his ships as they arrive at their destination.

On the 4th inst. a fine paddle-steamer was launched from the building-yard of Messrs. Laird Brothers, Birkenhead. She was built for the Anglo-Chinese fleet under Mr. H. N. Lay and Commodore Sherard Osborn. The dimensions of the new vessel are:—Length, 184ft; breadth, 24ft.; depth, 13ft.; tonnage, 525 tons; power of engines, 150 horse. The model is designed to make a fast and handy vessel, both at sea and in the rivers. She has a straight stem and elliptical stern. The deck fittings, &c., will be of the same style and quality as in her Majesty's service, as will also be the officers' cabins, magazine, shell-room, amd store rooms. This steamer, which is called the Quang Jung, was taken into dock, and placed under the crane to receive her machinery. There was also that day floated out of a dock at the same works another steamer built for the Anglo-Chinese fleet, called the Tien-tsin. Her dimensions are:—Length, 150ft.; breadth, 25ft.; depth, 12ft; tonnage, 445 tons; power, 80-horse. The engines are those for which Messrs. Laird Brothers, were awarded a medal at the International Exhibition. The machinery is fitted on board, and the Tien-tsin will be ready for steam in a few days.

A magnificent despatch paddle steamer, ordered by Captain Sherard Osborn for his Anglo Chinese fleet, was successfully launched from the yard of Mr. John White, of West Cowes, Isle of Wight. Her leading dimensions are as follow:—Length between perpendiculars, 239ft.; breadth of beam, 29ft.; tonnage, builders' measurement, 1,000 tons. The engines, which are of 300-horse power, are constructed by Messrs. Day and Co., of the Northam Ironworks, and will be placed and fitted on board in the Southampton Docks. From the beautiful lines of this very handsome steamer, and the reputation of her builders, this last new addition to Capt. Osborn's fleet will, it is confidently predicted, attain a high rate of speed under steam.

THE DISMISSAL OF GENERAL BURGEVINE.

Judging from the little transactions which have taken place at Shanghai between General Burgevine and the Chinese authorities, the position of European officers taking service under the flag of the Celestial Emperor is not likely to be quite such a pleasant one as they may have fondly anticipated. The pay is high, the service is pretty certain to be decidedly "active," the situation may have its romantic charms, and an energetic man, such as Captain Sherard Osborn undeniably is, may turn it to a certain indirect account, such as finding materials for papers in popular periodicals; but if the Anglo-Chinese officer is liable to be ordered on most reckless enterprises by fat mandarins who sit at ease in their yamuns; if the pay of his men is to be withheld when he refuses to obey; if he is to be summarily dismissed and to have a reward offered for his head, then his position is by no means one to be particularly envied or admired. The anomalous nature of that position and the difficulties to which it may readily give rise have been forcibly illustrated in the case of the American filibuster. It is rather fortunate that he and his employers have differed, as we are thereby now warned of what may occur to our own countrymen in the Imperial service, and are put upon our guard as to the danger of being involved in their affairs. It is not a matter of much public interest whether General Burgevine bullies the mandarins or is ill-treated by them, but it is important it should be clearly understood that Englishmen who take service under the Chinese Government do so at their own risk, and must rely upon their own value to that Government for proper treatment and regular pay. The accounts in regard to Burgevine's conduct differ sufficiently to leave doubt upon the question as to whether the Chinese were far in the wrong in their treatment of him. He was the first to commence the imbroglio which resulted in his dismissal, by taking money remitted for the payment of his troops and devoting it to the erection of fortifications at Soong Kong. That was in itself an act of disobedience which certainly would not have been tolerated in any other army in the world, and it is difficult to blame the Chinese authorities for declining to remit more money to an officer who had acted in such a manner. If they denied him the means for conducting necessary operations, then his clear course was to resign; but this is usually the last thing to which a soldier of fortune inclines. Instead of doing so, General Burgevine, when his troops became mutinous for want of pay, went down to Shanghai with thirty men, bruised the face of Sa-Kee, the Imperial banker and a blue-button mandarin, and forcibly carried off 40,000 dollars. For this he was dismissed the Imperial service, and a reward being offered for his apprehension, or for his head, he had to take refuge on board a British man-of-war It is amusing to find these pacificators of China, the men who are elected to restore law and order to that unhappy country, appearing in the double *role* of lawless depredators and helpless fugitives; but the subject is more than amusing. Supposing a similar difference arises between the Imperial authorities and the British officers placed at their service, how are we to act? Some such difference is very likely to arise, for it is scarcely probable that the high military and other authorities of China will allow the foreigners complete liberty of action, and if not, there will arise differences of opinion as to what is expedient and what is lawful. The theory of the Chinese Government is, that a local officer, civil or military, is allowed all the power necessary to success, and must be successful. Unfortunately it very often happens that he does not command the means necessary to success; but that is very rarely allowed to form his excuse. The Six Boards at Peking ignore that side of the theorem which relates to the means at the command of the local officer; they almost invariably assume that in that respect the whole force of the empire is at his disposal; so, when he fails, they banish him to the wilds of Siberia, or graciously invite him to swallow gold-leaf. There will certainly be some difficulty in accommodating this system to the expectations of English officers, and there must be urgent motives at work to produce anything like an harmonious result. In the Foreign Customs Service the difficulty has been got over, because the Imperial Government clearly saw that only by means of such a service could they levy the foreign customs revenue. In that case there was a tangible result to be obtained, while the field of action was too definite and limited to allow of mandarin interference. But the case is somewhat different when military and naval operations are undertaken by English employés of the Chinese Emperor.—*Daily News.*

Monetary and Commercial.

—o—

CITY, SATURDAY, MARCH 14.

The biddings for 60,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were, to Calcutta, 34,60,000 rupees; to Bombay, 24,00,000 rupees; and to Madras, 1,40,000 rupees. The declared minimum price was as before, viz., 1s. 11¾d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for about 140 lacs. Tenders on Calcutta at 1s. 11¾d. will receive about 63 per cent.; on Bombay at 2s. about 26 per cent.; and all above these prices in full; on Madras at 2s. will receive in full.

Mr. Neale Porter, the managing director in India of the Scinde, Punjaub, and Delhi Bank Corporation, left on the 5th to proceed to India *viâ* the overland route, with the view of establishing the Bank in Scinde and the Punjaub; and Mr. H. J. Lee, late acting secretary and treasurer of the Bank of Bengal in Calcutta, will follow in a few days as the sub-manager and chief accountant of the Bank at Kurrachee.

Advices have been received of the total wreck, near Capetown, of the ship *Akbar*, on her voyage from Siam to London, The cargo, consisting of rice, cassia, sticklac, and sapanwood, and worth about £26,500, was partly saved.

Advices from Point de Galle state that the steamer *Nemesis*, with the mail from Calcutta, had struck on the Bellows rock on the night of the 16th of February, but was got off and taken into the harbour. Her mails were transferred to the *Bombay*, which would carry them to Suez, together with those from China and Australia. The *Bombay* arrived from Australia at Galle on the 15th Feb., and her news was brought to Suez by the French mail steamer *Labourdonnais*, and telegraphed to London on the 5th inst.

Messrs. John Pender and C., of Manchester, have issued a very valuable paper relative to the imports, exports, stock, and consumption of cotton in 1860 and 1862—the former being the year of the largest consumption ever known. They also state their views with regard to the prospects of the supply in 1863.

As regards the price of cotton, a fall before long seems inevitable, and Messrs. Pender and Co. supply the best reason for this belief when they state that foreign markets do not respond to the high rates ruling here. They quote, as under, the average price per lb. of shirtings, in contrast with the net equivalents in Calcutta, Bombay, Hong Kong, and Shanghai, as reported by the last advices:—

Prices in Manchester	2s. to 2s. 1d.	per lb. weight
Ditto, Calcutta	1s. 6d.	„
Ditto, Bombay	1s. 7d.	„
Ditto, Hong Kong	1s. 7d.	„
Ditto, Shanghai	1s. 6d.	„

In face of these figures, surely shipments to India and China ought to fall off, and, consequently, the demand for cotton.

It is stated that the French India and China Mail Steam-packet Company are about to establish a branch line between Mauritius, Reunion, and Aden.

Digitized by Google

The Board of Trade Returns for the month of January last have been issued. The following are the exports to the Far East in that period :—

To CHINA.—Cotton Yarn: The value of the quantity exported in January last was £12,198, against £34,871 in January of 1862, and £16,421 in January of 1861. The quantity exported in January was 130,000 lbs., against 680,000 lbs. in January, 1862, and 361,620 lbs. in the same period of 1861. Cotton Goods: The quantity exported last January was 1,356,838 yards, of the value of £32,841; the quantity exported in January, 1862, was 8,441,260 yards, of the value of £120,965; the quantity exported in January, 1861, was 31,320,356 yards, of the value of £393,963. Lead: Value exported in January, 1863, was £12,202, against £6,307 in January of 1861. Neither the quantity nor the declared value has been officially given for January of last year. Woollen and Worsted Manufactures: Value of exports for January last reached £19,024, against £13,350 in January of 1862, and £57,115 in January of 1861. Worsted Stuffs: Value of exports in January last, £31,263, against £16,723 in January of 1862, and £17,276 in January of 1861.

To PHILIPPINE ISLANDS.—British and Irish manufactures; no returns for the month of January.

To JAVA.—Cotton goods; value of exports in January last, £19,757, against £37,392 in January of 1862, and £82,015 in January of 1861.

To SINGAPORE.—Cotton goods; value of exports in January, 1863, was £31,679, against £106,331 in January of 1862, and £60,775 in January of 1861.

To CEYLON.—Value of exports in January, 1863, was £10,788, against £17,947 in January of 1862, and £65,565 in the same period of 1861.

The following is the total declared value of the exports of British and Irish produce and manufactures from the United Kingdom to all parts during the month of January, as compared with the same period in the two preceding years :—1861, £8,344,701; 1862, £8,439,055; 1863, £8,045,155.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 4th inst, was—in gold: to Alexandria, £900; to Ceylon, £2,000; to Madras, £21,886; In silver: to Singapore, £9,000; to Hong Kong, £1,068; to Shanghai, £4,028. Total, in gold, £24,786; in silver, £14,096.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

ARRIVALS NOT INCLUDED IN THE TABLE.—Feb. 7, at Liverpool, from Hong Kong, Banda: March 8, at Marseilles, from Alexandria, Labourdonnais (French mail str.); with Singapore and China mails. March 2, at Gibraltar, from Sumatra and Pernambuco, Tarquin; 12, at Deal, from Foo-chow-Foo, Britannia; from Singapore, Forerunner; 10, at Liverpool, from Shanghai, Jessie Beazley; 8, at Brouwershaven, from Batavia, Huydekoper; 9, Jacobus Martinus; 12, at Deal, from Foo-chow-Foo, Hawthorn; 11, at Falmouth, from Rangoon, Speedwell; 9, at Bordeaux, from Padang, Independent; 13, at London, from Adelaide, Cochin, and Colombo, Adelaide; 12, at Falmouth, from Java, Crystal Palace; in Margate-roads, from Maulmain and Swansea, Eliza; 11, at Havre, from Hong Kong, Marie; 12, at Brouwershaven, from Patjitan, Staatsroad vd Houzen; 3, at Cadiz, from Manila, Concepcion; 15, at Falmouth, from Manila, J. W. A. Lorenzen; 16, at Deal, from Shanghai, Art Union; from Colombo, Cowslip, Oliver Cromwell; from Shanghai, Chryseis, at Dartmouth, from Foo-chow-Foo, Glendoveer.

DEPARTURES.—Feb. 8, from Deal for Batavia, Gondola; 7, for Samarang, Sliedrecht; 8, from Portsmouth for China, China (Chinese gunboat); 6, from Cardiff for Galle, Janua Cali; Feb. 24, from Liverpool for Galle, Golden Age; 25, Astrea; March 9, from Deal for Japan, Peep o'Day; for Shanghai, Balmacarra. From New York, Feb. 13, for Shanghai, Kate Hones; March 11, from London for Shanghai, Robin; for Cardiff and Singapore, Edward Stanley; 14, for Shanghai, Garrantall; 6, from Londonderry for Singapore, Benares (after repairing); 8, from Shields for Hong Kong, Fair Wind; 7, from Sunderland for Shanghai, Sarah Scott (Sir H. Parkes st.); for Hong Kong, Queen of the Ocean; 9, from Deal to Batavia, India Packet; 10, from off Dungeness for Batavia, Von der Heydt; 9, from Newport for Shanghai, General Putman; from Cardiff to Shanghai, Jane Leach; for Galle, Jane Anna, Susan Howland; 10, for Zebu (Phillipine Island), Arthur; 11, from Liverpool for Galle, Astrea; 13, from London for Singapore, Dewa Gungadhur; for Singapore and Penang, Daylight; 12, from Deal for China, Reindeer (had lost anchor and 90 fathoms of chain, which had been replaced); 13, from Newport for Singapore, Sun Lee; 14, from London for Kanagawa, Esperanza; for Colombo, Thames.

SPOKEN —No. 6,863, 3rd d.p. (ship), London to Hong Kong, March 5, 48 N., 12 W.; India, Batavia to Amsterdam, Feb. 5, 1 S., 22 W. Hebe, Rotterdam to Batavia, Feb. 24, 45 N., 20 W.; Fagel, Banjoewangie to Amsterdam, Jan. 9, 15 S., 20 E. (?) Elizabeth, Colombo to London, Jan. 6, 1 N., 76 E.; President van Ryckevorsel, Banjoewangie to Rotterdam, Dec. 20, 33 S., 29 E.; Julie, Rotterdam to Padang, March 5, near the Lizard; Ludwig, Rio Janeiro to Batavia, Dec. 3, 40 S., 32 E.; Harkaway, Sunderland to Shanghai, Jan. 4, 39 S., 41 E.; Charles Melchiors (?), Cardiff to Hong Kong, 24 days out, Feb. 1, 3 N., 23 W.; Beatrice, London to Hong Kong, Dec. 19, 31 S., 9 W.; Fremont, of Boston, South Carolina (?) to Batavia, Jan. 30, 27 S., 25 W.; Leopold Cateaux (ship), Amoy to Havana, Jan. 28, 4 S., 19 W.; Adams (?) Ceylon to London, 85 days out, Feb. 13, 17 N., 37 W.; General de Stuers (Dutch barque), Shields to Sourabaya, Jan. 25, 27 S., 26 W.: Nederwaard (Dutch barque), Rotterdam to Batavia, Feb. 7, 1 S., 27 W.; Sunbeam (iron barque) of London, Cardiff to Shanghai, Dec. 29, 18 N., 21 W.

LAID-ON.—At London, for Shanghai, Mirage; at London, for Hong Kong and Canton, Glenclune; for Penang, Teesdale; for Shanghai, Raven; for Kanagawa, Sea Witch. At Liverpool, for Shanghai, Castor; for Hong Kong and Canton, Banda, Jessie Beazley.

At MAURITIUS.—Feb. 3, from Liverpool for Shanghai, Defiance, str.; Maddison.

AT TABLE BAY.—Jan. 25, Castilian, Proctor, from Manila; 27, Hugo Grotius, Vogelsang, from Banjoewangie, sailed 21st; Chanticleer, (str.), Brown, and Emma, Arentzen, both for Singapore.

The Admiralty have invited tenders for the conveyance of the following Government stores from the river Thames to Hong Kong, viz., 123 tons heavy and 76 tons light common naval stores; 11 tons masts, longest 58 feet; 55 tons timber, 4 tons bricks, 5 tons iron cables, and 35 tons coke.

The Admiralty have engaged freight for Government stores in the Glencune, for Hong Kong.

The screw steamer Sir Harry Parkes, of 700 tons, and 120-horse power, has been despatched by Messrs. Killick, Martin, and Co., for Shanghai.

LIVERPOOL, March 11.—The Jessie Beazley, Fothergill, arrived here from Hong Kong, reports having experienced a hurricane on the 5th of March, in lat. 48 N.

FALMOUTH, March 10.—The Charles Henry, Rickmers, from Antwerp, for Manila, has arrived here leaky.

The Hugo Grotius, Vogelensang, from Batavia to Rotterdam, which put into Table Bay on the 27th of January, had sustained damage in her rudder.

The American ship *Jacob Bell*, of about 1,600 tons, which left Foochow on the 5th Nov., for New York, with a cargo of tea estimated at 789,700 lbs., was captured and burnt by the Confederate cruiser *Florida*, in 28 W. and 65 W. on the 12th Feb. The passengers and crew were landed at St. Thomas's, West Indies.

ARTICLES OF IMPORT.

TEAS.—During the first half of the month our market, although not so active as before, was very firm, and a fair amount of business was transacted at full prices, the probability of a reduction of duty still inducing purchases from the large selection on offer. Latterly, however, there has been some reaction from the favourable tone prevailing during the past two months, and our market has become very quiet, and it has been difficult to effect sales, except by making a concession in prices upon the good to fine blackish-leaf descriptions, which have hitherto ruled relatively high. Dusty and broken-leaf kinds of Congou have sold to some extent latterly at a shade lower prices; those with leaf have sold at a decline of ½d. per lb. Good common is scarce, and we quote it 1s. 1d. to 1s. 1½d. per lb., but only in moderate demand. Flavoury kinds, of old import, have sold ½d. per lb. dearer. Common to fair Ho-Hows, and good Ho-Hows and Ning-Chows, of old import, show a further advance of 1d. per lb. Medium Kaisow kinds, ranging fuem 1s. 4d. to 1s. 7d. per lb., have been rather difficult of sale, and prices irregular. Recent sales of black-leaf Congous, of new import, show a decline of fully 1d. per lb. Good and fine Monings and Wopaks have also sold fully 1d. per lb. lower. Good to fine Caisows continue fairly supported. Tayshans have been in moderate demand at former prices. Fair to good Oolongs remain heavy of sale at a decline of 1d. per lb.; fine to finest have been inquired for. Common to fair Souchongs maintain former rates; the good qualities are scarcely so saleable, but fine to finest are still wanted for export. There has been a considerable business in Flowery Pekoes, but at low prices for all kinds. Common Scented Capers show no change; the fair qualities have been difficult to move, but good and fine have been more in demand. Fair to good Canton-made Orange Pekoes have been saleable, but latterly at rather low prices; fine are wanted. Medium Foo-Chow kinds have been heavy, and sales made show a reduction of 1½d. to 2d. per lb. upon the grades previously quoted at 1s. 9d. to 1s. 11d. per lb. Uncoloured Japans have been in demand from 1s. 3d. to 1s. 5d. per lb. Assam and Cachar kinds continue to sell freely at full prices. In Green Teas there has been a fair amount of business at prices which show no material alteration. There has been an export inquiry to a moderate extent for Twankays and Hyson Skin, for Australia and Canada. Hysons continue to sell readily at full prices for export, for all good and fine qualities; the fair descriptions have ruled rather lower. Common to fair Young Hysons have been more saleable at the low rates current. Imperials and Gunpowders about maintain former value; the Moyune descriptions are much wanted. Japan Young Hysons, of old import, continue almost unsaleable; the new season's, being better made, have done comparatively better. Canton Young Hysons and Gunpowders show no material alteration. The Public Sales comprise 57,670 packages, of which 12,665 packages were sold, including 8,496 packages printed without reserve. The Stock of Tea in London on 28th February was as follows:—Bohea, 22,050 lbs.; Congou, 53,425,602; Pouchong, 129,644; Caper, 74,880; Scented Caper, 3,623,676; Ning-young and Oolong, 1,858,591; Scuchong and Camphoi, 2,425,090; Black leaf Pekoe and Hung Muey, 194,101; Flowery Pekoe, 1,861,097; Orange do., 292,224; Scented Orange Pekoe, 3,454,831; Twankey, 420,658; Hyson Skin, 112,770; Hyson, 703,200; Young Hyson, 5,305,853; Imperial, 416,881; Gunpowder, 1,992,028; Japan Tea, 601,380; Assam Tea, 1,049,200; total, 77,980,619 lbs.

SILK.—We have a quiet market in silk—during the last fortnight especially so. The deliveries are good, and consumption is supposed to be going comparatively well, but there is no disposition to purchase except particular classes—in the mean time prices are fairly supported. The large arrivals of last month have swelled our stocks to a tolerably large total, but speaking generally there is no sensation of excess. It may be that the disinclination to purchase was increased by the knowledge that the cargo of the *Colombo* was to be sold by public auction, but from the moment of the silk reaching London, it was evident that it was far too extensively damaged to be available for any general purposes.

SUGAR.—The heavy tone of the market continues, and transactions have been strictly limited to the immediate requirements of the trade. Prices exhibit a slight decline. The parcels brought forward by auction, which have been of unimportant amount, have gone off heavily, and very little has been realised, these include 810 bags damaged Clayed Manilla sold at 31s. to 31s. 6d., by private contract. 136 chests soft grey Bahia realised 35s. 6d., 1,000 bags common brown at 30s. 3d., one of 400 cases 825 bags white Bahia brought 23s. for the United Kingdom. The following are our quotations :—Bengal.—Crystalised, 24s. 6d. to 28s. 9d.

Digitized by Google

Benares, 22s. to 28s. 6d.; dale, 20s. to 26s.; ordinary to fine brown, 14s. to 19s. 6d. Penang.—Grey and white, 25s. 6d. to 26s. 6d.; brown and yellow, 16s. to 25s. Madras Grocery.—Grainy yellow and white, 22s. to 27s. 6d.; Native brown and yellow, 15s. to 19s. 6d.; jaggery, 14s. 6d. to 15s. 6d. Siam and China.—White, 23s. to 28s. 6d.; brown and yellow, 15s. 6d. to 23s. Manilla.—Clayed brown and yellow, 18s. 6d. to 20s. 6d.; muscovade, 15s. to 16s. 6d. Java.—Grey and white, 24s. 6d. to 28s.; brown and yellow, 16s. to 24s. Havana.—White, 31s. to 34s.: brown and yellow, 17s. to 27s. 6d. Bahia.—Grey and white, 20s. 6d. to 26s.; brown, 16s. 6d. to 20s. 6d. Refined descriptions also remain without improvement, and sales have generally been difficult on previous terms. The stock of sugar in the principal European ports on the 1st instant, was 166,400 tons, against 196,700 tons at the same date last year, and 113,000 tons in 1861; the separate amount on hand in the United Kingdom being 130,800 tons, against 100,400 in 1862, and 79,700 tons in the previous year.

COFFEE.—The demand continues active, and our quotations are fully supported. Ceylon: Public sales of Plantation, comprising only 304 casks, 125 barrels and bags, have gone off readily at stiff rates; low middling, good middling, 86s. to 91s. The very scanty supply of Native has also sold well, viz..26 casks, 316 bags, good and fine ordinary, 73s. to 74s. 6d. Mocha: This is in fair request, but business of importance is prevented by the small quantity offering. Our quotations are:—Mocha, ungarbled, 60s. to 78s. per cwt.; garbled, common to good, 80s. to 94s.; do., fine, 96s. to 103s.; Ceylon, Native, good ordinary to fine, 72s. to 76s.; ordinary, 68s. to 71s.; Plantation, ordinary to fine ordinary, 73s. to 84s.; fine fine ordinary to middling, 84s. 6d. to 88s.; good middling to fine, 88s. 6d. to 96s.; Java, 67s. to 88s.; Singapore, ordinary and good ordinary, 58s. to 73s.; Sumatra and Padang, 57s. to 72s.; Madras and Tellicherry, 71s. to 100s.; Malabar and Mysore, good ordinary, 73s. to 75s.; fine ordinary to fine, 76s. to 101s. The stock of Coffee in the chief ports of Europe on the 1st inst. was 67,200 tons, against 61,660 tons last year, and 55,860 tons of the corresponding period of 1861; of which there were in the United Kingdom 2,850 tons, against 8,180 tons, and 7,150 tons.

RICE.—The cargo sorts of Bengal have been in some request, but old white continues to meet a languid demand at drooping rates; the total sales privately are about 20,000 bags, great part common cargo. Ballam and Moonghy, 7s. 10½d. to 8s. 10½d.; middling to good old white, 10s. 6d. to 12s.; good bold pearly, 14s. 3d.; and a floating cargo of 500 tons new Bassein at 10s. 6d., guaranteed. The parcels of Bengal in auction have amounted to 11,500 bags, nearly all white, for which scarcely any bids were made, and only a small part, middling to good middling bold pearly, sold at 12s. to 13s. 6d.; the rest, ordinary cargo, went at 7s. 9d. to 8s.; 2,040 bags common old Bassein were withdrawn at 8s. 6d.; Madras, 10s. to 12s.; Arracon, Rangoon, &c., 7s. 6d. to 11s.; Java, 10s. to 21s.

PEPPER.—At public sale, 454 bags Singapore Black were bought in at 3⅞d.; of 1,554 bags Penang, one third middling greyish West Coast, was taken at 3¼d. to 3⅝d., the remainder, good quality, was withdrawn. Privately, few sales have occurred. 192 bags common Penang White, in auction, were mostly disposed of at 5d. per lb.

SAGO.—Small rather dearer, in other sorts no change; and 1,671 boxes at auction, half sold; middling large at 18s. per cwt., add fair small 18s. 6d. to 19s. Sales advertised. We quote large at 17s. to 21s., small 17s. to 19s. 6d. The stock on hand on the 1st inst. was 1,508 tons, about half the stock on hand at the same period last year. Sago Flour.—Our quotations are 13s. 6d. to 14s. Quiet, and of 1,885 bags at auction, a small portion damaged sold upon previous terms.

SPICES.—Pimento: This has been offered in public sale to the extent of 1,828 bags, and nearly all the sound was sold at stiffer prices, low middling to good was middling 2⅝d. 3d. per lb.; a good portion damaged sold with spirit at 2⅜d. to 2⅝d. Cloves: There are no private transactions to report, and only 180 bags damaged Zanzibar have been brought to auction, which were realised at 3¼d. to 3⅝d. Nutmegs: 15 cases middling went at 1s. 1d.; and 34 cases limed, principally at 9d. per lb. Aloes: Soccotrine and Hepatic, bright liver colour, dry, in casks or kegs, without skins, £3. 10s. to £24 per cwt. Cardamons: Malabar, short, plump, bright, not wormy, 5s. to 7s. 3d. per lb. Ginger, Bengal, Native: Sound, plump, bold, cut soft, 45s. to 50s. per cwt. We continue without any supply of Bengal. Of 10,376 bales at auction only a small quantity disposed of: £28. 10s. per ton was realised on common to fine. Cassia Lignea: 1st, 2nd, and 3rd quality, 90s. to 97s. cwt. Buds: 260s. to 280s. cwt. Cinnamon: Ceylon, 7d. to 2s. 5d. per cwt. Mace: 1⅜d. to 2d. per oz.; nothing doing. Oil of Anniseed: 5s. 9d. per lb. Cajaputa: 2½d. to 3d. per oz. Cassia: 8s. to 8s. 3d. per lb. Cinnamon: 2s. to 4s. per oz. Soy: 2s. 5d. to 2s. 7d.; quiet. Star Anniseeds: 105s. to 110s. per cwt. Colombo Root: Remains firm and scarce; 21 bags at auction partly sold at 50s. per cwt. for fair. Camphor: Quotations for China and Japan are £6; sales to a limited extent effected at our quotation, at which there are still buyers but no sellers. 218 cases China brought to auction, but withdrawn.

HEMP.—Our quotations are for Jute £19 to £28 per ton; Manilla, £23 to £27 per ton; Siam, £15 to £30. The stock on hand on the 1st inst. exceeded 12,000 tons. Jute: The market is somewhat heavier. Fine new has fairly maintained its former value, the lower and medium qualities declining 10s.; old has fallen 10s. to 20s. Of 10,376 bales brought to auction, only about one-third sold at £20 to £28. 10s. per ton for common to fine; private operations limited. Manilla: Of 5,010 bales brought to auction, one-third sold at £26. 5s. to £27 per ton for fair to good current quality, and £27 to £27 5s. Sorsogon. Fine Lupez has brought £60; prices being irregular, but full on the average.

SALTPETRE.—The market still maintains a firm appearance, and about 4,000 bags Bengal have changed hands as follows:—13 to 5¾ per cent. refraction, 36s. 6d. to 37s. 6d., 4¼ to 3 per cent., 37s. 9d. to 38s. Our quotations are as follows:—Bengal, 36s. to 38s. per cwt.; Bombay and Madras, 33s. to 36s. 6d. per cwt.

COTTON.—Great depression has again been experienced in this market, and a further reduction of ¼d. to ½d. per lb. has been acceded to, but towards the close, a firmer tone has been perceptible. The total sales are are only 2,800 bales on the spot, good fair Kurrachee, (Surat) 12d. to 12½d., middling fair Dhollera to good Broach, 14¾d. to 17d.; fully fair to good fair Tinnivelli, Madras, 14½d. to 15½d.; fair Western, 14½d. to 14¾d.; Coconada, 13½d.; and middling fair to good fair Bengal, 10½d. to 11¾d.; also 1,150 bales Madras for arrival, 14½d. to 15d. Madras: Quotations are 1s. 1d. to 1s. 3¼d. per lb. Surat: The unfavourable course of this market has continued with very little interruption: demand irregular and occasional; and prices generally drooping; the total fall since our last being ¼d. to ½d. per lb. Latest quotations are, Broach, 1s. 1d. to 1s. 5d. per lb.; Oomrawuttee, 1s. 0¾d. to 1s. 4¼d.; Dhollera, 1s. 0¾d. to 1s. 4¼d.; Mangarole, 1s. 0¾d. to 1s. 3½d.; Compta, 1s. 0¾d. to 1s. 3½d.

TIN.—Banca: £122 to £124 per ton. Stock on hand on the 1st inst., 2,422 tons: Straits: £121 to £132. 10s. per ton. This market firmly maintains the former advance, but business is limited. Arrivals.

JAPAN WAX.—We quote this at 62s. to 65s. per cwt. Moderate private transactions have taken place in block, on previous terms.

MISCELLANEOUS.—Cocoa: Limited transactions, prices drooping. Rum: Small quantities disposed of at previous quotations. East India, 1s. 4½d. to 1s. 5½d. per gallon. Tapioca, 737 bags Penang found buyers at about previous rates, good white 2¼d., dingy 1½d. to 1¾d.; 195 barrels good white Rio were chiefly sold at 3½d. Nitrate of Soda, neglected. Rattans, 3s. to 10s. per 100, scarce and dearer. Rhubarb, Dutch, trimmed, 4s. to 6s.; common, flat, 2s. to 4s. 9d.; common, round, 1s. 9d. to 4s. 6d. per lb. Sapan wood, Bemah, £5 to £8; Siam, £8 to £11; firm, no business of consequence. Shells, Mother of Pearl, Sincapore, 125s. to 150s.; Manilla, 80s. to 100s. per cwt.; no business, very limited business privately at slightly reduced prices. Sticklac, Siam, 60s. to 85s. per cwt., dearer. Teeth, Elephants', 70 lbs. and upwards, £38 to £40; 40 to 60 lbs., £35 to £37; 20 to 40 lbs., £28 to £32; Scrivelloes, £15 to £32; Ball do., £30 to £43 per cwt. Terra Japonica, market quiet; Cutch, Pegue, 24s. to 26s. 6d. per cwt.; Gambier, 20s. to 21s. 6d. per cwt. Coculus Indicus: 9s. to 12s. per cwt. Quiet; 200 bags at auction, all retired. Horns, Buffalo, 23s. to 45s.; tips, 23s. to 28s.; deer, 27s. to 55s. per cwt. Nux Vomica, 9s. to 11s. per cwt. Safflower, good to fine, £6. 10s. to £8; inferior to middling, £4 to £5. 10s. Seed, linseed, 63s. to 67s.; rapeseed, 65s. to 70s. per qr. Shellac, Orange, 170s. to 190s.; garnet, 160s. to 170s.; liver, 150s. to 170s.; block, 100s. to 170s. per cwt. Black Lead, 7s. to 23s. per cwt. Galls, blue 100s. to 110s.; sorts 70s. to 85s. per cwt. Gum Ammoniacum, drop 80s. to 122s.; block 20s. to 60s. per cwt. Gum Animi, 1st size £8. 10s. to £11; 2nd and 3rd size £6 to £8; partially scraped £2 to £6; Gum Arabic, picked 32s. to 57s.; sorts 25s. to 35s. per cwt.; Gum Assafœtida, drop 100s. to 120s.; block 25s. to 90s. per cwt. Gum Kino, £8 to £13. Gum Myrrh, 1st quality £9 to £11. 10s.; 2nd quality £4 to £8 per cwt. Gum Olibanum, white 65s. to 75s.; reddish 45s. to 60s.; pickings 8s. to 32s. Madder Roots, 24s. to 27s. 6d. Nothing d ng. Cocoa, Bahia is neglected, and 1,598 bags brought forward by auctio met scarcely any offers, and were withdrawn. Rum, only small quantities have been taken at the previous value. Shells, mother-o'pearl, 25s. to 64s. per cwt.; firm. Teeth, elephants', 70 lbs. and upwards, £30 to £35; 40 to 60 lbs., £28 to £33; 20 to 40 lbs., £27 to £32; scrivelloes, £12 to £32; ball, cut, £43 to £56; do., uncut, £29 to £43; hollows, £13 to £29; points and tips, £14 to £34 per cwt. Sea horse, 4 lbs. and upwards, 6s. to 14s.; 3 lbs., 4s. to 8s.; 1 to 2 lbs., 9d. to 2s. per lb. Tortoiseshell, 9s. to 20s. per lb. Bees' wax, white, £11 to £12. 5s.; yellow, £7 to £8. Ebonywood, £6 to £13 per ton; quiet. Myrabolanes, 11s. to 13s. 6d. per cwt.; very firm. Red saunderswood, £7. 5s. to £7. 10s. per ton; dearer. Senna, Tinnevelli, 4d. to 1s. 6d. per lb.; steady. Turneric, 25s. to 30s. per cwt. Bees' wax, bleached, £9 to £9. 10s.; unbleached, £7 to £8 per cwt. Castor oil, 5d. to 6¼d. per lb. Cowries, fresh (with enamel), 30s. to 40s.; dead (no enamel), 22s. to 32s. per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s.; hoops, £8. 10s. to £8 15s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 15s. to £6.

TIN.—119s. for block; 120s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. per box.

LEAD, &c.—English pig, £21 to £21. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £18. 2s. 6d.; zinc, English sheet, £23. 10s.; quicksilver, £7 per bottle.

The following report is from the Circular of Messrs. French and Smith:—Iron is generally rather easier in price, the demand having diminished somewhat. Rails and Welsh Bars have not been much inquired for. Staffordshire Iron continues steady. Copper.—Since the reduction in English, 3rd ult., the smelters have been very full of work, as but few orders had been given out the three months previous. It is not, however, anticipated that this pressure will continue, as new orders are not very abundant. Foreign Copper continues firm. Tin.—A large business in Foreign Tin has been done during the month of February. The price of Straits is now firm at 121s. cash, 122s. 6d. three months, for fine quality. Banca is steady at 122s. 6d. cash. Although during the past month we have had no arrivals of Straits, several parcels of Banca have been stored here, which accounts for the stock in London being so large.

The stocks of Foreign Tin, here and in Holland, for three years are given below:—

	28th February, 1863.		1862.		1861.	
	Slabs.	Tons.	Slabs.	Tons.	Slabs.	Tons.
Foreign in London, estimated at		2,490		1,570		610
In Holland	51,740	1,585	40,401	1,237	50,954	1,560
		4,075		2,807		2,170
In Holland towards next sale	86,234	2,641	104,800	3,209	120,746	3,698
		6,716		6,016		5,868

Digitized by Google

The quantity of Straits tin afloat for Europe is 413 tons, against 896 tons in 1861, and 760 in 1860. Tin Plates are very firm, and continue in good demand, especially for best brands. The quantity shipped to all parts was about 70,000 boxes, against 83,000 boxes in same month 1862. Lead continues firm, but without much activity. Spelter is dull. The stock here is 4,607 tons, against 5,123 tons 1st March last year.

FREIGHTS AND CHARTERS.

Outward Freights by vessels on the berth for China are dull. Coal Freights, however, are firm, both for China and Point de Galle, and most of the other ports, except Singapore. Homeward vessels for Manila and China continue in demand, and business has been done at advanced rates.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 25s. to 30s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 40s. weight, 30s. to 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41. 10s. and £1. 17s. 6d. For Shanghai: £50 and £2. 7s. 6d. For Manila, £1. 12s. to £1. 12s. 6d. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £27 and £1. 8s. For Penang, £24. For Galle, £26 and £1. 10s. 6d. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have engaged freights for Government stores in the Maggie from the River Thames to Ceylon.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 45s. to 55s.; Shanghai, 55s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

CASUALTIES.

The American ship Uncowah, from Shields for Hong Kong, was in contact Feb. 13, in lat. 46 N., long. 10 W., with the War Hawk (barque), of Shoreham, Williams, from Messina to Liverpool, and sustained some damage, but proceeded.

CAPE TOWN, Jan. 21.—The Akbar (ship), Hutton, from Siam to Falmouth, with rice, cassia, wood, &c., ran ashore near Blue Bay in the night of Jan. 12, while beating up during a fresh S.E. gale. The greater part of the cargo has been saved, but the vessel has become a total wreck, and been sold with what remained on board.

The Sales, Mendezona, which sailed from Liverpool for Manila Feb. 20, put back again March 2.

ST. HELENA.—January 30, The Orient, Harris, arrived here, reports having spoken the Dutch barque, No. 741, from Batavia to Amsterdam, on the 12th Dec., in lat. 23 S., long. 75 E., with masts badly sprung.

Digitized by Google

AMSTERDAM.—Feb. 27, The Stad Dokkum, Jaski, arrived here from Batavia; was in contact in the North Sea on the 23rd Feb., and lost ··bboom and part of sail.

ST. VINCENT, CV.—Feb. 22, The Ferdinand Nies (Prussian), Neumann, from Sunderland to Hong Kong, with coals, has been condemned at St. Jago, and sold with her cargo, the former for £556, and the latter for £150.

1,135 bags of coffee, and 53 cases sugar, ex Ottolina, Eeleman, from Sourabaya to Rotterdam, which put into Simon's Bay 30th Oct., with damage, have been sold in a damaged condition.

The Tryntje Fenna, Abbink, from Batavia to Holland, which put into Capetown leaky, has discharged her whole cargo and been discovered to be seriously damaged; part of the cargo has been sold in a damaged condition.

At ST. HELENA.—Jan. 7, Augusta, Westerberg, from Batavia, and sailed for Amsterdam; 10, Chanticleer, Fraser, from Ceylon, and sailed for London; 13, Affiance, Simson, from Manila; 18, Hurricane, Looke, from Shanghai, and sailed, 19, for London; 19, Constance, Sifkes, from Padang, and sailed, 20, for Rotterdam; 20, Almelo, Zjebbes, from Java, and sailed 21; 21, Banda, Glass, from Hong Kong, and sailed for Liverpool; Concepcion, Tuton, from Manila, and sailed, 22, for Cadiz; Ernestine, Darbonnens, from Galle, and sailed, 23, for Sierra Leone; 22, Robert Small, Darke, from Java, and sailed for Amsterdam; Atlantic, Tarras, from Java, and sailed, 23, for Rotterdam; Jonkheer Mr. van der Wall van Puttershoek, Lammerts, from Java, and sailed, 23, for Dordt; 22, Indus, Foulard, from Padang, and sailed for Nantes; Chryseis, Hedley, from Shanghai, and sailed, 23, for London; 23, Zodiac, Hopkins, and Art Union, Morrison, from Shanghai, and both sailed, 23, for London; 24, Lady Alice, Nicklebury, from Japan, and sailed, 26, for London; 26, Ascendant, Cockburn, from Singapore, and sailed, 27, for London; 27, Johanna Maria Christina, from Batavia, and sailed for Amsterdam; Zeemanshoop, Pfaff, from Banjoewangie, and sailed for Rotterdam; 29, Bretagne, Tahier, from Batavia, and sailed for Nantes.

At TABLE BAY.—Jan. 10, Defiance (str.), Maddison, from Liverpool, and left, 17, for China; 14, Heimelin, Ouchterberg, sailed for Manila.

At SIMON'S BAY.—Jan. 12, Barossa (str.), Dowell, sailed for China; 15, Alphonsine Irma, Cavaro, sailed for Ceylon.

At ALGOA BAY.—Dec. 30, Mutlah, Hampton, sailed for Colombo; Jan. 9, Wilhelm, Farrelman, sailed for Penang.

At ASCENSION.—Jan. 16, Regina Maris, Ouwehand, from Sourabaya, for Amsterdam; 26, Mirage, Roberts, from Hong Kong, for London.

At ST. VINCENT, C.V.—Feb. 11, The Sze-Chuen (str.), Kennedy, from New York, and left, 14, for China.

THE STEAMER "DEFIANCE."—By the Cape mail we hear that the paddle steamer *Defiance*, lately built by Messrs. Laird Brothers, of Birkenhead, and which left Liverpool for China on the 21st of November last, had arrived all well in Table Bay on the 10th of January last, taking the latest dates from England. The *Defiance* had steamed the entire distance, calling at St. Vincent and Bahia for coal; and although burning but half her consumption of fuel, was only forty-five days under steam, averaging about 180 miles per day. She left Table Bay on the 17th January for Mauritius and Singapore, taking a mail and a considerable amount of specie for the former port. Her voyage so far adds considerably to the repute already gained by her builders, Messrs. Laird Brothers and Co., of the Birkenhead Ironworks.

THE P. AND O. COMPANY.—The steamers at present building for the Peninsula and Oriental Steam Navigation Company are the *Carnatic*, *Rangoon*, *Golconda*, *Delhi*, *Baroda*, and *Syria*. The *Poonah*, a new vessel, will convey the next mails to Alexandria. There is a probability of the Company undertaking a bi-monthly service to Australia. The weekly service to Bombay has been for a time shelved by the Post-office.

THE CAPE, INDIA, AND CHINA AGENCY.

ORDERS for GOODS of all descriptions executed, and Shipped by the Overland Route or by Clipper Sailing Vessels. Consignments of Produce realised. The Goods are selected by parties who have had personal experience of the requirements of the markets at the

NAGASAKI, JAPAN,
Agent for the LONDON AND CHINA EXPRESS and LONDON AND CHINA TELEGRAPH.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.
The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1855.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD, HONG KONG

SEA FRONTAGE.
AT
HONG KONG.

FOR SALE.—IMPORTANT and VALUABLE BUSINESS PREMISES on the Harbour of "Victoria, Hong Kong," situate near the centre of the City, having Extensive Frontage (of upward of 250 feet each) to the "Praya or Wharf" and "Queen's Road," by nearly an equal depth, comprising Marine Lots No. 65 and 65A, upward of 62,000 square feet area, held by lease from the Crown for a Term of 999 Years from October, 1844, at an annual ground rent of £160 per acre, and will be SOLD by PUBLIC AUCTION at Hong Kong the first week in June next; and possession given on completion of the purchase not later than Midsummer, 1863. A portion of the purchase money can remain on mortgage if required.

This desirable property offers to the Merchant or Public Company a most eligible building site, bounded by Public thoroughfares, suitable for the erection of warehouses with extensive vaults (the latter partially completed); or the whole of the buildings at present erected could be demolished, and a large Steam Boat Depôt, Tea Hong, or Mercantile Offices erected in their stead, with the material (100,000 cubic feet of hewn granite) now on the land; or to suit persons with smaller pretensions, the land might be divided into two pieces. There is sufficient depth of water for ships close in shore; moorings already laid down, and a stone Jettie or Public landing in front.

"Victoria" is a Free Port, offering special advantages to the Merchant seeking an Insurable Depôt for his goods; it is convenient to the Great Marts and disturbed Provinces of China, quite safe from "Rebel" and "Imperial" attack, and the Port where the teeming Traders and Mercantile Marine from those Marts and Provinces carry on a peaceable thriving trade, similar to that yearly developed between "Singapore" and "The Eastern Archipelago."—Further particulars may be had of the Auctioneer, "Victoria Exchange," Queen's-road, Hong Kong.

TELEGRAPHIC COMMUNICATION BETWEEN ALEXANDRIA AND ENGLAND, And the Continent generally.

MR. E. ST. JOHN FAIRMAN, MERCHANT, ALEXANDRIA, EGYPT, will undertake to receive and Forward Telegrams, &c., &c., for account of Firms abroad

THE JAPAN HERALD (the only Journal published in Japan) is rendered interesting to the general reader by the usual leaders and discussions on passing events, by its local intelligence, and by frequent notices of the People, their Government, Laws, Literature, and Manufactures, and of the natural productions of the country; whilst the Merchant and Trader will find his interests consulted by a carefully compiled statement of Exports of the two staples, Silk and Tea, of the current seasons, showing the comparisons with the same time last year—also by authentic Market Reports of Imports and Exports, with the usual Shipping List of Arrivals and Departures, in Harbour, &c.
Published Weekly—Price 25 dollars per annum.
Files of this Paper may be seen at the following Offices in London, where orders for subscriptions and advertisements will be received, viz.:—LONDON and CHINA TELEGRAPH, George-yard, Lombard-street; Mr. F. Algar Newspaper Agency Office, 11, Clement's-lane; and Mr. George Street, 30, Cornhill, or such orders may be sent direct to the Proprietors of the *Japan Herald*, Yokuhama, Japan.

HOLLOWAY'S PILLS. — EVERYBODY'S WISH.—One of the many causes of the eminent success of this medicine is the quiet purifying effect it exerts over the circulation; it watches over the new blood forming from the food, invigorates the distribution of the maturer blood, and casts out the old which has done its duty, and whose further presence becomes detrimental. By taking Holloway's Pills agreeably to their accompanying instructions, every person may attain the best permissible state of health, without interfering materially with their usual habits, pleasures, or pursuits. The weak and nervous will find themselves invigorated by judicious doses of this medicine, and by steady and persevering attention may confidently hope for increased strength, greater comfort, and better health.

LIFE DEPARTMENT.
(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world for which no extra premium is charged.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying an unchanging rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.
ANNUAL PREMIUM FOR THE INSURANCE OF £100.
(Payable during the entire currency of the Policy.)

Age.	Without Profits.	With Profits.	Age	Without Profits.	With Profits
	£ s. d.	£ s. d.		£ s. d.	£ s. d.
18	2 3 3	2 8 9	33	3 2 0	3 9 11
21	2 5 11	2 11 11	36	3 7 9	3 16 6
24	2 9 3	2 15 6	39	3 14 5	4 3 11
27	2 12 11	2 19 9	42	4 1 11	4 12
30	2 17 2	3 4 6	45	4 10 3	5 1 10

No extra charge for voyages.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Vectis, arrived March 25.—From Hong Kong: Surgeon-Major Carnegie, Capt. Findlay, Mr. Moul. From Singapore: Hon. Mr. Callaghan. From Galle: Mr. and Mrs. Soames.

To Southampton, per Ripon, expected to arrive March 31.—From Hong Kong: Mr. Hobbs, F. Woodcock. From Singapore: F. Creath, Capt. Gunthorpe, Mr. Rowe. From Ceylon: Mr. and Mrs. Stephens, child and servant, Mr. Thomas, Capt. Rutherford, Rev. Mr. Allen and child. To Malta from Ceylon: Mr. Morris.

To Suez, per Candia, arrived March 17.—From Galle: Mr. D. Wilson, Miss Wilson. From Hong Kong for Alexandria: Mr. Dato.

By last Bombay mail per Massilia, arrived at Marseilles 20th March:—From Hong Kong: Mr. Deacon. From Singapore: Mr. Wilson. To Southampton, per Delta, expected to arrive this day.—From Hong Kong: R. MacMillan. J. Fergusson, R. Colquhoun, Capt. Stewart, Mr. F. Whitly. From Singapore: P. Robinson, wife, and three children, Mr. W. M. Cooper. To Gibraltar, from Hong Kong: Governor and Lady Guimaraes, Miss Loureiro and two servants. From Singapore: Mrs. D'Almerda, three children and two servants.

PASSENGERS OUTWARD.

By this mail, per Ellora, March 20, from Southampton.—To Shanghai: Messrs. T. W. Walker, Higginbotham, H. Hutchings, Sparks, Bowra and Boyle, Mr. Chamber's man servant. To Hong Kong: Messrs. Despard, Youel, and W. N. Payne, Captain Stent, Mrs. Willgoss. To Singapore: Messrs. T. R. Scholfield, Jno. Myrtle, G. Myrtle. To Ceylon: Messrs. H. Durand, L. Carey, S. Dobree, T. W. Gill, and Hedges, James Walker, Mrs. Sabonadiere and European female servant. To Calcutta: Staff Surgeon M. B. Gallwny, Mr. and Mrs. Mathewson and infant and European female servant, Mr. Nicoll, Messrs. Jackson, N. M. Burt, and Kirkman, Isaac Cartlidge, Messrs. Auchterlonie, and T. Wilson, Miss Graydon, Major Lambert, Mrs. Parker. Assist.-Surgeon Wall, Miss Faber, Richard Tickner, Ensigns H. M. Wood and G. T. Morris, E. Allen, Chas. Saxby. To Madras: R. Vigor and wife and three children, Mrs. W. Barefoot, Mrs. Rutherford, Mrs. Clark and infant, Miss Clark and European female servant, Lieut.-Col. Selby, Mr. Walker. To Alexandria and back: Mr. Enoch Price. From Suez to Hong Kong: Mr. Francis.

From Marseilles, per Vectis, to sail 28th March.—To Shanghai: Messrs. W. Lloyd, J. D. Campbell, W. Rawlinson, and W. H. Marwood. To Hong Kong: Messrs. W. Keswick, R. H. Chambers, and R. C. Antrobus. To Singapore: Capt. and Mrs. J. Burn. To Ceylon: Rev. Mr. and Mrs. McArthur and infant, Mr. and Mrs. G. John, Mr. and Mrs. G. Francis, Mr. C. H. Newton. To Calcutta: Capt. Tremlow, Sir J. Metcalfe, Messrs. H. B. Riddell, Black, and T. O. Watson. To Madras: Lieut. and Mrs. R. R. Stuart, Major E. T. Boddam.

Per P. and O. str. Ripon, 4th April, from Southampton.—To Hong Kong: Rev. R. K. Edwards, R.N., Rev. W. Meeres, R.N. To Shanghai: Mr. Bean, Mr. H. P. Bockett, Mr. G. C. J. Topp, Mr. Jno. Jas. Kelly, Lieut. J. A. Man. To Singapore: Mr. and Mrs. Stavers, Mrs. Van Vloten and infant, Mrs. Lowe, Dr. Hutchinson. To Penang: Capt. and Mrs. Robson. To Ceylon: Mr. C. Featherstonhaugh. From Marseilles, 12th April.—To Hong Kong: Mr. T. Vincent. To Shanghai: Mr. Chas. Bourlet, Mr. Louis Cliquet, Mr. Warren.

Per P. and O. str. Poonah, 20th April, from Southampton.—To Hong Kong: Mr. S. Douglas. To Ceylon: Mr. R. Cayley.

Per French mail str. Labourdonnais, 19th March.—From Marseilles to Galle: Messrs. Jones, and Morgan. To Calcutta: Messrs. G. W. Grove and Harrison. From Messina to Galle: Mr. Viscardi.

Per P. and O. steamer, 4th April, from Southampton to Shanghai, Mr. J. H. Watson.

Per P. and O. steamer 20th April, from Southampton to Shanghai, Com. S. Moriarty.

Summary of News from the Far East.

JAPAN.

The fears naturally entertained by the British residents in Japan, from the warning Her Majesty's Chargé d'Affaires recently received from the Japanese Government, have happily not been realised. The news which reaches us by this mail chiefly relates to the internal condition of the country. The *Japan Herald* of the 24th January states that proscriptions of the most extensive kind have been made among the nobility by the Emperor's direction; that no less than a hundred and ten persons of rank have been degraded and deprived of half of their property; and that, while this number includes nearly all those who have "had to do" with foreigners since the treaties were first made, the names of certain nobles known to be hostile to foreigners are not to be found among the proscribed. A list is given by our contemporary of many of the nobility so degraded and punished; their names and titles are given in full, together with the charge brought against each, and the punishment awarded. For the sake of brevity, the list is confined to about a dozen names, but the fullest details have evidently been supplied to the *Japan Herald* from some source. "Unfortunately," says the *China Mail*, "no mention is made of the source whence all this information is furnished, and as we know well that nothing reaches the ears of foreigners in Japan except what is specially allowed to transpire, it is competent for us to doubt whether the facts stated have not been prepared for foreign circulation, and to serve a political object. True or not, the matter could not have transpired without permission, and as a most important political object is to be served by it, the meaning of the proceeding is very clear to us if it be true, and the object of the fiction plain if it be only a concocted report. That the facts have been deliberately supplied to the *Herald* by the order or permission of the Japanese authorities will not be doubted when the complete system of secrecy at work in that country is considered. The object sought to be attained is clear enough. If the treaties are to be repudiated, it will be, if not necessary, at least convenient, to affirm that they were made altogether without the Emperor's knowledge; and of this no better proof could be afforded than the punishment of those who were cognisant of what was going on while the treaties were being negotiated. The present, therefore, is an important step towards denying all share or complicity, on the Emperor's part, in the opening of foreign relations. It is of equal significance to us whether these arrests and degradations are real or pretended; they point in the direction of treaties about to be repudiated, and constitute another step in the anti-foreign movement, which was so openly begun in the evacuation of Yedo."

It is stated that great numbers of princes, merchants, and others are removing to Miako, where building has begun on a large scale, likely to render the city in a little time nearly as large as Yedo.

CHINA.

PEKING.

From the capital no news of importance has reached us.

SHANGHAI.

Owing to the Emperor of Cochin-China having repudiated the new treaty with France, and the province of Saigon having revolted from French rule, all the naval and military forces of the French now stationed in China are being withdrawn. This leaves the safety of Shanghai city and district entirely in charge of the British. The French Admiral will proceed to Manila in order to raise a force there, as on a former occasion. He takes with him (says a Shanghai contemporary) the *Renommé*, flag-ship, together with the *Semiramis*, and all the available ships of war on the station; also 300 rank and file of the 3rd Algerine Infantry, leaving Captain Fancon, lately in ommand of the *Renommé*, as representative of the French naval and military force at Shanghai, which consists of 200 infantry and a Franco-Chinese Corps.

The country within the thirty-mile radius is showing signs of prosperity. Our troops have been busy with a survey of the whole district round about Shanghai; and this is completed so efficiently that our future movements, should any require to be made over the country surveyed, will be easy and rapid compared with what they were while we remained at the mercy of native guides, often ignorant, and possibly treacherous. It is needless to say that the residents in Shanghai are in a very different state of mind to that of last year, when smoking villages and frightened refugees told plainly that the immediate neighbourhood was occupied by the Taipings. "Whatever," says the *China Mail*, "may be the opinion as to the neutrality, so-called, in distant quarters, only one opinion prevails at this moment in Shanghai, and that is, that British interference, so far as it went, has been of the utmost value to commerce and to humanity. This it is not easy to gainsay."

A fire had broken out in the French Concession, which did considerable damage. Among the articles lost by this conflagration were the books of the Sungkiang Garrison Commissariat.

Patrick Dall, consulting engineer, advertises in the *Friend of China*, that a plan can be adopted effectually to prevent the total loss or detention of vessels sunk or stranded in the Yangtse and its approaches. He asks for information with regard to the number of vessels sunk or on shore during the past eighteen months, the time during which each vessel had remained in such position, together with the expenses incurred in trying to get her off, or raised, and the actual loss sustained in each case by the owner or charter party. When furnished with this information he states that he shall be prepared to lay before the public a project "which will effectually prevent the the detention or total loss of vessels placed in such a position."

The *Friend of China* has the following:—"It is said that when Mr. Consul Medhurst, General Burgevine, Capt. Borlaise, and other officers met in solemn conclave on board H.M.S. *Pearl*, to consider the best steps to adopt after the Takee fracas, the Consul declared that the only complaint made to him by the Chinese authorities regarding the 'Ward' force was the extraordinary expenses to which they were subjected; there was not a word about 'robbery' of public moneys by the officer in command. Consequent on this declaration, the question has arisen — How, then, did the obnoxious expression find its way into the advertisement published authoritatively in the *North China Herald?* Who translated the notice sent by the Chinese authorities? Did the translator, whoever he may be, interpolate the libellous words? and, finally, whoever the authority—whoever the translator—whoever the interpolator—what means are to be taken for obtaining redress for the outrage? As this action would have to be brought, in the first instance, against the publisher of the *North China Herald*, we would say to General Burgevine, should we ever happen to meet that gentleman, 'Think twice before you take further trouble in the matter. Bear in mind that the Editor of the *Herald* most magnanimously advised the authorities to withdraw the advertisement the moment the untruth was apparent to him; and that if you go to the Hong Kong Court for damages, you must be prepared to show what you have lost; a difficult thing, for no one, for a moment, gave heed to the foul insinuation—an insinuation which has rebounded on the head of its author with a force threefold in effect to that intended for you.'"

The city of Fooshan, a short distance beyond Plover Point, and held by the Taiping rebels for some time, having tendered its allegiance to the Government, an Imperialist garrison was at once sent to occupy it. This was followed by the surrender of the large city of Chang-shoo, a few miles further inland, in which an Imperialist garrison was also placed. News having afterwards reached Shanghai that a large rebel force was threatening that city, General Holland decided upon sending to its relief 500 of the Soonkiang troops, with two 12-pounder field guns, under the command of Major Brennan, an officer who has repeatedly distinguished himself in the field. The troops left for Chang-shoo, accordingly, in the *Willamette*, but were compelled to return, being unable to land. They were to start again with supplies and boats.

Chang-shoo is situated about thirty miles inland; but Fooshan, the walls of which were clearly discernible from the river bank, was found to be surrounded by the rebels, though not, as far as could be ascertained, in any great force. This delay, however, in throwing so important a succour into the city was most unfortunate, as the fact of their having appeared before it, would be quickly known at Soochow, and would have the effect of inducing Chung-wang to send down large reinforcements. In fact, the rebels were already busily constructing stockades when the *Willamette* left; and the rapidity with which they construct these formidable earthworks is well-known. Chang-shoo is situated on the frontier of the rebel country, not far from one of their most important strongholds; it was natural, then, to infer that an attempt would be quickly made to retake it, and that, if an army were already before the walls when the detachment arrived, they would have possession of the surrounding country, and it would be impossible to procure the necessary boats for landing.

Soonkiang and its garrison of disciplined Chinese are rapidly assuming a state of tranquillity which neither the city nor the troops have presented before. Not only is the corps and its auxiliary forces established upon a better basis than hitherto but a system of retrenchment has been adopted whereby it can be maintained at half its former cost, without materially diminishing its strength, and in no way interfering with its efficiency. These beneficial results have accrued from the labours of a commission, appointed by the highest Chinese officials, which had been engaged at Soonkiang, making inquiry into, and investigating the states of affairs there; and in consulting with General Holland, now in command, as to the future establishment of the force. Their labours were brought to a conclusion on the 26th January, when they returned to Shanghai.

The work of retrenchment was commenced by reducing the commissariat, quarter-master's, and military store departments, which had been largely increased to meet the requirements of the Nanking expedition; also with a view to the future enlargement of the force. This reduction included a great number of Chinese compradores, shroffs, and other hangers-on, who held doubtful appointments, but took care to draw largely upon the financial resources of the corps, without doing profitable work, consequently they were incontinently dismissed. A large uncontrolled expenditure was likewise incurred in hiring outside labourers for porter work, of which no accurate account was kept; instead of this a coolie corps of 300 men have been enrolled, doing the duty more efficiently at a great saving in the revenue.

Next came a very necessary curtailment of the steam flotilla, which has all along been a costly arm of the service. Of the number of hired steamers hitherto employed, partly for the use of the force and partly for that of its supporters two only have been retained—the *Zingari* and *Hyson*—and these are to be thoroughly equipped and efficiently armed as small vessels of war, for the purpose of guarding the approaches by water to Soonkiang in case of an advance of rebels; and to keep up regular steam and postal communication with Shanghai. The regiment drilled by Lieutenant Kingsley, of the 67th, has been withdrawn and marched down to Shanghai; and a portion of the troops recently arrived from Ningpo, to strengthen the Nanking expedition, will be sent back. Thus the force is to be reduced to its newly-fixed establishment, and will consist of 3,000 rank and file, 300 coolie corps, 100 boatmen, and the crews of the war steamers, exclusive of foreign officers, hospital staff, linguists, and others. The armament of the artillery consists of two 32-pounder siege guns, sixteen British naval 12-pounder howitzers, twelve American 12-pounder howitzers, four English mountain howitzers, two eight-inch mortars, and four Cohorn mortars. These are exclusive of the garrison guns mounted on the walls, comprising four 32-pounders and two 18-pounders. The whole of these guns are provided each with 300

Digitized by Google

rounds of ammunition. The equipment and arms of the force are excellent. First in order is the body guard of 100 men, who are armed with the short French rifle and sword-bayonet. These men are the *elite* of the corps, selected for distinguished gallantry in the field and general good conduct. They have never misbehaved, either in action or in garrison, and have been repeatedly used to good effect in suppressing riots and disturbances among the other soldiers. The rifle battalion, 650 strong, is armed with the German Government rifle and bayonet; and the remainder of the infantry with the new British Tower musket, recently imported from London. The pay of the private soldier is eight dollars per month, out of which he supplies himself with rations and fuel, except when on the line of march, or in the field, when these are furnished by Government.

Last year the force was in seventy-two engagements, and since its formation has been in upwards of a hundred. During these it has never once been beaten by rebels, and consequently has received, officially from Peking, the designation of "Chang-sheng-chune," which, being translated, means "The Ever Victorious Army,"—a name by which it is known throughout the empire. While the garrison at Soonkiang has thus been improving lately in the discipline and accoutrement of its corps, the city and suburbs have been undergoing improvements also. It now possesses a well-stocked arsenal and armoury, in which the whole of the arms are fitted and repaired, and the ammunition made up out of imported materials. There is also a well found military hospital, which has been completed since the advent of General Holland, wherein every medical comfort will be found, and efficient attendance on the sick. The ruined suburbs are gradually being levelled, to give a clear range for the guns around the walls; while a fine military road sixteen feet wide, with bridges across the creeks capable of bearing heavy artillery, has just been completed from the city walls to the north bank of the Wongpoo river, a distance of about three miles. Nearly the whole of these works were planned, and carried out by General Burgevine, the late commandant. While these military works have been progressing, the Chinese authorities have not forgotten that Soonkiang is an ancient seat of learning, and possessed some fine literary institutions before it was desolated by the Taipings. The temple dedicated to the great Confucius is being restored and rebuilt, so is the Examination Hall, where literary degrees were formerly conferred; and it is expected that next year the competitive examinations of the province will be held at Soonkiang.

This improved aspect of affairs in the city is spreading to the surrounding country, which has been completely cleared for many miles from the presence of rebel marauders. The farms are again coming into a state of cultivation, while hundreds of people are daily flocking into the city for permanent residence, so that Soonkiang will doubtless again become a large centre of population. It is a place of considerable extent; the walls are four miles and a-half in circumference, while the main street, measuring from the end of the eastern to that of the western suburb through the city, is seven miles and a-half in length. It is also intersected by seven large navigable canals, which radiate from it as a centre, through watergates—a new one being now in the course of construction—for the conveyance of merchandise to all parts of the adjacent country.

HANKOW.

Matters go on quietly at this port since the Custom House was opened on the 1st January. There is not much trade at present, as the season does not begin until May. All is quiet in the province.

NINGPO.

An attack was recently made upon Shaou-hing, a town about ninety miles from Ningpo, and held by the rebels. The besiegers were the Franco-Chinese force under the command of Lieutenant Lebrethon. The attack was so far successful that the men were scaling the walls, when an untoward accident occurred which caused the besiegers to desist and retire. Something had gone wrong with a gun, and Lebrethon, with three other Europeans (the only other foreigners connected with the force) grouped round it to see what was the matter; the gun burst and killed all the four, which disheartened the besiegers so much that they desisted in the attack and retired.

Dr. Parker, of the London Mission, died on the 2nd February from the effects of falling from his horse into a canal, while crossing a dilapidated stone bridge. He was much respected by a large circle of friends and acquaintances; his loss will be deeply felt by those who came within the sphere of his labours.

Mr. G. E. Moule writes to a friend at Shanghai:—

"All who were acquainted with Dr. Parker will be able to imagine what a loss has been inflicted on our community and on the natives by this mysterious dispensation of Divine Providence.

"Dr. Parker was, I believe, only about thirty-two years of age, during nine of which he had devoted his talents to the cause of humanity and religion, as a Missionary to China. His high aims were not laid aside when compelled, after six or seven years of labour in China, on the death of his first wife, to revisit Scotland, for the sake of his motherless children. After two years spent in making necessary arrangements for their education, he married a second time, and returned to his chosen work, reaching Ningpo in last March.

"The recollection of his high professional skill, his assiduous attention to patients whether foreigners or natives, his intelligent practical interest in all that concerned the well-being of society around him, and his friendly sympathy with those more closely associated with him, all make it deeply painful to speak of one who is no longer among us."

HONG KONG.

The following address to the Queen has been forwarded to the Secretary of State for presentation to Her Majesty:—

TO THE QUEEN'S MOST EXCELLENT MAJESTY.

May it please your Majesty.

We, your Majesty's dutiful and loyal subjects, the Acting-Governor and members of the Legislative Council of the Colony of Hong Kong, venture to offer to your Majesty our humble congratulations on the approaching marriage between his Royal Highness the Prince of Wales and the illustrious Princess whom he has chosen from the Royal House of Denmark—a marriage which has already received your Most Gracious Majesty's approval and ratification.

From this remote portion of your Majesty's vast empire, we desire to avail ourselves of the opportunity to renew our assurances of attachment to your Majesty's Royal Highness, here and hereafter; and we sincerely trust that the union of the august pair may be the source of increased domestic comfort and happiness to your Most Gracious Majesty.

The postage stamps for the use of residents in Hong Kong, with regard to which we lately published an official circular, have been recently issued. In addition to the ordinary impression of a postage stamp, these bear, on the dexter and sinister of the Queen's likeness, Chinese characters for "Hong Kong" and the number of cents which the stamp is good for. Then, again, for each different rate there is a different colour. A two cent stamp is of a purply drab, eight cent coppery gold, twelve cent light blue, eighteen cent neutral tinty purple, twenty-four cent green, forty-eight cent pink, and ninety-six cent copper plate black line shade.

On the position of Russia in the Far East, the *China Mail* writes:—"Russia is foremost of the three great European Powers in so far as priority of diplomatic relations is concerned, and her interest in the East can easily be shown to be equal to that of any other Western nation. At this moment there is perhaps no tract of country towards which the eyes of travellers are directed with greater curiosity than the vast Russian territories which lie adjacent to the Empire of China; and the recent acquisition by Russia, of an immense strip of territory bordering on the Gulf of Tartary and the Sea of Japan, gives that nation a prominence in this quarter of the world from which she will not readily be displaced. Her seizure of a harbour in Japan shows that a future is being chalked out for Russian influence both moral and material, which is likely to be of some importance in the North Pacific Ocean. The general question of Russia's right to pursue a policy of this kind is not to be disputed about. Civilisation and industry flourish under her rule after a fashion, and her colonies are situated in regions which no other nation could turn to much account. So far her functions as a civilised and progressive power are distinct and separate from those of England and France. She peoples territory which they do not covet, and opens communications which they are at full liberty to use, and which both East and West reap the benefit of. It is therefore quite impossible for the most jealous of the other powers to dispute the advances of Russia in this quarter of Asia, or to complain that only diplomatic and strategic reasons exist for her presence in China and Japan. Russia seems to understand much better than her more polite neighbours how to deal with nations that are what is sometimes termed semi-civilised. She had a representative in Peking long ago, and it is not on record that any warlike expedition was wanted to clear the way for her ambassador's arrival. As for Japan, she saved time and trouble, and preserved the authorities from the practice of deceit, simply by taking a harbour wherever she found a suitable place, and hoisting the Russian flag on the nearest convenient eminence ashore; this, it may be noticed, although a decided act of appropriation, is not so liable to offend the daily vanity or pride of a Japanese, as the presence of foreigners in their towns, or their highroads, or about their late capital; and the likelih[ood] is that they will not make the matter an object of serio[us]

Digitized by Google

pute. To Russia, however, the acquisition is invaluable; even say, on one pretext or another, she has collected a fleet in these seas; and we may rely upon it that this harbour which she has just helped herself to, will one day be developed into a formidable naval arsenal; not one which, like Sebastopol, Cronstadt, or Bomersund, has no outlet to the ocean against a blockading fleet; but an ample harbour whence could be sent a squadron to molest Britain herself. Of the three Powers, Russia is the luckiest in her Chinese connection."

On the vegetation of Hong Kong and the difficulty of preserving trees from the rapacity of the Chinese, the same journal writes:—"We, some time ago, suggested that the study of botany and floriculture, if pursued here, and rendered amusing and popular by annual competitions in the form of a Flower Show, would gradually gather a herbage round about the dwellings of people who live 'up the hill,' and in the verandahs of their less fortunate brethren who are confined to the more barren regions of Queen's-road. There was a time when the slope of the hill above West Point, higher up than the Pok-foo-lum-road, was covered over with young firs—planted, if we mistake not, by Sir Henry Pottinger, or in his time. There was nothing more in Sir Henry's Act—supposing it to have been his—than a mere exercise of ordinary foresight, laudable and meritorious, however, in the sense of his sowing what others were to reap. That the planter of this and other bits of forest in the island did not put too much faith in the fertility of the soil, is evident from the fact that trees do flourish here under proper care and attention. We have only to point to the rising villas at Pok-foo-lum in proof of what we advance; the incipient verdure there exceeds what most people expected in so short a time, but it encourages the idea that the island is not wholly sterile to a certain class of seeds and plants. But unfortunately, what Sir H. Pottinger sowed has been reaped by the wrong hands, the locality named having been stripped bald by the Chinese living near it. This is sincerely to be regretted. It cannot be denied for a moment that it is difficult, if not impossible, to detect a Chinaman in an offence of this sort, for he knows that a penalty is attached to it, and has always a scout or two keeping watch while the deed is being done. But wherever there is a village close by, however small and miserable it may be, it is quite competent to render the inhabitants answerable for the safety of the trees. Let their undisturbed residence on the spot be made conditional upon their exercising a watch over the plantation, and we have no doubt at all that they will be found safe custodiers of their arboraceous trust. The fact is that they are believed to cut down the trees themselves; but the best form of interference would be, to give them charge of these embryo forests, and make them responsible for any damage that may occur. That the presence of trees near human habitations is healthy, may be judged from the fact that most Chinese hamlets are embowered among wood and nestle, so to speak, among foliage. Even the Chinese depredators on this island spare the trees close to their dwellings."

The *Daily Press* states that the Saiwan barracks have been made over to the public of Hong Kong under the control and management of the volunteers, and adds "We hail the acquisition with delight, and make no doubt that a delightful place of recreation will be the result. The carriage road which now runs nearly to Sow-ke-won will doubtless be carried to Saiwan, which place can also be easily reached in fine weather by race-boats or yachts. So that the enjoyment of riding, driving, yachting, and pulling are all opened in reaching the place. The volunteers will doubtless establish all sorts of amusements there, and we make no doubt that the advantages which both the corps and the colony will derive from the acquisition, will be both durable and beneficial."

The following items of news are taken from the *Evening Mail*:—A "horse" case, in which the plaintiff was Mr. Young (of Gibb, Livingstone & Co.), and the defendant Mr. Johnson, was adjudicated upon by Mr. Justice Ball. A friend of the plaintiff's was riding a horse a little eastward of the Kuhlan monument. Defendant's son was driving a carriage behind him; this he did so carelessly that he fouled the plaintiff's horse and seriously injured it. The damages were laid at the sum of $250. His Honour found for the plaintiff; damages $86, without costs.

On the 3rd Feb., the steamer *Douai* belonging to the Messageries Imperiales arrived here, bringing on the Australian mails, which would otherwise have been detained five days waiting for the English packet; by this opportunity we were put in possession of the latest American news (up to December the 15th), recording a defeat of the Federals before Fredericksburg.

The result of a collection for the Lancashire Fund, made at St. John's Cathedral on Sunday, the 1st Feb., was stated to be over $1,000.

An amendment to Ordinance 8 of 1862 has attracted attention; by this amendment the Post-office officials are empowered to search vessels for contraband parcels of letters. The matter came before the Legislative Council on the 6th Feb., when a remonstrance from the Chamber of Commerce was presented to the Council, and the right of search refused.

A complaint was made of over-drill in the Volunteer Corps, in a letter signed "Two Effectives." This evoked replies from "An Artilleryman" and a "Full Gunner" deprecating the idea of the drill being overdone.

CANTON.

On account of one or two daring piratical attacks, mentioned in a former number of our journal, the foreign residents recently desired that a gunboat should be permanently stationed at Whampoa. But those vessels are not plentiful, Amoy and Swatow, like Hankow and Kiu-kiang, having only one gunboat between them. Besides, the maintenance of order at any port by means of vessels of war is not agreeable to the present British policy. In accordance with the latter, Mr. Consul Robertson wrote from Canton to state that he should request the native authorities to furnish better protection for the residents at Whampoa. The consequence of this request has been, as we just learn, that a civil magistrate and a military force have been stationed at the Whampoa anchorage by the Chinese authorities.

An arrest has taken place in the city of an individual who was formerly a partner in a piracy with the lately executed scoundrel, Chung-shun, and who had forged a pretended order, purporting to emanate from the Viceroy, commissioning him to confiscate Chung-shun's property. He had already extorted considerable sums by holding this warrant *in terrorem* over the heads of some of the shopkeepers at Canton and Fatshan. The greater part of the known property of Chung-shun has already been legitimately confiscated; and the forger with his associates will probably be executed as well.

Workmen are actively employed in commencing the repairs of the Shameen river wall.

THE PHILIPPINES.

MANILA.

The authorities at Manila, pursuant to orders from Madrid, have resumed the monthly auction sales of manufactured tobacco for exportation to foreign countries. A notification of the fact appears in the *Hongkong Government Gazette*.

JAVA.

Colonel Verspijck, the Civil Resident and Military Commandant in Banjermassing, has resigned his appointments, in consequence of the Government, contrary to his advice, having pardoned and sent back to Banjermassing several of the native chiefs who had taken part in the insurrection.

Many failures, especially among the Arab and Chinese traders, had taken place in Batavia and Surabaya, and had exercised a very unfavourable effect upon the sale of imports, there being very few traders to whom credit to any extent can be safely given.

By a Government notification, dated 27th January, 1863, the Chinese residing in Siak and its dependencies, are declared to be directly subject to the N. I. Government, and placed under the immediate control of the Resident of Riow and his representative in Siak. The regulations of the Opium Farm of the residency of Riow are also declared to be applicable in the Siak division. This notification is to take effect from the 1st July next.

The exports of rice from Java in 1862 amounted to 650,000 piculs, principally from the residencies of Batavia and Cheribon. The import of rice during the same year amounted to 175,000 piculs. In 1856 the quantity of rice exported from Java exceeded 5,500,000 piculs. This large diminution in export is ascribed, in the first place, to the failure of crops during the last two or three years, arising from the frightful inundations to which some of the principal rice districts were repeatedly subjected, and also in some degree to the forced labour prevailing which prevents the peasantry from being able to attend to the cultivation of their rice grounds.

CEYLON.

The chaplain of the Portuguese Church at Colombo has set on foot a very excellent proposition for the formation of a ragged school for the children of the poorer classes, a want

Digitized by Google

that has long been felt. A committee appointed by Government to report upon the condition of the mechanics of Colombo, have suggested the formation of an industrial school, in which the young may be instructed on European models in various mechanical pursuits. To aid this idea, one member of the committee has offered the free use of a roomy house for five years, provided Government consents to appropriate a sum of £500 a-year for the experiment during that period.

Colombo has been enlivened with the presence of H.M.'s steamer *Odin*, commanded by Lord John Hay, who, during his sojourn at Trincomalee, rendered himself conspicuous by the reforms he introduced into the working of the dockyard. On the 20th Feb. his lordship left for Bombay.

On the news of the death of Mr. Evan Ormistone, the manager of the Ceylon branch of the Chartered Mercantile Bank, which it will be remembered occurred in London on the 1st of Feb., the *Ceylon Times* writes :—

"We know not any similar event that could have been so deeply felt as this, for however much expected as the result of a long illness, it has nevertheless filled our community with sincere and deep felt sorrow. During a residence of eight years in Ceylon, the subject of this notice won the regard and esteem of all with whom he came in contact. Hospitable, generous and kindly, we can safely assert that he has left a large circle of friends behind him who can never remember him without pleasure, or think of him now without regret. As a banker he possessed the rare qualities so essential to success, honest straightforwardness and conciliating manners, and we shall be writing but the bare truth when we state that the Mercantile Bank has as much cause for regret in his death as his friends in Ceylon."

The pearl fishery at Aripo was to commence on the 2nd March. It is considered that the present fishery will prove one of the most lucrative on record for many years. The bank to be fished extends over a space of seven miles in length by two miles and a half in breadth, on which it is supposed there must be two or three hundred millions of oysters. It is expected there will be twenty-five days fishing with a hundred boats, but this will of course greatly depend on the weather, and the health of the locality during the fishery, which is liable to be brought to a sudden termination at any time by an epidemic or bad weather. It is estimated that £60,000 will be realised as the result of this year's operations.

Mr. Edwin M. Kinsey, Private Secretary to the Chief Justice, has, we regret to hear, lost his life, owing to a fall from his horse. He is universally regretted by all who had the pleasure of his acquaintance, both privately, and in his public capacity, where he will be much missed by Sir Edward Creasy.

The weather was proving more favourable to the coffee-curers; but notwithstanding the grateful change, the comparatively small quantity of coffee forwarded is somewhat surprising. During the fortnight ending Feb. 26, five vessels had left Ceylon with 21,431 cwts. only of plantation, against 32,205 in the same period last year; and 8,247 native kinds in 1863, while 9,371 cwts. were shipped in the corresponding fortnight of 1862—this gives a total of about twelve thousand cwts. coffee less shipped between February 12th and 26th, 1863, than in the same period of 1862.

A correspondent of the *Colombo Observer* writes :—

"Blest with a healthy climate, a sound and vigorous trade, Ceylon yet continues to be very poor, although judging from the customs returns any one would imagine that she must be one of the richest colonies in the world, as we have imported no less than *ten* millions sterling in specie within the last thirteen years. But, alas! how deceptive are appearances. It is true this vast wealth was actually imported, but, unfortunately, it does not remain in the island. In this respect, Ceylon is like a sieve that retains none of the golden streams that run through her. On considering the subject, one cannot help exclaiming—'Who are the richer for the millions so liberally accorded to us year by year from the silver mines of India and the gold fields of Australia?' We may well pause for a reply, because no particular class stands prominently forward out of the mass of poverty that pervades the island, as wealthier than the rest. There is no distinctive class here, like the Parsees of Bombay, who have amassed capital from their earnings; a few individuals are pointed out, but their number can be counted on the digits, and even their savings will be dissipated to the winds at their demise, owing to our law of inheritance. It may be urged that wealth and poverty are merely comparative terms, and that the million of native inhabitants who are well fed, clothed, and lodged upon their simple fare of rice, a few yards of calico wrapped round their loins, and their cadjan-thatched huts, are supplied with all their wants, and may be as comfortable and happy as the European who cannot live without every luxury that wealth can procure. This is true, but it is not of such stuff that the wealth of a country is created. What we want is a permanent European population, not the mere birds of passage that now occupy the island; and here we come to the root of the evil, that the absence of fixed residents, instead of those whose interest and connection do not last beyond a few short years, is the great radical disability under which we labour. The capital and intelligence existing in the island are undoubtedly concentrated in the hands of its Europeans residents, and England is our great and liberal creditor. The profits of our banks, our merchants, and our planters are remitted thither, and must go to her as the tribute due for the use of her money; and nothing is spent beyond what is required for the bare necessaries of life. Until therefore we have colonists who settle down permanently and identify themselves with the soil in every respect, Ceylon must continue to be poor; but this is as yet hopeless, for the object of every European at present is to earn a competence as soon as possible and hurry homewards with his wealth, leaving his successor to follow in his footsteps. Such a state of things is inevitable, the climate being the first and great obstacle, although dwellers in the Central Province present excellent specimens of hardy and robust humanity. Next comes the want of education for European children, which renders their being sent to England indispensable. Nor can we expect any improvement even after the million of acres of forest land remaining available shall have been cleared and planted; for the organisation of society cannot be changed in a small colony like Ceylon which does not possess any of the resources common to Canada or Australia.

"The next great evil is the absence of indigenous labour. The natives of Ceylon will not work on our coffee estates, because they prefer to sleep away their existence under the shade of their ancestral Jack and cocoa-nut trees, which, thanks to the bounty of nature, yield them sufficient sustenance; and we are, therefore, dependent on the aid of foreign coolies, who carry away their earnings to enrich their own country. Another drain is caused by our being compelled to import rice—the staff of life—to feed the population of our island, for which we must pay in hard cash. Thus we labour under three great disadvantages, which combine to keep us poor. The first is unalterable; but the others are, perhaps, in the power of legislation to remedy."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

BARRAS—On the 14th Jan., at Shanghai, the wife of John R. Barras, of a son.
KEASBERRY—On the 9th inst., at Mount Zion, Singapore, Mrs. B. P. Keasberry, of a daughter
MARSHALL—On the 31st Jan., at Hong Kong, at the residence of T. S. Borradaile, the wife of W. Marshall, of Yokuhama, of a son.
MAYNE—On the 9th inst., at Singapore, the wife of Captain J. O. Mayne, Royal Engineers, of a son.
WADMAN—On the 18th inst., at Gravelye, Lindfield, the wife of E. Wadman, Esq., of Ningpo, of a son.

MARRIAGES.

BLACKETT—SCOTT.—On the 1st Jan., at Wester Rora, by the Rev. Alexander Low, St. John's Episcopal Church, Longside, James Blackett, Esq., of Pen-y-lan, Ceylon, to Catherine, second daughter of the late William Scott, Esq., Wester Rora, Scotland.
LAIRD—GORDON.—On the 10th inst., at Holy Trinity Church, Paddington, by the Rev. G. F. W. Mortimer, D.D., assisted by the Rev. Christian Mortimer, John, third son of John Laird, Esq., M.P., Birkenhead, to Josephine, only daughter of the late John Gordon, Esq., Bombay Civil Service, and granddaughter of the late Joseph Gordon, Esq., Edinburgh.

DEATHS.

BIRDSEYE—On the 19th Jan., at sea, on board the *Viola*, on the passage from Shanghai to Hong Kong, the wife of T. J. Birdseye, Esq., of Shanghai, China.
EDE—On the 20th inst., at Baltham, Surrey, Herbert, the third son of Francis B. Ede, Esq., in his 10th year.
EMERY—On the 27th Nov., at Bangkok, John, infant son of Helen M., and Captain John C. Emery, of Hampden, Maine, aged 5 months.
KING—On the 17th Jan., at Swatow, China, Richard, son of the late John King, Esq., Sunbury, Middlesex.
OUTRAM—On the 11th inst., at Pau, Lieut.-General Sir James Outram, Bart., G.C.B. K.S.I., &c., of H.M.'s India Army, aged 60.
PARKER—On the 2nd Feb., at Ningpo, —. Parker, M.D., of the London Mission.
ROSAIRO—On the 8th ult., at Colombo, Mrs. J. P. Rosairo, aged 27 years 7 months.
TALBOT—On the 10th Feb., at Hong Kong, Henry E. Talbot, aged 27.
WALKER—On the 22nd ult., at Galle, Anna, the beloved wife of C. P. Walker, Esq., District Judge, and second daughter of the late R. Brooke, Esq., R.N., Master Attendant of Trincomalie, aged 37 years.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: It would appear that exporters have been holding back in the hope of the pressure for money, usual at the approach of Chinese new years, forcing the teamen into easy terms. These expectations have been but very partially realised; prices have been irregular, but whatever reductions were effected upon fine Congous they certainly have recovered themselves. A good business has naturally been the result of this state of things. Scented teas have declined a little for hard cash. In Canton Greens, moderate sales have been made, at a very slight reduction. The transactions in country greens have been exclusively for New York. The settlements of the fortnight are reported as under. Congou, 13 chops Oonaams at 19½ to 23½ taels; 12 chops Oopacks at 24 to 30¾ tales: 1 chop Monings at 24½ taels. Canton packed—1,400 half chests 17½ to 24½ taels. Scented teas. Caper 15,000 boxes at 13½ to 17 taels for common to fair; 19 to 13 taels for mid. to good; and 25 to 28½ taels for fine to finest. Orange Pekoe—9,000 boxes at 17½ to 20 taels: 22 to 26 taels for mid. to good; and 27 to 31 taels for fine to finest. Canton greens, 2,000 boxes Gunpowder at 16 taels for common; 1,000 boxes Imperial, com. to mid. at 16 to 19 taels; 500 boxes Young Hyson, middling, at 19 taels. Country Greens, 7 chops or 4,226 half-chests, at 40 to 55 taels for Gunpowder; 37 to 42 taels for Imperial; 28 to 45 taels for Young Hyson; 32 to 55 taels for Hyson; 28 taels for Twankay, and 22 taels for Skin. The total settlements of Congous for the season, amount to 218 chops, inclusive of 6 under contract. The stock remaining on the market is thus estimated—Congous 63 chops country teas; 2,000 half-chests Canton packed, and 1,200 half-chests Tyshaans; Oolongs, 2,000 half-chests; plain Orange Pekoe, 1,000 ditto; Flowery Pekoe, 150 ditto; Country, 16,500 half-chests new, and 1,891 ditto old; Scented teas and Canton greens uncertain.

SHANGHAI—Black:—During the past fortnight the market has been very much depressed and buyers have generally held off, looking for a further decline before they would operate, but as stocks remain very

Digitized by Google

small and have not been increased by arrivals from Hankow, holders have remained firm, and would not submit to any reduction on previous rates. The settlements of the fortnight are reported at 2 chops, or 6,100 chests, making a total to date of 272 123 chests against 187,751 chests same time last year. Stock 2,500 chests Congou; 1,500 chests Flowery Pekoe. Green: The market still remains dull and holders have submitted to a decline of tls. 2 on all medium and common country Teas, fine Moyunes, however, command previous rates, and are very scarce. Shanghai packed and Japans continue neglected. Shipments and settlements for the fortnight 15,300 half-chests China, making a total to date of 126,115 half-chests and 16,861 half-chests Japan, against 154,957 half-chests and 23.977 half-chests respectively same time last year. Stock 15,000 half-chests.

FOO-CHOW-FOO.—A large business has again been done in Congous during the fortnight; rates appeared at one time to tend downwards, but were ultimately well maintained. The low rates which Oolongs had attained at length tempted buyers for the New York market. A large business was the result, rates latterly tending up, and, in fact, advancing nearly one tael all round. The settlements of the fortnight are reported as under:—Congou, 19,400 chests, and 11,300 half do., at 5 to 14 taels for ord. and broken leaf; 14 to 17½ taels for good common to second better; and 17 to 21 taels for good flowery to Souchong kinds; Souchong, 130 chests, at 17 taels for common; Flowery Pekoe, 138 do., at 16 to 23 tls. for common to good; Oolong, 19,100 half chests and 1,400 boxes at 12½ to 20 tls. for common cargo to superior; Scented Teas, 7,900 boxes at 17 to 20 tls. fair. The stock in the market is thus reported:—Congous, 32.700 chests (say 18,000 ord., 10,000 good common to 2nd better, and 4,700 good flavory to Souchong kinds); Souchong, 300 chests; Pekoe, 1,100 ditto; Oolong, 24,400 half-chests; Scented Teas, 8,000 boxes; Green Teas, 600 half-chests.

AMOY.—The American ship *Susprise* was despatched on the 20th January for New York. For a few days after her leaving, the market remained quite inactive until the 27th ultimo, when a demand arose for Capers, and settlements were made to some extent. Again on the 31st ult. Oolongs came into notice, and since that date considerable settlements are reported. Congou: This description has attracted but little notice. Three parcels are reported settled—say, 670 half-chests, at $15 to 15.75 of clean quality. The stock remaining consists of 920 half-chests, of very low description. Oolong: At the time the Surprise was under despatch, the market for these kinds could be quoted fully half a dollar to one dollar lower; but during the last day or two, Teamen are again becoming firm in their demands, owing to buyers having entered the market, and prices are now nearly up to former quotations. Settlements amount to 8,300 half-chests, at $15.50 to 19.60, and 80 boxes at $20. The stock is now reduced to 8,500 half-chests. Ankoi.—These have continued in the same dull state as last advised. Only one parcel (112 half-chests) is reported settled at $11.50. Stock 5,200 half-chests. Orange Pekoe.—No settlements reported. Stock 1,900 half-chests. Capers.—These have been settled to some extent—say, 8,400 boxes at $7 to $7.50, reducing the stock to 2,400 boxes.

HANKOW.—The settlements for the month of January are reported at twelve chops congou, marking a total for present season of upwards of four hundred and fifty chops. The stock on the market was reduced to 10 chops, and is hardly likely to be augmented this season. Late settlements have shown a reduction of one tael; the current quotations are: Oonams 14 to 17 taels. Hohows 12 to 14 taels, but these refer only to common teas.

KEWKIANG.—Green tea buyers have shown great reluctance to enter the market at the present standard of rates—but the Teaman have displayed such extreme firmness that there is little if any perceptible change in quotations, although the estimated stock amounts to between sixty and seventy thousand packages. The settlements of the fortnight are reported at 4,500 packages only, mostly of inferior quality, the market offering but a small selection of fine. Medium to fine Mingchows are quoted 28 to 33 taels, Ditto Moyune 31 to 37 taels.—Two large chops fine Twanki are held at 35 to 37½ teals, about 10,000 to 15,000 packages more are expected from up country, which it is said, will complete the season's supply. Marauders are still reported in the producing districts. Rates may yield a little as new year approaches, but certainly present appearances do not warrant such an expectation. In black tea nothing has been done—about 3,000 chests common Hohow remain upon the market.

YOKUHAMA.—There is a very small business for the past week, only 200 piculs having been settled at about previous rates. Stocks: ordinary, 1,000 piculs; good, 1,000 piculs; common, 1,500 piculs; good ditto, 1,000 piculs; medium, 1,500 piculs; fine, 1,000 piculs. Quotations are as follows:—Ordinary, $1 to 3; good ditto, 4 to 6; common, 8 to 12; good ditto, 14 to 20; fair to good, 21 to 29; fine, 30 to 33. The total export of the season is 3,047,636 lb., against 6,847,183 corresponding period last season.

RAW SILK.—Shanghai: Moderate transactions have taken place since last report. Considering the scarcity of money amongst the Chinese (which is even greater than usual at this season) the dealers have continued very firm, acting under the conviction of the short supply, but an advance in the rate of exchange made operators more cautious, and resulted in a slight reduction on medium and inferior classes The receipts from the interior show no increase, and the arrivals from Japan have only been 186 bales, but the reports from Yokuhama state that supplies were being brought to the market freely. The settlements of the fortnight are reported at 1,800 bales, against 1,500 bales at corresponding fortnight of last season, and 3,000 bales the season previous. The total settlements of the present season reach 58,300 bales, against 55,000 bales corresponding period last year, and 70,000 bales the season before. The state of the stock is thus stated—3,000 to 4,000 bales now, against 9,000 bales and 8,000 bales respectively then. Tsaltees, No. 1, 480 to 490 tls. per picul; 2 455 to 470; 3, 425 to 450; market, 3, 420 to 430; 4, 405 to 415; 5 and com., 380 to 400; Taysaams, No. 1, 405 to 415; 2, 375 to 395; 3, 345 to 365; 4, 5, and com., 310 to 340; Youenta, No. 1, 430 to 440; 2, 400 to 420; 3, 375 to 395; 4 and com., 360 to 379; Hainings, 360 to 435; mid. to inferior, 300 to 320.

CANTON.—There have been no transactions during the fortnight. The stock is small, supplies appearing to be limited to native wants. The following quotations are purely nominal. Cumchook, rereeled $470 to 475. Loonkong No. 1 $440 to 445. No. 2 $420 to 425. Gowkong No. 3 $415.

YOKOHAMA.—An active business has been done in this article during the past week, no change in prices can be noted, notwithstanding a large stock being in the market, in fact for some descriptions a slight advance may be quoted. Settlements are estimated at about 450 bales. Stock on 24th January, 1863, four hundred to five hundred bales. The total export of season to date is fifteen thousand seven hundred and sixty-eight bales against 6,470 bales at corresponding period last season. Quotations:—Ida, best parcels, $530 to 550; medium, $490 to 510; inferior, none; Mybash, best parcels, $540 to 560; medium, $510 to 525; inferior, $485 to 500; Sodai, 1, 2, $465 to 500; Oshu, best parcels, $520 to 530; medium, $470 to 490; inferior, $415 to 440; Coshu, best parcels, $460 to 475; medium, $420 to 440; inferior, $370 to 400; Aatchogee, $375.

NAGASAKI.—Purchases have been small, and for the stock remaining on the market excessive rates are asked.

DRUGS, &c.—Cassia lignea: Sales 1,2 0 piculs at $15.25 to 15.50 stock 1,000 piculs. Cassia buds: No sales, a few piculs offering at $47. Cassia oil: Sale 56 piculs at $122 to 196, stock 30 piculs. Aniseed oil: Sales 10 piculs at $150, stock 130 piculs. Star aniseed: Sales 200 piculs at $19.25 to 19.50, stock 200 piculs. Gallangal root: Sales 80 piculs at $3.40, stock 370 piculs. Ginger preserves: $2.70 for best. Vesmilion: $37. Camphor: Sales of the fortnight are reported at 400 piculs at $28. to 29. Nagasaki.—The quotation is $28 to 30.

RAW COTTON.—Hong Kong: Owing to the tenor of the advices from England, an improved demand has taken place, and rates have advanced $1 to $1.50 per picul on last quotations. The sales of the fortnight comprise about 3,000 bales Shanghai, taken by foreigners for exportation at $19 to $20 per picul. The stock on the market is reported at only 250 bales Bombay and 5,000 bales Shanghai. Shanghai: Stocks are light, owing probably to the causes named in last report. The capacity of the country for the supply of the article cannot yet be said to be tested. The demand for export to the South, to India, and to England, continues good. During the fortnight six ships have been despatched for England laden with the article two large vessels have also completed their lading with the staple for Bombay. A little is likewise being shipped to New York. Rates have advanced about 5 mace all round, and may now be quoted at 12 taels for inferior up to 12¼ taels for fine, A good deal remains unshipped, and business has been done at Ningpo to some extent. Amoy: Slow of sale, and but small transactions, in Shanghai, reported at quotations $18 to $19 per picul. Stocks are estimated in Native hands about 6,000 bales, and in Foreign about 4,700 bales. Indian: Stocks reported about 900 bales; quotations $16 to $17.

CHINA IMPORTS.

The approach of the New Year has tended to suspend operations to a considerable extent. Upon the whole markets seem in a tolerably satisfactory state. Stocks in dealers' hands are very small, and importers are extremely firm.

KEWKIANG.—The market is quiet; Grey Shirtings are wanted, but the prices asked are too high.

HANKOW.—Cotton goods are quoted higher, but very little has been done. Woollens are saleable.

YOKUHAMA.—There still continued a good demand for Cotton goods, stocks being light. Tin was still inquired for, and saleable at quotations.

NAGASAKI.—Grey and White Shirtings, Chintzes, Velvets, Dyed Brocades, Longells, Camletts, Speltre, Lead, and Tin, were all saleable at quotations.

SHANGHAI.—During the fortnight business has been all but suspended. The deliveries of manufactures have been insignificant. Last quotations are repeated, but to effect sales at the present moment large concessions would have to be made, which holders are not disposed to listen to. No change has taken place in Metals. Coals have declined, but the fall is deemed temporary only.

FOO-CHOW-FOO.—The following sales are reported during the fortnight, principally in barter:—2,000 pieces Grey Shirtings, 8½ lbs., at $3.75 per per piece; 47 pieces scarlet Spanish Stripes at 98 cents per yard; 300 pieces Longells at $9.90 to $10.50 per piece; and 900 piculs Lead at $8.50 per picul.

AMOY.—Cotton Yarn: No sales; quotations $56 to $57 per picul. Stock about 1,100 bales. Grey Shirtings: Sales reported about 5,000 pieces, 6 to 6.2 catty, at $3.43 to $3.56 per piece. Quotations are:—5¼ catty, $2.95; 9¼ catty, $3 60; 7 catty, $3.80; re-exported about 8,000 pieces. Present stocks about 14,000 pieces. T-Cloths: No sales. Quotations:—4½ catty, $2.30; 5¼ catty, $2.50; 6 catty, $2.95. stock, about 9,500 pieces. White Shirtings: No sales. Quotations, 54 reed, $2.95; 64 reed, $3.70; 74 reed, $0.60; 80 reed, $5 per piece; stock, 1,500 pieces. Turkey Red Cloths: Sales reported of 300 pieces at $3.40 per piece; stock, 3,800 pieces. American Drills: Quoted $5.50 per piece; stock, 400 pieces. Spanish Stripes: No sales. Quotations 80 cents to $1 per yard. Metals: Lead, $8 to $8 25 per picul, nominal, no demand. Tin: Malacca, $20; Banca, $35.90. Quicksilver, $64.50 per picul.

CANTON.—Sales small owing to the holidays. Yarn saleable at quotations. Grey shirtings, tend up, as also do White. T cloths are in improved demand and are firmly held. Dyed Damasks are wanted. Other fancy goods neglected. Camlets are saleable. Other woollens dull. Lead is still saleable, and iron in a little better demand. Quicksilver has been resold by Chinese.

HONG KONG.—Yarn is quiet. Grey and white shirtings are firmly held, an advance being anticipated. T. cloths and fancy goods neglected for the moment. Camlets in fair demands, other woollens quiet. Lead and iron in request. Coals $8 to 9. Flour, California, $7 per barrel; Eastern $11 to 12. Beef or pork almost unsaleable; the former is nominal at $6 to 10, and the latter equally so at $10 to 14. The last sale of Stockholm tar was at $13 per barrel. Canvas: Hemp $9 to 15, good quality scarce and wanted. Rope: Russian hemp in full supply, the best offered at $10 to 10.50 pe. picul; Manila $10 per picul.

The picul is 133⅓ lbs. weight; the tael at Shanghai is equal to 1 dollar and 40 cents, and is divided into decimal parts of ten.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—Jan. 21, Dunnikur, from Glasgow; 29, E. Shun, from Glasgow; 21, Gazelle, from Newcastle; Feb. 1, Halton Castle, from Liverpool; 5, Herm and Theodore, from Newcastle; 1, Louise Kohm, from Newcastle; 1, Martaban, from London; Sept. 9, Monsoon, from Liverpool; Jan. 12, Theodore Dill, from Newcastle; Feb. 5, Trave, from Newcastle; 5, Trimountain, from Liverpool; Jan. 27, Vander Palm, from Newcastle; Feb. 3, Vanguard, from London; Jan. 10, Amaranth, from Newcastle; 14, Broadwater, from London; 17, Celestial, from London.

At HONG KONG.—Jan. 21, Lauderdale, from London; 31, Lusitania, from Glasgow; 11, M. Mildred, from Liverpool; Feb. 14, Agra, from London; 14, N. B. Palmer, from New York; 4, Westminster, from London.

At MANILA.—Jan. 26, Indiaman, from Cardiff; 29, Patriot King, from Liverpool; Feb. 6, Maria Louisa, from Hamburg.

At SINGAPORE.—Feb. 8, Harmonic, from Newcastle; 10, Olympia, from Liverpool; 16, Bebington, from Liverpool.

SAILED.

From SHANGHAI.—For London: Jan. 27, Robert Henderson; 29, Queen of the North. For Liverpool: Jan 28, Gorilla; 29, Zealandia; 31, Oriental, Gresham. For New York: Jan. 28, Rapido, 29, Ceasar and Helena.

From FOO-CHOW-FOO.—For London: Jan. 26, Antipodis: 26, Kate Carnie; 27, City of Durham.

From HONG KONG.—For London: None. For Liverpool: Jan. 30, Storm King. For San Francisco: Jan. 29, Adville; Feb. 3, Lotus; 6, Lotus.

From MANILA.—For London: None. For Cork: Jan. 25, Viola; 27, Statellie. For Melbourne: Feb. 5, Australian.

From SINGAPORE.—For London: Feb. 8, Chaturanga. For Liverpool: Feb. 12, Crescent City. For England: Feb. 12, H.M.S. Sanspareil; 13, H.M.S. Snake; 20, H.M.S. Reynard. For Manila: Feb. 9, Circe. For Batavia: Feb. 20, Amazon; 13, Batavia, Benledi, Johan and Hendrick.

From NAGASAKI.—Jan. —, Malvern and Excelsior, for London.

LOADING

At YOKUHAMA.—For London: Copernicus.

At SHANGHAI.—For England: Neville, Egean, Vision, Leichardt, Blackburn, Southern Cross, Caldera, Carlotta, Cyclone.

At FOO-CHOW.—Ceylon and Patrician. For New York: Almena and Behring.

At HONG KONG.—John Banfield, Unrivalled, Rachel, Minerva, Kosmos, Edith Moore.

At SINGAPORE.—For England: Ceylon, Isabella, Olympic, and Little Edith. For Bordeaux: Singapore.

FREIGHTS AHD CHARTERS.

SHANGHAI.

The approach of the Chinese New Year holidays, which necessarily suspend business entirely among the natives, naturally affect shipping both directly and very materially, particularly at the present time when there is so great a paucity of produce upon the market. Under such circumstances, the settlements of the fortnight, as detailed below, present as favourable a return as could be expected. From the export tables it will be seen what vessels have sailed for Great Britain since the despatch of the last mail, and what are loading. To New York a little more is doing than was reported last mail. The following may be called the current rates of freight, but it should be observed that at the present moment very little is doing. There is however no reason to suppose that prospects have become less bright than were last represented. On the contrary, there is every reason to expect, upon the resumption of business after the holidays, that the shipping interest will prove highly favoured. To Great Britain £3. 12s. 6d. to £4 for tea, and cotton 50 feet. To New York $15 per 40 feet for tea. Hankow 7½ taels per 40 feet for meast, goods, and 5 mace per picul for dead weight. To Nagasuki $4 for meas., and 25 cents. per picul. To Kanagawa $5 for meas., and 25 cents. per picul. To Hongkong and Amog $4 for meas.; 1.25 per bale of cotton.

HONG KONG.

The Freight Market during the past fortnight has not been very animated. The arrival of the Donnai, with instructions to buy Cotton for the Liverpool Market, created a little more excitement, and one or two Charters were negotiated at medium figures. The regular traders between this and the United Kingdom are not anxious to proceed there at present, preferring to make a trip to the Rice Ports, returning to these waters in time for the new Teas at Foochow, when it is anticipated Freights will be plentiful and high. Very high figures are demanded for Australia and California, beyond Charterer's limits; and though tonnage is wanted for both places, but little has been done. The near approach of the Chinese holidays has also had its effect upon freights, very few Hongs operating at present. For this reason there is little doing for the Coast Ports. At Amoy and Foochow, a moderate demand prevails. At Shanghai little will be done until after New Year. At Manila, tonnage is abundant and freights low. For the rice ports, little or nothing doing. We quote the following settlements:—Great Britain. Foam, Brit. ship, 628 tons, to Liverpool with cotton, £3. 10s. per ton. Minerva, Ham, barque, 245 tons, to London, at £3. 12s. 6d. per ton. Kosmos, Ham. barque, 320 tons, to London, at £3. 15s. per ton. John Banfield, Brit. barque, 528 tons, on the berth from Whampoa to London, at £4 per ton. Rachel, Brit. barque, 563 tons, on the berth from Whampoa to London, at £4 per ton. United States. Lota, Brit. barque, 475 tons, on the berth, hence to San Francisco, at $8 per ton.

SINGAPORE.

The demand continues active and the following Charters have been effected:—Hafis (Hambro' 400 tons) to carry 10,000 piculs, and Harmone (Danish 137 tons) to carry 3,200 piculs to Shanghai with Rice at 75 cents per picul; Alice Maud (253 tons) to Labuan and back for $2,000 in full. Scalavonia (297 tons) with Rice to Shanghai at 77½ cents per picul. H. V. Van Paulo to a port in Java at 42½ cents per picul for rice. Rates of freight Tin £3; Sago in boxes £3. 10s.; Sago Flour £3. 10s.; Gambier in bales £3. 10s.; Sugar £3. 10s.—per 20 cwt. Black Pepper £4 per 16 cwt.; Coffee £4 per 18 do.; Hides and Horns £4 per 16 do.; Gutta Percha £4 per 16 cwt.; Gutta Percha £4 per 20 cwt.; Measurement Goods £4 per 50 cubic feet.

MANILA.

The only settlement to note is that of the American ship Danube, for Boston, at $9 for sugar and hemp (40 cubic feet). The Aurora and Galatea (both American) are also loading for the same port on owners' account. There is little cargo, particularly sugar, offering for the United Kingdom, and the disengaged vessels in port are unable to find employment at present.

PASSED STRAITS OF SUNDA.

From China to England and Continent, Jan. 12, Crest of the Wave; 14, Express; 15, Orissa; 18, Queen's Own; 21, Marquis of Argyle; 25, William Fairbairn; 25; Singapore; 25, Napoleon III.; Feb. 2, Malvern; 3, Bombay; 3, Dorothy; 4, Speedwell; 6, Appelina; 7, Havering. To New York, Jan. 8, Mermaid; 10, Sarah S. Snow; Eureka; 21, Golden West; 24, Samuel Russell; 31, Surprise; 31, Bittern; 31, Tafforette. To Australia, Jan. 16, Spee; Feb. 3, Independance. From England and Continent to Singapore, Jan. 27, America; Feb. 7, ames Paton. From Singapore to England, Jan. 13, Spanker; 29, Alchymist; Feb. 4, Frederica. From Sarawak, Jan. 14, Delhi. From Manilla Jan. 11, Shand; Feb. 1, Victor Emmanuel Malta, Canam. From Nagasaki, Feb. 2, Malvern. From England to China, Jan. 15, Carausius. From Cardiff to Shanghai, Jan. 27, America. From Glasgow to Singapore, Wilhelmina; Newcastle to Ourust, Feb. 1, Cecilia; Bordeaux to Singapore.

CASUALTIES.

HONG KONG.

The British barque Ardville, Captain Williamson, has been lost on the Pratas Shoals, bound for San Francisco, with Chinese passengers, who, with the crew, arrived at Hong Kong in a China junk.

Another vessel lost on the Pratas is the Elizabeth, a French barque

Digitized by Google

bound from Saigon to Hong Kong with rice. She struck on the 6th current, and shortly after became a total wreck. The crew have all arrived in safety. The vessel was under charter to proceed from here to France.

The Danish ship Rapid, of Hong Kong, was lost in the Straits of Allas on the 9th of January. The mate arrived here on the 12th of February, via Manila; the captain and crew are on the Island of Lombock. After an extraordinary continuance of bad weather the ship sprung a leak, which increased to such an extent that the ship had to be beached.

The Soberana, from Shanghai, was lost on Formosa on the 30th of December. Captain and crew, after much suffering, reached the consulate at Tamsin.

SINGAPORE.

The officers and crew of the barque Colonsay, of 235 tons register, belonging to Greenock, arrived here in the barque Bebington on the 15th, reporting the loss of their vessel in Gaspar Straits. The Colonsay, Captain Watson, left Shanghai on the 8th January last, bound to Melbourne with a cargo of tea, and having four passengers on board. On the 26th, at 6 P.M., the vessel passed Gaspar Island, bearing west, one mile, steering S. S. W. at the rate of 6 knots per hour, with a moderate westerly breeze, the lead being kept going. At a little after 10 P.M. had soundings in 20 fathoms, and immediately afterwards the vessel grounded and shoaled into 1¼ and 1 fathom water, when she became a wreck.

Messrs. Thomas Hunt and Co. are progressing very fast in Whampoa with their new steamer Kum Sing. It is expected that she will have her trial trip shortly.

The S. S. Aden left Foo-chow on the 1st February, Amoy on the 2nd, and Swatow on the 5th, bringing a few passengers and a cargo of tea and treasure.

The Hamburg barque Laertes, from Newcastle, bound to Shanghai, one hundred and seventy days out, put into the River Min with scurvy on board. The Captain died from the disease on arrival off Sharp Peak.

The British barque Malacca, lately seized by the Imperial Customs and the British Consul, has been let off, as nothing could be proved against her.

H. I. Chinese Majesty's steamer Pluto has come down from Shanghai to receive new decks and boilers.

Royal Saxon, formerly belonging to Mr. Robert Towns of Sydney having been condemned, has been purchased by the Government as a convict hulk to lay off Stone Cutter's Island during the erection of the new jail.

The British ship Westminster, for Hong Kong, left the Downs on the 1st October. Crossed the Equator on Nov. 3; passed the Cape, 30th; St. Paul's, Dec. 17; Ombay Passage, Jan. 5, when there exchanged signals with the Vanguard; since arrived at Shanghai. Off the Island of Bouro on Jan. 8; saw the Aberdeen clipper, Culskyle from London bound to Shanghai. She left England twenty-four hours after the Westminster. In the Gilollo Passage saw the British ship Rajah of Sarawak from Falmouth bound to Hong Kong, one hundred and twenty days out.

A FRENCHMAN'S VIEW OF THE TAIPINGS.—A private letter from a French naval officer, dated Shanghai, January 17, describes an expedition against the rebels, in which he had just taken part. We give a free translation of part of his letter:—"We have just returned to Shanghai from an expedition which lasted nine days, during which time we have been almost constantly on foot, up to our knees in mud and water, eating and sleeping anyhow. We were sent on a reconnaissance. The country is mostly planted with rice and intersected in all directions with small canals. At about ten leagues from Shanghai, as we gradually approached the rebels, we found the ground obstructed with Chinese corpses. The towns were entirely depopulated and often burnt. Sometimes four walls which represented a house, would be found to contain the bodies of men, women, and children, and the roads were literally paved with bodies. Radine, but recently a fortified town of 500,000 inhabitants, had nothing standing but its fortifications. Scarcely 1,000 Chinese remained among the ruins. Wherever the rebels pass they leave their bloody traces. At first they took up arms from political motives, but then they became mere bands of robbers, who rob and murder indiscriminately, without any political pretext. They had but just left one town, which we entered, and we found bodies of women and children still warm and wet with blood. We were to stop here for the night, and I set abont hunting among the brick ruins for some house that still remained standing where I could find a bed, for the weather is very cold. At last I found one, but on turning back the coverings of the bed a sight met my eyes that I assure you was not agreeable. A man and a woman lay there, assassinated in the most frightful manner. A cord had been bound so tightly round their waists that their intestines protruded through the open wounds. It was horrible. This is what war is in China. The rebels do not wear tails like the other Chinese, so that when on their predatory expeditions, they adopt the simple plan of murdering everyone who has not his head shaved."

THE LOSS OF THE MAIL STEAMER "COLOMBO."—Mr. Selfe, police magistrate, and Captain Harris and Captain Baker, nautical assessors, attended at the Greenwich Police-court, on the 18th inst., to express the opinion arrived at with regard to the loss of the mail steamer *Colombo*, Captain Farquhar, on the island of Minicoy, in the Arabian Sea, on the morning of the 19th Nov. last, whilst on a voyage from Calcutta to Suez. The court was unanimous in its opinion, the principal point for its consideration having been the cause of the vessel being wrecked on the island named, the same being thirty-two miles to the northward of the supposed position of the ship at the time she struck, which was at 6 20 on the morning of the 19th Nov., and within seven or eight minutes after land was first sighted. Agreeing with the course shaped and allowance made for lateral currents by Captain Farquhar on leaving Point de Galle on the afternoon of the 17th November, the court was of opinion that such an extraordinary deviation as thirty-two miles to the northward of the supposed position of the vessel could only be ascribed to the influence of an unusually strong current, it having since been ascertained in this country, from a pamphlet published by Professor Ferguson, of the Indian navy, that a cyclone or rotary storm was prevailing to the N.W. of Minicoy. To this must be attributed such an extraordinary current, which no amount of precaution could have guarded against. In returning to Captain Farquhar his certificate, the court expressed an opinion that the conduct of the engineer in charge at the time of the wreck had been neglectful, in not throwing off the expansion gear on receiving the order just previous to the vessel striking, to "turn astern, full speed," by which two or three minutes of precious time was lost, although it did not appear in evidence that the wreck would have been avoided had the order been instantly obeyed. The court also expressed its approbation of the conduct of Captain Farquhar and his officers and crew in saving the lives of the whole of the passengers and recovering the mails and cargo on board the wrecked vessel, Mr. Selfe remarking that an official report embodying the opinions of himself and the nautical assessors would be forwarded to the Board of Trade.

DR. MACGOWAN ON CHINA.—At a recent meeting of the American Geographical Society, Dr. D. J. Macgowan read a statement respecting contemplated explorations of the mountain lands of China, and more especially of the interior of Cambodia and Formosa. He made allusion to the American expedition of 1842, and the contributions it had made to horticulture and agriculture in the camphor tree, tallow tree, &c. He considered that the bamboo tree might be advantageously introduced into China, as its fibre would serve for paper manufacture. The breed of swine might be improved by Chinese importations; and there were several articles of food in the East which might be made to constitute an important addition to American agriculture. The Yang-tse-kiang had been penetrated for 600 miles, but of the great river of Cambodia and the resources of the adjacent territory we knew nothing; and its exploration would be a fit object for American scientific enterprise.

FUNERAL TABLETS IN EGYPT AND CHINA.—At a late meeting of the Syro-Egyptian Society, Mr. Bonomi exhibited drawings and impressions from some objects in the Egyptian Museum of his Grace the Duke of Northumberland, in Alnwick Castle, among which were some funereal tablets of great interest and antiquity, in which was distinctly set forth a kind of ancestral worship like that practised in China at the present time.

ELECTRIC TELEGRAPH BETWEEN KURRACHEE AND GWADUR.—At a meeting of the Royal Geographical Society held on the 23rd inst., a paper was read on the "Exploration from Kurrachee to Gwadur along the Mekram Coast," by Major F. Goldsmid, F.R.G.S., &c. The objects of the mission were to enter into preliminary arrangements with the chiefs on the sea coast between Kurrachee and Gwadur for the protection of the contemplated line of electric telegraph.

HONG KONG GAS COMPANY.—The remaining portion of the plant of the Kong Kong Gas Company will leave in the *Banda* from Liverpool on the 1st April, which will complete the works competent to produce 120,000 feet of gas per diem. Workmen to erect this machinery are also on board the *Banda*. A meeting of the proprietors will be held shortly to consider the desirability of increasing the capital of the Company; and should such increase be determined upon, it is intended to offer a portion to the Hong Kong community before allotting to the public at home.

THE statement having appeared under the Indian news in *The Times* that the P. and O. Company's ship *Cadiz* has been lost in Hong Kong harbour, the secretary writes to contradict the report.

Parliamentary Intelligence.

HOUSE OF COMMONS.

MUTINY OF THE CHINESE TROOPS.

(March 23rd.) Colonel SYKES asked the Under Secretary of State for Foreign Affairs whether the statement of General Burgevine, respecting the causes of the late mutiny of the Chinese drilled troops, published in the *Friend of China* of the 17th of January, 1863, had been received at the Foreign Office; together with the protest of all his officers, forty-five in number, against the attempt of the Chinese authorities to obtain his head by the offer of 50,000 taels, or for his secret apprehension, and threatening to resign if he was murdered. Last Friday week he asked a similar question, when he was told that he appeared to derive information from sources that was not always truthful. On Saturday, however, the China mail arrived, when he found General Burgevine's statement published in the *Friend of China*, verifying the previous information on which he had asked the question, but which had been impugned by the Foreign Office.—Mr. LAYARD was afraid he was not able to give a more satisfactory answer than the one which he offered to his hon. and gallant friend a few evenings ago. It was only that morning that the Foreign Office had received despatches containing the article from the *Friend of China* to which his hon. and learned friend had referred, and he was unable to say whether the facts therein stated were true. It would seem that General Burgevine had some difference with his banker, upon which he had broken open the banker's till, and consequent thereon the Government had offered a reward of 50,000 taels for his head. As soon as he (Mr. Layard) was in possession of authentic information on the subject he would communicate it to his hon. and gallant friend. When his hon. and gallant friend, some time ago, on the authority of an anonymous letter, stated that certain English officers had given up Taiping prisoners, and had seen them tortured, the Foreign Office addressed a circular to every officer in China, enclosing the statement of his hon. and gallant friend, and the reply was that there was not one word of truth in the statement.—Colonel SYKES said the letter had been first published in China.

THE ENGLISH NAVAL CONTINGENT IN CHINA.

(19th.) Mr. ADDINGTON asked the Secretary to the Admiralty whether the officers of the Royal navy now in the service of the Emperor of China had received permission from the Admiralty to wear the uniform of Her Majesty's navy during the period of such service; and whether there would be any objection on the part of the Government to produce a copy of the instructions given to Commodore Sherard Osborn on his proceeding to China.—Lord C. PAGET stated in reply that the officers who were about to serve the Chinese Government were not entitled to wear Her Majesty's uniform. With respect to the second part of the question, he had to state that the Admiralty had issued no instructions whatever.

Digitized by Google

Commodore Osborn would be absent on foreign leave from the Admiralty, and would retain his half-pay, and by an order in Council he and other officers would be allowed to serve in China.—Mr. ADDINGTON inquired whether the Royal naval uniform was worn by those officers.—Lord C. PAGET believed that the Emperor of China had established a naval uniform for his officers.—Mr. ADDINGTON asked whether these officers were now wearing the English uniform by direction of Commodore Osborn.—Lord C. PAGET replied that they were not entitled to do so.

MILITARY EXPENDITURE FOR CEYLON.

(20th.) Mr. LYALL called attention to the military expenditure for Ceylon, and asked what steps had been taken to reduce the annual charge of £100,000 on the Imperial Exchequer for the troops in that island. In bringing this question under the consideration of the House and the Government, he would call to their recollection what occurred last year. He then connected the military expenditure of Ceylon with the recommendation to annex that island, so Indian in its character, to India, and the Under-Secretary for the Colonies, in his reply, opposed that suggestion, but, at the same time, admitted that he thought the expenditure was capable of reduction. Now, as he saw no alteration in the Army Estimates, he was induced to ask the question that he had put on the paper. The House had never, he believed, laid down any regular principle on which it would defray the expenses of our military forces in the colonies. though he should judge from past, and, indeed, from very recent debates, that when a dependency was rich, flourishing, and with an overflowing exchequer, without hostile tribes within its frontiers, and no fear of foreign aggression, there would be a general expectation that it should discharge all its own civil and military police expenditure. India had never cost this country one shilling from the day of its conquest, but, on the contrary, had been a source of wealthy contributions to England. Java sent an annual tribute of £3,000,000 of produce to Holland after paying all its expenses; but Ceylon, richer than India, and nearly as prosperous as Java, cost this country £110,000 per annum, and if we deduct £10,000 for Imperial naval charges at Trincomalee, a clear £100,000 was paid by this country for its Colonial Government. Now, this charge, so unjust to the British taxpayer, might not have been so when this arrangement was originally made. It was fixed many years ago, when the circumstances of the island were totally different. Ceylon had then a debt, a deficient revenue, and the pacification of the hill tribes of the Kandyan district was not complete. Now, however, the revenue of the island, which as late as 1854 was only £408,000, had since increased at the rate of £50,000 per annum, and by the last accounts exceeded £767,000. Ceylon had no debt, and good roads had been made through the mountains of Kandy, and that district was as peaceful as any portion of the island. The circumstances, therefore, were entirely changed, and only a much smaller military force could now be required, and whatever was necessary for a military police establishment ought, in such a prosperous colony, to be defrayed out of its own exchequer. Any one who considered the geographical position of Ceylon could have no fear of foreign invasion, as Ceylon possessed an iron-bound coast, and was within two or three days of Madras, where it could procure any amount of troops. There was also an Imperial naval station at Trincomalee, so that in no part of the world was the military and naval supremacy of England more complete.—Mr. C. FORTESCUE said that in answer to the hon. gentleman he had little to add to what he stated the other night in a discussion on the Army Estimates. The proposal made last year to annex Ceylon to India had caused no little apprehension in the colony, and an address had lately been received from the Legislative Council entreating Her Majesty not to consent to any such annexation, on the ground that the island was well governed and possessed institutions which were satisfactory to the people. In the opinion of Her Majesty's Government the inhabitants of Ceylon were right in wishing to remain as they are. The Government, however, thought that the colony might be fairly expected to make further pecuniary sacrifices for the sake of its connection with the mother country, especially as there could be no doubt that the troops in Ceylon were mainly maintained there for purposes of internal order. Through the liberality of Parliament Ceylon had been enabled to develop its prosperity, and the time had now come when it might make an additional contribution towards its military expenditure. There would be no delay on the part of the Home Government in communicating these views to the colonial authorities.

FORTIFICATIONS OF THE COLONIES.

(23rd.) During the discussion on the Army Estimates, Mr. BAXTER called attention to the expense of fortifications in the colonies, and contended that the colonial possessions having local self-government should provide for their own internal defence. The House had more than once affirmed that principle, yet he found that there was an increase in the item for fortifications in nearly all the colonies. Believing these fortifications were useless, that they would be a source of weakness to England in time of war, and that if they were necessary the colonies could well pay for them, he moved that the item for colonial fortifications be reduced by £10,000. —Mr. HALIBURTON said for the last four sessions the hon. gentleman who had just sat down had gone over the same ground as he had now traversed. He protested against these continued motions with regard to making the colonies do this, that, and the other for themselves; it created angry feelings on the part of the colonists, who did not know the weight in this country of the opinion of those who made them.—Mr. A. MILLS said that those who were desirous that we should hold our colonies would do well to consider whether expenditure or fortifications attained the object they had in view. We could only defend and hold our colonies by maintaining our supremacy at sea.—Colonel NORTH said his only objection to the vote was that it was not half enough.—Sir G. C. LEWIS assured the committee that the items had been carefully revised, and that the remark of the last speaker had considerable force if they compared the number of competitors for votes with the number proposed. He had not proposed to fortify any place which had not been fortified already, and the additions and improvements were of the most moderate description.—Mr. BUTT maintained that the principle involved was the surrender of our colonial possessions by abandoning their defence, which we could not impose upon them, and which they could not undertake for themselves.—The committee divided, and the vote was agreed to by a large majority.

Continental Intelligence.

FRANCE.

The news received from Cochin China is by no means satisfactory, and reinforcements are earnestly asked for by the officer in command of the French force. General Forey is making the same demand from Mexico, where, it is said, 6,000 men are required in addition to the present large force in that country.

A meeting of all the leading Orleanists in Paris has been held at the house of the Duc de Broglie. M. Thiers, M. Guizot, General Changarnier, M. Rivet, M. Barthelemy-Hilaire, M. Dufaure, and many other Orleanists of distinction were present. The point to be debated was, whether the party should continue to abstain from public life, or should enter the arena, take the oath, and appear as candidates at the forthcoming elections. The words of the oath are, "I swear obedience t the Constitution and fidelity to the Emperor." All presen seemed inclined to abandon their passive resistance, and all but two agreed that this oath might be taken. The two were M. Dufaure and another not named, and M. Guizot hesitated. The decision has alarmed the Government, which, in the *Constitutionnel*, hints at the necessity for imposing new oaths and demanding categorical explanations. It is thought that several Orleanists may be returned.

On the debate being resumed, M. Billault said that this speech was imprudent, and affirmed that moral support was all that France could give to Poland. "The sympathies," he said, "of France for Poland are not new, and are founded upon glorious recollections, and the sentiments inspired by the sufferings of an heroic people which have lasted nearly a century."

The affairs of Poland have taken away for a while the thoughts of the public from the distress in the manufacturing districts; yet there is reason to believe that it has not only not diminished, but rather extended. From places where the workmen continued to be employed up to the last, appeals now come for relief. A circular from the relief committee of Mulhouse shows that the evil is spreading throughout Alsace, and 15,000 working men swell the list of those who have no wages to depend upon. A lottery for their benefit has been started in Paris by a number of ladies.

An important debate, continued for three nights, has taken place in the French Senate on the affairs of Poland. In the course of it the Marquis de la Roche-Jacquelein having supported the passing of the order of the day, Prince Napoleon opposed that course.

Six hundred and eighty-nine Protestant French ministers have signed an address, dated March 13, to ministers of the Gospel in this country, calling upon them by the memory of British philanthropy and British religion to arouse themselves that the influence of this country may be exerted for the liberation of the slave. They say:—"No more revolting spectacle has ever been set before the civilised world than a Confederacy, consisting mainly of Protestants, forming itself, and demanding independence in the nineteenth century of the Christian era, with a professed design of maintaining and propagating slavery —a Confederacy which lays down, as the corner-stone of its constitution, the system of slavery as it exists at present in the Southern States, a system which may be defined briefly as the right to treat man like cattle, and to commit adultery and murder with impunity. Setting aside all political considerations, can any Christian heart fail to be stirred to indignation at hearing the chief of that Confederacy answering a decree of emancipation by an implied threat of extermination? The triumph of such a cause would put back the progress of Christian civilisation and of humanity a whole century. If there is a peaceable means of hastening the end of the war and of rendering its issue such as is desired by all the friends of humanity, is it not that the sincere Christians of Europe should give to the cause of emancipation a powerful testimony, which would leave to those who fight for the right of oppressing the slaves, no hope of ever seeing those Christians give them the hand of fellowship? Ministers and pastors of all the evangelical denominations of England, Scotland, and Ireland, it is here we need your assistance. Take the lead, and let us call forth a great and peaceful manifestation of sympathy for the coloured race so long opposed and debased by Christian nations."

An extraordinary incident has come to light in Paris. On the 4th of February three gentlemen, Messieurs Garcia, Calzado, and Miranda, found themselves among a select party in the

Digitized by Google

salons of Madame Barucci, *alias* Benini, *alias* Justi. Miranda, who is a nobleman in the Queen of Spain's household, had already lost 35,000f. or 40,000f. to the two others the same evening at the Spanish-American Cercle. Before they sat down to *trente-et-quarante*, MM. Garcia and Calzado kept walking about together, and the other guests seemed to notice them with a certain reserve. Garcia was opposed to Miranda, while Calzado kept betting on Garcia's hand, and in the end, the stakes having been raised again and again, and Garcia having won fifteen times running, Miranda lost some 130,000f. or 140,000f. At this point the Duke de Caderousse-Gramont interposed, and charged Garcia with foul play, seizing his cards and pointing out to the company that some were lighter in tint than others. Garcia confessed that he had brought in some cards, but with no dishonest intention, and "only to change his bad luck." This was too much. His pockets were searched, and a quantity of extra cards were found. He was then called upon to refund, and, after much resistance, was induced by a threat of sending for the police to throw down bank notes worth 50,000f. More were demanded, and a general search was agreed upon. The result was that Garcia and Calzado had to be chased from room to room, dropping bank notes at every step, and almost all the missing notes were recovered. These facts being clearly proved against both, Garcia, who did not appear, was sentenced to five years's imprisonment, and Calzado to fifteen months', beside heavy penalties in fines and damages.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, March 22, 1863.

It is but seldom that I have to retract any statement I make in the columns of the *London and China Express*, but to-day such a case occurs; for it turns out that the intelligence of the betrothal of the Prince of Orange with his cousin the Princess Marie, of the Netherlands, as communicated in my last letter, is incorrect, or at least premature. In my own justification, however, I may be permitted to observe not only that I received it from a source which I had every reason to believe trustworthy, but that it was publicly mentioned everywhere in this city as an undoubted fact, announced in all the leading newspapers, and promulgated from the pulpit on the ensuing Sunday in all the churches, where prayers were offered up for the welfare and happiness of the heir apparent to the crown of Holland and his affianced bride. Notwithstanding all this, however, it appears after all to be not true, or rather that the Princess thought better of it, and that the engagement has been since annulled. Under the pretence of assisting at the ceremony of laying the foundation-stone of the monument to be erected at Berlin to the memory of King Frederick William III. of Prussia, the Princess has left this country with her parents. As the official part of the press had not announced the betrothal, they were of course not called upon to contradict it; but the most wonderful part of the story is that it has been officially denied in a quarter where one least expected to find it, viz., in the official organ of the Swedish Government, the *Post-och Inrikes-Tidning* of Stockholm.

In the Second Chamber of the States General, a Ministerial Bill has been brought in for an alteration in the excise duty on spirits distilled in this country. This was the necessary consequence of the late revision of the tariff and the change effected in the import duty on foreign spirits, its object being to place these two descriptions on the same footing and subject them to one legislative system. By virtue of the law of 1859 the duty on foreign spirits was fixed at 35 florins per hectolitre, whilst the produce of the home distilleries only pays 22 fl., thus enjoying a protection of 13 fl. By the new Bill the duty will be equalised, or nearly so, by reducing the charge on foreign made spirits to only 3½ fl. per Hectolitre of 50 degrees strength. But this measure could not be carried into execution without the consent of France to a corresponding modification of the Treaty of Commerce existing between the two countries; but the concurrence of the French Government to the proposed alteration has already been obtained, so that it now only remains to induce the States General to assent to the Bill. It is needless to observe that the French Treaty was concluded in the year 1840, consequently long before the revision of the tariff in this country, and before the present free trade principles came into operation.

Mr. Fransen van de Putte, the new Colonial Minister, has laid before the Second Chamber his new Colonial Budget for the current year, which has been, as is customary, referred to a committee to examine and report on previous to becoming the subject of general debate. I have not yet been able to see it, but judging from the explanatory memorandum of the Minister accompanying the Budget, it differs but little in amount from the previous one thrown out by the Chambers. There is an increase of 6,935 florins in the estimates for the expenditure, the principal item of which is in the new $3, containing an additional vote of 5,000 fl. for salaries to civil servants employed in a temporary capacity in the colonial office, the Minister's object being to obtain the latest information and practical advice on sundry important colonial questions from civil and military servants lately returned from Netherlands India, and more especially from such as arrive in this country on leave of absence, who for a small additional emolument would be glad to communicate to the Government their own views of the state of things in India, derived from their own personal observations and the result of their experience on the spot. The second item is 1,800 fl. for additional instruction in the languages, geography, and ethnology of the Dutch possessions in India at the Royal Academy of Delft. This item was included in the Budget of 1862, but subsequently thrown out by the Second Chamber in their evening sitting of the 20th of December, 1861, in consequence of an amendment proposed and passed. The third item is only for 135 fl. for additional support of another military pensioner at the asylum for invalids at Leyden.

There is also a new Ministerial measure before the Second Chamber for the importation, free of duty, in Netherlands India, of all raw articles of manufactures in metal, including iron, copper, lead, steel, and zink.

The Netherlands Trading Company have chartered the following twenty-five first-class vessels to load cargoes of colonial produce in Java for the undermentioned ports:—

Ship.	Captain.	Port of Discharge.
Princess Amalia	D. Van Bertfeld	Amsterdam.
Gerard Peter Servatius ...	J. Wamsteker	Do.
Johannes Christiaan... ...	C. Van Heemstede Obelt	Do.
Alexander...	A. Dekker	Do.
Decima	H. Grivel...	Do.
Stad Enschede	S. W. Kretschmer... ...	Do.
Frans and Elise...	T. J. Niedfeld	Do.
Alida Maria	J. De Vries	Do.
Elize Henriette...	P. J. Deterding	Do.
Eensgezindheid...	J. M. De Waal	Do.
Hercules	J. F. Deterding	Do.
Vesta	A. Van der Eyk	Rotterdam.
Abel Tasman	J. R. Ryken	Do.
Voorwaarts	E. L. Kerkstra	Do.
Jacobus	J. J. Van Loon	Do.
Ida Elisabeth	W. Dooren	Do.
Delft	L. Van Geelkerken ...	Do.
Cortgene	W. H. Rusman	Do.
Noach	P. Wierikx	Do.
Souburg	M. W. Zwart	Do.
Vyf Vrienden	C. Johan...	Do.
Nederland and Oranje ...	J. Bouwmeester	Dordrecht.
Patriarch Samhiri	J. J. Lion	Schiedam.
Vier Gezusters	J. Bok	Do.
Stad Middelburg	D. Ouwehand...	Middelburg.

The same company having advertised for tenders for the conveyance of 2,000 tons of coals from Newcastle to Sourabaya, and 2,000 tons from same port to Onrust or Kuyper, at a freight not exceeding 35 fl. per last of two tons. The following vessels have been offered and accepted:—*L. A. Bang*, Captain Fallenius, and *Gerharda Hendrika*, Capt. Glim.

Accounts have been received at the Naval Department from the Cape of Good Hope, announcing the safe arrival in Table Bay of H.N.M. screw corvette *Bali*, of ten guns, Lieut. A. L. Palm commanding, from Java, on the 10th of January, and proceeded on her voyage to this country on the 18th of the same month. The screw corvette *Soembing*, of ten guns, Lieut.-Commander J. N. Slegt, also from Java, arrived in Table Bay on the 14th of January, and proceeded on the 27th of the same month to this country. All well on board both ships.

A letter from Vliessingen states that orders have been received at that dockyard to prepare for sea the first-class steam frigate *Adolph Duke of Nassau*, fifty-one, to convey H.R.H. the Prince Alexander of the Netherlands to St. Petersburg.

The Minister of Finances has given notice that the letter to be burned into thetimbers of vessels officially measured for their register during the service year 1863-4 is a Gothic capital E.

Private letters from Batavia announce the suspension of payments of the house of Messrs. Schimmelpenninck and Co. of that city, as well as under the same firm at Sourabaya, Passarocang, and Probolingo, with liabilities to the amount of

Digitized by Google

1,640,605 florins, and assets for 1,094,670, showing a deficit of 545,935 fl. The *Rotterdam Courant* states on authority, that all goods consigned to the firm were delivered over to the owners or their agents, and that there was every reason to suppose that the creditors would come to an amicable arrangement and accept a composition, all who attended the first meeting having agreed to do so.

At the last meeting of the Royal Society of Arts, a communication from Dr. R. Th. Friedrich, of Batavia, was read relating to the drawings of the Dierenriem, and two inscriptions found on a statue of Mandjoerceri, lately discovered by him in Java.

Younker J. L. C. Pompe van Meerderoort has received from the Dutch residents at Decima, through the instrumentality of his Excellency the Chevalier Huyssen van Kattendyke, the Naval Minister, a splendid piece of silver gilt plate, as a token of their gratitude for his medical services during his residence of five years in Japan. The plate was manufactured by Mr. J. H. van Kempen, of Voorschoten.

According to the final report on the proposed alteration in the Naturalisation Laws the question has again been mooted in the Second Chamber whether the exclusion of Englishmen from becoming naturalised be in accordance with the contents of the Law of July, 1850. Several members denied it. On the other hand, it was observed that the law of 1850 was not free from hardships affecting other foreigners settled in Netherlands India. According to the Civil Code, these persons were considered as Dutch subjects, as far as regards their being amenable to the laws of this country.

The *Arnhem Courant* states that letters by the Overland Mail have been received in this country, announcing that the Lieutenant-Colonel commanding the Dutch troops at Banjermassing, in Borneo, has tendered his resignation. As a reason for this step it is asserted that he felt aggrieved at the Government having returned a Pangarang that he had banished from the island as a dangerous character and disaffected towards the Dutch.

The first armour-plated iron gunboat for the Dutch Navy has been successfully launched from the private yard at Fyenoord, where it was built by contract. Mr. C. J. van Steel, Civil Engineer of the First Class, has been commissioned by the Government to superintend the construction of her engines and general fitting out.

By Royal Decree of the 10th of March, No. 1, The concession granted provisionally to Mr. Poolman by Decree of the Governor-General of Netherlands India, dated the 28th of August, 1862, for the construction of a railway from Samarang to Djokdjokarta through Soerakarta, is confirmed, subject to the eventual approbation of the States-General.

PASSENGERS ARRIVED.

Per *Staatsraad van der Houven*, Capt. Heymericks, at Rotterdam, from Patjitan: Mr. J. C. van den Berg.

PASSENGERS OUTWARDS.

Per *Princess Amalia*, Capt. van Bentveld, from Rotterdam to Batavia: Colonel and Mrs. E. Rappard and five children; Miss Krom and Miss C. H. Rausch, Messrs. T. C. Andreas, J. Andreas, L. Schneider, H. Wilkens, H. F. de Wilde, and A. C. Ravensway; 125 supplementary troops.

Per *India Packet*, Capt. Diepering, from Amsterdam to Batavia: Mrs. Heukensfelt-Staghek, two children, and servant; Mrs. Schol and child, Mr. and Mrs. J. L. l'Epagnoil, Mr. and Mrs. J. Hulshof-Pol, Capt. O. A. Kooken, E.I. Infantry, Lieutenant J. O. Arnoldy, E.I. Army, and lady; T. W. Neuhaus, Military Apothecary E.I. Army, Messrs. G. Gehrung and J. Eeg.

Per *Stiedrecht*, Capt. Feenstra, from Nieuwe Deep to Samarang: Mr. H. de Boer, Medical Officer, E.I. Army; Messrs. J. Brandes, L. F. Muter, A. G. Fries, P. Clignet, and J. F. van Hengel.

Per *Louise*, Capt. Buys, from the Texel to Batavia: Mr. and Mrs. P. A. Muller, Mr. and Mrs. H. W. Wigman, Mr. and Mrs. T. Hees and two children, Mrs. M. C. ter Marsch, Miss L. Planekes, Mr. G. Wigman, and Mr. Sweers.

Per *Hendrika*, Capt. de Groot-Stiffry, from Amsterdam to Batavia: Messrs. J. G. Huyser, P. G. Hajenius, J. A. Altman, F. C. Bosstraeten, and the Javanese Dodo.

Per *Telanak*, Capt. Popken, from the Texel to Batavia: Mr. N. Bonthuis, Medical Officer in the E.I. Army, and family.

COMMERCIAL.

COFFEE.—Notwithstanding the close proximity of the Company's sale there has been ever since the departure of the last mail a lively demand for East India descriptions, both here and at Rotterdam, and in all cases full values were realised. Among the sales were 5,000 bags of private trade Macassar, ex *Macassar*, at 42½ to 44 cents, 600 bags of Padang, second quality, at 37, and 1,500 bags private trade Java at 46½. Any stray parcels of company's good ordinary Java, out of former sales, that appeared in the market, were immediately snapped up at full prices, 45½ cents being readily given, and in some instances 46 were paid. From the tabular statement of the result of the Company's Spring sale at foot, your readers will perceive that the whole quantity found purchasers. With regard to the prices obtained, it may be remarked that, with the exception of the yellow and high yellow sorts, most of the other qualities went off at ½ cent above the valuations, and the finer coloured descriptions, as well as the Menado, even considerably higher. The deliveries commence to-morrow.

SUGAR.—At the Company's sale of 62,217 kranjangs of Java, the whole quantity was sold, about one-third being taken for export, chiefly for Russia and Germany, and the rest for home refiners and on speculation. For brown and middling descriptions the prices of the last November sale were obtained, fine steam made qualities (Nos. 16 to 20) realised higher rates, whilst inferior sorts fetched 1 fl. less than at the November sale. The following are the prices obtained:—

No. 6	..	23fl.	..	11	..	29½fl.	..	16	..	35½ fl.
7	..	24½	..	12	..	31½	..	17	..	37½
8	..	26	..	13	..	32½	..	18	..	38½
9	..	27½	..	14	..	33	..	19	..	39½
10	..	28½	..	15	..	34½	..	20	..	40½

In addition to the above, the private sales of the fortnight were not inconsiderable, among which may be noticed 2,108 kranj. of Samarang, ex *Lady Ægidia*, No. 19, fine steam made, at 28½fl.; 600 kr. of Sourabaya, No. 16, very fine, ex *Robert Small*, at 35½fl.; 837 kr. of ditto, No. 18, ex *Metis*, at 37½fl., and 1,304 kr. ditto, No. 18, fine steam made, ex *Freya*, at 38fl., to be received on board. Refined sugars firm, and several sales amounting to 3,000 tons reported. The tone of the market is more satisfactory, and the demand for exportation increases as the spring is advancing.

RICE.—Market quiet. No sales by importers, and a moderate business for consumption by the dealers.

SPICES.—Java cinnamon in great favour at rising prices for No. 3. Sales commenced at 73 and ran up to 84 cents, which has been paid, and under which figure there is none to be had. Nutmegs, No. 1 of 1862, have been done at 62 cents. Cloves are more in request, and the late rise is fully established. In Pepper there have been some considerable transactions, among which were 2,041 bags of Sumatra, ex *Catharina Maria*, at 21½ cents, and 1,536 bags ditto, ex *Benvoirlich*, at the same price. The demand still continues.

TIN.—Banca experiences a good demand, and several sales have been made at rising prices, commencing at 72½fl. and creeping up to 75fl., at which figure about 5,000 blocks have been taken. The market closes firm.

COPPER.—The Company's sale of 300,000 kilog. of old Java coins melted into tough cake went off with spirit, all being sold at 50fl. to 51fl.

RATTANS in great favour, and full prices paid. Amongst the sales by importers were 4,252 bundles ex *Alblasserwaard*. The Company have advertised 200,400 bundles (9,445 piculs) for public sale at Rotterdam on the 27th inst. The valuations are as follows:—Banjermassing, 15fl. to 18fl.; Padang, 13fl. to 15fl.; and Koetie, 8fl. to 9fl.

TOBACCO.—No transactions in Java for want of stock. The whole quantity on hand is only 83 bales.

SILK.—The Company has advertised a public sale of 250 bales of Japan for the 26th inst. The valuations are as follows:—

25	bales	Mino Scando	.. ..	16 fl.	to	20½fl.
86	„	Aechazan	.. .. ..	19½	„	25½
12	„	Oshue	.. ..	20	„	26
37	„	Idah	.. ..	21½	„	28½
90	„	Maybash	.. .. ..	28	„	36

Result of the Company's Spring Sales of 412,662 bags of East India Coffee, held at Amsterdam, March 18, 1863.

PRUSSIA.

The Prussian sailing transport *Elbe*, that accompanied the diplomatic expedition to China and Japan, has been sold out of the service. She was built at Apenrade, in Denmark, and was purchased at Hamburg by the Prussian Government for 100,000 rix dollars. She has now been disposed of by private contract to a Hamburg house for 19,500 dollars.

SWITZERLAND.

The Japanese Embassy in Switzerland has applied for the necessary powers for negotiating in the name of the Mikado of Japan, as the Tycoon will probably withdraw from Yedo to Miako.

LONDON, FRIDAY, MARCH 27, 1863.

MOSS v. ALCOCK.

SIR RUTHERFORD ALCOCK, in his recent work "The Capital of the Tycoon," has recorded his version of Mr. Moss's case, without, however, giving the name of that gentleman. That this version should be one-sided is only what might have been expected, neither does it surprise us to find that Her MAJESTY'S MINISTER PLENIPOTENTIARY in Japan should have altogether omitted to notice two or three of the most prominent features in the story in which his conduct was pre-eminently blameworthy. Sir RUTHERFORD ALCOCK is a very clever man, but all his efforts will not suffice to override certain plain facts which are well known to English residents in Japan, and with which all our readers have been made familiar. It is curious to read Sir RUTHERFORD ALCOCK'S account of "A British subject in collision with Japanese police at Kanagawa," and then to peruse the narrative recently drawn up by Mr. Moss, in which he relates his seizure by the Japanese, and his treatment by the CONSUL-GENERAL. Any one who reads the story for the first time, as told in Sir RUTHERFORD'S volumes, would take it for granted that the use of fire-arms on the part of Englishmen in Japan was a direct violation of a law by which foreign residents were bound. He would believe that the Japanese police were acting in accordance with the Treaty in endeavouring to arrest a British subject for shooting a wild goose within ten Re of the TYCOON'S residence. He would believe that Mr. Moss had deliberately fired at and wounded the Japanese officer, and that the police had only done their duty in securing and carrying him off as their prisoner; and, finally, he would believe that the punishment awarded by the CONSUL, if not technically correct, neither "touched the prisoner in pocket nor convenience," and was under all the circumstances extremely mild, since the CONSUL-GENERAL might have legally awarded twelve months' imprisonment. This would undoubtedly be the impression conveyed by Sir RUTHERFORD ALCOCK'S statement, and there can be no doubt also that it would be utterly false.

To begin at the beginning, Mr. Moss would have been more prudent if he had abstained from shooting, just as poor RICHARDSON and his companions would have been more prudent if they had abstained from riding on the Tocaido. None of the Japanese, with the exception of the Daimios, are permitted to ride on horseback, or to shoot within a specified distance of the residence of the TYCOON. It is only natural that the Japanese should be desirous of imposing the same restrictions upon foreigners, and that the Princes should wish to receive from them the same marks of reverence which they exact from their own countrymen. Prudence of this character has ever been a Dutch virtue in the Far East, but it is one which our countrymen do not seem much to relish. Grant, then, if you will, that Mr. Moss thought more of amusement than of what was exactly expedient when he started, in the month of November, 1860, for "an early and long day's shooting." The only point for us to consider with regard to his day's sport is whether, in the pursuit of it, he was committing an illegal act. It appears that a year before, Consul VYSE had requested the foreign community to desist from this amusement for a time, and they acceded to the CONSUL'S request. But when the shooting season came round again, no consular notification on the subject having been issued and publicly exhibited, as by law it was bound to be, in the office of the CONSUL, Mr. Moss considered that he was justified in following his sport. In this belief he was not singular, since most if not all the foreign residents in Yokuhama held the same opinion, and on the very day on which Mr. Moss was seized "the "SECRETARY of His EXCELLENCY'S legation at Yedo came "down to Kanagawa with His EXCELLENCY'S consent for "the purpose of shooting." But if we take the opposite view and come to the conclusion that Mr. Moss's conduct was blameworthy, were the Japanese police justified in endeavouring to seize him? Sir RUTHERFORD ALCOCK says "they had simply been performing their duty." Now it is perfectly true that any Englishman in Japan committing an unlawful act may be arrested summarily, provided he be at once brought before his Consul, and dealt with according to the laws of his country. If shooting on the part of foreigners was unlawful, it might be a legal act on the part of the Yarkuneen to take Mr. Moss prisoner for having so offended. But it was not necessary that a number of two-sworded men should have rushed upon him for this purpose; and it was most natural that Mr. Moss, with the knowledge that he possessed of Japanese treachery, should have immediately stood upon the defensive. Mark what followed. While parleying with the leader of the band, Mr. Moss was suddenly seized on from behind and knocked to the ground. In the struggle the gun, which he affirms had been wrested from him, went off and severely wounded one of the Japanese. Hereupon the police, who, according to the CONSUL-GENERAL, were "simply performing their duty," instead of at once securing their prisoner and carrying him before the English CONSUL, bound his legs with cords, twisted his arms behind his back so as to cause intense pain, gave him several blows on the head until the blood trickled from the wounds, and carried him off to a place of concealment, where he was eventually discovered and claimed by Mr. Consul VYSE. Sir RUTHERFORD ALCOCK does not hesitate to affirm that the conduct of Mr. Moss in shooting a goose was illegal, and that he was morally and legally responsible for all the injury and mischief resulting, but he says not a word in reprobation of the infamous conduct of the Japanese officials, nor does he mention that the English Consul was obliged to threaten the exercise of force, before he could gain admission into the prison in which his countryman was confined. We hold, then, in opposition to the opinion of the CONSUL-GENERAL, that the conduct of the Japanese police at this time was most atrocious, and we are assured that they knew it to be illegal, since the Japanese GOVERNOR persisted in denying that Mr. Moss was confined within the prison at all, and only yielded him up on being compelled to do so.

Sir RUTHERFORD ALCOCK writes as if he had no doubt whatever that the gun was fired, and OYARKUNETARO wounded by Mr. Moss, since this was affirmed at the trial by the Japanese witnesses, but he does not even hint that, despite the evil treatment Mr. Moss had already received from the Japanese, he had actually resolved to return him into their custody until the trial should take place. That such an act would have been almost certain death to the prisoner few can doubt who are acquainted with the character of the Japanese. No wonder, therefore, that the Minister's order aroused in Mr. Moss "every feeling of astonishment and indignation." No wonder, too, that a deputation of Englishmen waited immediately on the CONSUL-GENERAL to protest against the order being carried into execution. Happily for Mr. Moss, as well as for the good name of Her MAJESTY'S Minister, they gained their point, and the prisoner was tried by his own countrymen. The trial is given *in extenso* by Mr. Moss in the appendix to his pamphlet, but most of our readers are already acquainted with its details. The assessors, it will be remembered, differed from Consul VYSE in their opinion of the case, and the matter was referred to the CONSUL-GENERAL at Yedo. He decided that Mr. Moss was guilty; first, for breaking the law of Japan in having shot game; second, for assaulting and resisting Japanese officials in discharge of their duty; third, for shooting at OYARKUNETARO with intent to do him grievous bodily harm. With regard to each of these charges Mr. Moss establishes his innocence, and with regard to the third he proves as clearly as anything can be proved that he did not fire the gun, but that it had been taken from him in the struggle before it went off. To Mr. Moss's statement on this subject it is satisfactory to know that Earl RUSSELL "gives full credit," and we suspect that Sir RUTHERFORD ALCOCK is the only Englishman who, after due investigation, has arrived at a contrary conclusion. Mr. Moss was, therefore, sentenced to pay a heavy fine, to deportation from Japan, and to a three months imprisonment in the gaol of Hong Kong. This, according to

Digitized by Google

the CONSUL-GENERAL, was in effect a kind act towards Mr. Moss, "a shield and protection to him and to the whole community, "whatever else it might be considered." We are charitable enough to hope that Sir RUTHERFORD ALCOCK may never have such a shield thrown over him! It might indeed have been advisable under the circumstances that Mr. Moss should leave Japan for a time, but there is a wide difference between a voluntary exile and a forced banishment. In the former case he would have been able quietly to wind up his affairs, and when the time came to sail for Hong Kong, he would not have embarked on board a vessel which was infected with small pox, nor, on arriving at his destination, would he have been treated as a common malefactor. Happily, the warrant by which Mr. Moss was imprisoned proved to be faulty, and after seven days of durance vile he was discharged, and commenced a suit against Her MAJESTY'S CONSUL-GENERAL in Japan. That he was justified in so doing is proved by the fact that Her MAJESTY'S Government, on learning the particulars of the case, reversed the decision of the CONSUL-GENERAL, and remitted the fine which he had imposed. The jury at Hong Kong, it will be remembered, were only able to award damages on one count, that, namely, of false imprisonment, leaving, as Mr. Moss truly says, "the injustice and hardship of his case unexposed and untried. He, therefore, resolved to return to England, and to ask for compensation from Her MAJESTY'S Government, but in this effort he has proved unsuccessful. Mr. LAYARD writes that, "Her MAJESTY'S "Government, having consulted the law officers of the Crown, "are not prepared to entertain that claim," and that if Mr. Moss has any cause of action against Sir RUTHERFORD ALCOCK not covered by the damages awarded at Hong Kong, the courts of this country are open to him. Of this suggestion Mr. Moss cannot avail himself, owing to the losses he has suffered.

Nothing remains, therefore, but an appeal to Parliament; and we sincerely hope that such an appeal will not be made in vain. The Government has, perhaps, gone as far as it can in censuring a valuable public servant by reversing the whole of his verdict; but the people of England, through their representatives, are free to protest against an act of flagrant injustice, and by recognising the claims of Mr. Moss, to re-instate him in his former position.

IMPROVED CURRENCY FOR HONG KONG.

THE thin end of the wedge has been at last introduced of what is destined to prove the most important reform that has ever been effected in our relations with China. It is impossible that the benefits which the colony of Hong Kong will derive from the settlement of its currency upon a fixed basis, can fail to make themselves felt all along the mainland, so that we may expect ere long to see one uniform currency pervading our entire relations with the Chinese, and thus gradually making its way far into the interior. Such a result, indeed, was to have been anticipated, though it would seem that our Colonial office had some misgivings as to the capacity of the Chinese to appreciate the magnitude of the boon about being conferred on them. The best exposure of this singular delusion is to be found in a remarkable fact stated by Sir HERCULES ROBINSON, in his despatch of 26th May, 1862, which has recently been published by the Stationery Office among the correspondence, which, during two years and a half, has been going on between the Home Government and the authorities of Hong Kong on this subject. He there mentions that "the notes of the Chartered Banks established here (*i.e.*, at Hong Kong) are taken unhesitatingly throughout the colony, and, I am told, *are even cashed in the interior of the Kwantung province, seventy or eighty miles above Canton, by native bankers for a charge of about one tenth per cent!*" If such things be done in the green tree, what may we expect in the dry? If even paper commands its representative value, what is there to fear from the introduction of an ascertained metallic coinage? That is the question which the Colonial Secretary has been approaching with fear and trembling, whereas he must be ignorant indeed of ethnological peculiarities, if he is unaware that John Chinaman is of all created beings the best able to take care of his own interests.

The nature of the evils to be remedied is so well known by bitter experience to our readers, that we need not now discuss the difficulties consequent upon a fluctuating standard of that which hitherto has formed the basis of Chinese currency, viz., the Imperial cash. We propose rather briefly to point out the precise nature and operation of the remedies proposed, so that the alterations which in terms of the proclamation of the 9th January last are to take effect so soon as the necessary amount of coinage of different values has been struck at the Mint in this country, may be at once intelligible by all. We are glad to think that the principles on which they are founded are so fair and equitable alike to the European resident, the Government, the naval and military *employés*, and the Chinese themselves, that a very few years at most will in all probability see the currency of Hong Kong at least established on as sound a basis as that of any country of Europe.

Starting from the position which is clearly made out, that unlike other countries, whose fixed standard is either silver or gold, that of China is based upon copper, it is proposed to strike a coin of a certain weight fifty-seven grains, of copper duly alloyed, bearing the inscription "Hong Kong, One Mil," with the date of the year around the inscription V.R., surmounted by a crown, and for the reverse, the inscription "Hong Kong, One "Cash," in Chinese characters. One thousand such cash or mils are to represent one silver dollar, of value equivalent to that of Mexico (but not of Spain or South America, the value of the Spanish dollar having been recently depreciated below that of the Mexican, owing to the Spanish currency being now based on a gold coinage of the same fineness as that of the United States), The dollar is to pass current as a legal tender at 4s. 2d., and the cash or mil is to be limited as a legal tender only to the amount of one dollar. Thus no one need receive more than ten string of cash unless he please, while the cash, though of far superior workmanship and greater purity of metal than that of the Imperial coin, is, besides the definite admixture of alloy, to circulate at 1,000 for 970, or about three per cent. above its intrinsic value, with the view of preventing it being found profitable to export it or melt it down.

These two coins, the copper cash, and the silver dollar worth one thousand cash, represent the two extremes of the new coinage. But for convenience of small payments, certain intermediate values are also to be legalised, one being a copper-piece representing one hundredth part of a dollar, on the obverse of which is impressed HER MAJESTY'S effigy, with the inscription "Victoria, Queen," and on the reverse, in both languages, One Cent, Hong Kong, with the date of the year. Coins of silver depreciated twenty per cent, so as to circulate rather as tokens than regular money, will also be issued, having the same obverse impression (we presume on a varying scale) as the cent; and, on the reverse, besides the inscription in both languages "Hong Kong," and the date of the year, a further inscription, likewise in both languages, indicating the value of the piece in cents (or hundredths) of a dollar. Provision is made that the cent, like the cash, shall only be a legal tender to the amount of one dollar, while the silver intermediate pieces are limited as a tender to two dollars. We are inclined to believe that the first issue of silver intermediary coins will be confined to ten cent pieces, but there seems little doubt that so soon as the working of the new coinage begins to be understood, there will be a general demand for silver pieces of five cents and twenty-five cents, and possibly of three cent pieces, similar to those once current in the United States.

On the whole, we feel most hopeful as to the prospects of this scheme, which, though so simple when thus stated, has been a considerable time incubating, owing to our unfortunate Anglo-Saxon habit, not confined to our governing authorities, of supposing that no other nation is thoroughly acquainted with the principles of finance but ourselves, and possibly the Jews and the Dutch. There can be no greater mistake, nor would it much surprise us to find this first practical recognition by us of the decimal principle in commerce, reacting upon our own British coinage, and paving the way towards the abolition of the cumbrous relations of pounds, shillings, and pence, in favour of the far simpler and more elegant dollar and cent.

Two collateral points deserve to be noticed ere we conclude this sketch. We cannot find that any notice has been taken of the suggestion of Sir HERCULES ROBINSON to have a hole drilled in the cash as coined at home, and issued in the colony, so as to enable the usual process of "stringing" to be adopted, and we think this, to a certain extent, a defect, as also the limiting the legal tender to one dollar, in the absence of such a ready means of reckoning. When such an authority as Mr. J. J. MACKENZIE speaks of its being a "labour of love to a China-"man to handle and carry cash," the home authorities might with all safety adopt his suggestion that $5 cash would not be too high a limit for a legal tender. Of course, with HER MAJESTY'S effigy in the centre, such a thing as a drilled hole is impossible; so we presume this cannot now be remedied, while as to the limit of legal tender, as the whole question is entirely in the tentative stage, it has possibly been the object not to attempt too much at once.

Digitized by Google

The other topic to which we would invite attention is also one of detail. We find no provision, express or implied, for the calling in at a given rate of the defaced Imperial cash. This, perhaps, would involve considerable trouble and expense, but unless some step be taken to obviate this, there will be great difficulty, owing to the necessity of examining every cash upon a "string," to see lest any worn coins have been included. In this view the absence of a hole with which to string, and the limitation to one dollar of the legal tender, may be productive of benefit. But, on the other hand, the counterfeiting will be resumed with still greater success than ever, the more pure the metal. It does not signify how much depreciated the legal cash is, so long as it passes current for what it represents. In fact, till the currency becomes universally adopted throughout the East, the more the cash circulates as a token, rather than a coin, the more will the object aimed at be achieved, viz., of retaining it as a convenient mode of settling small sums on the spot. Hence the necessity of some steps being taken to purchase in the Imperial cash at a definite rate, so that there may be only the regular cash, and the spurious counterfeits circulating at once. There has been no analogy in the West of a new currency having had to compete with an *inferior* currency at its first issue. When our penny was changed some years ago, the amount of copper in the old penny was much greater than in the new, and therefore no difficulty was encountered in calling in the old coinage. Precisely similar was the experience of France in 1853. In the present case, however, no provision seems to have been made for the reverse of this system, and it is here, we fear, that the hitch, if any, will make itself felt.

We will not, however, anticipate any such drawback. The superior finish of an English coin can never, in the absence of proper machinery, be equalled by even Chinese ingenuity; and since the Chinese, as already mentioned, are eminently capable of taking care of themselves, they may be safely left to guard against this source of difficulty. Too much publicity, however, cannot be given to the various details of the measure, so as to preclude any accusation of the native community having been taken by surprise, or the much more probable event of our soldiers and sailors being adroitly "pigeoned," while chaffering at the bazaars. The foreign community should see to this, as they will not be the least gainers by the substitution of definite coins in every relation of life, from the much simplified settlement of the "*comprador's*" accounts, to the greatly facilitated transmission of specie at a certain unvarying value, instead of by the old system of weighing a certain amount of silver.

THE DISMISSAL OF GENERAL BURGEVINE.

IN the recent conduct of General BURGEVINE, which has led to his dismissal from the command of the "ever victorious army," we have a sample of the difficulties which are likely to arise between the Imperial Government and the foreign officers employed in its service. The perplexing position in which the General found himself, and which led to an apparently unjustifiable act on his part, was caused by the perversity of Chinese officials; and it is clear that in the time to come this perversity may prove as detrimental to Captain SHERARD OSBORN as it has now proved to the successor of WARD. No commander can manage a force when he is unable to deal out rations or pay, and nothing was more natural than that, in his eagerness to supply the wants of his men, General BURGEVINE'S irritability should have got the better of his judgment. No doubt he had considerable provocation, but every foreigner who undertakes to fight the battles of the Emperor of CHINA must expect to meet with annoyances such as those of which General BURGEVINE complains. A protest against the Chinese authorities may be very natural under the circumstances, but is scarcely likely to prove of essential service. We have yet to learn whether the General's enemies are in earnest in offering a reward of 50,000 taels for his head, but the issue of such a proclamation in the present case is, at all events, suggestive of other offensive measures in the future; and it is easy to foresee how some aggressive act against English officers serving in China may lead to another war with that country, even although it may be disavowed by the Government of Peking.

THE MILITARY TAXATION OF CEYLON.

IN the recent discussions on the army estimates, the attention of the House was directed by several of the members to the military and financial position of Ceylon. Sir G. C. Lewis, in proposing a reduction of 100 rank and file in all battalions serving at home and in the colonies, excepted Ceylon, as well as China and New Zealand. General Peel complained of the small pay awarded to a Major-General and his aide-de-camp in Ceylon, compared with that received in China. Mr. Childers considered that if a reduction of men was necessary, Ceylon was one of the colonies in which it should be effected. The expenditure of Ceylon, he said, was £67,000 less than its revenue. "He was aware that Ceylon contributed to the allowances of troops, and also to their commissariat charges, but he thought the colony should pay more than £24,000." On the 20th inst. the attention of the House was again drawn to Ceylon by Mr. Lyall, who asked what steps had been taken to reduce the annual charge of £100,000 on the Imperial Exchequer for the troops in that island. Mr. LYALL alluded to the proposal he had made last year for the annexation of Ceylon to India, and observed that while Java sent an annual tribute of £3,000,000 of produce to Holland, and while India had been a source of wealthy contributions to England, "Ceylon, richer than India, and nearly as prosperous as Java, costs this country £110,000 per annum."

We were glad last year to find that Mr. LYALL'S proposition to annex Ceylon to India was not entertained by the Government. Such an act would have been in the highest degree detrimental to the interests of the colony, since, as Mr. FORTESCUE truly observes, the island is well governed, and possesses institutions which are satisfactory to the people. This good administration, however, having produced its usual fruits, Ceylon is in such a prosperous condition that the Home Government is entitled to expect that the colonists should contribute more largely to their military expenses. An additional contribution—we are not told the amount—is therefore to be at once demanded, and the request is, we feel assured, too reasonable to meet with opposition in the island. The troops maintained in Ceylon are not stationed there for the promotion of Imperial interests, but in order to preserve the internal security of the country. It is obvious, therefore, that since the colonists are able to bear it, a fair share of the burden should be laid upon their shoulders.

BLUE BOOK ON THE REBELLION IN CHINA.

"Further Papers," one hundred and eleven in number, have just appeared on the subject of the Taipings. They are varied in character, but contain few points of special interest with which our readers are not already acquainted. Among them we find a number of despatches from Brigadier-General Staveley, in which he notifies the capture of Najaor, the measures adopted for the defence of Shanghai, the operations of the allies, the evacuation of Tien-tsin, the recapture of Kahding, &c. A portion of the correspondence relates to custom-house regulations, and considerable space is devoted to the topic of chief interest at the present time, viz., the employment of English officers in China. The last letter of the series, dated Jan. 8th, is from Consul Medhurst. It relates the "dismissal of General Burgevine from command of Ward's Chinese Brigade." To some of the papers contained in this somewhat bulky "Blue Book" we may have occasion to refer on a future occasion.

THE GOVERNMENT ESTIMATES FOR THE FAR EAST.

In the civil service estimates for the year ending March 31, 1864, the sum of £81,054 is set down for services in China, Japan, and Siam; the estimate under this head for 1862-63 was £86,748, showing a decrease in the estimate for the succeeding year of £5,694.

Literature.

MR. BENTLEY announces the publication of Lieut.-Col. Fisher's "Personal Narrative of Three Years' Service in China." We shall notice the book in our next issue. The first volume of the Cambridge Edition of Shakespeare, edited by Messrs Clark and Glover, of Trinity College, has been just published by Macmillan and Co. The same publishers advertise as nearly ready, "The Water Babies; a Fairy Tale for a Land Baby," by the Rev. Charles Kingsley, reprinted from their magazine. Mr. Sutherland Edwardes has written a most interesting work, entitled "The Polish Captivity; an Account of the Present Position of the Poles in the Kingdom of Poland, and in the Polish Provinces of Austria, Prussia, and Russia" (Allen and Co.). Mr. Edwardes' personal knowledge of Poland and of Russia, and his familiarity with the political position of each of these countries, as well as with its language and literature, give a reality and vividness to his narrative. We observe that Mrs. Gaskell's new novel, "Sylvia's Lovers" (Smith, Elder and Co.), has already reached a second edition. Miss

Digitized by Google

Braddon, the "sensation" novelist, whose "Aurora Floyd," and "Lady Audley's Secret," have proved so extraordinarily popular, has commenced in *Once a Week* a new tale called "Eleanor's Victory." Mr. Fullom writes at great length to the *Standard* pointing out the similarity which exists between his tale, "The Man of the World," written five years ago, and Miss Braddon's two novels. "A Selection from the Poems of Robert Browning," just published by Chapman and Hall, will be attractive to many readers for whom Mr. Browning's entire works, so full of genius and of wilful eccentricity, have but little charm. Mr. Browning might perhaps have been the first of living poets. He has chosen to write in a manner which, however pleasing to a small school of which he is the master, does not often find its way to the common heart of humanity. Literature was not altogether unrepresented at the marriage of the Prince of Wales. Among the literary men of eminence present were Mr. Thackeray, of the *Cornhill Magazine;* Mr. Russell, of the *Times;* Mr. Sala, of the *Telegraph;* and Mr. Thomas (or "Tom") Taylor, of the *Manchester Guardian.*

Spirit of the Press.

THE CHINESE PUZZLE EXPLAINED.

The mystery is out at last. It was always a puzzle to all men who comprehended the East why the Chinese Government, with its traditions of isolation, its timidity, and its pride, should have so suddenly sought to give itself masters in the shape of a sepoy army commanded by Europeans. Asiatics are not often so unsuspicious, nor are Chinese the most confiding of Asiatics. The blue-book on China just published, however—a mass of official *detritus* worth exactly nothing, but serving well to conceal a political nugget or two—explains very satisfactorily, or unsatisfactorily, this departure from Chinese precedent. Prince Kung never demanded British drill-masters, did not suggest them, and, so far as we can gather from a very cautious statement of his opinions, did not desire them at all. They were forced on him by Mr. Bruce, who seems, in his unyielding, unsympathetic Scotch way, to have gained much the same position at Peking as Mr. Kinglake describes the "great Elchee" to have assumed in Constantinople. The development of the scheme was in this wise. Mr. Bruce, in the general interests of civilization and the special interests of the China trade, undertook to protect the treaty ports, and, apparently, to clear the neighbourhood of Shanghai of insurgent Taipings, provided the Chinese garrison would assist. That was promised, of course, the Chinese unfeignedly approving the conduct of foreign barbarians in fighting their battles without reward. If the English won, the Taipings would be defeated, the revenue guaranteed, and an unpleasant duty very cheaply performed. If, on the other hand, the Taipings won, the Emperor would lose nothing except the aid of some foreigners, whom the Flowery Land could spare with little sadness or dissatisfaction. The promise was honestly given, and the promised "braves" appeared, but, unluckily, the moment the English departed they followed the English example. Kading, for example, was taken by Englishmen, handed over to the Imperialists, and filled with a garrison of braves, who immediately ran away, leaving the Taipings to return and decapitate all the loyal. The Taiping tide receded before the pumps, but always over-mastered the permanent dyke. Mr. Bruce grew tired of his endless labour, and in an interview with Prince Kung, held on May 7th, 1862, he told him pretty bluntly—the unlucky Prince, in a subsequent letter, calls him "plain-spoken but friendly"—that his braves were a horde of ruffians who only insulted the allies. The Prince "fully admitted their indiscipline," but hoped to organise a new force; whereupon Mr. Bruce suggested his preconceived plan. He told Prince Kung that Chinese *could* fight if disciplined after the English fashion, that he must have a new artillery, and that he had better appoint Captain Cane to be its director at once. Her Majesty's Government would lend that officer, and find drill-instructors besides. "I urged," says the Ambassador, "with all possible earnestness, the necessity of acting without loss of time," and finally told him that if the British Government was to defend the treaty ports "this was a *sine quâ non.*" "The Prince approved," of course;—what does any Asiatic ever do when a strong-headed European has him once in his mental grasp?—Captain Cane was appointed, and the levy of a sepoy army commenced. The design was none of Prince Kung's, though approved, we are bound to add, by the Governor-General of Central China, and the "earnestness" mentioned seems to indicate a resistance which Mr. Bruce had to overcome by a strong mental squeeze. The Prince is, in fact, at once jealous of his authority, and very averse to quarrel with Europeans who, as these despatches show, when building sites are refused at half price, land marines, pull down the Chinese houses, and so clear the ground by a process which, say in Southampton or St. Malo, might possibly be thought slightly summary. We have in France exactly the same right of acquiring land which we have secured in China; but then in France one asks usually the owner's consent to the sale. However, oppression is the lot of mankind, and one cannot live in the air, and there are other truisms familiar to the Anglo-Saxon adventurer, and very effective when there are Armstrongs in port; so we may let that pass. At all events, Prince Kung fears the British, and a few months later displayed this fear in a very comical fashion. "General" Burgevine, sepoy officer, found his men's pay a little delayed, and considering regularity the very soul of discipline, he took it by force from the Treasury. Prince Kung could not endure an act which, as he clearly perceived, struck at the foundation of civil authority. He applied to Mr. Bruce, and on that gentleman declining to interfere, hit on an expedient really amusing in its ingenious cowardice. He gazetted the general as dismissed, but did not inform him of his dismissal, and continued his pay and allowances, thus maintaining his authority in the eyes of his people without offending his own subordinate. Imagine his authority when thirty housand men are commanded by thirty General Burgevines, quite capable of coalescing, and not incapable, when provoked, of marching upon Peking, and declaring a Regency, specially empowered to pay the foreigners with due punctuality. We have not, as at present informed, many arguments to produce against Mr. Bruce's advice. It may, for aught we know, be necessary to put down the Taipings, and impossible to effect that object without Chinese trained under English officers. It may be much the best for Prince Kung to create a force which he cannot rule, and for us to commence a scheme which, whether our intentions are simple or subtle, will place China at the disposal of the protecting Power. But we do object, after this, to be told that the British Government is not responsible for the new policy, that it is a local affair altogether, and that Parliament has no claim to be consulted on Chinese local affairs. They are not local affairs. The acts described in these despatches form the commencement of a new and most intricate foreign policy, suggested by a British ambassador, approved by a British Secretary of State, and to be carried out by British officers. It is a policy which will totally change our position in Eastern Asia, which may end in the acquisition of a second India, and which, if it stops short of that extreme result, will impose on us for years the obligations of the ultimate, and, therefore, paramount power among a third of the human race.—*Spectator.*

BRITISH TRADE WITH JAPAN.

An element of some importance in forming a conclusion as the policy to be pursued towards Japan, is the value of our existing trade with that strange country. The port of Kanagawa, which includes Yokuhama, is the principal place for trade, little being done at Nagasaki, and still less at Hakodadi. The entire value of the British trade conducted there, including both exports and imports, is little more than half a million sterling yearly; and the entire exports and imports of the place are under a million sterling yearly. The profits on this trade will not do much more, we should think, than keep up the extensive mercantile establishments at Yokuhama, and there does not seem to be any immediate prospect of its increase, but rather the contrary. According to the official returns of the Kanagawa Consulate, the imports in British vessels for the half-year ending June 30, 1861, were to the value of £80,951, and in the corresponding period of 1862 they were only £68,981. A comparison of the same periods in regard to exports shows an increase in 1862 to the trifling extent of £2,000, so that such trade as there is appears to be falling off rather than increasing; and it must be remembered that in Japan there is no smuggling, as there is in China, to afford indirect returns. The balance of trade, it will be observed, is largely in favour of the Japanese. Most nations would rather like this, but they with their usual ingenuity, consider it a grievance. As they do not want our products or manufactures, and have themselves abundance of the precious metals, they grudge that what they produce and want to use in the country should be exported from it. Grey shirtings, camlets, and lead, are the only things they take from us in appreciable quantities, and against these they give us raw silk, tea, and copper. There has been for several seasons a falling off in the size of Chinese silk, and consequently Japanese silk has been in great demand in the London market. The British merchants at Yokuhama made great efforts to procure a large supply, and offered prices considerably higher than those at which the Japanese were selling silk among themselves, but it was of no use. Whether we attribute it to the instinct of the people or to the action of the Government, even our urgent demand and high prices failed to attract any considerable proportion of the silk crop into the export market. The ordinary laws of trade do not seem to work among these copper-coloured Easterns. As there is so little existing British trade with Japan, the question naturally arises as to what the prospects are of its being further developed. While some hold that the best, and indeed the only way to do so, is quietly and patiently to cultivate new wants among the Japanese, taking care not to offend or startle their rulers, others openly declare that the only way to create commerce is to break down the feudal system of the country, and to let the foreign merchant come in fair contact with the people, who, it is alleged, are quite willing to trade. Having more than once pointed out the enormous difficulties there would be in the way of this latter course, we need not further advert to it at present. The former may be trying to our patience, but it will be honourable to our forbearance, and is required by justice; for if it is not always right to have recourse to arms in order to protect our existing trade, it would be decidedly wrong to do so in order to develop a very dubious prospective one. The only practical question we have to settle at present in regard to Japan is, how to prevent the ever-recurring assassinations which render the position of our countrymen there so unpleasant; and under this head it is pertinent to ask whether, for a few years, it would not be best for us to be content with a very limited trade and a very confined position in Japan. As it is, we seem drifting into complications which a statesmanship capable of taking the initiative might avoid.—*Daily News.*

THE CHINESE IN AUSTRALIA.

The Melbourne correspondent of the *Daily News* writes:—

"The habitable world has suddenly grown larger. Naturally, our yearnings for increased population are towards the millions of Great Britain, but fate has suddenly thrown us some 2,000 miles nearer to the 360,000,000 of China. For many years past that redundant population have been overflowing into every island of the Indian Archipelago, and Borneo alone partly possesses, and is partly possessed by, some hundreds of thousands of Chinese. These islands are stepping-stones from China to Australia. Our Chinese population already numbers some five and twenty thousand (almost all males), being about 5 per cent. of our whole population.

"A large portion of the eastern end of Melbourne (a sort of celestial Ghetto) swarms with them, and from their costume and appendages of blue bag trousers and blouses, and thick shoes, and pig-tails (which they coil away into the crowns of their hats, like private and confidential black snakes), and from the arrangement and contents of their stores, and the Chinese signboards hanging out over every door, the quarter might pass for a bit of Canton let into Australian soil. Now, as the £10 capitation tax imposed on them on their entrance into the colony is about (so say our more influential parliament men) to be abolished, this liberal step, co-

Digitized by Google

operating with our now practically closer neighbourhood to the inese empire, will, of course, stimulate Chinese immigration to these colonies. With what social and political results in the long run it is not easy to foresee.

"Thus much, however, may be considered certain. That of these people, we may (so some of the more intelligent of them tell me) have millions, if we only encourage them. But the moral effect of large numbers of them, without women, could not be good; and even with women they would probably soon grow embarrassing to us, if not even dangerous. For they are a people with whom we can never thoroughly amalgamate; and yet, by reason of their great intelligence, they can never (especially when they greatly outnumber us) be treated politically and socially in all respects as an inferior race. At present they have no votes; exercise no civil rights; and yet they think of these things. I was talking the other day to one of the few among them who speak English, and was startled to hear him put points on the *comitas inter gentes* as clearly as if he had read Gaius or Puffendorff. He objected that the £10 capitation tax on his countrymen was contrary to the treaty between Great Britain and China, and said that if the Chinese were strong enough in the colony they would resist it. Agreeing as I did with the man's objection, I could only say that morals sometimes became complicated with legislation so as to embarrass young legislatures; that an excessive immigration from his country to Victoria might in effect almost amount to an invasion; that Great Britain could never send so many emigrants to China as to imperil the existence of that most populous empire; whilst China might pour herself over our comparative handful of population, until all distinctive character, and even specific existence of our people, might become lost. He stuck, however, to the tenor and effect of the treaty, and refused to admit any qualifying considerations whatsoever; 'for when it comes to that,' said he (with a knowing laugh), 'it means only a treaty to bind one side.' Even he could see that the greatly facilitated access of New Holland to the Chinese, supplied by the later explorations, must hereafter raise to great importance a subject easily manageable at present. 'The Chinaman,' said my Celestial friend, 'will go where there is gold. If you shut him out of the front door, he can go round to the back; close Melbourne against him, and he gets untaxed ashore at Guichen Bay, whilst North Australia is becoming more convenient than either.' You must see that the future may confront us with social and political difficulties which may somewhat strain and try the generally recognised principles of international law."

THE PASHA OF EGYPT AND THE PENINSULAR AND ORIENTAL COMPANY.

The following Report has been forwarded for publication, and will be read with interest:—

"Cairo, Feb. 20.

"Gentlemen,—I have the honour to report to you that your deputation, consisting of myself and Messrs. Allan and Olding, reached Alexandria in the *Euxine* on the 11th inst. Immediately upon our arrival we instructed Mr. Bethune (the Company's Superintendent) to communicate to the Government of His Highness the Viceroy the object of our visit, and to ascertain the pleasure of His Highness with regard to our reception. The answer received from Cairo was to the effect that, after our arrival at that place a day would be fixed for the interview, and we were at the same time required to state whether we sought an official or a private one. To this we replied by explaining the nature of our visit, leaving it to His Highness to decide whether he would receive us at his palace or at the citadel. Before leaving Alexandria we paid our respects to Mr. Colquhoun, Her Majesty's Consul-General, and requested him to present us, but were informed by him that, though nothing would have afforded him greater pleasure than to do so, an engagement at Alexandria, which he could not defer, would prevent him from accompanying our party. He undertook, however, to mention our arrival, and the object of our visit, to His Highness, and recommended that as he had already presented Mr. Bethune to him he would be a fitting person to undertake that duty for us. We accordingly proceeded with him to Cairo on the 12th inst., His Highness having done us the honour to send one of his State carriages for our conveyance. Upon reaching Cairo we were informed that His Highness had decided (no doubt as a mark of honour to your body) to give us a public reception at the citadel, and that the day which he had fixed upon was Saturday, the 14th inst. At one o'clock on that day we accordingly waited upon His Highness at the place appointed, and were received by him in a most gracious, I might almost say cordial manner. After we had paid him the usual salutations, I read to him your address in English, and then handed it to Nubar Bey, his interpreter, who repeated it in Turkish. He listened to it with much apparent interest, at its close replying in a very lively manner as follows:—

"'That he was fully sensible of the courteous motives which had influenced the board of directors in sending out a deputation to convey to him the address of congratulation just read. He more highly appreciated the course which they had thus thought fit to adopt, because he was perfectly aware that they had taken the initiative in making Egypt the highway for the passenger and cargo traffic to the East, and that to them the country was in a great measure indebted for its general commercial relations with Europe and Asia. These relations, created and extended by the Peninsular and Oriental Company, had largely contributed to the development of the resources of the country which he had been called upon to govern, and to the prosperity of which he was resolved to devote all his efforts and energy. That in extending to the company assistance and protection he felt he should be best studying the interests of Egypt, and they might rely upon his assurance that the Government over which he presided would make it a duty to grant them every facility, which they might also depend upon receiving from himself personally. That the railway was not yet in the state of perfection which he could wish, but that the gentlemen of the deputation would, no doubt, concur with him in attributing this to the newness of the undertaking, and understand that at the commencement of such operations complete satisfaction in all the working details could hardly be expected. He was determined, however, to give his attention to that important enterprise, and to do all in his power to promote the comfort and rapidity of the transit. In conclusion, he begged to repeat that the company might always rely upon his support, and requested the gentlemen of the deputation to convey his best thanks to the Court of Directors for this mark of their attention.'

"The above were, as nearly as we could recollect, the exact terms in which His Highness expressed himself; and I can only add, with reference to his mode of doing so, that it expressed even more eloquently than his words the good feeling which he entertains towards the company.

"I am, &c.,

"P. D. HADOW, Deputy-Chairman.

"To the Board of Directors of the Peninsular and Oriental Steam Navigation Company, London."

Naval and Military.

NAVAL PEKING CLASPS.

Notice is given that the grant by Her Majesty of the "Peking Clasp," with the medal issued for the late China wars of 1856, 1860, has been extended to such of the officers and men of the Royal Navy and Royal Marine Battalion as served under fire in the battles of the 18th and 21st of September, 1860, prior to the fall of Peking, and that the clasps are now ready for issue.

The officers of the Chatham division of Royal Marine Light Infantry entertained Rear-Admiral Sir J. Hope, K.C.B., at a banquet, in the mess-room at the Royal Marine barracks, where covers were laid for ninety guests. Colonel T. Lemon, C.B., commandant of the Chatham division of Royal Marines, presided. There were also present Vice-Admiral Sir W. J. H. Johnstone, K.C.B., commander-in-chief at the Nore, Major-Gen. A. B. Eyre, commanding the Chatham district, Major-Gen. A. B. Stransham, inspector-general of the Royal Marines, Captain E. Fanshawe, superintendent of Chatham dockyard, Captain C. Wise, Aide-de-Camp to the Queen, Colonel J. Mitchell, commandant of the Woolwich division of Royal Marines, Colonel J. H. Gascoigne, C.B., Colonel J. O. Travers, C.B., Assist. Adjutant-Gen., and other distinguished officers.

The detachment of non-commissioned officers and men of the Royal Engineers selected to proceed to the Australian colonies, on important service, has received notice to hold itself in readiness to leave head-quarters, Chatham, on the 27th inst. The detachment goes out under the command of Capt. E. T. Brooke, who has been ordered to join at Brompton barracks for that purpose.

The 2nd battalion 18th Regiment (Royal Irish), under the command of Lieut.-Col. Chapman, was officially inspected on Saturday, at Parkhurst, Isle of Wight, by Major-Gen. Lord W. Paulet, C.B., the general officer commanding the district, preparatory to the departure of the regiment from England on foreign service. The ships Elizabeth Ann Bright and Norwood will embark the regiment for New Zealand about the end of the present week.

A Royal warrant has been promulgated at Chatham garrison amending the previous warrant relative to the retirement of officers of the army, who will in future be allowed to retire upon temporary half-pay, although under twenty-five years' service, under certain conditions.

Notice is given in the *Gazette* that the payment of the proceeds of the Chinese junks, and their cargoes, detained for the breach of blockade of the Canton river, in the year 1857—which was suspended by notice in the *London Gazette* of the 27th ult.—is now resumed, and distribution of the same is being made in accordance with the advertisement which appeared in the *Gazette* of the 13th ult.

COMMERCIAL POSTSCRIPT.

CITY, 3 P.M.

The following is from the Silk Circular of Messrs. Waithman:—We have had no improvement in the demand for silk during the past fortnight; prices on the whole have been well maintained. Japans have shared in the general quiet, but one or two sales have been made at some decline. Accounts from the Continent are gloomy, still we look for a better demand shortly. Deliveries, 1st to 24th inclusive, China, 3,686 bales; Japan, 1,178 bales: Total—4,864 bales.

The dividend to be declared at the meeting of the Oriental Bank Corporation, on the 16th of April, is 8 per cent. for the half-year ending the 31st of December, which, in addition to 7 per cent. previously distributed, makes 15 per cent. for 1862.

ARRIVALS NOT INCLUDED IN THE TABLE.—March 23, off Dungeness, from Batavia, Atlantic; 24, at Clyde, from Shanghai, Sappho; at Queenstown, from Manila, Mary and Catherine; 23, at Brouwershaven, from Banjoewangie, Jacoba Helena; 24, at Texel, from Tjilatjap, Alme'o; from Banjoewangie, Admiral Tromp; 23, at Marseilles, from Samarang, Nizam; 26, at Queenstown, from Manila, Martin Luther; at Falmouth, from Maulmain, Canora.

DEPARTURES.—March 22, from off Dungeness, for Singapore, Typhoon of Whitby; 21, from Newport, for Galle, Venus; 23, from Liverpool, for Shanghai, Loodianah; 24, from Cardiff for Singapore, Boreas; 26, from Liverpool for Singapore, Tigris.

SPOKEN.—Edinburgh, Shields to Shanghai, Feb. 7, 1 N., 24 W.; Matthew, Bell, Liverpool to Manila, Feb. 13, 4 S., 25 W.

LAID ON.—At Liverpool for Hong, Kong, Falcon.

The Weymouth, Norris, which sailed from London 24th inst. for Shanghai, had to put back to Gravesend the same day with loss of fore and main yards, having been in collision, but proceeded next day.

Monetary and Commercial.

CITY, THURSDAY, MARCH 26.

The annual meeting of proprietors of the Oriental Bank is convened for the 16th of April, and a general meeting of proprietors of the Chartered Bank of India, Australia, and China, is called for the 8th of April.

Digitized by Google

A proposal has been announced for establishing the English and Belgian Bank, with a capital of £1,000,000, in 20,000 shares of £50 each, with power to increase. In addition to the conclusion of the recent treaty of commerce and navigation with King Leopold, which will develop the trade of the country, large public works exist in the shape of railway and other undertakings, the requirements of which demand increased facilities.

According to a circular, dated Glasgow, 19th inst., the business of Lorrain, Sandilands, and Co., Penang, will in future be conducted under the title of Lorrain, Gillespie, and Co.

The P. and O. steamer *Pera*, with the last homeward mails from India, China, and Australia, put into Lisbon short of coal, and did not arrive until the 22nd March at Southampton.

The American ship *Jacob Bell*, of about 1,600 tons, which left Foo-chow on the 5th Nov., for New York, with a cargo of tea estimated at 789,700 lbs., was captured and burnt by the Confederate cruiser *Florida*, in 28 W. and 65 W. on the 12th Feb. The passengers and crew were landed at St. Thomas's, West Indies.

A general meeting of the shareholders of the Atlantic Royal Mail Steam Navigation Company was held, *pro forma*, for the purpose of adjournment only, as the details of the contract between the company and Her Majesty's Government for the renewal of the postal service are not yet completed. The meeting was postponed till the 1st of June next.

The letters of allotment of the Bank of Gibraltar and Malta have been issued. For the present Messrs. Masterman, Peters, Mildred, and Co. will transact the London business of the bank. The prospects, both at Gibraltar and Malta, are asserted by the directors to be encouraging, and business will commence at both places at an early date.

The biddings for 40,00,000 rupees, in bills on India, took place at the Bank of England. The proportions allotted were —To Calcutta, 26,94,000 rupees; to Bombay, 12,63,000 rupees; and to Madras, 42,000 rupees. The declared minimum price was as before, viz., 1s. 11¾d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for about 110 lacs. Tenders on Calcutta at 1s. 11¾d. will receive about 70 per cent.; on Bombay, at 2s. ⅛d. will receive in full, nothing being allotted below that price; and on Madras, at 2s., in full.

The subjoined circular has been issued by the Empire Marine Insurance Company of Liverpool:—

"I am directed to inform you that arrangements have been completed whereby the underwriting business of Messrs. W. Rotheram and Co. has been transferred to this company, and that two of their constituents, Mr. G. H. Wakefield (Wakefield, Nash, and Co.) and Mr. B. C. Nicholson (Nicholson and M'Gill), have joined the board of directors. The directors, in soliciting your support, request me to inform you that the company is now established in the offices of Messrs. W. Rotherham and Co., in the Liverpool and London-chambers, where the underwriter, Mr. J. D. Tyson, will be glad to receive proposals for marine risks of every description."

At the last monthly biddings at Madrid, on the 28th ult., the prices fixed by the Government as the maximum at which they would receive tenders were, for the Interior Passive, 19, and for the foreign, 27.65. The amount to be laid out was, for the Interior, 731,000 reales, and for the foreign, 8,200,000 reales. Offers of the Interior were accepted at 18 to 19, while of the foreign there were no offers. For the month of March the amount to be laid out by the Government is, for the Interior, 375,000 reales, and for the foreign, 9,200,000 reales.

The steamer *Edward Hawkins* has arrived at Liverpool from Matamoras (Mexico), with about £100,000 in Mexican dollars. Remittances of this coin have also come to hand from New York.

At the meeting of the Atlantic Telegraph Company, the directors' report was agreed to. The chairman, the Right Hon. J. S. Wortley, mentioned that the board are only waiting till the subscription reached £300,000, when they will commence operations. Three-fourths of this amount had already been subscribed, and even if they fail to obtain £80,000 more, he said he cannot believe the British Government would leave them in the lurch.

A general meeting of shareholders in the Suez Canal is convened for the 15th of May, at Paris.

A circular announces the failure of Messrs. Pilkington Bros., American merchants, of London and Liverpool. The liabilities are estimated at about £60,000, while the assets, which are dependent upon remittances from abroad, are expected to prove small.

Bank of Hindustan shares have improved, owing to its being stated that a proposal for an amalgamation with the Central Bank of Western India is on foot.

The first series of public sales of colonial wool for the present year, which commenced on the 26th February, were brought to a close on the 23rd. The quantity offered amounted to 52,686 bales, including 6,309 bales from Sydney and Queensland, 23,263 from Port Phillip, 1,179 from Van Diemen's Land, 1,508 from Adelaide, 595 from New Zealand, 2 from Swan River, 16,240 from the Cape of Good Hope, and 3,590 bales of sundries. There was a large attendance of home buyers from the commencement, but foreign purchasers were few, and the quantity bought for export was not very extensive until near the close, when a fair proportion was taken. Prices at the commencement exhibited a downward tendency, which was more fully developed at the termination, when the prices offered exhibited a decline of 1d. to 1½d. per lb. on Sydney, 2½d. to 3d. per lb. on the better qualities of Port Phillip, and 1d. to 1½d. per lb. on Cape qualities, compared with those current at the close of the present auctions.

OUR FOREIGN TRADE.

Subjoined is a statement showing the proportion in which the various countries of the world ranked as our customers during the past year. The total value of our exportations was almost the same as in 1861, but there were some important changes in their relative distribution. Our own colonies continue to take about one-third of our entire annual shipments. India shows a falling off, which has been made up by the West Indies, Australia, and Canada. In 1861 the United States, which for several years had occupied the next place in the list to our own colonies, declined to a point that brought them below Germany; but there has now been a partial recovery, which has brought them back to their old position, although the total trade thither was only about 60 per cent. of that which had previously been considered its normal amount. France continues to make progress, and figures, notwithstanding the cotton crisis, for a further increase of about 3¼ per cent., although in the preceding year there was an increase of 65 per cent. The shipments to the foreign West Indies, like those to our own possessions in that region, show a considerable augmentation—to be attributed, probably, to the activity of transactions with the Confederate ports. With all the countries of South America a falling off has occurred; but Mexico exhibits a not unimportant increase, owing, perhaps, partly to the requirements of the army of occupation, and partly to the diminished facilities for smuggling across the Texan frontier. Paraguay makes its appearance in the list for the first time for a long period, that Republic having at length come under the rule of a President who is believed to be animated by a desire to promote commerce. To Hayti and St. Domingo the shipments have been comparatively large, and the improvement is probably to be attributed to the Spanish annexation of the latter State. With Japan the promise of a development of trade has fallen to nothing, the exports thither, which amounted to £43,100 in 1861, being now reduced to £21. The several foreign countries which show an increase are the United States, France, Turkey, the foreign West Indies, Sweden, Western Africa, Denmark, Mexico, Hayti, Morocco, Paraguay, Eastern Africa, and Algeria. All the others show a decrease.

ARTICLES OF IMPORT.

TEA.—During the past fortnight our market has been very dull, the demand both from the trade and exporters having been very limited. The arrivals continue large, and, with the desire on the part of some importers to realise, the few sales made have been in most cases in favour of buyers. Dusty and broken-leaf kinds of Congou have met with a fair demand at about former prices, as also the kinds with leaf. Good common is scarce, and with only a moderate demand has advanced to 1s. 1½d. per lb. Flavoury kinds of old import show no material change. Common to fair Ho-Hows show a decline of fully 1d. per lb. Good Ho-Hows and Ning Chows have been difficult of sale at a reduction of 1d. per lb. Medium Kaisow kinds have been but little inquired for, and prices are rather lower. Good to fine Monings and Wopaks have sold to some extent, but at a further decline of 1d. to 1½d. per lb. Finest are heavy of sale at a similar reduction. Good to fine Kaisows continue fairly supported, being in limited supply. Tayshans show no marked alteration. Some considerable sales of Oolong have been made, but prices have again ruled about 1d. per lb. lower. Fair to good Souchongs have been less saleable and prices show a decline of 1d. to 2d. per lb. Fine to finest have been better maintained. Flowery Pekoes remain much as before. Scented Capers have been difficult to move, and for fair qualities show a decline of ½d. to 1d. per lb. Fair to good Canton made Orange Pekoes have sold to a fair extent, but at rather easier rates. Medium Foo-Chow kinds are in over supply and not readily saleable at the decline last quoted Uncoloured Japans have been in request under 1s. 6d. per lb. for fair to good qualities. At the public sales Assam and Cachar kinds of private growth sold irregularly at lower prices. Business in Green Teas has been to a fair extent; all the better kinds find a ready sale at about previous prices, but Common Hysons and Young Hysons still sell with difficulty at rather lower prices, the former not being good enough for export purposes, and the latter in over supply. Japan kinds show no change. Canton Young Hysons have been dull of sale, but Gunpowders have been taken to a fair extent at from 11d. to 1s. 3d. per lb. for common to fair quality. The public sales comprised 15,007 packages, of which 4,686 packages were sold, including 2,907 packages offered without reserve, and 1,500 Assam and Cachar.

SILK.—The following are the current quotations for the fortnight. A later notice will be found in our Postscript:—

SUGAR.—The market continues dull; foreign descriptions have sold heavily, and the business done in some of these shows a rather material decline. Of Bengal no public sale has taken place, and the only business to report in Madras is 1,000 bags Jaggery, by private treaty at 27s. 6d. The public sales have included as brought forward:—15,453 bags Clayed Manilla, which met few offers, and being held firmly were bought in at 32s. 6d. to 33s., and only about 450 bags washed afterwards placed at 31s. 3d. By private contract 1,200 bags brown Bahai have been sold at 30s. 3d. to 31s., 50 chests low soft white at 34s. 9d., 150 tons brown Siam at 28s. 6d. Our quotations are:—Bengal, crystalised, 24s. to 27s. 6d.; Benares, 22s. 6d. to 28s.; date, 20s. to 26s.; ordinary to fine brown, 14s. to 19s. 6d.; Penang, grey and white, 25s. to 26s.; brown and yellow, 16s. to 24s. 6d.; Madras, grocery, 21s. 6d. to 27s.; native, 15s. to 19s. 6d.; Jaggery, 14s 6d. to 15s. 6d.; Siam and China, white, 23s. to 28s.; brown and yellow, 15s. 6d. to 22s. 6d.; Manilla, clayed, brown, and yellow, 18s. 6d. to 20s. 6d.; Muscovade, 15s. to 16s. 6d.; Java, grey and white, 24s. to 28s.; brown and yellow, 16s. to 24s.

COFFEE.—Prices exhibit an advance; greater firmness has prevailed in the market during the week, partly produced by the favourable report of the Dutch company's sale. Ceylon: Public sales of Plantation, amounting to 602 casks, 381 barrels and bags, have gone off with spirit at prices about 6d. per cwt. higher; low middling to middling, 87s. to 89s. 6d.; good middling, 90s. to 93s. 6d. Native has also fetched a similar improvement; 30 casks, 784 bags selling as follows:—Good ordinary, 73s. 6d. to 74s.; superior, 74s. 6d. to 75s. Mocha: Of 358 packages, at auction, about half was sold at firm rates, good clean garbled yellow, 94s. 6d. to 96s.; the remainder, long berry, was withdrawn. East India: 279 bags fine ordinary pale Java realised 78s. to 79s. 6d. Bahia sold at full rates, good to fine ordinary, 67s. to 68s. 6d. Our quotations are:—Mocha, ungarbled, 60s. to 78s.; garbled, common to good, 80s. to 94s.; do., fine, 96s. to 103s.; Ceylon, Native, good ordinary to fine, 72s. 6d. to 76s.; ordinary, 68s. to 71s. 6d.; Plantation, ordinary to fine ordinary, 73s. to 85s.; fine fine ordinary to middling, 85s. 6d. to 89s.; good middling to fine, 90s. to 98s.; Java, 68s. to 90s.; Singapore, ordinary and good ordinary, 58s. to 74s.; Sumatra and Penang, 57s. to 73s.; Madras and Tellicherry, 72s. to 100s.; Malabar and Mysore, good ordinary, 74s. to 76s.; fine ordinary to fine, 101s.

RICE.—The market is somewhat heavy, but there is no material alteration of former quotations. The sales on the spot privately are about 15,000 bags, principally Bengal, common cargo to fine Ballam, 8s. to 9s.; for arrival, 150 tons new white at 13s. 6d., without guarantee, ex ship, and two cargoes of new Nakrenzie, one, 1,500 tons, at 10s. for the continent, or 10s. 3d. for the United Kingdom, and one of 900 tons, at 10s. 1½d. for the continent, both guaranteed. 5,053 bags Bengal, at public sale, were only partly sold, chiefly low middling old broken white at 10s., a few low heated, 9s to 9s. 6d., and ordinary cargo sort, 7s. 9d. to 8s. 863 bags low weevily Bassein were bought in. Our quotations are:—Bengal, white, 9s. to 15s. 6d.; cargo, 8s. to 9s.; Madras, 10s. to 12s.; Arracan, Rangoon, &c., 7s. 6d. to 11s.; Java, 10s. to 21s.

SAGO.—Cheaper; 1,784 boxes at auction, half sold at 13s. to 19s. 6d. per cwt. for fair to good large, and 18s. to 18s. 6d. fair small. Our quotations are—Pearl, large 17s. to 20s.; small 17s. to 19s. 6d.; Flour 13s. to 14s. per cwt.

SPICES.—Pepper: Black, steady. Auctions have embraced 2,516 bags Singapore, half sold at 3¼d. to 3⅞d. per lb., and 2,467 bags Penang three-fourths sold, at 3¼d. to 3⅜d. Arrivals, quotations 3¼d. to 4d. per lb.

Digitized by Google

White: This has sold irregularly, but without establishing any further reduction; and 665 bags Penang at auction were all quitted at 5d. to 5¾d. per lb. for middling. Arrivals: Quotations are 5d. to 6¼d. per lb. Pimento: The more moderate supply at public sale, has gone off steadily, viz., 419 bags middling to good at 2¾ to 3d. Oil of Aniseed: 5s. 7d. to 5s. 8d. per lb. Myrrh: First quality, £9 to £11. 10s.; second, £4 to £8. Fifteen cases Myrrh, one-fourth sold at 85s. to 87s. 6d. for low to ordinary. Aloes: £3. 10s. to £24 per cwt. Cardamons: Malabar, 5s. to 7s. 3d. per lb. Mace: We quote first quality at 1s. 8d. to 2s. 9d.; second quality at 9d. to 1s. 2d. The market is steady. Musk: First quality, 23s. to 28s. per oz.; lower qualities, 12s. to 21s. per oz. Nutmegs: First quality, garbled, 2s. 6d. to 3s. 9d per lb.; second and third ditto, 11d. to 1s. 6d. per lb. Camphor: China and Japan, £7. 5s. to £7. 12s. 6d. Cassia Lignea: First, second, and third quality, 87s. to 95s.; Buds, 260s. to 280s. Cinnamon: Ceylon, 7d. to 2s. 5d. per lb. Cloves: Amboyna and Penang, 4½d. to 1s. 4d. per lb.; Zanzibar and Bourbon, 3⅜d. to 4d. per lb. Soy: 2s. 5d. to 2s. 7d. per gal.; quiet. Star Aniseeds: 100s. to 105s. per cwt. 200 cases, sold at auction at 100s. to 105s. per cwt. for fair to good. Cubebs: Dull; we quote them at £5. 5s. to £5. 15s. per cwt. Galangal Root: Steady; 50 bags at auction, sold at 25s. to 25s. 6d. per cwt.; quotations are 25s. to 30s. per cwt. Ginger: Calicut and Cochin, £3. 5s. to £6. 10s. Firm, but transactions limited. No auctions.

HEMP.—New has maintained its value, and recent transactions show an improvement. The market is quiet, with limited demand. 7,452 bales brought to auction, and three-fourths quitted at and after the auctions at £20. 7s. 6d. to £28 per ton for common to fine new. Arrivals: At the sales on the 25th there was no material alteration. The following are our quotations:—Jute £19 to £28 per ton; Manila, current quality £23 to £27 per ton; this has been neglected; auctions confined to 293 bales; a few sold at £25 to £25. 2s. 6d. per ton for middling roping; private transactions equally unimportant. Arrival and sales advertised. Of the above to 76 bales Bombay, sold at £23 to £23. 15s. per ton, and 58 bales Kurrachee retired. The stock on hand exceeds 5,000.

SALTPETRE.—A steady though not active demand has continued to exist for this article, and fully previous rates have been obtained; the total transactions on the spot comprising 3,200 bags Bengal, 10½ per cent. refraction 37s. 7½d. to 6¼ per cent. 37s. 3d. to 37s. 6d., 5¾ to 2¼ per cent. 37s. 9d. to 38s. 6d., and about 1,500 bags landing, part at 37s. for 11 to 12 per cent. refraction. Nitrate of Soda has been in moderate request at 13s. 9d. to 14s. 3d.

COTTON.—Considerable buoyancy has been observable in the market since our last advice, and although a subdued tone has recently ensued, prices in general exhibit a material advance at the close, those of Madras and Surat ruling ¾d. to 1d. per lb. above those of Friday last. The sales effected are as follow:—3,400 bales, low seedy Surats to good fair Kurrachee 11d. to 12d., very middling Compta to middling fair Broach 14¼d. to 16½d.; 3,000 bales middling fair to good fair Tinnivelli 14½d. to 16¼d.; 1,400 bales Western, fair 15¼d. to 16½d., Coconada 13¾d. to 14¾d.; 2,100 bales Bengal, middling to fully fair 10½d. to 12d., and 900 bales China at 14d. to 14¾d.: for arrival, 4,000 bales have been sold at from 11d. to 16½d.

TIN.—The market has further and materially improved in value, with most extensive transactions both in Banca and Straits; contracts of importance also made for arrival; and the market remains extremely firm. Banca: This may be quoted at £127 to £128. 10s.; the stock on hand is £2,422. Straits, £122 to £125 per ton.

JAPAN WAX.—We quote this at 62s. to 80s. per cwt. A recent arrival, 195 cases fine saucer, sold at auction, at 80s. per ton, being 5s. cheaper; moderate business in block privately at 72s. Arrivals and sales advertised.

MISCELLANEOUS.—Gutta-percha, 1s. 4d. to 2s. 6d. per lb. India-rubber, 1s. 3d. to 1s. 5d. per lb.; Singapore and Batavia, at 1s. 2d. to 1s. 5d. for ordinary to good. Ebonywood, £6 to £13 per ton; of 17 tons Ceylon at auction, one third sold at £9 to £10. 5s. per ton. Myrabolanes, 11s. to 13s. 6d. per cwt.; scarce. Red Saunderswood, £7. 5s. to £7. 10s. per ton; firm. Senna, Tinnevelli, 4d. to 1s. 6d. per lb.; steady. Dragon's blood rather cheaper; 39 cases at auction sold at £5. 5s. to £6 per cwt. for ordinary to middling lump; arrivals and sales advertised; we quote, in reed, £11 to £15; in lumps, £4 to £11. Bees' wax, bleached, £9 to £9. 10s.; unbleached, £7 to £8 per cwt.; quiet. Castor oil, 5d. to 6½d. per lb. Cowries, fresh (with enamel), 30s. to 40s. per cwt.; steady. Madder roots, 24s. to 27s. 6d. per cwt.; quiet, little business doing. Seed: Linseed, 63s. to 67s. per qr.; quiet. Rapeseed, 65s. to 70s. per qr.; flat, with limited trade. Shellac: Orange, 170s. to 195s.; Garnet, 160s. to 170s.; Liver, 150s. to 170s.; Block, 100s. to 170s. per cwt.; quiet. Gum Benjamin, Sumatra, 1st quality, £15 to £16; 2nd, £12 to £14; 3rd, £6 to £10; 4th, £1 to £5 per cwt. Damer, 35s. to 52s. per cwt. Gamboge, picked, £9 to £11; in sorts, £5 to £8 per cwt. Cocoanut oil: Cochin, £51 to £54; Ceylon, £48 to £51; Sydney, £45 to £51. Sticklac, Siam, 60s. to 85s.; firm. Teeth, elephants, 70 lbs. and upwards, £38 to £40; 40 and 60 lbs., £35 to £37; 20 to 40 lbs., £28 to £32; scrivelloes, £15 to £32; ball, £30 to £43. Terra Japonica, Cutch, Pegue, 24s. to 26s. 6d.; steady. Gambier, 20s. 6d. to 22s.; Sapanwood, Bemah, £5 to £8; Siam £8 to £11 per ton; flat. Shells, Mother-o'-Pearl, Singapore, 125s. to 150s.; Manila, 80s. to 100s. per cwt. Rattans, 3s. to 10s. per 100; scarce. Rhubarb, Dutch, trimmed 4s. to 6s.; common, flat, 2s. to 4s. 9d.; ditto, round, 1s. 9d. to 4s. 6d. per lb. Tortoiseshell, fine quality, 22s. to 26s.; sorts, 14s. to 21s.; inferior, 10s. to 13s. per lb. Turmeric, 16s. to 30s. per cwt.; China continues scarce; Java rather cheaper; and of 200 bags at auction, half sold at 11s. to 17s. 6d. per cwt. Vermilion, 2s. to 2s. 2d. per lb.; very dull. Horns, buffalo, 23s. to 45s.; ditto, tips, 23s. to 28s.; deer, 27s. to 55s. per cwt. Nux Vomica, 9s. to 11s. per cwt.; firm. Safflower, good to fine, £6. 10s. to £8. Galls, blue, 100s. to 110s.; sorts, 70s. to 85s. per cwt.; Gum Ammoniacum, drop, 80s. to 122s.; block, 20s. to 60s. per cwt. Animi, first size, £8. 10s. to £11; second and third size, £6 to £8; partially scraped, £2 to £6 per cwt. Arabic, picked, 32s. to 57s.; sorts, 25s. to 35s. per cwt. Assafœtida, drop, 100s. to 120s.; block, 25s. to 90s. per cwt. Kino, £8 to £13 per cwt.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s.; hoops, £8. 10s. to £8 15s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 15s. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8½d. per lb.

TIN.—119s. for block; 120s. for bar. Tin plates, best charcoal, I. C. 28s. 6d. to 29s. per box.

LEAD, &c.—English pig, £20. 15s. to £21. 10s.: shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £18. 2s. 6d.; zinc, English sheet, £23. 10s.; quicksilver, £7 per bottle.

Since our last Price List of the 10th, business in all metals has been quiet, tin only excepted, in which considerable transactions have taken place.—Straits is now firm at our quotations, and with a prospect o further improvement.—Banca is also in great demand in Holland, 73. florins has been paid, and 74 florins is now asked. Tin plates firm Copper, lead, and spelter without animation.

EXPORT OF BULLION TO CHINA, &c.

MANCHESTER MARKETS.

The yarn market has been better, and there has been a more general business throughout the market, especially for India, the home trade, and for the Mediterranean. Buyers for these markets have all been operating pretty freely, and in some cases at a slight advance on the prices of Friday last. The cloth market is also rather more active. The letters from India, which came to hand on the 23rd inst., seem to have borne out pretty accurately the anticipatory accounts previously to hand by telegram, and have created a very good feeling in the market. We have had less excitement than on last Tuesday, but prices are the same, and a considerable business has been done in fabrics suitable to the markets of Calcutta and Bombay. Printing cloths are not in much request, and there is but little demand from the home trade. Further telegrams from India are expected to-day. Messrs. John Slagg and Co. report of the cloth market —"There is no new feature in the market since Tuesday last. Business is still checked by the advanced prices then asked; but as the accounts from the chief Indian markets continue good, holders are in many instances less inclined to sell, and all adhere firmly to the advance. The business of the day is, consequently, on the most limited scale."

FREIGHTS AND CHARTERS.

Vessels are in good demand for general cargoes to Ceylon and Hong Kong. Coals freights remain unaltered. Homeward freights are still firm, with good inquiry for ships from China and Manila.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 25s. to 30s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 40s. weight, 30s. to 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41. 10s. and £1. 17s. 6d. For Shanghai: £5 and £2. 7s. 6d. For Manila, £1. 12s. to £1. 12s. 6d. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £28 and £1. 8s. For Penang, £24. For Galle, £27 and £1. 10s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have invited tenders for the conveyance of the following Government stores from the river Thames to Hong Kong, viz., 123 tons heavy and 76 tons light common naval stores; 11 tons masts, longest 58 feet, 55 tons timber, 4 tons bricks, 5 tons iron cables, and 35 tons cake.

The Admiralty have engaged freight for Government stores in the Glenclune and Mary Ann Wilson for Hong Kong.

INSURANCE.

The following are the current rates of premium at Lloyd's, according to the class of vessels, &c.:—To Hong Kong, 45s. to 55s.; Shanghai, 55s. to 65s.; Singapore, 40s. to 45s.; Batavia, 40s. to 45s.; Manila, 50s. to 60s.; Japan, 80s. At Hamburg: To Batavia and Singapore, 40s. to 45s.; China and Manila, 50s.

CASUALTIES.

LIVERPOOL, March 11.—The Jessie Beazley, Fothergill, arrived here from Hong Kong, reports having experienced a hurricane on the 5th of March, in lat. 48 N.

FALMOUTH, March 10.—The Charles Henry, Rickmers, from Antwerp, for Manila, has arrived here leaky.

The Hugo Grotius, Vogelensang, from Batavia to Rotterdam, which put into Table Bay on the 27th of January, had sustained damage in her rudder.

The American ship Jacob Bell, of about 1,600 tons, Frisby master, which left Foo-chow on the 5th Nov., for New York, with a cargo of tea estimated at 789,700 lbs., was captured and burnt by the Confederate cruiser *Florida*, in lat. 24 N., and long. 65 W., on the 12th Feb. The passengers and crew were landed at St. Thomas, West Indies, on the 19th Feb. by the Morning Star, from New York to Cuba.

The Reindeer, which sailed from the Downs 12th March for China, had been supplied with anchor and 90 fathoms of chain to replace others lost.

DARTMOUTH, March 15.—The Glendoveer, Knowles, which arrived here yesterday from Foo-chow-Foo, reports having taken on board the boatswain's mate and an assistant engineer from the Alabama (Confed. str.), which vessel made them back their yards, and sent on board an officer to ascertain their identity, on the 28th Feb., in lat. 30 N., long. 37 W.

At MAURITIUS.—Feb. 3, from Liverpool for Shanghai, Defiance (str.), Maddison master.

At TABLE BAY.—Jan. 25, Castilian, Proctor, from Manila; 27, Hugo Grotius, Vogelensang, from Banjoewangie; sailed 21st, Chanticleer (str.), Brown, and Emma, Arentzen, both for Singapore.

At SIMON'S BAY.—Jan. 25, Kestrel, Fisher, sailed for Shanghai.

At ST. HELENA.—Feb. 4, Cosmos, Way, from Ceylon, and sailed, 5, for London. She had experienced a severe hurricane off Mauritius 24th December, and lost starboard, bulwarks, and stanchions. 6, Burnside, Dalgarno, from Singapore, and sailed, 6, for Greenock.

The screw steamer Sir Harry Parkes, of 700 tons, and 120-horse power, has been despatched by Messrs. Killick, Martin, and Co. for Shanghai.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."

An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1885.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

THE WORK SOLD BY HINNAM, QUEEN'S ROAD HONG KONG

JOHN GOSNELL AND CO.'S PERFUMERY, PATRONISED BY

HER MAJESTY and the ROYAL FAMILY.

JOHN GOSNELL and Co.'s COURT PERFUMES.—Queen Victoria's Bouquet, The Bride's Bouquet, Jockey Club, Guard's Own, Ess Bouquet, Military, Royal Yacht Club, New Perfume—Extract of Flowers, Eugenie, Napoleon II., Frangipanni, Wood Violet, Opera Bouquet, &c.

JOHN GOSNELL and Co.'s LA NOBLESSE PER FUME—a most delicate perfume of exquisite fragrance

JOHN GOSNELL and Co.'s FOUNTAIN PERFUMES for the BALL-ROOM.—A most elegant and useful invention, which cannot fail to be appreciated by the Ladies.

JOHN GOSNELL and Co.'s REAL OLD BROWN WINDSOR SOAP.—A Toilet Soap of the finest quality and very superior fragrance. It differs so widely in composition from the ordinary Alkaline Soaps, that its frequent use is highly beneficial in removing all harshness and redness of the skin.

JOHN GOSNELL and Co.'s CHERRY TOOTH PASTE is greatly superior to any Tooth Powder, gives the Teeth a pearl-like whiteness, protects the enamel from decay, and imparts a pleasing fragrance to the breath.

JOHN GOSNELL and Co.'s INSTANTANEOUS HAIR DYE.—The only Hair Dye which produces a good natural colour with perfect certainty, and with the least possible trouble.

JOHN GOSNELL and Co.'s PATENT TRICHOSARON is adapted for universal use, and the most serviceable and convenient Hair Brush ever invented. Letters Patent Granted Nov. 6, 1852.

JOHN GOSNELL and Co.'s PATENT PERFUME SPRINKLER, which, for convenience and simplicity of application, far exceeds anything of the kind hitherto produced.

Merchants and Shippers supplied on liberal terms.

LIFE DEPARTMENT.

(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world for which no extra premium is charged.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying an unchanging rate which, it will be seen is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.
(Payable during the entire currency of the Policy.)

Age.	Without Profits. £ s. d.	With Profits. £ s. d.	Age.	Without Profits. £ s. d.	With Profits. £ s. d.
18	2 3 3	2 8 9	33	3 2 0	3 9 11
21	2 5 11	2 11 11	36	3 7 9	3 16 6
24	2 9 3	2 15 6	39	3 14 5	4 3 11
27	2 12 11	2 19 9	42	4 1 11	4 12
30	2 17 2	3 4 6	45	4 10 3	5 1 10

No extra charge for voyages.

Prospectuses containing full Tables of Rates, Proposal forms, and every other information, may be obtained by application to Company's Agents in India and China, who have full powers to grant Policies and pay Claims:—

Bombay—Messrs. Finlay, Scott and Co.
Batavia—Messrs. Morgan, Melbourn and Co.

SEA FRONTAGE.
AT
HONG KONG.

FOR SALE.—IMPORTANT and VALUABLE BUSINESS PREMISES on the Harbour of "Victoria, Hong Kong," situate near the centre of the City, having Extensive Frontage (of upward of 250 feet each) to the "Praya or Wharf" and "Queen's Road," by nearly an equal depth, comprising Marine Lots No. 65 and 65A, upward of 62,000 square feet area, held by lease from the Crown for a Term of 999 Years from October, 1844, at an annual ground rent of £160 per acre, and will be SOLD by PUBLIC AUCTION at Hong Kong the first week in June next; and possession given on completion of the purchase not later than Midsummer, 1863. A portion of the purchase money can remain on mortgage if required.

This desirable property offers to the Merchant or Public Company a most eligible building site, bounded by Public thoroughfares, suitable for the erection of warehouses with extensive vaults (the latter partially completed); or the whole of the buildings at present erected could be demolished, and a large Steam Boat Depôt, Tea Hong, or Mercantile Offices erected in their stead, with the material (100,000 cubic feet of hewn granite) now on the land; or to suit persons with smaller pretensions, the land might be divided into two pieces. There is sufficien, depth of water for ships close in shore; moorings already laid down, and a stone Jettie or Public landing in front.

"Victoria" is a Free Port, offering special advantages to the Merchant seeking an Insurable Depôt for his goods; it is convenient to the Great Marts and disturbed Provinces of China, quite safe from "Rebel" and "Imperial" attack and the Port where the teeming Traders and Mercantile Marine from those Marts and Provinces carry on a peaceable thriving trade, similar to that yearly developed between "Singapore" and "The Eastern Archipelago."—Further particulars may be had of the Auctioneer, "Victoria Exchange," Queen's-road, Hong Kong.

JOYCE'S AMMUNITION — 1862. Established 1820.

The following articles, of the best quality, manufactured by
FREDERICK JOYCE
OF LONDON
may be had of most Gunmakers and dealers in Gunpowder.

MILITARY RIFLE PERCUSSION CAPS.
PATENT PYROXYLINE SPORTING DITTO
ORIGINAL (1824) ANTI-CORROSIVE DITTO
TREBLE WATERPROOF CENTRAL FIRE DITTO
Chemically-prepared Cloth, Felt, and Paper Waddings, Cartridge-Cases for Breech-loading Guns, Wire and Universal Shot Cartridges, &c., &c., Contractor to Her Majesty's War Department.

DINNEFORD'S PURE FLUID MAGNESIA has been, during Twenty Five years, emphatically sanctioned by the Medical Profession and universally accepted by the public, as the best remedy for acidity of the stomach, heartburn, headache, gout, and indigestion, and as a mild aperient for delicate constitutions, more especially for ladies and children. When combined with the acidulated lemon syrup, it forms an agreeable effervescing draught, in which its aperient qualities are much increased. During hot seasons, and, above all, in hot climates, the "regular" use of this simple and elegant remedy has been found highly beneficial. It is prepared (in a state of perfect purity and of uniform strength) by DINNEFORD and Co., 172, New Bond-street, London, and sold by all respectable Chemists throughout the World.

ROBERT ADAMS, Contractor for, and Wholesale Manufacturer of every description of Fire-Arms and Appurtenances. Patentee of the Revolver and Breech-loading Gun. Prize Medal awarded for improvements in Breech-loading Arms, International Exhibition, 1862. Merchants and the trade supplied on the most liberal terms. R. ADAMS, 76, King William-street, London, E.C.

HOLLOWAY'S OINTMENT and PILLS.—Unexpected Relief.—These purifying and soothing remedies demand the earnest attention of all persons liable to rheumatism, gout, sciatica, or other painful affections of the muscles, nerves, or joints. The Ointment should be applied after the affected parts have been patiently fomented with warm water, when the unguent should be diligently rubbed upon the adjacent skin, unless the friction should cause pain. Holloway's Pills should be simultaneously taken to reduce inflammation and to purify the blood. This treatment abates the violence, and lessens the frequency of gout, rheumatism, and all spasmodic diseases which spring from hereditary predisposition or from any accidental weakness of constitution. The Ointment checks the local malady, the Pills restore the vital powers.

Com. General Mercer. From Alexandria to Hong Kong: Mr. Tieckman. From Suez to Ceylon: Mr. W. H. Thomas.

Summary of News from the Far East.

DEFEAT OF THE COMBINED FORCES.

General Burgevine's successor, Captain Holland, has met with a serious defeat. On the morning of Feb. 10 Ward's troops left Shanghai for Tai-tsan with a force of 2,500 men, 22 pieces of cannon, and an ample supply of ammunition. Several delays took place in the progress of the troops, but they reached Tai-tsan on the 13th Feb. This city is about forty miles from Soon Kiang, and has been in the hands of the rebels for nearly three years. It was occupied in great force by the Taipings. Although not more than a mile beyond the frontier, the Taipings have latterly kept strictly from crossing it, while at the same time from the position of the city as a commanding post, they could at any time make a descent upon Kahding, which is only eight miles in a direct line from Tai-tsan. General Holland according to one account, accompanied the force throughout, but commanded it only so long as it was within the limits of the thirty miles radius. He then made over the command to a Major Barclay, who, however, had to resign it to a Chinaman known as the fighting Colonel Lee. The rest of the story shall be told by the correspondent of the *North China Herald*, who does not corroborate the above statement respecting General Holland:—

"A good road runs from Wy-con-sin along the bank of the creek towards Tai-tsan. Soon after the troops got clear of the Imperialist stockades, they formed up beside the road and waited till the boats came up, and the whole force then moved on together toward Tai-tsan, for about three and a half miles; but after that the creek diverges to the right and winds a good deal, so that the boats were some distance behind when the troops halted, about a mile from Tai-tsan, to enable them to come up. In the meantime, the Imperialists also began to arrive with a grand blowing of trumpets and display of flags. Some of these were sent into a neighbouring village to get doors, windows, tables, &c., to form a bridge over the creek, which here intercepted our further advance. A little distance the other side of this creek, the rebels had constructed a stockade, and as we could not yet get at it, General Holland brought up the guns and opened fire. This was continued for nearly two hours, without the rebels showing the slightest inclination to leave. At the end of that time Holland returned to the boats and embarked a couple of hundred men, intending to storm it; but, as it afterwards turned out, the distance by the creek was nearly four miles; though, from the spot where the artillery was placed, it was only about half a mile. In the meantime seven Europeans crossed the creek in a small dingy, and the moment they appeared the rebels left—apparently not a hundred strong. Directly the rebels began to run a tremendous cheer burst from the Imperialists, who had pushed on some men armed with muskets towards a little cover, whence they fired across the creek at their adversaries. Rows of stakes had been here driven into the creek by the rebels, and the boats had to be delayed some time till these could be pulled up. By the time all had passed it was more than five o'clock, so the force was halted for the night, and the rations served out. The guns were landed and got into position during the night, and the rebels made a sortie against them, but were driven back after some sharp firing, principally by the rifles, who were turned out to oppose them. After their repulse a few shells were fired at intervals to show we were on the alert, and they did not again disturb us. About daybreak on the following morning the rebels received large reinforcements from Soochow, who were greeted with immense cheering. Shortly afterwards fire was opened from two 32-pounders, eight 12-pound howitzers and four mortars. This continued for between four and five hours, after which time General Holland ordered the assault, and then our disasters began. The mandarins had assured him that there was no creek running round the walls, but only a dry ditch. He did not think it necessary to assure himself of the truth of this by personal observation, but took their word for gospel. Captain Graham, with twenty of the body-guard, volunteered to plant the ladders against the breach; the gallant fellows picked up the ladders with a cheer which, as it turned out, caused one half of the confusion that ensued, as it was taken up by the rifles who were in the front, and then by the 1st batallion who, being behind, did not know what was going on, but seeing the party with

Digitized by Google

adders run forward, and hearing the cheers, rushed past their officers to join, as they thought, in the assault. About forty yards from the wall, all arrived together at a deep moat, which the men could not ford. In the absence of bridges, they were all huddled together on the bank —a mark for the fire of the defenders, who now manned the breach in hundreds—and kept up a fire which told fearfully on the masses of the trained troops. A ladder was thrown across the creek, and a few men, with several officers, crossed on it; but it was too weak to bear their weight, and broke, and the Chinamen did not fancy another attempt at such a novel mode of crossing. A sergeant-major of the rifles here performed an act of bravery which no European could have outdone. He rushed to the front with Ward's flag, and stood there alone, a mark for the enemy's bullets, for several minutes, calling on his men to advance. It is extraordinary that though six bullets pierced his clothes, not one struck him. In the meantime the few who had crossed the creek attempted the breach, but most fell in the attempt; poor Maunder fell here, shot through the heart; a few reached the top, but only to be shot or knocked down by bricks which, at such close quarters, the rebels used with deadly effect. Unable to cross the moat, and tired of standing to be shot down like sheep, the men retreated; seeing which, Colonel Barclay, who, since Colonel Forrester's retirement, is second in command, ran to the guns and fired a few shells at the breach. Finding that the guns were still manned, the men ran behind them and halted under their protection.

"General Holland now ordered the guns to the rear, and determined on a retreat. All were safely conveyed there save the two thirty-two pounders, which were so deeply sunk in the soft, swampy ground that they could not be removed. General Holland did not wait to see their fate, but started off in his chop for Wy-con-sin. Every effort was made to save these guns; a ball from a six-pounder which the rebels had on the walls killed two men while they were hauling at the ropes, and still their comrades continued their efforts. But it was useless; the carriages had sunk to their axle-trees and could not be moved. Seeing that the men were falling thickly to no purpose, Colonel Barclay now ordered a retreat. It would have been impossible even to spike the guns save at a terrible loss of life; the rebels seemed to have marked them for their especial prey, and concentrated on them such a hail of shot that no one could approach them. They were abandoned, but the retreat was conducted steadily and in good order on Wycon-sin, the men facing about at intervals and firing at their pursuers to keep them in check.

"The rebels fought admirably, and were all well armed with European muskets. The loss of the Soon-kiang force cannot yet be correctly ascertained, as stragglers will probably drop in for some days to come. At the present time it consists of about 500 killed, wounded, and missing. Twenty casualties occurred among the Europeans. Captain Maunder, Macarthy, Macleod, and Bosworth killed, and twelve other officers, besides four marines, wounded. Among the former are Captains Graham, Murray, Tapp, Silverton, and Dunn. The latter is shot through the groin, and, it is feared, will not recover."

In every respect this is a most mortifying defeat for the Imperialists and for Ward's "Ever victorious army," now victorious no longer. General Holland's incapacity is loudly asserted, but every commander who meets with a repulse is sure to have his ability depreciated. It appears, however, if we may trust the above letter, that the army, well equipped as it was in some respects, was without storming ladders, and that the artillery was so placed that the men were totally unprovided with cover. The *North China Herald*, commenting on the defeat, says:—"One impression appears to pervade the minds of all, that Captain Holland's career as a Chinese general is terminated—that the confidence in him, not only by the men, but the foreign officers, is gone, and that under his command the disciplined Chinese force will never take the field. To General Staveley, who is responsible for the appointment, the Chinese authorities now look for a change; and we submit that they are entitled to aid in securing the capture of Tai-tsan; either by a British force, or what would be the more preferable, the disciplined Chinese led on by a British officer endowed with the capacity of a general, and the expedition to receive the countenance and moral support of one of the regiments now in garrison."

JAPAN.

The telegraphic news that the Legation at Yedo had been blown up by gunpowder, was in one respect alone surprising, viz., that no life was lost by the outrage. The information now received explains the enigma. It appears that the destruction refers to the new Legation building at Yedo, a portion of which was completed. It seems that, of late, the strongest desire has existed among the Japanese authorities at Yedo to have the place demolished. They proposed to give Colonel Neale any other place he might choose from a number at their disposal, and to bear all the expense of removing the building from the Goten-yama (the Hyde-park of Yedo) to the place Colonel Neale should select. The latter did not like to act in the matter after the site had been deliberately conceded to Mr. Alcock and approved by him. In the meantime, those hostile to its remaining on the Goten-yama had the building set fire to and demolished by bags of gunpowder, on the 1st Feb. The site of Goten-yama is very extensive, and it being arranged that all the foreign legations should be there, the construction of the British legation appears to have been carried out without loss of time. A fine building was contracted for, and had just been completed. The French legation had also been commenced, but had not been very far proceeded with. A Japanese guard had been placed to protect the site, but it does not appear that any guard was placed over the buildings. Such being the case, about two o'clock on Sunday morning, the 1st inst., the Japanese guard at Goten-yama saw the British legation burst into flames in several places simultaneously, repeated explosions making it evident that gunpowder and combustibles were the means employed, and so fiercely did it burn that it was consumed in a few minutes. When the conflagration was at its height, from ten to twenty guns were fired as a signal, it is said, to give notice that the work was accomplished. In the outhouses a large quantity of gunpowder and matches were discovered as though in reserve. The fence behind the buildings was cut to afford the incendiaries ingress and egress. The buildings of the French legation were not touched. The Dutch and American legations had not been commenced upon.

The hostility of the Japanese is on the increase, and they are gradually preparing for the worst. From the *Shanghai Recorder* we quote the following "Orders of the Mikado to the Tycoon with respect to Foreigners:"—

"For a long time the plan of expelling the barbarians has been thought upon by us, and although it has been put off up to the present time, the Imperial will cannot change. Whilst in the department of the Tycoon changes have been gradually made in every way in the carrying out of new system, we have remarked the respect entertained for our will. But if now the sure expulsion of the barbarians does not take place, the hearts of the people will not be united: this causes great sorrow to the Imperial bosom. Let the Tycoon do all in his power to ensure the expulsion of the barbarians, and orders must speedily be given to all the Daimios. Moreover, it is the duty of the Commander-in-Chief of the army (the Tycoon or Shoo-ngun) to carry out the steps of the scheme. Quickly and with haste complete the whole resolve, make certain what has been deliberated upon for the state up to the present, and determine on the precise time when communications with the ugly barbarians shall cease. You will present a report to us on this matter."—(*Translation.*)—E. M. S.

Admiral Kuper, with all the available naval force in China, was to proceed at once to Japan in obedience to orders received from home. His arrival will be opportune.

CHINA.

PEKING.

The news from the capital is to the 21st January. Ho Kwei Tsing, who lost Soo-chow to the rebels, has been beheaded. His friends had endeavoured to buy him a pardon, but the Government would not grant their prayer, and Ho was suddenly taken from prison one morning and beheaded in the "Cabbage Market," the usual place of execution.

General Shing Paou, who caused the death of Capt. Brabazon and others, has been handed over to the Board of Punishments; his property has been confiscated, and he will probably be executed.

SHANGHAI.

A military review took place on Feb. 9th on the new racecourse. On the ground there were about 2,500 rank and file of the 31st, 67th, 5th Bombay, 29th Belloochees, and disciplined Chinese; besides thirty mounted artillery, and three mountain howitzers, with the usual complement of men. General Staveley and staff arrived punctually at 3 P.M. There was a large number of spectators on the ground, who obtained good positions to see the review from the mounds scattered over the field. From one of these mounds the scene at one time was very picturesque, and presented all the appearance of a battle field; the Chinese were thrown out in front as skirmishers, firing away in gallant style, while the mountain howitzers joined their bellowing mouths in chorus; these were supported by the mounted troop. Orders were given, "prepare to receive cavalry," when the regulars and the Indian troops formed into hollow squares; the red-coats in the distance lighted up the field, while the dark uniform of the Belloochees presented a fine appearance. After about an hour's field exercise, the whole force marched past the general and staff. Behind them stood the Chinese Governor of the Province and suite, who appeared greatly interested on the occasion. The whole affair passed over without any accident.

It is said that a junk arrived at Shanghai from Taku on the 17th Feb., after a voyage of nine days, reporting that the ice had broken up on the 8th. The navigation of the Peiho has, therefore, opened unusually early this year, from the mildness of the season. There is an uncertainty always attending the breaking up of the ice in the Gulf of Pecheli, as it is affected by the severity or mildness of the winter. The first year of the foreign occupation of Taku the ice did not break up until

Digitized by Google

March. Last year the shore could have been approached in the middle of February, and this year a week sooner.

The following advertisement, which appears in the *Friend of China*, suggests the notion that some young Englanders in the settlement must be rather hard up for amusement :—

"Sport.—A great slaughter of rats will take place at the Exchange Hotel Pit, French Concession. A handicap match, open to all dogs not exeeeding thirty-five pounds weight. Dogs to kill according to rule this Saturday, February 14th, 8 P.M. A turn-up between two good dogs will conclude the evening's sport. A handsome collar will be awarded to the fastest killer. Admission, One Dollar. J. Henry and John Roberts, Proprietors. Shanghai, 11th February, 1863."

NINGPO.

General Le Brethon has been succeeded in command of the disciplined Chinese force by General Tardif, and the latest news states that troops were under the walls of Shaou-hing, ready for the assault. Breaching guns of heavy metal had been brought down from Shanghai by Captain Dew, and a note received at Ningpo on the 18th February, stated that the city would be attacked in the rear on the first or second day following. If Shaou-hing be taken, it will open up the whole of the silk and cotton districts, and greatly improve the commercial prospects of Ningpo.

There are a number of Cantonese in the employ of the Mandarians at Ningpo who receive no pay. They live by committing extortions upon the people, and are bitterly complained of. Some foreign officers in the French contingent are only paid it is said $30 per month, and they also feel justified in appropriating all portable valuables that may come in their way.

HONG KONG.

The Post-office Ordinance, which proposes a right of search, was brought before the Legislative Council in February. The Hon. Mr. Murray, in presenting a letter to the Council from the Chamber of Commerce, said that the prosperity of the colony had arisen from the absence of Government restrictions, and that the passing of this Ordinance would result in a feeling of strong hostility between the shipping interest and the local government. Under circumstances like these, and by legislation of this kind, the colony would retrograde. The Chamber's letter was read and laid on the table. From this letter, which is of considerable length, we extract the following paragraphs :

"That your memorialists have read with unfeigned surprise and alarm the draft of an Ordinance published in the *Hong Kong Government Gazette* of 31st January, and entitled 'An Ordinance to amend Ordinance No. 8 of 1862,' intituled 'An Ordinance to provide for the management and control of a Post-office for the Colony of Hong Kong,' which inflicts additional penalties on the masters of vessels carrying letters privately, and on persons sending letters to them for conveyance; and empowers officers of the Post-office to detain vessels suspected of having other than mail letters on board, and to break open and search any package, in order to ascertain whether such suspicions are well founded.

"That the Ordinance No. 8 of 1862 received careful revision, both in and out of the Council, before being passed; and has, so far as is known to your memorialists, worked satisfactorily up to the present time, affording increased accommodation to the public and additional revenue to the Post-office—which are strong reasons for affording it a further legitimate period of trial without introducing hasty amendments or innovations of any nature.

"That the commercial prosperity of this free port and colony has entirely arisen from the absence of Government restrictions, charges, and formalities, which has caused it to become a continual place of call and resort for shipping, coming and going unhindered; and that the true interests of the colony demanded a persistent adherence to this course of non-interference, as nothing would so effectually retard its progress or cause it to retrograde, as the subjecting vessels to supervision and annoyance from different Government departments.

"That, with the exception of the mail line to Great Britain, and the line connected therewith, Government (Imperial or Colonial) does hardly anything for the conveyance of the correspondence of this colony or of the consular ports in China to which Hong Kong serves as a centre of communication—such conveyance being largely and effectually carried out by private steamers and vessels, which receive no payment for the services they render to the public, the insignificant allowance permitted by the law being usually regarded as a perquisite of the captain or other person who takes the trouble of receiving and delivering the mail packages.

"That under such circumstances, a legislation expressly framed to repress, punish, and interfere with such vessels, becomes doubly harsh and ungracious, and eminently calculated to lead to opposition and hostility between the Government and the shipping interest, whose true policy and advantage are to serve each other."

The Attorney-General said that the amendments proposed were necessary to give effect to the ordinance already in existence. At present there was no penalty in the case of vessels refusing to carry mails. One captain had threatened to pitch a high Post-office official overboard.—The Hon. Mr. Perceval said that if this ordinance were carried into effect, he knew of one firm that would throw the letters overboard as soon as the vessels got out of the Ly-yu-moon.—The Chief Justice asked why ships should be subject to an inconvenience when they received no benefit in return.—The Attorney-General urged that it was of the nature of a tax.—The Chief Justice said that in the case of a tax, there was convenience on both sides.—The Hon. Mr. Perceval spoke of the Shanghai postal service as an impediment to business. At present, his own letters and those of his friends were sent in a box, which did not go through the Post-office, and were delivered before the steamer had anchored, while, in the case of the Post-office, a delay of six, eight, ten, or twelve hours would elapse before the letters were in correspondents' hands. That did not suit business men ; with them one hour was of importance. What had the Post-office ever done for the mercantile community, that it should now demand so much? There was no regular mail service to Foo-chow, and none to Japan, unless some of them (the mercantile community) happened to despatch a steamer to either of those places, and then there was a mail. He could safely affirm that henceforth, as hitherto, the merchants would be most happy to oblige the postal service at any time, but the terms of this ordinance would not be submitted to.—The Chief Justice said that the present ordinance was, in spirit, an interference with free trade. It was better to sacrifice a little than to legislate in such a direction, which he thought a wrong direction altogether. The most obnoxious clauses were struck out unanimously, the Bill was then passed, and the Council adjourned *sine die*.

The following Government notification has been issued :—

It is hereby notified that the services of eight Europeans are required by this Government to form the staff of the convict hulk intended to be anchored off Stone Cutters' Island. The staff will consist of—

1	Superintendent	Salary $1,920	per annum.
1	Warden..	„ 480	„
1	Head turnkey	„ 420	„
1	Turnkey	„ 396	„
2	Do.	„ 360	„
2	Do.	„ 324	„

The services of a Chinese, as interpreter, will also be required. Salary $384 per annum.

Applications accompanied by testimonials or certificates to be sent in on or before the 21st proximo. By order,

W. H. ALEXANDER, Acting Colonial Secretary.

The following Government notification had been issued :—

"Tenders will be received at this office up to noon of Monday, the 23rd proximo, for the privilege of preparing and selling prepared opium within the colony of Hong Kong for one year from the 1st of April next, under the conditions set forth in Ordinance No. 2 of 1858.

"By order, W. H. ALEXANDER, Acting Colonial Secretary.

"Colonial Secretary's Office, Hong Kong, 25th February, 1863."

A Proclamation by the Acting Governor prohibits "either to be exported from the colony of Hong Kong, or to be carried coastwise within the said colony, arms, ammunition, gunpowder, military and naval stores, for a period of twelve months from the 28th day of February, 1863, and for such further period as shall from time to time be specified in any Proclamation to be hereafter duly published."

On the 16th February there was a Grand Review of the "Hong Kong Artillery Volunteer Corps." The occasion was one of special interest as the corps was to be presented with a set of colours and a silver trumpet. At 3.30 in the afternoon the volunteers were marched on to the parade ground, where an elevated platform had been prepared, which was occupied by his Excellency the Acting-Governor, and Mrs. Mercer ; the Lord Bishop of Victoria ; Colonel Moody, commanding the Royal Engineers, and Mrs. Moody ; Mrs. Ivor Murray, and many ladies and gentlemen connected with the colony and with H.M.'s army and navy. On reaching the parade ground, the volunteers formed in line and fired a royal salute, after which they advanced in line to the platform, in order to receive colours and trumpet. The proceedings were opened by the Lord Bishop offering up an appropriate prayer.

Mrs. Mercer next presented the colours to the corps. Lieut. Dodd came forward to receive them. Mrs. Mercer, in making the presentation, said :—

"Captain Brine, Officers, and Gentlemen of the Hong Kong Volunteers. You have done me great honour in requesting me to present the colours under which your corps is to serve from this day forward. A request so kindly made is most willingly fulfilled. This banner, the gift of a generous friend belonging to that great German nation, with which our Royal family (whom God long preserve) is so intimately connected, I commit to your keeping. The very sight of it will bind your corps together, assist your discipline, and tend to the promotion of harmony and good feeling amongst you.

"In giving it, Lieutenant Dodd, into your hands, I feel certain that

Digitized by Google

by you and your comrades its high and holy association will be duly cherished, and the standard itself will never suffer dishonour."

The silver trumpet, sent from England some time ago as a gift to the corps from Mrs. Brine, was next presented by Mrs. Moody, who said :—

"Gentlemen,—I have a very pleasing task to perform on behalf of an absent friend, Mrs. Brine, wife of your Commandant. In her name I present you with this silver trumpet, a token of her kind regard and good wishes. Allow me to add my good wishes to hers; and I feel assured that the cause of duty, whether in garrison or in the field (should your duties ever call you there), will be answered by you all with the same chivalrous devotion, loyalty, and honour, which has acted as a guiding spirit in the formation of the Hong Kong Volunteer Artillery. May God bless all your efforts in upholding the honour of our Queen and country whenever and wherever required!"

Captain Brine replied on the part of the corps.

Then followed the review, which was most satisfactory, and elicited warm expressions of gratification from the military officers present, as well as from the general spectators. In the evening the corps entertained their friends to dinner in the St. Andrew's School-room. The room was decorated with flags and evergreens; and, at one end, a gallery was erected for ladies. A variety of Latin mottoes, done in transparency and illuminated, were placed on the walls, and the general effect was further enhanced by a tasteful amount of Chinese ornamentation. The roads leading to the school-room were lighted up with numerous lamps fitted up for the occasion, and a detachment of police were in attendance to maintain order. Three mat-sheds erected close to the building served for reception-room, orchestra, and servants'-room. In case of accident from fire, Captain Quin ordered a fire-engine to be in attendance.

The table was laid for a hundred and sixty, and nearly that number sat down to dinner. Among the guests of the corps were his Excellency the Acting Governor, the Lord Bishop of Victoria, Admiral Kuper, &c. In addition to these were guests invited by individual members (effective and honorary). About eight o'clock the corps went in to dinner, when grace was said by Dr. Smith, who also returned thanks after dinner; the *Non Nobis* was sung by members of the Hong Kong Choral Society. Post prandial speeches were made by the Acting Governor, Captain Brine, Admiral Kuper, Dr. Kane, and others.

The annual races have taken place, and the *China Mail* gives, as usual, a long account of the proceedings. The races, according to that journal, fell flat on the first day. The Canton Cup, value 100 guineas, was won by Forrester. The Garrison Cup, of the same value, was won by North Pole; the Setna Cup, value £50, by Anecdote; the Takei Cup, value $700, by Sir William. The chief race on the second day was for the Challenge Cup, won by Sir William, in whose favour the betting had been heavy. The Barrister's Cup, value 100 guineas, was won by North Pole. On the third day the Ladies' Purse, won by Reindeer, was presented to the rider, Dr. McDowell, by Miss Pollard, The Foochow Cup, value 300 guineas, was won by Forrester; and the Shanghai Cup, value 100 guineas, by North Pole. There were several other minor stakes.

CANTON.

The Tartar General Mukhtena resigned office at Canton on the 26th February, and was to leave for Peking on the 7th of March. He is succeeded by the Lieutenant-General, named Kukhkitai. Mukhtena, a man of gigantic size, has been in the city since 1856, and is known as one of the most persistent and least enlightened of the anti-foreign party. His successor is well spoken of.

The cultivation of opium in the Province Kwangtung is becoming extensive. The drill of the Chinese and Tartar troops had recommenced after the New Year's holidays. Between 800 and 1,000 men are now under instruction; and the earlier squads have attained considerable proficiency.

It is stated that a Chart of the Province of Kwangtung is in course of publication at Canton, having been compiled, from all the best sources, during the past year, by Mr. W. S. F. Mayers, H B.M.'s Interpreter at Canton.

SIAM.

BANGKOK.

The *Bangkok Calendar* for 1863, compiled by Dr. Bradley, contains a great deal of useful and curious information. Besides the usual contents of a calendar and directory, the work gives us lists of the Sovereigns of Siam, the relatives of the present King, his children, table of fruits, &c., and their seasons; Buddist temples, the customs of priests, annual visit of the Kings to the temples, examination of scholars in Pali, seminaries of learning, and other interesting papers.

The *Calender* states that the first King has had altogether 61 children, the youngest being a princess born in September, 1862. Of this numerous offspring 50 are still alive. His Majesty has had altogether 27 wives, and he has also at the present time 34 concubines. Each of these receives an allowance varying from 120 to 1,200 ticals. There are 75 maids of honour in the King's family, all being the daughters of noblemen, and they receive salaries amounting in whole to 6,440 ticals yearly. Twenty-seven ladies, being aunts, sisters, and nieces of His Majesty, reside with him, and have pensions amounting to 24,960 ticals. About 30 of the younger princes and princesses are now under education by an English Governess.

The second King has at present about twenty Laos and five Siamese wives. He has had about 60 children, of whom only 30 are now alive. His eldest son is commonly called Prince George. The name given him in his infancy was George Washington. Although the present Kings have so many wives, it is stated that they have not a quarter so many concubines as their regal predecessors. Some of the chief noblemen are said to have 30, 40, and even 50 wives.

In 1862, the arrival of merchant ships at Bangkok were as follows :—

	Ships.	Tonnage.
Foreign...	187	88,871
Siamese...	126	47,078
The departures from Bangkok were as follows :—		
Foreign...	183	87,806
Siamese...	123	49,999
	305	137,805

The imports in Bangkok were valued at $2,770,807, of which $2,215,931 were from Singapore and Batavia (via Singapore). Besides this, a large quantity of merchandise, consisting of silk, glass, earthenware, and hardware, together with a variety of China goods, was brought by Siamese vessels and junks from Batavia and China, of which no report could be obtained.

The exports from Bangkok were valued at 5,650,718 ticals, or (the tical being equal to sixty cents of dollar) $3,390,430.

The European residents in Bangkok and other places in Siam amount to 112, and the American residents to thirty-eight. These numbers are exclusive of the families of the married residents.

JAVA.

It is reported that the Governor-General at an early date intended to proceed to the Moluccas on a tour of inspection. It was also rumoured that an expedition was about to be sent against Nias.

The Dutch barque *Davo* from Singapore bound to Shanghai, on the 12th January, struck on a reef about seventy miles west of Makassar, and became a total wreck. The crew reached Makassar in safety.

MALACCA STRAITS.

SINGAPORE.

With regard to the deficiences of the Church of England in Singapore, and the necessity that exists among the changes for additional clergymen and churches, the *Straits Times* writes :—

"Among the many inconveniences attendant upon our present anomalous form of government, not the least is the utter inadequacy of existing arrangements for the celebration of public worship and parochial superintendence. Singapore forms this day, as at its foundation, a military chaplaincy—where men, more or less qualified, come to vegetate for a year or two, as it were 'on leave of absence,' till their delighted hearts hear a call to the upper ranks of the church militant in India, to 'a more enlarged sphere of usefulness' and to increased pay. Yet here, in addition to the military officers, whose souls are thus tenderly cared for, are fifty times their number of Europeans—bankers, merchants, lawyers, shopkeepers, and artisans - men who for the most part have been either born or brought up within the pale of the National Church, who see in her, spite of all imperfection, the surest guarantee of freedom of religious thought, the one constant witness to a nation of baptised heathens of an eternal and righteous King and Ruler upon earth. They are men who would be glad to have their children introduced into the same community as themselves, and would like that when the time comes the same words of unutterable beauty, and hope, and love should be read over their graves, that they listened to in the quiet churchyards of England, where their fathers are sleeping. And besides this resident English population, there are continually coming and going hundreds of Europeans intent on business or pleasure, but each and all of them gaining good or evil in Singapore. There are many professing Chinese Christians, and still more descendants of Europeans, whose claim is as good as our own on the Government and Church of their ancestors. There are hospitals where the sick or dying might be soothed. Gaols, where criminals might be improved if not reformed. Schools, where children might be civilised, in fact, there are a hundred opportunities for the exertions of an educated and enlightened

Digitized by Google

clergy. For these extensive and pressing wants there is provided one church for the entire island, and one chaplain who for the last six months has been resident in England. In the meantime the faith of 'the faithful' is fanned by two Sunday services held during the hottest hours of the day, conducted by either laymen, or, as latterly, by a missionary, who must reconcile to his own conscience, the leaving his few sheep in the wilderness even for the attractions of the pulpit in St. Andrew's. The worship, moreover, as prescribed, is in accordance, perhaps, with the rubric; certainly not with the wants of the congregation, nor the nature of the climate. Wherever the church exists, there is being felt the need of services more varied, frequent, and of shorter duration. After six days of weary working there are many who would turn with relief to the Church's prayers, were they not terrified by the prospect of the minister's sermon, and it is by either success or failure that every religious body learns sooner or later the necessity of adapting itself to the varied wants of its members. So long as Singapore continues a part of the Madras presidency, and subject to the ecclesiastical jurisdiction of the Bishop of Calcutta, we can refer to this subject only in the hope that its anomalous position may be soon altered to an independent one, from which there must result the greatest advantage both civil and ecclesiastical. The subject we have discussed will before long be forced upon the attention of statesmen in England, who cannot far err if they take as the only sound basis of a Church establishment in this settlement, the introduction of something like the home parochial system with an authority central and influential."

PENANG.

The *Penang Argus* writes :—"A rumour has recently become current in Penang that Colonel Cavenagh is about to proceed home. We are not in a position to confirm or to refute the report, but if there be any foundation for it, we incline to the opinion that his Honour's absence will only be for a very brief period, originating, possibly, in desired data at home connected with the contemplated transfer of the Straits to the Colonial Office."

CEYLON.

The Governor has appointed C. H. Layard, Esq., to be Acting-Deputy Postmaster-General at Kandy; and Alexander Young Adams, Esq., to be a justice of the peace for the central province.

The Pearl Fishery commenced on the 8th March with favourable weather, and a large number of native dealers and diving boats, the latter numbering 180. At first not more than fifty boats were sent out each day, the quantity of oysters brought in being under a quarter of a million each time.

The prices realised thus far have been above the official valuation, but it is not at all certain that these will be maintained.

The railway promises to be soon in course of construction. Mr. Faviell, the contractor, is engaged taking over the works, plant and land, though there is still a portion of the latter to be purchased from private owners. A steamer has been chartered in Bombay for the conveyance of skilled workmen and overseers from that Presidency, so that we may consider a beginning has at length been made. "It may be difficult," says the *Ceylon Times*, "for persons who have never experienced the harassing vexations and many losses attendant on bullock transport in a tropical country, to understand the deep interest with which planters regard the construction of our railway, but of this there is little doubt that, without some such means as that of the iron road, Ceylon can never be in a safe position as regards the competition of other coffee-producing countries. A good deal of stress has been placed on the fact that the construction of our railway will circulate a large amount of capital in the colony. No doubt this will be the case. To a certain extent our local trade is already feeling the effect of this new stimulus, but we are content to look rather to ultimate results than immediate effects, and it is in this light that the railway must be regarded as placing the coffee cultivator to a great extent beyond the risks of cattle disease, and bad roads."

A committee has been appointed to inquire into the state of the roads, as to consider whether it might not be feasible and advisable to organise some system of Municipal arrangement of roads, analagous to the system of Turnpike Trusts in England, to be aided by votes from the general revenue, so that the attention of the Department of Public Works should be mainly given to the principal or Trunk Roads in the Colony, whilst the Branch or Planters' Roads should be administered by some such body as that above indicated.

A general meeting of the Asiatic Society of Ceylon was held at Colombo on the 7th of March; the Rev. B. Boake, V.P., in the chair. The Secretary reported the progress made in regard to the increased accommodation required for the society's museum in consequence of the amalgamation with it of the Military Medical Museum. The Governor had approved of the proposed plan for adding a floor to the present building, by which means it would be made to correspond with the opposite wing of the suite, occupied by the treasury, but difficulties were in the way of carrying out the plan, owing, it was understood, to the large amount of work on hand in the civil engineer's department. The cost of the building had been estimated at £350, and there seemed no doubt that his Excellency would sanction the appropriation of such a sum. At present the contents of the Military Museum remained in their original rooms which might at any time be required for other purposes.

A letter from the Lord Bishop of Colombo proposes the formation of a diocesan fund to promote the extension of the National Church and the support of additional clergymen in Ceylon :—

"I would propose," he writes, "to establish a diocesan fund, to be created by contributions either in the form of donations or annual subscriptions, to be vested in trustees, and administered by a mixed committee of clergy and laymen chosen in such a manner as to command public confidence. And in order to facilitate their operations, and to prevent frequent and perhaps personal discussion, I would advise that certain rules should be laid down for their guidance, sufficient to meet the general run of applications, so as to leave a few cases requiring laborious and exact investigation, and to enable those of high and responsible station to hold the office, for which otherwise, they could not spare the necessary time and labour. Thus for instance:

"I. I would give the bishop power to assign an amount in certain cases bearing proportion to the existing fund and the claims of the district from its population of peculiar circumstances.

"II. I would not leave it optional to continue any payment to a clergyman under deprivation or suspension by his ordinary.

"III. I would admit the claim to an increase of income under certain circumstances, and on fixed conditions such as time of service—married or single, number of family, &c.

"IV. I would allow no payment to a clergyman non-resident in his district or parish.

"Such a measure, I think, might be attended with success, and would at least provide some additional means of supporting and assisting our clergy, and that on the soundest principle, viz., that of self-exertion. And it would, I should greatly hope, assist and encourage our missionary efforts by proving the reality of our work."

The Archdeacon, in commenting on the Bishop's proposal, says :—

"It is difficult to approximate very closely to the number of Protestants in Ceylon, and the proportion belonging to the several denominations. But of British residents probably one half are members of the Church of England, and of the Episcopalian Church of Scotland. They, perhaps, present also the larger amount of property and income. I shall also doubtlessly be well within the mark by estimating the incomes of Anglican Churchmen in Ceylon, from property and stipends, at not less than £200,000 yearly. If of that sum a tenth part, as enjoined on the Jews, were set apart for the services of religion, how large and noble an offering would it be to God! Ought the higher godliness of the Gospel to be content with dedications to God, willingly made, less than those commanded under the more imperfect dispensation?"

Colonel Hadden, commanding the corps of Royal Engineers stationed in Ceylon, has been suspended by order of the Major-General, Brevet Major Armitt succeeding him. The cause of this order has not transpired.

The *Colombo Observer* comments thus on our postal arrangements :—

"We wonder that the present state of our course of post with Great Britain has not attracted more attention than it appears to have met with. The mails from India, China, and Ceylon invariably arrive just after the English mails for those places are closed, and it therefore takes much longer time for us to receive answers to our letters than there is any occasion for. For instance, the letters posted here on the 17th of February will, in the ordinary course reach London on the 12th of this month—just two days after the Marseilles mail has closed;—they will lie fourteen days unanswered, and their replies will only be sent on the 28th, which should enable us to receive them on the 20th April. There is in this arrangement a clear loss of ten days; and in these days, when 'time is money,' and when fixed rates of speed are laid down in the postal contracts, to which strict adherence is intended to be paid, it seems ridiculous to throw away so much time in England, when, as we imagine, better arrangements can be made."

The editor of the *Observer* having come to England for a "well-earned holiday," has commenced a correspondence with that journal under the title of "The Editor out of Harness."

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

AVERY—On the 8th March, at Colombo, at the residence of Mr. Rusbridge, Mrs Avery, of a daughter.

CLOWES—On the 6th March, at Kandy, the wife of the Rev. J. Herbert Clowes, of a daughter.

DE RUBEN—On the 6th March, at Borella, Colombo, the wife of Mr. E C. De Ruben, of a son.

GREEN—On the 5th inst., at Laira Cottage, Balham, the wife of Mr. John S. Green, of a daughter.

LANGENBERG—On the 12th March. at Small Pass, Colombo, the wife of Mr. Charles Van Langenberg, of a daughter.

PIGOTT—On the 12th March, at Matakooly, Colombo, the wife of the Rev. Henry R. Pigott, of a daughter.

RICHARDS—On the 29th ult., at Glendore Lodge, Southsea, the wife of W. M. Richards, Esq., late H.M. Naval Storekeeper, Hong Kong, of a daughter.

Digitized by Google

MARRIAGES.

BAIRD—CAVE.—On the 2nd ult., at the Church of the Holy Trinity, Paddington, by the Rev. H. H. Mogg, cousin of the bride, assisted by the Rev. Francis Pigou, Henry Dillon Baird, Esq., of Ceylon, to Caroline Elizabeth, eldest daughter of Thomas Saunders Cave, Esq., of Kossbrin Manor, county of Cork, and Brancliffe Grange, Yorkshire.

COMMIDGE—MASON.—On the 10th February, at Shanghai, Henry C. Commidge, to Annie Mason, both of York.

HART—GOODBURN.—On the 14th February, at Ningpo, George M. Hart, to Caroline S. D. Goodburn, of Folkeston, Kent.

KROES—SLAGHEK.—On the 20th February, at the Netherlands Consulate, Macao, Theodore Kroes, His Netherland Majesty's Vice-Consul at Shanghai, to Adeline Johanna Maria Carolina Heukensfeldt Slaghek, of Livorno.

PURVIS—GLASS.—On the 19th February, at Penang, by the Rev. William Burns, of the Scotch Presbyterian Church, John Murray Purvis, Esq., of Singapore, to Barbara Christina, second daughter of the late Rev. John R. Glass, of the Free Church, Musselburgh, N.B.

DEATHS.

LUDEKENS—On the 13th ult., at Colombo, Harriet, the wife of R. Ludekens, and second daughter of the late W. Reckerman, aged 33 years.

NUGENT—On the 9th Aug. last, at Ylvilo, Philippine Islands, of fever, on board the ship *Blanch*, to the inexpressible grief of his bereaved parents, Thomas Albert Nugent, in his 21st year, eldest son of Mr Nugent of H.M.'s Civil Service, and Elizabeth, his wife, deeply lamented by all who knew him.

ORMISTON—On 1st Feb., at Euston-square, London, Evan Ormiston, Esq., of Wigfair St. Asaph; and Colombo, Ceylon, aged 34.

PECK—On the 7th ult., at Colpetty, Colombo, Jane, the beloved wife of W. Peck, Esq., aged 43 years.

ROSAIRO—On the 10th ult., at Colombo, Eugene, infant son of Mr. J. P. Rosairo, aged 1 month and 27 days.

SOMERVILLE—On the 9th February, at Shanghai, Robert Somerville, aged 29.

SANTOS—On the 21st February, at Shanghai, M. L. Dos Santos.

WATERMAN—On the 14th Jan., at Saigon, Cochin China, Henry Waterman, Esq., surgeon, youngest son of the late Wm. Waterman, Esq., of Tenterden, aged 45.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Canton: The usual interruption to business consequent upon the Chinese new year has tended to keep the market closed, whilst the favourable advices received from London by the 10th January mail, has caused buyers to evince some anxiety to purchase. The consequence is that the few Chops of Congou settled show an advance on previous quotations. The following are the settlements reported since last mail. Congous: 4 chops of Oochows at 25 to 26½ taels, and 1 chop Oopacks at 29½ taels. Scented Teas: 500 boxes common Caper at 13 taels and 250 boxes good Orange Pekoe at 26 taels. In other descriptions nothing has been done. The stock remaining on the market is thus stated:—Congou: 58 chops beside Tyshans and Canton packed; Scented Caper, 30,000 boxes; Scented Orange Pekoe, 16,000 ditto; Oolong, 2,000 half-chests; Plain Orange Pekoe, 1,000 ditto.; Flowery Pekoe, 150 ditto; Country Greens, 16,500 half-chests; New, and 1,824 ditto Old. Shanghai.—Black: The market has again been very dull and during the past week no transactions have taken place owing to the native holidays. Three chops have been settled during the fortnight at prices fully up to our last quotations. The stocks continue very small and have not been increased by arrivals from Hankow. The settlements in the market amount to 1,967 chests Congou: reshipments on owner's account 3,800 ditto—together 5,767 chests; making a total for the season to date of 277,890 chests against 190,105 chests same time last year. Stocks 2,000 chests, Congou, and 1,800 chests Flowery Pekoe. Green: Settlements have been on a small scale and are principally confined to fine country teas which are now becoming very scarce; prices are fully supported. Common country teas, Hoochows and Japans, are quite neglected and would not be touched unless at a considerable decline on previous rates. Shipments and settlements amount to 11,323 half chests China, and 381 half-chests Japan, making total to date of 237,438 half-chests, and 17,242 half-chests against 173,793 half-chests, and 23,977 half-chests respectively same time last year. Stock in all about 15,000 half-chests.

FOOCHOW.—Purchases of Congous and Oolongs continued to be made up to the 17th inst., that is to say, until New-Year's Eve. The market then closed firmly at one tael advance, and has not again reopened. The settlements reported since last mail are as under. Congous: 10,700 chests and 11,800 half do. at 5 to 14 taels for ord. and broken leaf; 14 to 17 taels for good com. to second better; 17 to 23½ taels for good flavoury to Kaisow kinds. Souchongs: 300 chests at 20 taels for common. Flowery Pekoe: 100 chests at 19 taels for fair. Oolongs: 22,300 half-chests at 11½ to 15½ taels for com. to good cargo. Scented Teas: 6,600 boxes at 18½ to 22 taels for fair. Of green teas the market has been swept on native account for shipment to Shantung. The stock now remaining on the market is thus estimated. Congous: 18,700 chests (say 10,000 ord. 7,000 good com. to second better, good flavoury to Souchong kinds 1,700). Souchong: None. Oolongs: 5,300 half-chests only. Scented Teas: 2,000 boxes. The total supplies of Congous this season amount, inclusive of contract teas, to 570,300 chests, against 513,100 ditto at the same period last season. The total sales this season are 501,600 chests.

HANKOW.—No transactions are reported as having taken place since last mail. 5 chops of Congou have arrived from the country during the fortnight, 3 of which being contract Teas, were shipped to Shanghai. The stock remaining on the market is reported at 12 chops, and it is known that a few chops still remain in the country. The total settlements of the season to date amount to 347 chops, Oonams, Oopacks, and Hohows, besides 89 chops contract Teas. So that the total supply of the present season from this one port only will be very little short of 500 chops Congou.

KEWKIANG.—Green Teas: The hopes entertained of the teamen easing their rates on the approach of China new year, have not by any means been realised. They have, on the contrary, evinced much firmness, and it must clearly be accepted as a fact, that the crop of Green Teas is really short. Supplies come in slowly—the stock on the market is below 50,000 packages, and it is confidently asserted that 12,000 packages now in the country will complete the season's yield. The settlements of the fortnight are reported at 7,000 packages, all for shipment to New York. The rates (duty paid) for these were 31 to 37 taels for Moyunes, medium to fine; and 27 to 33 taels for Fochows, same range. The shipments which have been made to Shanghai, have been principally on account of the teamen.

YOKUHAMA.—The advices from London per mail of the 10th Nov. had caused exporters to retire from the market. This circumstance, combined with the large stock and the approach of the new year, caused rates to fall between $2 to $3. The consequence was that a large business was done, the settlements during the month of January amounting to no less than 12,000 piculs, the stock remaining being fully 8,000 piculs. The following are the latest quotations:—Trashy and ord., $5 and downward; common, 7½ to 12½; middling, 15 to 22; good, 25 to 28; the best, 30 to 34.

RAW SILK.—SHANGHAI.—During the fortnight very few transactions have taken place, on account of the holidays. Prices are unchanged, but with the few settlements of only 400 bales China, they must be considered nominal. About 1,300 bales have arrived from Japan. Regarding the coming yield, advices from Ningpo state that a great mortality of the worm had occurred in the silk districts from starvation. Settlements since last mail are reported at 1,700 bales, against 2,000 bales at corresponding fortnight of last season, and 1,500 ditto of season before. The total settlements of the present season to date are 60,000 bales against 57,000 same period last year, and 71,500 the season before. The present unsold stock is estimated at 3,000 bales, against 8,000 same time last season, and a like quantity same period the season before. The Custom-house having been closed for the Chinese holidays, the usual statistics of exports cannot be given. Tsatlees, No. 1, tls. 480 to 490 per picul; 2, 455 to 470; 3, 435 to 450; market, 3, 420 to 430; 4, 405 to 415; 5, and com., 380 to 400; Taysaams, No. 1, 405 to 415; 2, 375 to 395; 3, 345 to 365; 4, 5, and com., 310 to 340; Yuenfa, No. 1, 430 to 440; 2, 400 to 420; 3, 375 to 395; 4, and com., 360 to 370; Hainings, 360 to 435; Sewhing, mid. to inferior, 300 to 320.

CANTON.—The article continues scarce and wanted. Quotations are nominal and form no guide.

YOKUHAMA.—A large business continued to be done. The settlements for the month of January amount to 2,500 bales, making a total for the season to date 18,500 bales, against 6,500 bales for the corresponding period of last season. Supplies continued to arrive prices for good and fine were well maintained, whilst for the inferior qualities a material advance had been established. The following are the current quotations, which it will be observed are even above those given in last report. Ids, medium $500 to 540; Mybash best dyepots $550 to $560; middling $525 to 540; inferior $575 to 580. Soday $470 to 500 for No. 1 and 2. Oshio $525 to 550 for the best rereeled—$475 to $500 for medium and $425 to 450 for common. Coshio, fine $460 to 475, middling $400 to 440, common $365 to 375 Hadsiojee $375 to 400 per picul.

DRUGS, &c.—Cassia Lignea: No sales; stock 400 piculs, for which $16.75 is asked. Cassia Oil: Nominal, at $215 per picul. Cassia Buds: A lot of 25 piculs is on the market, for which $48 is asked. Rhubarb: Nominally as last quoted; small stock, no sales. Gamboge: No stock. China Root in very small stock, and worth about $4.25. Galangal is also in limited supply, and commands $3.50 to $4. Camphor: The market has fallen to $26. Yokuhama: $30 to $32 per picul.

RAW COTTON.—Canton: The market has been in a quiet state, owing to the Chinese new year holidays. The only transaction reported is the sale of the remaining lot of 290 bales Tinnivelly for shipment to England at two taels advance. Holders are not disposed to part with their stocks, and the following advanced quotations are therefore nominal. Bombay 14*t* 6*m* to 16*t* 2*m*. Bengal 14*t* 5*m* to 15*t* 7*m*. Shanghai, 14*t* 8*m* to 15*t* 3*m*. The stock unsold on the market is stated at 1,560 bales Bombay 185 do. Bengal, and 11,700 do. Shanghai. Hong Kong: The settlements of the fortnight are reported at 7,000 bales, principally for shipment to Europe, but the Chinese are now buying for native wants. The quotations have advanced and close firmly as follow: Shanghai, $20 to 21; Ningpo, $21½ to 22½; Japan, $23 to 23½. Shanghai: There are large orders in the market for shipment to England, but the dealers are unwilling to operate until the market shall open after the holidays. The capacity of China for supply will then be put to the test. Two ships have sailed for England since the departure of the last mail, and two for Bombay. The quotations tend up, and may be called 12*t* to 12*t* 3*m* for common, up to 12*t* 5*m* to 13*t* 2*m* for fine. Yokohama: $16 to 17 per picul.

CHINA IMPORTS.

COTTON YARN.—The sales reported in this market during the past fortnight amount to 597 bales, at rates which show a very material advance upon the quotations given in last circular. There are not any transactions to report from Canton, but prices are also quoted considerably higher from that port.

GREY SHIRTINGS.—Nearly 5,000 pieces of these goods have changed hands since the close of the holidays; and although the advance established is not quite so great as compared with that obtained on Yarns, the market closes very firm.

WHITE SHIRTINGS have been much inquired for, and the settlements of the fortnight are put at 8,386 pieces. Stocks are now very moderate, and enhanced prices will doubtless be shortly obtainable.

T-CLOTHS have gone into consumption to the extent of 6,700 pieces, and prices show some improvement, although they are still considerably below the value obtainable for the same description of goods in Shanghai.

AMERICAN DRILLS are in excessively small stock, and there are not any transactions to be reported.

WHITE SPOTTED SHIRTINGS, Dyed do., Brocades, White and Coloured, remain without material change to notice, the transactions of the fortnight being comprised in a sale of 1,000 pieces of Dyed Spotted Shirtings and 800 pices of Brocades at the annexed quotations.

CHINTZES AND HANDKERCHIEFS.—Of the former there have not been sales, but some 3,600 dozens of Handkerchiefs have been placed at rates which do not show any improvement upon the quotations given in last report.

RAW COTTON.—An improvement in the value of this staple to the extent of $1.50 to 2 per picul, as compared with the rates obtainable in the end of January, was noticed in last circular, and to-day's quotations

Digitized by Google

must be considered fully $1 to 1.50 higher than the prices quoted a fortnight ago. A fair amount of business also has been done during the fortnight, some 10,000 bales of Shanghai cotton having changed hands. From Canton no transactions are reported, but prices of both Indian and Shanghai growth had improved slightly. The stock of the former is now reduced to about 2,500 bales in Canton.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths: There is no improvement to notice in the value of these goods, as compared with previous quotations, and the sales of the fortnight have been confined to 289 pieces of Assorted Spanish Stripes sold here, and 216 pieces placed in the Canton market.

LONG ELLS.—There has been a fair inquiry during the fortnight without, however, leading to any advance in price for these goods in Hong Kong, and the sales are put in at 780 pieces of descriptions. In Canton 200 pieces have found buyers, quotations there also remaining as previously given.

CAMLETS.—There are not any sales of these goods to report from Canton, while in Hong Kong the business has been limited to 120 pieces of English manufacture.

LASTINGS show an improvement of about 50 cents per piece, with 440 pieces sold here.

METALS.—Iron, Flat, &c., remain much as before, the sales of all descriptions being put at about 4,500 piculs. In Canton nothing doing.

LEAD has been in fair inquiry in Canton, but prices have not been maintained. The sales in Canton are put at 1,300 piculs; nothing done in Hong Kong.

TIN.—464 slabs placed here at about previous quotations constitute the business of the fortnight.

TIN PLATES.—There are no sales to report from Hong Kong. In Canton 200 boxes have found buyers.

COALS.—At Hong Kong $8 to $9.

EXCHANGES ON LONDON.

FROM HONG KONG.—For Liverpool, Feb. 18: Edith Moore, and H.M.'s steamer, Sphinx, for Portsmouth.

FROM MACAO.—For London, Feb. 18: Unrivalled. From Canton, for London, Feb. 14: John Banfield.

FROM SINGAPORE.—For Liverpool: Ceylon. For Capetown; Spinx.

FROM BATAVIA.—For England, Feb. 19: St. Snake. For Holland, Feb. 22: Veruniging; 26, Zaanstroom.

FROM MANILA.—For London, Feb. 18: Omegar. For Boston, 11: Aurora.

LOADING.

At YOKUHAMA.—For London: Copernicus and Ocean Gem.

At SHANGHAI.—For London: Ferozepore, Martaban, Egean, Leichardt. For Liverpool: Caldera, Charlotta, Cyclone.

At FOO-CHOW-FOO.—For London: Ceylon, Geologist, Alicia, Annie, Algerman.

At HONG KONG.—For Liverpool: Cumberland, Foam.

At MANILA.—For New York: Cyclone, Mountain Wave. For Cork: Caprera, Leander, Mary Fry. For Cadiz: Cervantis, Gertrudis. For Boston: Danube. For Melbourne: Schah Jehan, For San Francisco: Rattler.

At SINGAPORE.—For London: West, Isabella. For Outports: Olympia, Little Edith, Frida. For New York Revere: For Bordeaux: Singapore.

At PENANG.—For London: Wilhelmsburg.

FREIGHTS AND CHARTERS.

SHANGHAI.

The new year's festivities has caused business during the fortnight to be almost entirely suspended. The prospects are good. Ships will be wanted for cotton to England, and rice being on the advance, grain charters will doubtless be in the market. The ice having broken up very early at the northern ports, a fair coast trade may also be expected. The new teas will be very early this year, and clipper ships will be wanted within a couple of months to take them to London.

The following rates are those nominally current, and may be deemed generally a shade too low. To London and Liverpool: £3. 15s. to £4 for tea and cotton, £5 for silk (per ton of 50 feet). To New York: $15 for tea (per ton of 40 feet). To Nagasaki: $4 per 40 feet and 25 cents per picul. To Kanagawa: $5 per 40 feet and 25 cents per picul. To Teintsin: 7 tls. per 40 feet. To Tientsin the same. Hongkong: $4 per 40 feet. Cotton $1.20 per bale. To Amoy: Cotton $1.25 per bale. To Foochow: $4 per ton.

KANAGAWA.

To Shanghai $4 to 5 per ton for steamers and $3 to 4 per picul for Silk. To London £6. 10s. for Silk, and £5. 10 for Tea.

HONG KONG.

Notwithstanding the Chinese holidays, a considerable business has been done in freights during the past fortnight, chiefly for the coast. Two vessels have been taken up for California, and there are two more wanted, as the passenger trade has fairly commenced, and is likely to be very large this season. Some animation has been shown in London Freights, though the number of ships on the berth does not greatly exceed that of last year at this time. Bangkok rates are low, but will advance within the next week, in all probability. The eagerness of masters and agents to procure Charters to Rice Ports, to return in time for teas, has been taken advantage of by charterers, and rates have been depressed. At Amoy and Swatow coast business for small vessels is very good. At Foo-chow and Shanghai the spring business has not yet commenced, at Manila tonnage is plenty, with no demand. As a whole freights have advanced rather than receded in China, and we confidently look forward to a steady improvement during the next few weeks. The actual settlements are: Great Britain.—Pysche, Danish barque, 250 tons, on the berth from Whampoa to London, at £3. 15s. per ton; Cumberland, British ship, 925 tons, on the berth to Liverpool, at £4 per ton; Margaret Mitchell, British ship, 894 tons, on the berth to London, at £3. 10s. to £4; Peterborough, British barque, 560 tons, on the berth to London, at £4. 10s. United States: Storm King, American ship, 1,500 tons, on the berth from Whampoa to New York, at current rates; Sarah Newman, American ship, 900 tons, hence to San Francisco,

Digitized by Google

$15,500 in full; Elizabeth Kimball, American ship, 1,000 tons, hence to San Francisco, $16,500 in full. Colonies: Margaret Eliza, British barque, 420 tons, on the berth hence to Melbourne or Sydney, at £3. 10s. former, £4 latter port; Mary Bradford, American ship, 800 tons, on the berth hence to Melbourne and Sydney, at £3. 5s. former, £3. 10s. latter port. East Coast: Brem. barque, 504 tons, hence to Shanghai, 50 cents per picul; Hever, Ham. brig, 180 tons, hence to Shanghai, $2,000 in full; Harvest Queen, American ship, 316 tons, hence to Shanghai, 52½ cents per picul; Fiery Cross, British ship, 674 tons, hence to Shanghai, current rates.

MANILA.

In consequence of the little sugar yet available for shipment, there is no demand for tonnage for the U. K., and there have been no settlements since last mail. The nominal rates of freight to a port in the U. K. are £3 per ton for sugar and £4 for hemp.

SINGAPORE.

To Great Britain, £3. 5s. dead weight, and £4. 10s. light goods. Tonnage rather scarce.

BATAVIA.

To Great Britain, £3. 10s., and to load at rice ports, £3. 10s. to 15s.

CASUALTIES.

HONG KONG.

c The American barque Houqua, Capt. Cartwright, left the harbour on Feb. 24th last bound to Shanghai. Through the carelessness of the Chino pilot, she is represented to have got in a position to the northward of the island, from which she cannot be extricated without the assistance of steam. The news was brought in yesterday by the Lucy E. Ashby, and the Sycee was quickly despatched to the assistance of the Houqua, but unfortunately the hawsers fouled the screw of the steamer, and in consequence of the heavy sea on at the time, it was impossible to clear it. The steamer Whampoa left this morning to the assistance of both vessels. The Houqua is making seven inches of water per hour.

The Undine, from Foo-chow, proceeded to Whampoa to dock, having, on Feb. 10th, had a strong northerly set with calm weather, in an impenetratable fog, struck the South Ninepin Island with jibboom end. Engines being reversed going astern full speed – backed out and proceeded, with loss of jibboom and figure head, the Island being a sheer precipice. The iron hull was not even scratched.

SHANGHAI.

The Prince of Wales, from Newcastle, had a very long and disagreeable passage. She experienced heavy weather in the English Channel, and crossed the equator on the 17th July, in long. 29.00. Ran down the N.E. Trades with fine weather, and rounded t e meridian of the Cape on the 9th August, in lat. 39, and experienced a series of heavy gales. Running down the Eastings was compelled to jettison a quantity of the cargo, and a great portion of the bulwarks was carried away in consequence of the decks being continually flooded. Passed Anger on the 21st October. Up the China Sea a series of calms and light weather prevailed. Was at anchor four days within two miles of the light ship, and although several of the Pilot cruisers passed with pilots on board, none could be obtained, but several vessels with heavier drafts anchored about half a mile astern had received them from the boats. The British ship Rhine arrived near the Light Ship in a disabled condition. The crew all being laid up with sickness; she was worked up to the anchorage by five pilots, and towed to Shanghai by the Washington steam-tug.

SWATOW.

Mr. F. Goarlach, pilot, seeing a vessel outside (about 4 P.M.) proceeded out in his boat with a crew of five Chinese to board her, but it setting in dark he missed her and was seen off the Sugar Loaf returning; at this time it was blowing half a gale of wind. Darkness set in and his not coming in, a search was made, but that night no intelligence of the boat was found until the next day when search was made again and the boat was found on shore stove all to pieces, and the body of one of the crew. Since then the remaining bodies of the crew have been recovered, but no accounts of the unfortunate pilot who was only lately married. The event has caused much gloom among the small community at Double Island, as the deceased was universally respected.

PASSED STRAITS OF SUNDA.

From China to England and Continent, Feb. 17, Antipodes; 17, Radnagore; 17, Spirit of the North; 17, Brierley Hill; 17, Robert Benderson; 17, Gresham; 19, Gorilla, Zealandia; 19, Queen of the North; 23, Burman; 25, English. SHANGHAI AND THE TAIPINGS.

The *Daily News* of April 10td had an article on "the decay of Taipingdom," which contains some truth and a large amount of error. The injustice and ignorance of the writer are strikingly displayed in the opening paragraph, which is a gross calumny on the character of European residents at Shanghai. If it were true they would, long ere this, have been driven from the settlement:—

"The truth is that an altogether fictitious importance was given to these rebels by their approach to Shanghai, where they interfered uncomfortably with foreign security and trade. That settlement is composed chiefly of energetic young English merchants, whose time is only half occupied, and each of whom firmly believes that it is entirely the fault either of the mandarins or Taipings, but more especially of Sir Frederick Bruce at Peking, that he has not 'made his pile,' and is not comfortably seated in the Oriental Club in London. Like Mr. Thackeray's 'Philip,' these young gentlemen cry out very lustily when anything annoys them, and they made so much work about the presence of the Taipings that it might have been imagined all China was in its death agony."

THE ANGLO CHINESE FLEET.

From this small but carefully equipped force we expect great achievements. It is a curious proof of our confidence in the appliances of civilisation and in the skill of our countrymen, and it is a pleasant token of the improvement in public morals, that while we send out six small ships and a little band of men to take part in the civil war and intestine commotions of a conglomerate of mankind numbering one-third of the human race, we never ask ourselves whether it is possible that so small a force can have any effect upon such a vast empire, but only whether the cause in which they go is a good cause, and whether the use they will make of their power will be such as may be creditable to a Christian people. Reiterated wars and continual layers of Income-tax have forced upon our public some slight study of Chinese matters, and, although the popular notions of China are still somewhat vague, there are a few ideas which have become tolerably fixed in the mind even of a London elector. We have all, for instance, come to the conclusion that the marauders who are called rebels, or Taipings, are not a political party or a national party, but simply a social disease. We know now that they are only the idle, the destitute, and the ignorant, congregated upon an enormous scale, and plundering in great multitudes; and we know that there is nothing to be said in their favour, except that they may occasionally aid the least respectable of our merchants to smuggle in goods duty free. Sometimes, indeed, as at this moment, they may lessen the price of silk at Shanghai by plundering the silk districts and selling their booty, and by driving all the up-country stocks into that treaty port as to a place of safety. It is said there are agents now in London buying up and shipping arms and powder to be smuggled into China and bartered to these Taipings in exchange for the plunder gathered in Hangchow and Soochow and in the rich districts of the silk manufacture. The proceedings of these worthies will, however, only illustrate the shrewd remark to be found in a despatch from Lord Elgin, printed in the last China Blue-book: "The moral evils of smuggling in China are not redeemed by any material benefit to the general interests of trade." Whenever those arms are used, it will be against the interests of European commerce as much as against the Imperial Government, and against all feelings of humanity. What is this fleet going forth to effect? We do not ask what the plan of operation may be, for in all probability none has yet been resolved upon—but what are its general objects? These have been already stated with more or less precision, but as the exp anations are buried in reams of diplomatic correspondence, they have not been read by the public. Let us, then, cull such information as we can obtain from the Blue-books. In the first place, this Anglo-Chinese fleet goes to establish Imperial authority on the Yang-tse. In this object political and commercial considerations equally combine. In a despatch from Mr. Wade, which is printed in the Blue-book before us, it is clearly shown that the Taipings have never "held" any province in China, although they have infested several. They have, however, held one city. Pillaged, ruined, and decayed as is the once magnificent city of Nanking, broken to potsherds as is its Porcelain Tower, burnt or dispersed as are the celebrated libraries of the Golden Island, desecrated as is the cemetery of the Ming dynasty, whom these Taipings commenced by professing to revere, Nanking has still been undoubtedly "held" by these people. Nanking was the southern capital of the enormous empire. If there had been any life or constructive power in the Taipings, it might have been the capital of a new empire, carved from the too unwieldy old one. Ten years' experience has, however, proved that there is nothing of these qualities in the Taipings. Instead of being the capital of a Government, Nanking is the stronghold of robbers, whence they issue and to which they return. As a matter of prestige to the Imperial arms, the first serious task imposed upon Captain Osborn will be to recover Nanking. The Taipings foresee this, and are using their best endeavours to provide against it; but, as they have already ruined the city and exhausted the neighbourhood, it is not probable the defence will be much prolonged. This will be a blow upon the head of the rebellion, but it will also be good service done to honest traders. The Yang-tse river in China—an empire without roads—is the great highway; and, as Nanking is on the Yang tse, the establishment of this piratical power at Nanking is like the establishment of a confederacy of highwaymen half-way up Cornhill. Any set of policemen who would destroy such a nest of depredators would deserve our thanks. We shall be very glad to hear of the fall of Nanking and of its being held, to prevent bloody reprisals, by Captain Osborn's force. To explore the inner waters, re-open the traffic upon the Grand Canal, establish telegraphic communications along the principal thoroughfares, and teach the Chinese the use of steam, is the second and not less important object of those going out to China. There are many great rivers in China yet to be surveyed, and many great commercial cities still unknown. It is not that civilisation is wanted, but there is in China a hitch in its progress. After running far ahead of the rest of the world it had stopped, and has let the rest of the world pass it. Clothed with Imperial authority, and having conquered Nanking, Captain Osborn will be able to present steam and electricity to minds capable of understanding their practical importance directly they see them in work; and if steam and electricity once take hold of the interior of China, and of the commercial instincts of the people who dwell there, the "hitch" is removed, and civilisation will march forward again there as it does here. A third object is to put down the piracy which now exists between the open ports. But all these are second to the first great necessity of breaking up the nests of the Taiping robbers, and putting the Imperial Government in a position to protect its own people and discharge its obligations towards other Powers. The first is a necessary preliminary to the other two. All these, however, are objects which must command the sympathies of every one who does not seek to make money by supplying the Taipings with the instruments of robbery and massacre, or who does not desire to use the Taipings as a covering party to some operation of smuggling, or who is not under the influence of some incurable delusion. There are persons, of course, in each of these categories, but they are, we apprehend, very few in number and utterly without consideration either here or in China.—*The Times.*

BRITISH RELATIONS WITH JAPAN

It has become quite clear that England cannot maintain its present relations with Japan. We must embark in another "little" war, or leave the Japanese to enjoy their old isolation. The position of our Legation and

Digitized by Google

our merchants becomes worse every day, and the general ill-will towards and constant attacks upon both, prove most decidedly the existence of a national antipathy to foreigners, and the inability or unwillingness of the Government to restrain it. The fact is that the Japanese Government either repents its admission of foreigners to settle and trade; or with Oriental deceit intended from the first that the concession should be practically inoperative; or, retaining its own opinions in favour of the policy which the treaties inaugurated, has been compelled, by the pressure of national opinion against the foreigners, induced not a little by their own misconduct, to abandon it. There can be no doubt that the dominant party in the empire desires to expel the foreigner and resume the ancient system of isolation. It is too shrewed, however, to attempt to openly break the treaties and forcibly expel the settlers. The Japanese statesmen are clever enough, and they know that England and France would soon take a very signal vengeance for such acts. They labour, therefore, to effect their end in an underhand manner; or perhaps we should say more correctly that the Government has no part in these murderous attempts, but that the strength of the national feeling prevents it from taking any effective steps to prevent and punish them. But whether the Government be privy to them or not, the English Government cannot any longer expose its servants to such dangers. We must withdraw the legation and our consuls for a time, or at least withdraw them to the particular port to which the Japanese desire to confine them; or we must send a sufficient force to Yedo and the other ports to protect the Minister, consuls, and settlers, and take ample satisfaction for any further outrages which may be attempted against them. If we adopt the latter course we enter upon the same work of bloodshed which we have been pursuing so energetically in China for 20 years past. We have not the slightest doubt that our commerce would have developed itself quite as fast without the opium or lorcha wars; but certainly China is a country with great commercial capabilities, and a very extensive commerce has sprung up between it and Europe. Now, the commerce of Europe with Japan is never likely to be large. The natural productions of the empire are few; the wants of the people very small. They grow silk and tea, but the silk, although very good, is not produced in any large quantities, and the tea, as well in the character of the leaf as from the inferior system of preparation, cannot compete with the Chinese. The only really profitable trade done with Japan by Europeans and Americans in all the years it has been opened to us is that of money-dealing, in which the ignorance of the people and Government have given them large profits. It would not, then, be worth our while to go to war with Japan to enforce the free admission to the empire of our citizens and our goods, and it certainly would an act of gross injustice to do so. If the Japanese deem it better for their own happiness to exclude foreign nations from all intercourse with them they have assuredly a full right to do so.—*Standard.*

Parliamentary Intelligence.

HOUSE OF COMMONS.

FOREIGN AND COLONIAL POSTAGE.

(26th.) Mr. CAVE asked the Secretary to the Treasury whether it was intended to abandon the principle of a uniform rate of postage to British possessions abroad by doubling the charge upon letters to the British West India Colonies, while reducing that upon letters conveyed by the same line of packets to foreign countries even at a greater distance, and, if so, for what reason.—Mr. PEEL said the principle of a uniform rate of postage had already been abandoned in the case of letters to Hong Kong and Singapore. It had been determined to adopt a 1s. rate of postage for the Cape and the West Indian Colonies, because the 6d. rate was insufficient to pay the expense of transmission, and because an increase within certain limits of the terms of postage did not affect the amount of correspondence in any material degree. The charge for letters by private ship was, however, only 3d. or 4d., so that there were, in fact, two rates, one for those to whom speed was of importance, and another for those who had to study economy. The 1s. postage had been fixed in the case of Mexico and Cuba, in order to assimilate the rates to those of our colonies.

THE DIPLOMATIC SERVICE.

(26th.) On the order for going into Committee of Supply, Mr. DODSON called attention to the charges for the diplomatic service, entering into various details and adducing examples to show the complication in which the diplomatic expenditure was involved, and moved a resolution, "That all sums required to defray the expenses of the diplomatic service ought to be annually voted by Parliament, and that estimates of all such sums ought to be submitted in a form that will admit of their effectual supervision and control by this House."—Mr. LAYARD said no doubt what had been stated by Mr. Dodson was to some extent true, but the system had hitherto worked well, and he opposed the resolution on two grounds—economy and the efficiency of the public service. If the diplomatic charges were annually submitted to the House, he had no doubt (for reasons which he explained) they would be considerably increased, while the service would be less efficient than it was. Such a change would, he believed, be fatal to the efficiency of our diplomatic service. Formerly, when a change of Government took place, there was also a change of our representatives abroad, but that system had, to a great extent, disappeared, and, consequently, our diplomatic agents had become independent of any political parties, obeying simply the instructions of the Minister of the day. But if, every year, diplomatic salaries and missions were discussed in that House, it would lead our agents abroad to look more to Parliament, and to become greater politicians at home. It was true that in the cases of Japan and China the House had been asked to vote sums for diplomatic salaries in addition to the £180,000 which had been agreed upon; but those cases were peculiar, a large diplomatic and consular staff having to be created in both of those countries. The experience gained by those votes did not encourage the proposition to submit all diplomatic salaries to annual discussion, for, instead of diminution in amount, appeals were being constantly made in that House for additional Consuls to be appointed. While the Foreign-office was limited to the expenditure of £180,000, it was compelled to restrict its expenditure to that amount.—The CHANCELLOR of the EXCHEQUER also spoke against the resolution, which was negatived by a large majority.

THE NEW METAL, ALUMINUM.—Among the most curious and interesting articles exhibited at the International Exhibition, was a display, on a small scale, of ingots of *aluminum*, of a degree of purity hitherto unattained since the metal was first discovered in 1827 by Wöhler. Previous to the collection we are about to notice, it had been in pretty general use, slightly alloyed, for small brooches, &c., the researches of Prof. Deville since 1855 having greatly improved it, though still leaving much to be done, ere it could vindicate itself against the reproach of being only suitable for toys. Its colour at that time was of a dull bluish leaden hue, attesting the presence of some alloy most difficult to be got rid of, as the ore resisted the strongest heat applied to purify the metal from this infinitesimal but most detrimental impurity. With the experience since acquired, however, of which the articles displayed at South Kensington were the expression, this difficulty, it was easy to perceive, must disappear, and we have recently been favoured by Messrs. Mappin Brothers, at their West-end establishment, 222, Regent-street, with a private view of a very remarkable collection of articles of *vertu*, as well as of everyday use, manufactured in the new metal and its alloys by that well-known and enterprising firm, showing not merely the infinity of uses to which the metal itself is applicable (at a price no greater than platedware, though only one-fourth of the weight), but also a capacity to amalgamate with other metals, especially copper, which marks it as destined to play no inconspicuous part in the fine arts. Here, besides every ordinary purpose of the breakfast or dinner table-service to which silver is applicable, will be found extraordinary imitations of gold, of bronze, of oxidised silver in every variety of pattern, besides unmistakable evidences of its extraordinary ductility, tenacity, hardness, and absolute incapacity to rust, both in its pure and alloyed state,—the latter, a most invaluable quality, in which it differs from every known metal, except perhaps platinum and its cognates. On the whole, we do not know of a more unique selection than that of Messrs. Mappin, and we heartily recommend the adoption of the new metal in all cases where lightness, elegance, and durability are *desiderata*.

THE "SAGINAW."—*The Times'* San Francisco correspondent writes:—"The United States' steam gunboat *Saginaw*, originally built in California of native-grown timber, and which was condemned in China for dry rot, was brought over to this country and effectually repaired at the navy-yard on this bay. She is now fully restored and fit for sea, waiting only to ship her crew. Her case proves, what I have frequently asserted, that our own Government has on this coast the timber suitable for the building of gunboats and iron-clads for the protection of our colonies. I trust the Government will stir itself to do something with this view in the North, else our neighbours, with all their 'preparations,' will steal a march upon it."

Continental Intelligence.

FRANCE.

The *Moniteur* announces that all the centres of the Annamite insurrection have been dispersed, and the fortifications and batteries of the insurgents taken by the French troops. "All resistance has ceased. But few men have been lost in the campaign, which was, however, very fatiguing."

Prince Napoleon is about to absent himself from France for a short time. His yacht, the *Jerome Napoleon*, has been ordered to get ready to sail at short notice. The Prince will probably pay a visit to Egypt. Since his speech on the Polish insurrection a coldness has sprung up between him and the Emperor.

It is officially stated that the last reports received from Mexico announce that General Forey had summoned a council of all the generals and chiefs of the service for the 28th Feb., in order to arrange the details of the movement on Puebla, and give them their final instructions. The siege was to commence on the 16th March. The parks of artillery, the war material, and a great depot of stores were concentrated at Quecholac, to which place all the munitions necessary for the first operations had been conveyed. The sanitary condition of the army was satisfactory.

Admiral Jurien de la Gravière has been recalled from Mexico. The reason officially assigned for his recall is, that the importance of the French naval forces in the Mexican waters is no longer such as to warrant the presence of an officer of that rank.

It is reported that the general election to the Corps Législatif will take place in the first fortnight in June.

It is stated, on "reliable information," that the French Government has intimated to its diplomatic representatives its determination to pursue a new and decided policy in regard to Poland, by demanding the independence of that country, with the Duke de Leuchtenberg as its constitutional sovereign. The Duke de Leuchtenberg, as everybody knows, is connected both with the Russian and the French reigning families, and was lately put up for the Crown of Greece.

The French Legislative Body, by a majority of 225 votes to six, have passed a Bill for calling out 100,000 men from the

Digitized by Google

class of 1863. It is about one-fiftieth part of the picked youth of France. Although a very little aggravation in the method of a Conscription seems to put it beyond the endurance even of a conquered people like the Poles, the French submit to it as we submit to the Income-tax—as a fatality from which there is no escape. It seems, however, that there is even in France a germ, or residue, as it may happen to be, of opposition to Conscriptions and great armies. The figure 100,000 represents only the new conscripts actually taken away to be drilled. The number which represents the enlisted, the re-enlisted, and the substitutes is 200,000, or about one in 25 of the picked male youth of the kingdom. M. Picard ventured to think this too great a draught to be drawn off every year, and desired to be allowed to examine the reasons for this vote of 100,000 instead of 80,000 men, and asked for a smaller contingent. But these matters are held to be beyond the province of the Legislative Body. "Confiding," says the report, "in the policy of which the Emperor alone knows the necessities, and which has exalted France so high in the face of the world within a few years, your Committee think that in the present state of things, and for a period impossible to predetermine, a contigent of 100,000 men is necessary." M. Picard considered this reasoning to be unsatisfactory, and the confidence to be too blind. It was, however, explained to him by General Allard that "the contingent of 100,000 instead of 80,000 men forms a fundamental basis of the actual organization of the French army." The General considered that this ought to have satisfied M. Picard, and he complained that not only was M. Picard never weary of contesting the figures of the contingent, but that he (General Allard) was obliged to reproduce this reason for the tenth time. When a Frenchman is told that the fundamental basis of the organisation of the French army is the consumption of 100,000 men per annum, and that the unknown necessities of the unknown policy of the Emperor require that this should be adopted as a rule of indefinite duration, he is told in effect that this is a matter with which he has nothing to do. Moloch will have his 100,000 men a-year, and France must provide them.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, April 6, 1863.

A Bill for confirming the concession granted to Mr. Poolmann and his consorts for the construction of a railroad in Java from Samarang to Djokdjokarta, passing through Soerakarta, has been presented to the Second Chamber of the States General by the Colonial Minister, accompanied by the following documents, but with the understanding that their contents are for the present to be kept strictly secret and considered by the members as confidential:—1. A memorial of the Governor-General of Netherlands India, dated Batavia, August 28, 1862; 2. A dispatch from Mr. Stieltjes, Adviser of the Colonial Department to the Governor-General, dated Salatiga, January 8, 1862; 3. A report in answer to the demand for a concession; 4. A memorial from Mr. Dixon, principal Civil Engineer for railroads and industrial undertakings in Netherlands India, on some questions laid before him for his technical opinion; 5. Two plans (on the scale of 1 to 5,000 and 1 to 50,000) of the country between Samarang and the Regencies; 6. A copy of the demand for the concession, with marginal notes containing sundry explanations of detail; 7. Some statistical tables of the traffic; 8. Dispatch from Mr. Stieltjes, dated January 16, 1862, No. 9, accompanied by the Report of Mr. Roorda van Eysinga, dated December 23, 1861, No. 34; 9. Letter from Mr. Dixon to Mr. A. Loudon, Secretary-General at Batavia, together with a Report dated Samarang, January 26, 1862; 10. Two maps showing the lands under rice cultivation and the forests in the Residency of Samarang; 11. Opinion of the Director of the Civil Public Works, dated February 15, 1862, No. 376, containing draft of the conditions under which the Concession should be granted; 12. Opinion of the Director of Produce and Civil Magazines, dated Feb. 22, 1862, No. 1,357; 13. Opinion of the Director of Finances, dated April 30, 1862, No. 4,481; 14. Opinion of the Military Commander of the E. I. Army, dated June 19, 1862, No. 83; 15. Dispatch from Mr. Beyerink to the Governor-General, dated Salatiga, July 6, 1862, with a sketch map on the scale of 1 to 200,000; and 16. Opinion of the Council of Netherlands India, dated Batavia, July 25, 1862, No. 27.

Some alterations have been made in the original Concession granted provisionally by the Governor-General, the principle one of which is that the guarantee for thirty-three years has been reduced from 5 to 4½ per cent. per annum, and consequently the responsibility of the State lowered from 700,000 to 630,000 florins. After some preliminary discussion as to the expediency of printing the above papers, which was negatived, the general debates were postponed till after the Easter recess.

The Bill for confirming the decree of the Governor-General allowing the free importation, without payment of any duty, of paddy and rice in Java and Madura, and abolishing the import duties on all articles of food in the whole of Netherlands India, was passed unanimously by the Chamber after a short debate provoked by Mr. Cool and answered by the Colonial Minister, after which the sittings were adjourned till after the Easter holidays.

At length the "Amsterdam Canal Company" is finally constituted and has issued its prospectus. The capital required was 18 millions of florins, three millions of which were subscribed beforehand by the municipality of this city, leaving only 15 to be taken, but the rush was so great that a far larger sum has been subscribed for than is wanted. The allotment of shares will therefore be made in proportion to the sum subscribed. Several members of the Royal family had their names put down for large amounts. It will not be wonderful if the shares are shortly at a high premium, as the advantages are so many and so valuable. In the first place a guarantee by the State is given for the payment of 4½ per cent. interest during the progress of the works (which are calculated to last for six years) and the same interest for fifty years after their completion. One of the most important parts of the concession is that the company are to retain possession of the land recovered from the sea and made arable. The quantity of land thus acquired is estimated at 6,000 bunders (of 2½ acres each), and the value of such land in adjacent spots is no less than 3,000 florins per bunder, as it is found to be admirably adapted for the cultivation of mustard, of which large quantities are grown in this neighbourhood. Thus the whole amount of the capital would be covered from this source alone, independent of the tolls to be levied on passing ships, and the sale and lease of building lands at both ends, where of course dwellings, hotels, offices, warehouses, and other buildings must necessarily spring up in a very short time, if only for the accommodation of the officers and workmen employed. The canal will extend in a direct line from Amsterdam to Wyk-aan-Zee, passing through Zaandam. The total length will be 23 kilometres, or 14 English statute miles, and as the distance to the Helder by the Great North-Holland Canal is 79 kil. it follows that Amsterdam becomes practically removed 56 kil. or 35 English miles nearer the sea, whilst the distance from this city to London and all other ports south of the Thames is shortened by twice that amount, or 70 miles. The entrance dock at Wyk will be accessible at all times of the tide, and be capable of accommodating three hundred large ships; it will be three hundred yards wide and have a depth of 26 feet below ordinary low water mark. Steam-tugs will be employed to tow ships through the canal in three hours at all hours and seasons, for even in case of a severe frost the ice will be perpetually broken by the passing traffic and not be able to congeal firmly.

Under date of the 10th of March, the Naval Department gives notice to captains of vessels proceeding to Java of a communication received from the Governor-General of Netherlands India, announcing the completion of a new lighthouse, on the Western Haven Head at Batavia, which was lighted for the first time at sunset on the 1st of January last, and burns every night from sunset to sunrise. It is a catadioptric light of the fourth class, and is placed at an elevation of 16¼ metres above the level of the sea, at high water. It appears as a stationary light of a white colour, and is visible in clear weather at a distance of twelve English nautical miles from every point of the compass, serving as a land-mark for vessels entering the roadstead at Batavia. In making the anchorage on a southerly course, the light must be kept between S. ¾ W., and S. ¼ E. In coming from the West by Onrust, it is needful to steer S.E. by E. till the light bears due South, and follow this course to the anchorage. The lighthouse at Batavia hitherto in use is now no longer lighted up at night.

During the month of March the number of vessels arrived in this country from the Far East amounted to 36 (against 34 in February, 53 in January, and 14 in December), of which 21 brought cargoes for the Netherlands Trading Company, and 15 for the private trade. 14 discharged at Amsterdam, 16 at Rotter-

Digitized by Google

dam, 2 at Dordrecht, 3 at Schiedam, and 1 at Middelburg. 11 came from Batavia, 10 from Banjoewangie, 5 from Passaroeang, 3 from Sourabaya, 1 from Tjilatjap, 1 from Samarang, 1 from Wyncooper's Bay—altogether 33 from Java; and further, 1 from Padang, 1 from Maccassar, and 1 from Foo-chow-Foo. These vessels brought 128,084 bags of coffee, and 85,456 kranjangs of sugar (of which 106,840 bags of coffee, and 58,108 kr. sugar for the Company, and 21,194 bags of coffee, and 27,348 kr. sugar for the private trade), as well as 7,076 bags of rice, and 7,583 packages of tea—both the latter for the private trade.

Last week an election took place in the Council Chamber of the Stadhouse in this city, for the purpose of electing a Commissioner and a Deputy-Commissioner of the Netherlands Trading Company, vacant by the retirement of Mr. H. Croockewit and Mr. R. D. Wolterbeck, whose period of service has expired. Mr. J. van Eeghen, and Mr. J. van Heukelom, were duly elected to the appointments respectively.

A speculative genius of this city publishes a list of twenty who have died intestate in Netherlands India, subsequently to the year 1780, leaving fortunes varying from 20,000 to 250,000 fl., and invites their heirs to call upon him for further information.

Captain Simpson, of the barque *Three Bells*, arrived at the Texel from Samarang, reports having seen in 31 deg. N.L. an iron three-masted ship, deeply laden, and apparently in good condition, but unaccountably not making any way, possibly from having a foul bottom. It is supposed here that the above vessel may be the *Jan de Wit*, Captain J. Guyt, from Batavia to this port, which is long overdue, and whose non-appearance has caused much apprehension to her owners and underwriters.

Previous to the adjournment of the Second Chamber of the States General for the Easter recess, a batch of Bills for the naturalisation of foreigners was laid on the table by the Minister of the Interior. Among them are the names of the following gentlemen:—Mr. O. van Below, residing in Java; Mr. D. E. van Heemskerk, of Netherlands India; and Mr. F. P. Cassalette of Batavia.

Referring to a former preliminary advertisement, the Colonial Minister now gives notice that tenders for the new steam service in Netherlands India for ten years certain, will be received at Batavia, and the contract adjudicated on the third day after the arrival of the European mail that leaves Marseilles on the 12th of June next, with the proviso that should that day fall on a Sunday the adjudication will take place the following day.

Two engineers are required for steamboat service in Netherlands India. The salary commences at 350 florins per month (£350 per annum), periodically rising 30 fl. per month for every three year's service till it reaches the maximum figure of 500 fl. per month, with claim to further promotion, outfit, and free passage out as Government passengers in the chief cabin.

A splendid young lion for the Royal Zoological Gardens at Amsterdam, has arrived at Vlissengen by the barque *Walcherzee*, Captain Ouwehand, from Passaroeang, and was safely landed in excellent condition.

During the month of November, 1862, as we learn by an official table just published by the Colonial Department, the revenue of Java and Madura amounted to 918,036 fl. In the eleven first months of the year it was 9,735,605 fl. But in this amount is included a fictitious sum of 2,032,266 fl. for duties on Government produce exported, as well as the sum of 128,030 fl. for duties paid and subsequently returned on re-exportation, leaving a nett amount of 7,575,309 fl.

A letter has been received in this city from Vienna, announcing that Mr. Andreas Jalics, President of the Chamber of Commerce at Pesth, and one of the largest wine-growers in Hungary, has received an order from Japan for ten thousand bottles of his celebrated Vilany and Menes wines. The letter adds that the above-mentioned gentleman intends to send out with the shipment a case containing samples of the same vintage and quality, to be returned to him unopened, in order to convince himself if the Hungarian wines deteriorated by crossing the equator. This will at all events prove a severe test, as on the voyage out and home his samples will have to pass the line no less than four times.

By the last overland mail dispatches were received by the Naval Department, stating that H.N.M. screw steam corvette, *Vice-Admiral Koopman*, 14 guns, Capt. Lieut. J. E. Buys, stationed in the Japan seas, after the arrival of the screw corvette *Medusa*, 19, Capt. Lieut. F. de Casembroot, which sailed from Batavia for that station on the 20th of January last, will remain some time longer there to show the national flag in some of the Japanese ports, and to convey the Swiss Embassy from Nagasaki to Yokuhama and Jeddo.

H.N.M. screw corvette *Bali*, of 10 guns, Lieut. A. L. Palm, from the E. I. station (last from the Cape) has arrived at Helvoetsluys, and been inspected by the Port Admiral previous to being paid off. As it was blowing hard when she arrived, she anchored in the outer roads, but was obliged to go out to sea, and lost an anchor and seventy fathoms of chain cable.

The screw corvettes *Dommel* and *Delfzyl*, of 10 guns each, have been commissioned at Helvoetsluys for service in the East India station, the former by Lieut. R. W. Arendsen de Wolff, and the latter by Lieut. N. M. Kroef.

The screw-corvette *Stavoren*, of 10 guns, under the command of Lieut. J. K. Van de Kruysse-Pilaar, left Helvoetsluys on the 1st of April for the West Indies, from whence she will proceed to reinforce the squadron in the Eastern Archipelago.

H.N.M. screw-corvette *Soembing*, Lieut. J. N. Slegt, from the East India station (last from the Cape of Good Hope), after touching at Portsmouth in coming up the Channel, has arrived at Vlissingen, and will eventually proceed to Helvoetsluys, where, after being inspected by the Port Admiral, she will be paid off. All well on board.

As a proof that "conscience money" is not unknown in this country, I notice in the papers an acknowledgment from the Colonial Minister for a sum of 500 florins received anonymously in a letter, with the post stamp of Naastricht, as repayment of that amount received too much from the Colonial Treasury in Netherlands India.

PASSENGERS ARRIVED.

Per *Edouard and Marie*, Capt. van der Kolff, at Brouwershaven from Java: Messrs. Kohler, van Ameyde, van Duyn and van Heumen, all of the E. I. Army, Olderman and Schooneveld of the Navy, and a passported corporal.

Per *Ottoline*, Capt. Ecleman, of Brouwershaven from Batavia: Mr. Hartingfield, Mr. Wagner, Miss Lubeck, and Miss Robertar.

PASSENGERS OUTWARDS.

Per *Ida Elizabeth*, Capt. W. Doorn, from Rotterdam to Batavia: Mrs. C. Knoght and two children, Mrs. Smith van Altenstad, Mr. H. J. Prins, Mr. N. Cardinaal, and Miss J. Uldersen.

Per *Mentor*, Capt. Duynker, from Amsterdam to Sourabaya: Mr. W. Meyer.

Per *Tonia*, Capt. Breuning, from Rotterdam to Batavia: Mr. and Mrs. Knippler, Mrs. de Laat de Kanter, Mr. Vredenburg, and Mr. Groeneveld.

Per *Frans and Elise*, Capt. Nietfield, from Amsterdam to Batavia: Mr. and Mrs. J. H. Tobias and daughter, Mrs. van der Thoorn, Miss de Lampret, Miss F. Hunneman, Miss N. van Hees, and Miss C. Dassee.

Per *Batavia*, Capt. Dolder, from Amsterdam to Samarang: Mr. and Mrs. Schuurmans, Mr. Mesritz, Mr. Tulleken, and three volunteers.

COMMERCIAL.

COFFEE.—As might be expected so soon after the Company's Sale, the business done in this article since last post has not been very extensive, but the opinion continues favourable, and the general state of the market inspires confidence in the future. The Nos. 2, 7, 11, 13, 14, 19, 27, and 29 of the sale are in request, and in some cases a trifling advance on sale prices has been paid. The deliveries have been very large, amounting to 142,029 bags out of the sale, and 24,107 bags on warrants, thus leaving the present stock at 313 939 bags.

TEA.—At a sale of congou ex *Sunda*, from Foo-chow-Foo *via* London, the demand was languid and only 4 lots of fine Kaisow Congou fetched 105 cents, all the rest being unsold.

SUGAR.—There has been a lively demand for the raw article, especially in the higher qualities, and rather better prices are obtained. The sales of the fortnight amounted to about 12,000 kranjangs of Java. In refined goods there has been also an animated market at full prices.

RICE has been quiet for want of materials. A cargo of 7,076 bags of Java table rice per *Susannah Elizabeth* has arrived, and will be shortly brought to market.

SPICES.—Java cinnamon No. 3 is not in so much demand as by last mail, but still there continue to be purchases. The late high price of 84 cents could not be maintained, and the value has receded to 80 and 81. Cloves are again in request at 25 cents, and a fair business has been done at that figure. Pepper quiet; no alteration in quotations.

SILK.—The Company's Sale of 250 bales of raw Japan held at Rotterdam, went off as follows:—86 bales Æchazan from 18¼ to 23½ fl.; 25 bales Mino Scando, 17¾ to 20 fl.; 37 bales Idah 19½ to 28¼ fl.; 12 bales Oshue 20½ to 25½ fl.; and 90 bales Maybash, 26½ to 33 fl. All sold.

RATTANS.—At the Company's Sale at Rotterdam of 200,461 piculs, the whole found purchasers at prices varying from 7 to 18 fl. according to quality.

GUTTA PERCHA.—There has been a private sale of 3,000 kilogr. at Rotterdam, which fetched 113 to 128 cents, all sold; and at the same sale 11 baskets containing 1,000 kil. of the new substitute for India Rubber mentioned in a previous letter and called Getah Gitang, which realised 50 fl.

INDIGO and COCHENILLE.—The Company have advertised sales as follows:—On the 29th April at Amsterdam 1,132 piculs of Java Indigo and 40 chests of Cochenille, and on the 1st of May at Rotterdam 1,188 piculs Java Indigo. In these sales the common descriptions are well represented, and there is a fair quantity of good middling, whilst the finer sorts are scarce.

CAMPHOR and INDIA RUBBER are in great demand, and stiff prices easily realised.

LONDON, MONDAY, APRIL 13, 1863.

THE POSITION OF SHANGHAI.

IT is satisfactory to learn that the measures adopted for the security of Shanghai have proved thoroughly efficacious. The alarm and excitement caused a year ago by the incursions of the rebels have entirely subsided, and our merchants are able to pursue their avocation in peace. To gain so important an end a great effort was demanded from the allied troops. It was necessary that the Taipings should be driven beyond the radius promptly and vigorously. The slightest delay would have increased the difficulties of the position. Any dallying with the rebels would have added two-fold to their strength. The Taipings were to be taught that they could not with impunity venture within the charmed circle marked off by the Europeans, they were to be taught that the power of the allies if once put forth would prove irresistible. They have learnt the lesson it was so necessary to teach them; and, instead of hovering on the borders of the splendid settlement which promises ere long to be the greatest commercial city in the East, they have retired upon Nanking, and are preparing for what may prove a severe yet final struggle in that ancient capital of the kingdom. So far, then, the policy adopted by the allies, but mainly carried out by Great Britain, has proved successful. It remains to be seen whether the broader scheme now sanctioned by the Government can be carried out to its full extent without difficulties arising which may prove very perplexing or even insurmountable.

English officers commanding Chinese forces will have to grapple with strange and unexpected hinderances. They cannot always expect to be tolerated by Chinese officials or obeyed by Chinese soldiers. The powers conferred upon them by the Imperial Government will not always be respected, and however ill-used they may be, they are not entitled to seek for redress from the Government of their own country. An exception is indeed made by Earl RUSSELL with regard to British officers and men who instruct Chinese troops and act with them against the Imperialists within the thirty-mile limit. These will still be regarded as acting for the interests of their own country, and will, therefore, remain under its protection, but the soldiers and marines who will serve under Captain SHERARD OSBORN will be dependent on the favour and protection of the Government of Peking. It needs no prophetical power to anticipate to some extent the results of this policy. With the Chinese Customs under the conduct of Mr. LAY, and Chinese troops under Captain OSBORN; and with the thousand complications resulting from this anomalous condition of affairs, it can hardly be doubted that difficulties will arise; that the Government of Prince KUNG will, at a fitting opportunity, renounce the services which necessity has compelled it to accept; that the tale of wrongs suffered will be carried to England, that redress will be demanded, and that unless the Imperialists are stronger than they appear, they will be once more compelled to yield to British claims or to submit to a British protectorate.

A writer in *Blackwood's Magazine* affirms that after having for years spent wealth, energy, and precious lives in opening China to Western influence and civilisation, the success of England is at length certain. "The Government and people "of China," he says, "both ask us to aid them in their hour "of trouble, and in return they will assuredly grant us that "access and commercial freedom for which we have so long "laboured and so often fought." We hope, though we scarcely anticipate, that this sanguine belief may be realised. Unfortunately, however, our commercial freedom, which is in itself so certain to produce abundant fruitage, is entangled with political aims, and the one is dependent on the other. It has indeed been impossible to hold intercourse with the Chinese on any other terms; but this "mingled yarn" renders the Chinese question one which it will be always difficult to unravel.

THE ISTHMUS OF KRAW RAILWAY.

THE official correspondence relative to the Isthmus of Kraw Railway has just been published by order of the House of Commons. It commences with a letter from Mr. WISE to Sir CHARLES WOOD, written so far back as December, 1859, in which he states that the Government of Siam had sanctioned the construction of a railway "across the narrow strip of "Siamese territory which divides the Bay of Bengal from the "Gulf of Siam." A memorandum, together with a map of the proposed route, accompanies this communication. n the following month a letter from the India Office informs Mr. WISE that Her MAJESTY'S Government cannot fail to take a warm interest in the undertaking, but that this interest cannot be evinced in the shape of any pecuniary contribution or guarantee. In May, 1862, the report of Captain FRASER and Captain FURLONG is forwarded to Sir CHARLES WOOD from the Government of India, together with an able summary of the advantages likely to be derived from the proposed route, addressed in reply to the Chief Commissioner of British Burmah. The last paragraph is as follows:—

"The Chief Commissioner has been told that we were fully "alive to the importance of any practical scheme, having for its "object the extension of trade with China and Siam. But that "with the information at present before us as to the political con-"dition of Western China, and with imperfect information as "to the practicability and commercial advantages of the proposed "scheme for crossing the Isthmus of Kraw, we should not at pre-"sent be justified in incurring any expenditure on the scheme. "Still we have desired that every available opportunity should be "taken to obtain a knowledge of the advantages of the scheme "proposed, and of any circumstances which may recommend it "to the consideration of Government."

This cold and cautious official statement is by no means discouraging considering the quarter from whence it is issued, and we are convinced from the statement of the engineers, that the undertaking must be carried out, and will prove successful. On the advantages of the projected route we have more than once dealt in this journal, and it is not therefore necessary now to reiterate our former arguments; but we would draw special attention to the concluding paragraph of the report by Messrs. FRASER and FURLONG, which contains in a few brief words the decision to which their investigations have led them. Thus they write:—"We have laboured to prove (and we think have "done so satisfactorily) that, as a mere speculation, the con-"struction of a railway across the Isthmus of Kraw will be pro-"fitable; that the communication may be established for one-"third of the capital the interest of which is now being expended "yearly on mere fuel and establishment of running steamers, "and that a vast amount of time will be saved over present "routes; of the political bearings of the subject we have said "nothing; but holding in view that the line from Ceylon to "Cochin China is nearly straight, we are convinced that if "Great Britain does not take it in hand France must." These are pregnant arguments, and if, as we dare believe, they cannot be gainsayed, the Isthmus of Kraw Rail ay may even now be regarded as a *fait accompli.*

THE CHIEF COMMISSIONER OF BRITISH BURMAH.

IN the LONDON AND CHINA TELEGRAPH of Jan. 27, in our remarks on the recent treaty with Burmah, we alluded to the valuable services of Lieut.-Col. PHAYRE, and asked what reward the Government of this country had to bestow on a public servant who had served her so faithfully and so well. We spoke strongly on the subject because we felt as though the honour of England was tarnished by the comparative neglect with which the Chief Commissioner of British Burmah had been treated. At last, we are happy to say, an honourable, though by no means adequate distinction has been awarded, and Lieut.-Col. PHAYRE has received the dignity of C.B. This is well so far as it goes, and never was this mild honour bestowed more worthily. But the merits of Colonel PHAYRE deserve a still higher recognition, and we trust that a very brief period will elapse before we have to congratulate him on being gazetted a K.C.B.

THE HONG KONG AND CHINA GAS COMPANY.

An extraordinary general meeting of the proprietors of the Hong Kong and China Gas Company (Limited) was held on the 8th inst. at the offices of the company, for the purpose of passing a resolution to increase the capital to £50,000. Captain Arrow, the chairman of the company, was in the chair. The secretary having read the advertisement convening the meeting, the chairman briefly adverted to the measures carried out by the board for the establishment of gas works in Hong Kong, and the reasons that rendered an increase of the capital at this time necessary; and proposed the following resolution, which was seconded and unanimously carried:—

Resolved,—That the directors of the company may, and they are hereby, on behalf of the company, authorised to increase the present capital thereof by the addition thereto of fifteen thousand pounds, thereby making the total capital of the company fifty thousand pounds, and that such additional capital be divided into one thousand five hundred shares of ten pounds each.

The chairman having intimated that two-thirds of the increased capital would be offered to the existing shareholders, and the remaining third to the inhabitants of the colony, the proceedings terminated.

The above company was incorporated in June last, and has commenced its operations in the town of Victoria, Hong Kong. The Government sanction having been received to the establishment of gas works on the Island, the Secretary of State for the Colonies confirmed the arrangements made, which enabled the company to take immediate steps for carrying out the objects of the enterprise. One of the conditions of the above arrangement required that the sum of £10,000 should be expended before the end of last year, so that the directors had little time to lose in taking measures to get capital subscribed, and the manufacture of plant proceeded with. The whole amount of capital offered, viz., £35,000, was subscribed for in this country before the matter could be brought before the public, and the directors, though anxious that the inhabitants of Hong Kong should become interested as shareholders, were obliged, owing to the shortness of time at their disposal, to allot nearly the whole of the capital in this country. Some of the local newspapers have complained of the small number of shares reserved for the inhabitants of Victoria, but seeing how the directors were situated it was hardly possible that they could have acted otherwise than they have done. That they have acted judiciously is already apparent, for not only have the stipulations with Government been complied with to the letter, but machinery competent to produce 200,000 feet of gas per diem is shipped for its destination, the workmen to erect the same being passengers in the vessel conveying it. In Victoria the company has not been idle, their engineer has been in the colony since November last, and ground having been purchased as a site for the gas works, it is now being prepared for receiving the machinery. The necessary tanks, foundations, &c., it is expected, will be completed by the time the works arrive out, so that in the end of the present year gas in Victoria will be an established fact. The company's operations will be extended to other important towns so soon as the introduction of gas is accomplished in Hong Kong. From the liberality already bestowed by the Government, we may infer that its sanction and encouragement will not be withheld whenever the Hong Kong and China Gas Company are ready to extend its operations.

SINGAPORE GAS COMPANY.

The directors' report for the year 1862, to be presented at the first ordinary general meeting, on the 20th inst., states that up to the 31st of December, 1862, 4,686 shares have been allotted, on which £1 per share has been paid, and 368 shares on which a deposit of 10s. per share has been paid; since that date a further number have been allotted, making the total number allotted to the present date 5,109 shares. The directors, early in August last, nominated Mr. E. J. Wells, late of the Worthing Gas Works, as their manager and engineer at Singapore, who sailed for that place early in September, and on his arrival there in October reported very favourably on the prospects of the company. In accordance with the instructions of the local committee, he at once proceeded to take possession of the land, and to make the contracts for necessary buildings and manager's house, which are now in course of erection. The directors have entered into contracts for all the materials and apparatus required for the erection of the works; a great portion of the fire bricks, retorts, and service pipes have arrived at Singapore, the larger portion of the cast iron mains have been shipped, and the iron work for the general apparatus is in a forward state, so that the directors anticipate, if no unfavourable circumstances intervene, that the town of Singapore will be lighted up early in the ensuing year. The directors have derived valuable assistance from the local committee at Singapore, a body of influential gentlemen who co-operate most thoroughly with them in their endeavours to carry out the works in an efficient and economical manner. They have also received most satisfactory accounts as to the manner in which Mr. Wells, the manager of the company at Singapore, is exerting himself for the interests of the company.

Literature.

The publication of Lieut.-Colonel Fisher's "Personal Narrative of Three Years' Service in China," is delayed until the 18th April. On the 4th inst. more than four columns of *The Times* were devoted to a review of "The Capital of the Tycoon." The writer does not evince any special knowledge of his subject, neither for a *Times'* article is the composition remarkable in a literary point of view. His observation that Sir Rutherford Alcock is entitled to attention "as the best informed person who has written for our instruction since the second unsealing of the Japanese empire," is undoubtedly correct, and equally true too is his statement, that the substance of the book is interspersed with "little stocks of emotional interest," and that occasionally "even the gravity of a public question is compromised by the utterance of a personal wail." In the current number of the *Edinburgh Review*, there is also a very full review of Sir Rutherford's volumes. "The Story of Elizabeth," a work of real genius, which has lately appeared in the *Cornhill Magazine*, and which is generally attributed to the pen of Miss Thackeray, has been republished in one volume, with illustrations, by Smith, Elder and Co. Messrs. Jackson, Walford, and Hodder have published a volume of "Lectures on Theology, Science, and Revelation," by the late Rev. George Legge, Missionary at Hong Kong, with a Memoir by James Legge. "A Dialogue on the Best Form of Government," by the Right Hon. Sir George Cornewall Lewis (Parker, Son and Bourn), appeared last week.

Yedo and Peking. A Narrative of a Journey to the Capitals of Japan and China, with Notices of the Natural Productions, Agriculture, Horticulture, and Trade of those Countries, and other things met with by the way. By Robert Fortune. With Map and Illustrations.—John Murray.

Mr. Fortune should have brought out his interesting volume three months ago. At the present moment he comes before the public at a disadvantage, since Sir Rutherford Alcock's more voluminous work on a similar topic is already in everybody's hands. But while both writers undertake to describe the "capital of the Tycoon," each tells his story in a very different fashion. Sir Rutherford Alcock is by nature a politician, by position a diplomatist. In Japan he occupied the highest official position ever held in that country by a British subject; and he does not allow his readers to forget it for a moment. He is a man of literary tastes, and of æsthetic culture; he has read a good deal in various languages; he is something of a philosopher, something of a moralist, has a turn for reflection, and, while thus noticeable in many ways, is chiefly distinguished as an egotist. It is this characteristic which accounts for the extreme discursiveness of his style, and at the same time gives a peculiarity to his pages which, although it may sometimes irritate the reader, is on the whole not unpleasing. Mr. Fortune, on the other hand, having wandered in Japan with the same object which has made his name so famous as a traveller in China, undertakes in a simple, manly, unpretentious manner to describe what he saw, and to tell what he did, in a country so eminently favourable to horticultural pursuits. His object was a practical one, and he pursues it in a practical, business-like manner. This unity of purpose leaves its mark in the written narrative. And thus it comes to pass that while Mr. Fortune has travelled much and often in China in search of plants and flowers, he has given us some of the most valuable books we possess about that country, and that he has now added another volume equally interesting, and almost equally important, with reference to the empire of Japan.

It is not much matter where we open a book, every page of which is entertaining and instructive. Mr. Fortune writes

Digitized by Google

about the baths, tea-gardens, and other domestic institutions of Japan very much like other travellers, but he is gallant enough not to spoil the charms of Japanese girls in English eyes by saying anything about their mania for powdering and painting. Indeed, the damsels of the tea-houses are always pretty, if we may credit Mr. Fortune, and while he is perfectly aware that their extreme civility is intended to bring custom to the establishment, he avers that it is very refreshing to the weary traveller to be waited on by them. "The young girls," he tells us in one place, "kneeling in front and on each side of me, poured out my tea, and begged me to eat of the cakes and fruits, while one of them busied herself in taking the shells off some hard-boiled eggs, dipping them in salt, and putting them to my mouth." As to the alleged immorality of promiscuous bathing, as practised by the Japanese, he observes that it is the custom of the country, and that "the Japanese would probably tell us that many of the customs amongst ourselves—such for example as our mode of dressing and dancing—are much more likely to lead to immorality than bathing, and are not so useful nor so healthy," but he adds that the practice cannot be attributed to habits of primitive innocence in this case, as no people in the world are more licentious in their behaviour than the Japanese.

On the trees and flowers of Japan, Mr. Fortune writes with authority, and some of the most interesting passages in his volume are devoted to these subjects. The art of dwarfing is carried to great perfection, and he describes with some minuteness the mode in which it is practised. The Dutch style of gardening, which was adopted with such enthusiasm in England two hundred years ago, and was probably derived from Japan, seems in the present day to be pursued with equal ardour by the Japanese. Trees are cut into all kinds of fantastic shapes, and made to grow in every form, save that designed by nature. Hedges are clipped and trained, and shrubs of enormous circumference are "neatly nipped into a fine round form, perfectly flat upon the top, and look like dining-room tables." The farms in Japan, ploughed with a pronged fork, have the neat appearance of gardens. The gardens, those at least of the working-classes, are like miniature toy places, with their tiny hillocks and little lakes, and curious dwarfed plants. The Japanese, says Mr. Fortune, will sell anything for money, and he has succeeded in securing a number of most valuable shrubs, many of which are perfectly adapted to our English climate.

To Mr. Fortune we owe more perhaps than to any other man living, for the introduction of new plants into this country, and, while engaged in a pursuit which may be truly called national, since, in the years to come, it will benefit rich and poor alike, one might suppose that every possible assistance would be afforded him by English officials, or that, at the least, no obstruction would be thrown in his way. But our traveller has a story to tell, which, were it not for our limited space, should be told in his own words. As it is we can only give the point of it, referring our readers to the volume for a more detailed account. Mr. Fortune made his first visit to Yedo as a guest of Sir Rutherford Alcock, who treated him with the utmost courtesy. On wishing to return to the capital, Sir Rutherford, having in the meanwhile gone to England, he accepted an invitation from Mr. Harris, the American Minister. The same evening, however, he received a note from Mr. F. G. Myburgh, who had the temporary charge of Her Majesty's Legation, requesting him to depart from Yedo without delay "as no British subject can visit Yedo without an invitation from, or the sanction of, Her Britannic Majesty's Minister, or, in his absence, the officer in charge of Her Majesty's Legation." Mr. Fortune wrote an explanatory note in reply. He had been given to understand that he could not obtain permission from the officer in charge of the Legation to visit the city, he was sure that had Mr. Alcock been there he would have been received by him; as it was, he had been cordially welcomed by the American Minister, and he therefore trusted he might be permitted to remain a few days, as it might be a matter of public regret should he be prevented "from adding to our home collection some new trees or other plants of much interest." To this communication Mr. Myburgh replied that he cared not to be told for what object Mr. Fortune had come to Japan, he only knew that he had come as a private individual in a private capacity, without the requisite sanction; that it was his duty to have communicated with him which he had not the common courtesy to do, and that he was only performing a public duty when he called upon him a second time to quit Yedo at once. To this Mr. Fortune replied that he would leave Yedo immediately, that he might have been wrong in accepting Mr. Harris's invitation without permission from Mr. Myburgh, though such a proceeding was not without a precedent, but that he had no intention of treating him with disrespect. We think Mr. Fortune was wrong in the first instance in his apparent slight of the officer left in charge of the Legation; we can understand how that act wounded the *amour propre* of Mr. Myburgh, but we cannot conceive how an English gentleman, after having fully expressed his feeling in the matter, should have declined accepting the apology offered, and compelled his fellow-countryman to leave the city. Such a course was alike illiberal and undignified.

We have said that the chief interest of Mr. Fortune's volume lies in the descriptions he gives of Japan in relation to his special pursuit in that country. On political matters he touches very briefly. He believes that the opening of Yedo to foreign merchants would have proved highly dangerous, and that it was wise "to waive our right to the opening of the city at least for the present," but he conceives that the same objections do not apply to Hiogo and Osaca, and that we ought to have insisted on our treaty rights as far as these cities were concerned. The dislike of the Japanese to foreigners—which, by the way, is shared by the dogs—is, the author remarks, a feeling which they really cannot help; yet he has faith in the Japanese Government, and thinks that it manifests a real anxiety to keep faith with Great Britain. The land, he observes, is "happy and peaceful," and evidently while he writes of it he sees bright visions, of scenery unsurpassed for variety and beauty, of fair damsels offering him cups of tea and sweet cakes on bended knees, of little children from the cottages and farmhouses, helping him in his search for insects and shells, and of other pleasant things "met with by the way." Happy the traveller in Japan who can thus even for a moment forget the dark side of Japanese life! Mr. Fortune tells us something of that also, yet he evidently loves to dwell on what is peaceful and joyous. The concluding portion of this entertaining volume is devoted to an account of Tien-tsin and Peking, but on this we have no space to dwell. The work will increase its author's reputation, and, in saying this, we give it no stinted praise.

Naval and Military.

Rear-Admiral Kuper, C.B., has been gazetted Rear-Admiral of the White, and also to hold the rank of Vice-Admiral while in command on the East India and China Station. Capt. W. H. Hall, C.B., lately Flag Captain to Admiral Seymour on the China Station, has been gazetted as Rear-Admiral of the Blue.

Captain Peter Cracroft, C.B., lately on the China Station, in command of the Aboukir, has been ordered to hoist a broad pendant as Commodore of the second class, at Port Royal, Jamaica, and Commodore Dunlop, C.B., is to return to England by packet.

The command of the Royal yacht Victoria and Albert has been conferred on Prince Leiningen, who has been succeeded on board the Magicienne by a popular officer, Captain William Armytage (1860).

The screw steam gunvessel Vigilant, 4, Commander W. R. Robson, bound from Sheerness for the East India and China station, put back to Plymouth on the 1st. inst. Having on her passage down channel called in the first instance at Plymouth, she left the Sound on the 15th ult., experienced heavy south-westerly gales all the way to Lisbon, and put in there on the 20th. It is understood that a survey of her damages was made while in the Tagus, the result of which was that she was ordered to return and left on the 20th. On arrival at Plymouth she went immediately into Hamoaze for repairs. The only damages apparent were the loss of her starboard bulwarks, but indistinct reports were current that she was rotten or defective in other and more vital parts. The attention of the Lords Commissioners of the Admiralty having been frequently called of late to the fact that ships leaving the eastern ports in an alleged seaworthy state either put into the Sound unnecessarily when going down channel or put back to Plymouth afterwards for repair, their lordships seem determined to ascertain the true source whence these delays arise. One of the officers of the department of the Controller to the Navy, Mr. Joseph Large, a constructor, has therefore been sent to Devonport to decide on the seaworthiness of the Vigilant, and whether she was defective when she left Sheerness, and, if not, whether there was sufficient cause for her return to England after having arrived at Lisbon.

The 20th company of Royal Engineers, under the command of Capt. E. C. Sim, is ordered to be augmented to its home strength by the addition of a number of men of various trades from the depôt companies at head-quarters, Chatham. This company will shortly leave Brompton-barracks for Portsmouth, where it will relieve the 22nd company, which is ordered to embark for China. The officers, non-commissioned officers, and men have gone through a course of ball practice at the new Government rifle range near Rochester.

The Dutch screw corvette Sorembing, 8 guns, Commander J. N. Slegt, anchored at Spithead on the 1st inst., from Batavia, bound for Flushing.

The head-quarters of the 2nd battalion of the 18th Regiment (Royal Irish), under the command of Lieut.-Col. Alfred A. Chapman, arrived at Portsmouth in the Lucifer and Comet steam tenders from Parkhurst, Isle

Digitized by Google

of Wight, and immediately embarked on board the hired sailing transport Elizabeth Ann Bright, lying alongside the dockyard, for conveyance to New Zealand. The second division of the regiment followed in the hired sailing transport Norwood.

The intelligence which reached London referring to the loss of her Majesty's ship Orpheus, was of a very sad description. The subjoined Circular was sent out from the Admiralty during the day:—"Suez, April 2. —Her Majesty's ship Orpheus, total wreck on Manakaou Bar, New Zealand, 7th February, 1863, with loss of Commodore Burnett and Captain Burton, 22 officers, and 157 men. Nothing saved. List of survivors: 8 officers and 62 men; Charles Hill (Lieut.), Yonge (supposed to be Lieut. D. D. Yonge), Amphlett (paymaster), Hund (supposed to be C. G. Hunt, midshipman), Filding (supposed to be B. W. Fielding, midshipman), H. M. Barkly (naval cadet), W. Mason (boatswain), J. Beer (carpenter). Further information will be given respecting the names of the surviving seamen, but owing to the incorrect spelling of the telegram it is impossible to give the names with any hopes of accuracy until they have been compared with the records in office.

Such a calamity as that of the wreck of the Orpheus has not fallen on the British navy since that dreary night when the Avenger, with nearly the whole of her crew, unwarned and unprepared, disappeared beneath the waters of the Mediterranean. The Orpheus was a fine screw-corvette of 1,706 tons, 400-horse power (nominal); she mounted 21 guns, and her regular complement ot officers, men, and boys should have been 275. She was commissioned on the 25th of October, 1861, and left England for North America at the time when the Trent affair caused so much excitement in England.

Some degree of interest was created in Liverpool by a rumour that a new "iron-clad" steamer had been trying her engines, and departed from the Mersey in course of the forenoon's tide. From the outcry which has recently been made in relation to war steamers having been supplied to the Confederate Government, the rumour referred to excited considerable remark. Investigation, however, showed that the "suspicious craft" was perfectly legitimate in all respects. She proved to be the troop-ship Orontes, recently built for our own Government by Messrs. Laird Brothers, at Birkenhead, which was launched in November last. This vessel, by dint of great exertion, has been completed in her external fittings, and was wanted to proceed at once to Devonport. Her engines, by Watt and Co., are 500-horse power, and have been put on board, and the vessel is in all respects ready for the reception of troops, and for the conveyance of these she will no doubt be immediately put in commission. She is 300 feet in length between perpendiculars; is 44 ft. 7 in. in extreme breadth; is 32 ft. deep in the hold; and her register measurement is 2,811 tons. She will carry from 1,100 to 1,200 troops with the greatest comfort, besides her own full complement of officers and crew.

Orders have been received at Sheerness to fit her Majesty's screw steam frigate Leander, 51 guns, 400-horse power, with commander's and secretary's cabin. It is supposed that she will shortly hoist a commodore's broad pennant, and proceed to the Pacific to relieve the Topaze, 39, Commodore the Hon. John W. S. Spencer. The Leander was taken out of dock on the 7th April, and was removed the following day from the basin in Sheerness dockyard to her moorings in the harbour, to prepare for immediate commission.

A return, pertinent to the recent discussions on the cost per man of the army, has been made by the War-office, showing the amount allowed each soldier for pay, beer money, clothing, fire, forage, and other allowances. The annual cost of a gunner, sapper, or private, in the following corps is:—Royal Horse Artillery, £55. 6s. 1½d; Life Guards, £68. 16s. 8½d.; Horse Guards, £63. 14s. 2½d.; Cavalry of the Line, £52. 11s. 3½d.; Royal Artillery (Infantry), £32. 6s. 11½d.; Royal Engineers, £31. 5s. 3½d.; Military Train, £31. 15s. 9½d.; Foot Guards, £28. 17s. 7½d.; and Infantry of the line, £26. 3s. 5½d.

The Lyra, 9, screw corvette, recently returned from service on the Cape of Good Hope and Mozambique station, has been placed in dock at Portsmouth for survey and repair.

NETLEY HOSPITAL.—There are about 200 invalids in the Netley Military Hospital, and more are expected shortly. Sixty surgeons are at the medical quarters. A company of the 53rd Regiment, a troop of Artillery, and a large staff of hospital orderlies, are at the hospital barracks. The lighting of the hospital with gas has commenced, and military sentries now guard the building and the roads leading to it. The chapel has been opened for public worship. Besides the hospital building there are a steam washing-house and a gas manufactory and barracks, and there will be a medical school and rows of houses for married soldiers. Preparations are making for commencing the sea wall.

London Gazette.

The Queen has been graciously pleased to give orders for the appointment of Lieutenant-Colonel Arthur Purves Phayre, of the Bengal Staff Corps, Chief Commissioner of British Burmah, to be an Ordinary Member of the Civil Division of the Third Class, or Companion of the Most Hon. Order of the Bath.

"THE EMPEROR OF CHINA'S FLEET."

The New York correspondent of the *Daily News* writes:—"The feeling of irritation here about the fitting out of Confederate men-of-war in English ports continues to increase, and there is a strong movement now being made to induce Mr. Lincoln, in case any of the 'Emperor of China's' fleet put to sea, to call an extra session of Congress, and adopt retaliatory measures. It is said that if four or five more rovers get afloat they will drive American ships off the sea, and place the whole carrying trade into English hands, which is probably the object at which the English shipbuilders are aiming. So it is proposed to meet this by levying on all British ships entering American ports a high tonnage duty, so as to lessen in some degree the feeling of exhilaration which is now supposed to be caused in English shipping circles at the depredations of the *Alabama*. I am unable at this moment to state what is the precise rate proposed to be levied, but I remember that under it a Cunard steamer would have from $7,000 to $8,000 to pay every time she came into port."

THE FRENCH EMPEROR IN WANT OF AN ALLY.—In the number of the *Revue Contemporaine* which has just appeared is an article on the foreign policy of France, which purports to show that one of the things which the Emperor has most at heart is to find "a sincere ally, with a liberal and pacific policy, who should co-operate with him in removing, by a frank and honourable accord, the formidable complications which press more heavily on the great Powers even than on France." Though the principle of that accord is the maintenance of the peace of Europe, with guarantees offered by Louis Napoleon himself against his supposed ambition, yet nothing has yet been done. The English alliance, so much hoped and sought for, has not held. Austria, in the Crimean war, was wanting to herself and to Europe. During the war in Italy, Russia, more decided, would have allowed France to go on to Venice and complete her work. Yet events have followed their course. From the new French Empire dates the resuscitation of liberal ideas in Europe. Divine right has vanished before the rights of the people. Civil equality and commercial liberty are making their way in the world. Russia has been led to emancipate 25,000,000 serfs. Austria relaxes her inveterate policy of repression, and appears to abandon her old traditions. Italy has once more appeared on the map of Europe, and the civilisation of equality and Christianity is penetrating to the confines of the earth. The reviewer judges it worthy of special remark that hitherto France is the only Power which seems desirous of maintaining peace, and the only one that foresaw and prevented formidable difficulties which the errors of the past had left to her. After the Treaty of Paris it was France that called the attention of the great Powers to Poland, and to the stipulations which are binding on Russia. England did not think the moment favourable, but Russia promised to satisfy all just demands upon her, and only asked that she should be allowed time to do so of her own motion. In the meantime, Poland is once more in insurrection, and this fresh symptom of a radical disease has again appeared to afflict and disturb the world. France deeply feels for her sufferings—for those hopeless and ever-recurring struggles; and she now proposes to Europe a common understanding to remedy so many evils, and to decide Russia to fulfil her promises—to do, in fact, what her true interests command her. The writer asks whether the voice of France will be heard, but he does not answer his own question.

COMMERCIAL POSTSCRIPT.

CITY, MONDAY AFTERNOON.

The last importation of dollars have been sold at 62¼d. The bar silver is still on hand. The circular of Messrs. Waithman on silk says:—"Since last mail very few transactions have taken place. Japans, hitherto so ready of sale, have failed to attract the attention of buyers; yesterday, however, there appeared a general disposition on the part of the export houses to do business, and the result was that 500 bales or more of Japans were sold at prices about 1s. 6d. below the highest point of the year. Deliveries 1st and 9th inclusive:—China, 1,312; Japan, 280; total, 1,592 bales."

ARRIVALS NOT INCLUDED IN THE TABLE.—April 6, at Texel, from Rangoon, J. U. Brookman; 10, off Salcombe, from Macao, Martin Luther; March 28, at New York, from Manila, Castilian; April 11, from London, for Hong Kong and Canton, Glenclune; for Colombo, Charlotte Ann; for Singapore, Prince Alfred; for Newport and Galle, Navigator; 2, at Madeira, from Clyde, for China, Pekin (str.).

DEPARTURES.—April 7, from Deal for Shanghai: Palmerston, Bosworth; 6, from Liverpool for Hong Kong: Dictator; 8, for Shanghai: Niphon; 7, from Sunderland for Shanghai: Alexandra; 9, from London for Colombo: Maggie; 10, from Liverpool for Shanghai: Albrecht O'Swald; from Glasgow for Singapore and Penang: Ripisiquit; April 10, from London for Shanghai, Fow-tsun; for Batavia and Sourabaya, Nord; 8, from Cardiff for Hong Kong, Nicoline: 10, from London for Cardiff and Manila, Steadfast; 9, from Cardiff for Hong Kong, Ellen; 10, from Shields for Singapore, Maid of the Tyne; 9, from Sunderland for Shanghai, Zodiac; 12, from Liverpool for Newport and Hong Kong, Typhoon.

LAID ON.—At London, for Shanghai, Speedy; at Liverpool, for Hong Kong and Canton, Brilliant; at Liverpool, for Hong Kong, Tientsin, Cutwater.

The *Star of the South*, Renner, from Bombay and Trincomalee, for Liverpool, was burnt at Barbadoes, March 24, with 500 bales of cotton and 100 tons linseed.

Monetary and Commercial.

CITY, SATURDAY, APRIL 11.

THE AGRA BANK.

The 29th annual general meeting was held on the 11th inst., when the report, which we subjoin, was unanimously passed. The Hong Kong opium loss was, of course, the chief topic, and a more vexatious swindle could not fall into the hands of restless shareholders; a few general comments were made by Mr. Morland, who was reminded, however, that it was not for the general interests of the bank that the directors should circularise, and otherwise keep such a matter before the public. For our part, we think the great source of consolation is that by the prudence of the Directors, they have a reserve fund capable of swallowing such losses in one year. The total profits of the year will be found to be highly satisfactory; and altogether the Bank's affairs appear to us to be administered with more vigour and ability than ten years ago. The *prestige* of the establishment, both in public estimation and on the Stock Exchange, bids fair to place it as the first Oriental banking undertaking. The £50 shares were this morning quoted at £100.

The directors beg to submit to the shareholders the audited accounts for the year ended 31st December last, exhibiting a surplus of £173,815. 17s. 5d. The directors regret to say that a very serious loss has been sustained by the opium frauds at Hong Kong, the whole of

Digitized by Google

which they have deemed it their duty to write off to debit of the reserve fund, according to the discretion vested in them under the deed of settlement. Out of the above sum of £173,815. 17s. 5d., the directors have paid the usual dividend and bonus, amounting to £120,000, and have transferred the balance, £53,815. 17s. 5d. to credit of the reserve fund, which now stands at £192,658. 17s. 8d.

Since the last annual meeting the directors have opened a branch of the bank at Sydney, under the management of Mr. Alexander Campbell, the progress of which has been satisfactory.

The house occupied by the bank in Calcutta has long been found insufficient for the extended business at that Presidency, and the directors are glad to report that a most eligible site has been secured, on which suitable premises will be immediately erected. The directors have purchased the freehold of the premises in Cannon-street on favourable terms.

The Commercial Bank of India have declared a dividend of 20 rs. per share, being at the rate of 8 per cent. per annum for the half-year ending 31st December last, after paying and writing off in full all bad and doubtful debts, and carrying 233,000 rs. to the reserve fund. The head office of this bank will shortly be transferred to London from Bombay.

The report of the directors of the Chartered Bank of India, Australia, and China, presented at the general meeting on the 8th inst., was a follows :—

"The directors now lay before the shareholders the general balance-sheet of the bank for the year ended the 31st December last, exhibiting a profit of £70,792. 5s. 4d. The shareholders were informed by circular, on the 29th of August last, of the loss which this bank, in common with others, had sustained by the extensive opium frauds perpetrated at Hong Kong, and which precluded the directors from recommending a half-yearly interim dividend in October last. They regret to state that, notwithstanding every effort, the hopes which were at first held out to them of recovering a portion of the loss thus incurred have not been realised; and the deficiency, amounting to £50,323. 13s. 10d., must now be regarded as a total loss. Under these circumstances the directors have decided to write off that amount from the profits of the year; and out of the remaining balance of £20,468. 11s. 6d., they now recommend that a dividend for the half-year ended 31st December last be declared at the rate of 5 per cent. per annum, free of income-tax, leaving £4,368. 11s. 6d. of undivided profits to be carried to new account. Apart from the loss above noticed, the directors are able to report that the general business of the bank throughout the year has been very satisfactory. Since last annual meeting they have opened a new agency at Rangoon, and completed arrangements for another at Kurrachee."

Accounts from the Island of Labuan, dated the 7th of February, state that the Governor, who had just left for England, had, previous to his departure, paid a visit to the coal mines, and expressed satisfaction at the great progress made since the arrival of Mr. Sinclair, the present manager. The stock on the 31st of January was 2,867 tons, and some small quantities has since been supplied to her Majesty's ships *Leven* and *Renard*. The commanding officer of the latter had furnished a report that "the quality for generating steam is good, and that it is well adapted for the service." Sufficient coal headings had been opened to produce 200 tons per day, with a proper supply of labour, of which there was now a better prospect, 147 Chinese coolies having just been engaged at Singapore.

The following communication with reference to the trade of Japan appeared in the *Times* :—

"Sir,—As the increasing value and importance of British trade with Japan are not, it seems, generally known in England, will you allow one who has lately returned from that country after a residence of two years at the port of Yokuhama, Kanagawa, to lay before your readers a short statement of the trade of that port?

"The export of raw silk thence for the half year ending the 31st of December last was 14,231 bales, being an increase, as compared with the same period of the previous year, of about 9,000 bales; and the advices received yesterday, which reach to the 30th of January, tell us that the settlements to that date had advanced to 19,000 bales, with plenty more silk in the country; so that the export for the present season will not be less, probably, than 25,000 bales, or more than double that of the season 1861-62.

"The exports of Kanagawa for the current year (1862-63), it is estimated, will be in value about three millions sterling; and, as the value of the imports of goods is not likely to exceed £300,000, a balance of £2,700,000 will have to be paid in Mexican dollars.

"From this trade the Japanese Government is deriving a large revenue. The export and import duties will be over £100,000, and the gain by the exchange of itzibus for Mexican dollars will amount to from £800,000 to £900,000, or together, in round numbers, about a million sterling.

"It is much to be regretted that Earl Russell consented to defer the opening of the port of Osaca,—Osaca being the great emporium of the country, and the opening of it in January, 1863, the most important stipulation in the treaty. This concession will do no good—it may be regarded only as a sign of weakness; but since it has been made it is much to be hoped that our own Government will insist on the due fulfilment of the other conditions of the treaty.

"The state of the currency is the greatest impediment with which the export trade has to contend. So, if Her Majesty's Government will cause this important question to be settled on a just and fair basis, it will do a great service to British trade in Japan.

"I am, Sir, your obedient servant, "JOHN HUGHES."

At the meeting of the Ceylon Company, the directors' report, recommending the payment of interest at the rate of five per cent. per annum, was agreed to. Operations were commenced in Ceylon early in September, and since then upwards of £59,000 had been invested in mortgages, and about £29,000 in purchases. The business has been extended to the Mauritius. The chairman congratulated the proprietors upon the success which has already attended the company's transactions. A resolution was passed authorising the board to borrow money.

The biddings for 60,00,000 rupees in bills on India took place at the Bank of England. The proportions allotted were —to Calcutta, 30,60,000 rupees; to Bombay, 24,00,000 rupees; and to Madras, 34,000 rupees. The declared minimum price was as before, viz., 1s. 11¾d. per rupee on Calcutta, and 2s. on Bombay and Madras. The applications within the limits were for about 110 lacs. Tenders on Calcutta at 1s. 11¾d. will be allotted in full; on Bombay at 2s. will receive about 17 per cent., and above that price in full; on Madras at 2s. will receive in full.

At a meeting of the Ottoman (Smyrna to Aidin) Railway Company, the chairman, Sir Macdonald Stephenson, observed that the success of the enterprise entirely depends on the completion of the line to Aidin, and that a special meeting will be held on the 4th of May, to consider the subject. The report was agreed to. Messrs. George Smith and Henry Lloyd Morgan were re-elected auditors of the company.

A report which had been circulated, that some relaxation of the prohibitive navigation system, as regards the American coasting trade, was contemplated, so far as to allow goods shipped at Panama for San Francisco to be treated as if from a foreign port, had been positively contradicted, and the *New York Journal of Commerce* adds that there is no reason to expect any change in the national policy. The origin of the rumour is attributed to a desire to promote a speculative movement in the shares of the Pacific Steam Company, and a characteristic aspersion is consequently levelled at the Government by the intimation that the Secretary of the Treasury "may" have been innocent of any connection with such speculation, and "may have been merely used by interested parties for their own purposes."

BOARD OF TRADE RETURNS.

The Board of Trade returns for the month ending February 28 have made their appearance. The following are the exports to the Far East in that period :—

To CHINA.—Cotton Yarns: The quantity exported in February last was 12,410 lbs., making for the two first months of the year 142,410 lbs., against 758,200 lbs. in January and February of 1862, and 2,257,570 lbs. in the corresponding period of 1861. Cotton Goods: The quantity exported in February last was 509,672 yards, against 2,075,906 yards in February, 1862, and 27,667,127 yards in February, 1661; for the two months ending February 28, the amount exported this year was 1,866,510 yards, against 10,517,166 yards in January and February of 1862, and 58,987,483 yards in the corresponding period of 1861. Woollen and Worsted Manufactures: The value of the quantity exported in February last was £13,582, making with the January exports a value of £32,606, against £15,632 in the first two months of 1862, and £88,513 in the corresponding period of 1861. Lead: The quantity exported in February last amounted to 1,248 tons, and, with the export of January last to 1,816 tons, against 718 tons for the first two months of 1862, and 1,009 tons in the corresponding period of 1861. Worsted Stuffs: The declared value of the quantity exported in February last was £24,484, which, with the value of the January exports, makes a total for the first two months of this year of £55,747, against £35,274 in the corresponding period of 1862, and £37,094 in 1861.

To PHILIPPINE ISLANDS.—Cotton Goods: The quantity exported in February last was 1,645,741 yards, against 3,389,185 yards in the first two months of 1862, and 9,019,498 yards in January and February of 1861, there being no exports of cotton goods to the Philippine Islands in January last.

To JAVA.—Cotton Goods: The quantity exported for the first two months of this year was 813,876 yards, against 5,204,429 yards in January and February of 1862, and 8,001,896 yards in the corresponding period of 1861.

To CEYLON.—Cotton Yarn: The quantity exported in February, 1863, was 4,500 lbs., against 45,200 lbs. for January and February of 1862, and and 32,500 lbs. for the first two months of 1861.

EXPORT OF COTTON GOODS.

In Sam Mendel's Prices Current of April 1st are given the latest published returns of exports of cotton and twist to the Far East, from London, Liverpool, and the Clyde :—

The export of plain cottons to Hong Kong and Canton from February 17th to March 17th, was 1,003,629 yards; from March 17th to April 1st, 109,192 yards; and for the twelve months ending March 17th, 16,923,100 yards; the quantity of plain cottons exported to Shanghai for the first-named named period was 1,099,798 yards; for the second period 1,966,205 yards; and for the third period, 1,966,205 yards. Of coloured cottons there were exported to Hong Kong and Whampoa, from February 17th to March 17th, 28,768 yards; from March 17th to the 1st inst., 29,650 yards; and in the twelve months ending the 17th ult., 1,209,373. The exports of coloured cottons to Shanghai were for the first-named period, 709,441 yards; for the second period, 500,025 yards; and for the third period, 4,898,740 yards. The printed cottons exported ot

Hong Kong and Canton from Feb. 17th to March 17th amounted to 145,600 yards; from March 17th to April 1st to 52,800 yards, and for the twelve months ending March 17th, to 1,428,774 yards. To Shanghai the exports of printed cottons were for the first-named period 87,400 yards, for the second period 181,280 yards, and for the third period 3,402,837 yards. Of twist there was exported to Hong Kong and Canton in the month ending Feb. 17th, 18,800 lbs.; from March 17th to April 1st, 40,000 lbs.; and in the twelve months ending March 7th, 2,120,114 lbs. The export of plain cottons to Calcutta from Feb. 17th to March 17th reached 8,474,513 yards; from March 17th to April 1st, 9,000,722 yds; the export of plain cottons to Bombay from Feb. 17th to March 17th were 5,173,414 yards, and from March 17th to April 1st 3,809,131 yards; to Madras, in the first named period, 281,469 yards, and in the second period 199,695 yards. The export of coloured cottons to Calcutta for the month ending March 17th was 1,174,806 yards, and thence to the 1st inst., 484,700 yards; to Bombay, for the month ending March 17th 203,050 yards and thence to the 1st inst. 409,990 yards; to Madras in the first named period, 128,003 yards, and in the second period, 165,300 yards. The amount of printed cottons exported to Calcutta from Feb. 17th to March 17th, reached 734,245 yards, and thence to the 1st inst. 535,660 yards; the printed cottons exported to Bombay from Feb. 17th to March 17th reached 84,560 yards, and from March 17th to the 1st inst 382,230 yards; the printed cottons exported to Madras in the month ending March 17th was 286,075 yards, and from the 17th ult. to the 1st inst. 105,470 yards; the first-named period reached 36,300 lbs., and in the second-named period 50,000 lbs. The twist exported to Calcutta from Feb. 17th to March 17th was 750,500 lbs., and from the 17th ult. to the 1st inst. 409,420 lbs.; there was exported to Bombay in the first-named period 29,530 lbs., and in the second period 108,923 lbs.; the exports to Madras for the month ending the 17th ult. was 36,300 lbs., and thence to April 1st 50,000 lbs. From Feb. 17th to March 17th there was exported to Ceylon 117,602 yards of plain cottons, 79,655 yards of coloured, and 69,472 yards of printed cottons, also 34,000 lbs. of twist; the exports for the same destination from the 17th ult. to the 1st inst. were 308,341 yards of plain cottons, 128,531 yards of coloured cottons, 237,642 of printed cottons, and 30,000 lbs. of twist; Other exports of cottons and twist to the Far East were as follows:—Singapore: from Feb. 17th to March 17th, 611,280 yards of plain cottons, 105,900 yards coloured cottons, and 12,400 lbs. twist; from the 17th ult. to the 1st inst., 3,588 yards plain cottons, 16,853 yards coloured cottons, and 25,908 yards printed cottons. Batavia: Exported from Feb. 17th to March 17th, 130,566 yards plain, 182,011 yards coloured, 168,143 yards printed cottons, and 33,400 yards twist. Manilla: Exported from Feb. 17th to March 17th, 816,140 yards of plain cottons, 768,461 yards coloured cottons, 25,000 yards printed cottons, and 6,550 lbs. of twist.

The amount of bullion by the P. and O. Company's steamer *Ripon*, from Southampton on the 4th inst. was, in gold: to Ceylon, £8,000; to Madras, £2,566. In silver: to Hong Kong, £138,184; to Foo-chow-Foo, £1,596; to Shanghai, £38,600; to Amoy, £1,000. To Aden, Bar gold and silver, £200. Total in gold and silver, £190,146.

ARTICLES OF IMPORT.

TEA.—Our market has been very quiet; the arrivals have continued on a large scale, and have been freely offered, and the trade, with the uncertainty as to the reduction of duty, have been disinclined to add to their stocks, except at reduced prices, and the result has been a decline on many kinds, without leading to any improvement in demand. The Budget will be brought forward on the 16th of April, when we hope the Government will be in a position to grant the long delayed reduction in duty,—a step which the supplies on hand and afloat would fully warrant, they being ample to admit of a largely increased consumption. Dusty and broken-leaf kinds of Congou have sold to a moderate extent at about former prices, also the fair qualities with leaf. Good common is scarce, and, owing to moderate purchases, has risen to 1s. 1½d. per lb. Flavory kinds, of old import, remain much as before. Common to fair Ho-Hows and Ning-Chows have been difficult of sale at a reduction of fully 1d. per lb. Good Ho-Hows and Ning-Chows and second-class Monings, Wopaks and Honams, have been sold to a moderate extent at a further decline of 1d. to 1½d. per lb. Fair to good Kaisows have not been readily saleable, and prices have given way about 1d. per lb. Fine Monings and Wopaks have sold at 1d. to 1½d. per lb. reduction, but finest, owing to the limited quantity, have supported former rates. Fine to finest Kaisows show no alteration. In Tayshan kinds there has been but little doing, and prices remain much as last month. Common Oolongs have been difficult of sale; the fair to good descriptions have been sold to some extent at a decline of fully 1d. per lb. Fair to good qualities of Souchong have been less in demand for export, and prices have given way 1d. to 2d. per lb; fine to finest have been better maintained. In flowery Pekoes there have been some transactions at the low prices established for good qualities. Scented Capers have been only in moderate request. Common kinds show no change; the fair to good kinds have sold 1d. per lb. lower. Fair to good Canton-made Orange Pekoes have been taken to a fair extent, but prices have ruled rather easier; fine are in slight demand at about previous prices. Foo-Chow kinds continue in full supply, and have not been readily saleable at the decline last quoted. There has been an export inquiry for uncoloured Japan up to 1s. 6d. per lb., and the sales made show rather higher prices. The Assam and Cachar kinds, of private growth, did not sell so readily as usual at the public auction, and prices must be quoted irregular at a decline of 1d. to 2d. per lb. Business in Green Teas has been to a fair extent generally at about previous prices. Twankays and Hyson Skins show no material alteration. Common to fair Hysons have been difficult of sale at a decline of about 2d. per lb.; good and fine show no change. Common Young Hysons remain difficult of sale at lower prices; the good and fine kinds have been readily saleable at former prices. Imperials show no alteration. Gunpowders have sold very readily at full prices, especially for the good and fine Moyune kinds, which are scarce. Japan kinds are difficult of sale at former prices. Canton-made Young Hysons have been heavy; but there has been a fair demand for Gunpowders at from 11d. to 1s. 3d. per lb. for common to fair quality. The public sales comprised 39,939 packages, of which 9,876 packages were sold, including 5,195 packages without reserve, and 1,600 packages Assam and Cachar kinds.

SILK.—We have had a very inactive Silk market during the past month; continental politics having to some extent interfered with business, while the prolongation of the American war continues to operate adversely to the interests of manufacturers. In China Silk the transactions have been quite unimportant, and the few sales in Tsatlees recently effected show a decline of about 1s. per lb. from the highest point of January. Taysaams, owing to their scarcity, are still held firmly. The deliveries for the month, 4,586 bales of China and 1,426 bales of Japan, though far behind those of March, 1862, indicate that consumption is progressing satisfactorily. Japan Silk has been almost a dead letter during the past month; occasionally sales have been made at a sensible decline, but it is difficult to quote the fall. Some large arrivals now being unloaded will no doubt lead to business, and establish market rates. The New York circular of Mr. Johnson states: The market continues firm, though less active, at the advanced rates. The reduction of the ten per cent. duty on silk imported from England, will undoubtedly check a much greater advance in Taysams. We quote: Re-reeled Canton Cumchook, Nos. 1 and 2, $8 to $8.50; Long Reel Canton, No. 3, $5; Japan, $9 to $10; Tsatlees, No. 1 to 2, $10 to $10.50; do. Hong, $8.50 to $9; Taysams, usual reel, No. 1 and 2, $8.50 to $8.75; do., do., No. 3 and 4, $7.50 to $8; do., do., re reeled, A 1, none. According to a circular of Messrs. Aries Dufour and Co., of Lyons, the silk markets at that city have, contrary to expectation, shown great flatness during the month. Manufacturers are complaining of the slow sale, even at losing prices, of their rather heavy stock of goods on hand and of the insufficiency of fresh orders. Notwithstanding the fears that have already arisen respecting the result of the next European silk crop, and although the stocks of raw material are small in the various markets, holders exhibit an increased desire to realise; but even the reduction of two to three per cent., shown by existing rates compared with those of last month, fails to create more than a very limited demand.

SUGAR.—The dull state of the market has deterred importers from bringing forward any parcels by auction, and the transactions by private contract on the spot have been of limited amount. Our quotations are:—Bengal, crystalised, 24s. to 27s. 6d.; Benares, 22s. 6d. to 28s.; date, 19s. 6d. to 26s.; ordinary to fine brown, 14s. to 19s. 6d.; Penang, grey and white, 24s. 6d. to 26s.; brown and yellow, 16s. to 24s.; Madras, grocery, 21s. 6d. to 27s.; native, 15s. to 19s.; jaggery, 14s. to 15s.; Siam and China, white, 22s. 6d. to 28s.; brown and yellow, 14s. 6d to 22s.; Manilla, clayed, 18s. 6d. to 20s. 6d.; muscovade, 15s. to 16s. 6d.; Java, grey and white, 24s. to 27s. 6d.; brown and yellow, 15s. 6d. to 23s. 6d.

COFFEE.—The market has exhibited some improvement. The parcels of plantation in auction have amounted to 1,180 casks, 415 barrels and bags, which were taken readily as follows:—Fine fine ordinary to low middling, 85s. to 91s. 6d.; middling to good middling, 86s. to 93s. 88 casks, 2,439 bags native, likewise met free buyers; common good ordinary to superior, 73s. 6d. to 76s. Mocha: 1,385 packages were held for the extreme previous value, at which nearly the whole has been sold; middling to good clean garbled, 92s. to 95s. 6d. There were also brought forward at auction, 1,360 packages, which found free buyers at full prices; common to good yellow clean garbled, 92s. 6d. to 96s.; superior, 97s. Current quotations are as follows:—Mocha, ungarbled, 60s. to 78s.; garbled, com. to good, 80s. to 94s.; ditto, fine, 96s. to 103s.; Ceylon, native, good ordinary to fine, 72s. 6d. to 76s.; ordinary, 68s. to 71s. 6d.; Plantation, ordinary to fine ord., 73s. to 85s.; fine fine ord. to mid., 85s. 6d. to 89s.; good mid. to fine, 90s. to 98s.; Java, 68s to 90s.; Singapore, ordinary and good ord., 58s. to 74s.; Sumatra and Pedang, 57s. to 73s.; Madras and Tellicherry, 72s. to 100s.; Malabar and Mysore, good ordinary, 74s. to 76s.; fine ord. to fine, 77s. to 101s.

RICE.—The tone of the market continues dull, and not above 10,000 bags have been sold on the spot privately, great part Moonghy, at 8s. 7½d., and low cargo sort 8s.; afloat, however, two cargoes new Nakrenzie, amounting to about 2,600 tons, have been realised at 10s. 3d., for Liverpool, and two cargoes floating ditto, making 1,600 tons, at 10s. 1½d. to 10s. 4½d. for the continent. 1,322 bags Bengal in auction have been withdrawn; we are still without any business in Madras. Our quotations are as follows:—Bengal white, 9s. to 15s. 6d.; cargo, 8s. to 9s. 3d.; Madras, 10s. to 12s.; Arracan, Rangoon, &c., 7s. 6d. to 11s.; Java, 10s. to 21s.

SAGO.—Pearl, large, 16s. to 18s. 6d.; small, 17s. to 19s. 6d. per cwt. Large grain again 1s. to 2s. per cwt. cheaper, but small pearl steady; of 1,926 boxes at auction three-fourths sold at 17s 6d. to 18s. 6d. per cwt. for fair to good bold, and 18s. to 19s. fair to good small. Privately fine small has brought 19s. 6d. Flour: 13s. 6d. to 14s. per cwt.; very quiet, and of 1,437 bags at auction, only a few lots damaged sold.

SPICES.—Pepper: Malabar quiet, 330 bags at auction retired; price of sifted, 4d. to 4½d.; half heavy, 3¾d. to 4d. per lb. Black may be quoted at 3½d. to 4d. per lb.; it shows a downward tendency. Auctions have embraced 1,840 bags Singapore, mostly sold at 3¾d. to 3¾d. per lb., and 2,111 bags Penang, at 3½d. to 3¾d.; arrivals, and sales advertised: white, at 5d. to 6½d. per lb. is steady at the former low rates, and 225 bags

Digitized by Google

ordinary Penang at auction were retired at 5½d., and subsequently quitted at 5d. per lb.; arrivals, Ginger: Bengal, native arrivals not yet on the market, sales advertised; quotations 45s. to 50s. per cwt.; stock on April 1, 2,392 cwt.; Galangal Root: Calicut and Cochin, £3 10s. to £6. 10s. per cwt. Rather dearer, especially the lower qualities; and of 88 cases at auction, one-third sold at 71s. per cwt. for middling. Aloes: Soccotrine and Hepatic £3 to £20 per cwt. cheaper, in consequence of increased supplies; but 21 kegs Soccotrine sold at auction at £10 to £15. 5s. per cwt., for fair to good but rather soft; 36 cases Mocha all retired. Cardamons, 5s. to 7s. 3d., quiet, with very little doing; 5 cases Malabar, 16 cases Aleppy, and 10 bags Madras at auction, all retired; 8 bags Ceylon sold at 4s. 10d. to 5s. per lb. for good, and 3s. 1d. low husky. Pimento: 584 bags, in auction, consisted chiefly of old and common qualities, which were about half sold, low middling to good, 2¾d. to 3d., very low, 2½d. per lb. Cassia Lignea meets only partial buyers; 341 boxes being barely half disposed of, low middling 88s., ordinary dark 82s. Cinnamon: Ceylon may be quoted—1st sort, 1s. 2d. to 2s. 1d. per lb.: 2nd, 1s. to 1s. 9d.; 3rd, 10d. to 1s. 4d.; 4th and Jungle, 8d. to 11d. per lb; very little doing. Cloves: Amboyna and Penang, 4d. to 1s. 4d. per lb.; Zanzibar and Bourbon, 3¾d. to 4d. per lb.; nothing doing in Penang; Zanibar cheaper and dull, supply exceeding demand, and of 1,663 bags at auction, a very small portion sold at 3⅞d. to 3⅞d. per lb. for fair to very good: 287 bags Amboyna sold at 3⅞d. to 4⅛d. ordinary dark to good; and sales advertised; stock on hand on 1st inst., 6,503 packages. Cubebs remain very dull; 119 bags at auction, all retired: quotation, £5. 5s. to £5. 15s. per cwt.; stock on hand on 1st inst., 562 bags; Galangal Root, 24s. to 27s. per cwt.; quiet; and of 84 bags at auction, half sold at 25s. per cwt. Mace, first quality, 1s. 8d. to 2s. 3d. per lb.; second, 9d. and 1s. 2d. per lb.; steady; and of 19 cases Singapore at auction, half sold at 8d. to 1s. 2d. per lb. for low to good bright reddish; small sales effected privately. Musk, first quality, 23s. to 28s. per oz.; lower qualities, 12s. to 21s. per oz.; auctions confined to 2 caddies Tonquin, and those not sold. Nutmegs, 1st quality, garbled, 2s. 6d. to 3s. 9d. per lb.; 2nd and 3rd, garbled, 11d. to 1s. 6d. per lb. without change, and 10 cases Penang and 16 cases Singapore at auction, sold at 3s. per lb. for fair bold, and 11d. to 1s. 9d. ordinary to fine medium. Soy: 2s. 5d. to 2s. 7d per gallon; a few casks sold privately at our higher quotation; but of 153 casks at auction, 83 casks were forced off at the reduced prices of 2s. 1d. to 2s. 3d. per gallon. Star Anniseeds: Quotation is 100s. to 105s. Oil of Anniseed, 5s. 7d. per lb.; retail sales made privately at this quotation; 82 cases at auction, all retired. Camphor: China and Japan, £8 to £8. 5s. per cwt. China has sold at £7. 17s. 6d. to £8 per cwt.; limited business privately up to £8 5s. Japan, and China £8.

HEMP.—Jute: This market has been generally much more active, and large transactions have taken place privately, new crop advancing 5s. to 10s. per ton, but old slightly receding; of 14,112 bales brought to auction, rather more than half sold at £18. 17s. 6d. to £28 per ton for common to fine new. Arrivals and sales advertised. We quote this description at £19 to £28 per ton. Stock on hand on 1st inst. 6,074 tons. Manila: The quotation £23 to £27 per ton shows material improvement, and of 5,129 bales brought to auction, a large proportion sold at and after the auctions at £25 to £28 per ton for middling roping to Sorsogon; and £23. 5s. to £23. 12s. 6d. common. The market remains very firm. Arrivals and sales advertised. Stock on hand the 1st inst. 6,477 tons. Sunn: Auctions confined to Bombay, 1,121 bales, of which about two-thirds sold at £23. 10s. to £28. 10s. per ton for low to fair. Sales advertised. Current price £15 to £30. Stock on the 1st inst. 184 tons.

SALTPETRE. The market is characterised by heaviness, and only small parcels Bengal have been placed on rather lower terms, viz., about 800 bags 5¾ to 2¼ per cent. refraction 37s. 6d. to 38s. Nothing has been brought to auction. Moderate transactions have taken place in nitrate of soda at 13s. 9d. to 14s. 3d.

COTTON.—More favourable accounts from India, and an improved demand at Manchester, have united to produce a revival of animation in the market here, and a large business has resulted at an advance of ⅛d. to ¼d. per lb.; the chief particulars of the week's sales being, 3,700 bales Surat, middling fair Kurrachee 11¾d., middling Mangarole to fair Jumbaseer 14¼d. to 15½d. middling Dhollera to fully fair Broach 15¼d. to 17d.; 2,150 bales Western Madras, fair 16d. to 16¼d., Coconada 15d. to 15¼d.; 1,440 bales middling to good fair Tinnivelli 14¼d. to 16¼d.; 3,300 bales middling to good fair Bengal 11¼d. to 12¼d.; 1,050 bales fair to good fair Salem 15¼d. to 16d. The purchases for arrival are 3,850 bales, the bulk Madras at 15¼d. to 16¼d.

TIN.—Banca: Current quotation is £127 to £128. 10s. per ton. The market is firm, with moderate operations. Stock on hand on the 1st inst., 2,505 tons. Arrivals—Straits: The current quotation, £122 to £125 per ton, is firmly maintained; moderate operations.

JAPAN WAX.—Of 519 boxes at auction about one-fourth sold at 69s. to 70s. per cwt. for good block, being cheaper than former quotations. On the 9th inst., of 300 boxes offered most were withdrawn; in the lots disposed of saucer brought 78s. to 80s., and a few blocks sold at 70s. The current quotation is 62s. to 80s. per cent.

MISCELLANEOUS.—Cocoa Nut Oil: Cochin, £51 to £53. 10s.; Ceylon, £48 to £51; quiet. Tortoiseshell: 9s. to 20s.; nothing doing. Bees' Wax: White, £11 to £12 per cwt.; yellow, £7 to £8 per cwt.; both sorts continue scarce. Dragons' Blood: In reeds, fine bright colour when powdered, £11 to £13; in lumps, £4 to £11. Galls: Blue, 100s. to 110s. per cwt.; sorts, 70s to 85s.; scarce, and firm. Gum Ammoniacum: Drop, 80s. to 122s. per cwt.; block, 20s. to 60s. per cwt.; Animi: 1st size, £8. 10s. to £11; 2nd and 3rd size, £6 to £8; partially scraped, £2 to £6; Arabic: Picked, 32s. to 57s.; sorts, 25s. to 35s.; Assafœtida: Drop, 100s. to 120s.; block, 25s. to 90s. Kino: £10 to £14. Myrrh: 1st quality, £9 to £11 to 10s.; 2nd, £4 to £8. Olibanum: White, 65s. to 75s.; reddish, 45s. to 60s.; pickings, 8s. to 32s. per cwt. Madder Roots: Bright red, crisp, sifted, 24s. to 27s. 6d. per cwt.; quiet. Tortoiseshell: Fine, dark mottle on light ground, fine quality, 22s. to 26s.; sorts, 14s. to 21s.; inferior, 10s. to 13s.; Tumeric: 26s. to 30s.; China continues scarce, and wanted. Vermilion: 2s. 2d. to 2s. 3d. Castor Oil: 4¾d. to 6d.; declined in value, sold at 5d. to 5¾d. per lb. for straw. Cowries: Fresh, 30s. to 40s.; dead, 22s. to 32s. per cwt; flat. Horns: Buffalo, 23s. to 45s. per cwt.; buffalo tips, 23s. to 28s. per cwt.; deer, 27s. to 55s. per cwt. Nux Vomica: 9s. to 12s. 6d. Rattans: 3s. to 10s. per 100; firm. Rhubarb: Dutch trimmed, 4s. to 6s. per lb.; common flat, 2s. to 4s. 6d. Sapanwood: Bemah, £5 to £8 per ton; Siam, £8 to £11 per ton; steady. Shells. Mother-of-Pearl: Singapore, 125s. to 150s. per cwt.; Manila, 80s. to 100s. per cwt.; nothing doing. Safflower: Good to fine, £6. 10s. to £8; inferior to middling, £4 to £5. 10s. Ebony Wood: £6 to £13 per ton; firm. Myrabolanes: 11s. to 13s. 6d. per cwt.; firm. Red Saunders Wood: £7. 5s. to £7. 10s. per ton; very firm. 4 tons sold at auction at £7. 10s. per ton. Senna: Tinnevelli, 4d. to 1s. 6d. per lb.: steady: only 11 bales at auction, one-third sold at 4¼d. per lb. for ordinary, and 11 bales pods retired. Sticklac: Siam, 60s. to 85s. per cwt.; very firm. Teeth, Elephants: 70 lbs. and upwards, £38 to £40 per cwt.; 40 to 60 lbs., £35 to £37 per cwt.; 20 to 40 lbs., £15 to £32 per cwt.; Scrivelloes, £30 to £43. Terra Japonica: Cutch Pegue, 24s. to 24s. 6d. per cwt.; steady. Gambier: 20s. 6d. to 22s. per cwt. Gum Benjamin: Sumatra, 1st quality, £15 to £16; 2nd, £12 to £14; 3rd, £6 to £10; 4th, £1 to 5. Damer: 35s. to 52s.; Gamboge: Picked, £8 to £10; in sorts, £4 to £7. Gutta Percha: 1s. 4d. to 2s. 4d. per lb. India Rubber: 3s. to 1s. 5d. per lb. Seed: Linseed, 61s. to 66s. per qr.; quiet; rapeseed, 62s. to 67s. per qr.; scarce. Rum: Scarcely any business done in East India.

ARTICLES OF EXPORT.

IRON.—The quotations in London are for Welsh bars, £6. 10s. to £6. 15s.; nail rods, £7. 5s.; hoops, £8. 10s. to £8 15s.; sheets, single, £9. 10s. to £9. 15s.; Staffordshire bars, £7. 10s. to £8; rails, £5. 12s. 6d. to £6.

STEEL.—Swedish keg, £16.

COPPER.—Sheet and sheathing, £96 per ton; yellow metal, 8¼d. per lb.

TIN.—119s. for block; 120s. for bar. Tin plates, best charcoal, I.C. 28s. 6d. to 29s. 6d. per box.

LEAD, &c.—English pig, £20. 15s. to £21. 10s.; shot, patent, £23. 15s.; sheet, £21. 10s.; spelter, £18; zinc, English sheet, £23. 10s.; quicksilver, £7 per bottle.

Until the last ten days business in metals generally was lively, but there is now a slackness in the demand for all descriptions.—Iron.—Scotch Pig Iron has been steadily declining during the last month, the late advance having been mainly caused by speculation. English iron is flat. Staffordshire also is without animation. Copper.—The price continues steady with a moderate demand, but with the large quantity of Ore and Regulas constantly offering for sale, no improvement for some time can be expected. Foreign is without alteration. Tin.—The demand for English has been good all the past month, and for a week past the smelters have been selling small quantities only. Foreign was in great demand, and prices advanced almost daily, in one instance 127s. was reported as being paid for arrival, but the last ten days no business is reported higher than 125s. three months prompt, and 124s. cash, Banca is quoted 128s. and 128s. 6d.

The stocks of Foreign Tin, here and in Holland, for three years are given below, the increase of the stock here is mainly owing to parcels of Banca brought from Holland, and stored here.

	31st March, 1863.		1862.		1861.	
	Slabs.	Tons.	Slabs.	Tons.	Slabs.	Tons.
Foreign in London, estimated at		2,590		1,470		856
In Holland	44,090	1,330	36,066	1,104	41,454	1,269
		3,920		2,574		2,125
In Holland towards next sale	95,955	2,940	115,728	3,544	129,244	3,958
		6,860		6,118		6,803

The quantity of Straits Tin afloat for Europe is 654 tons, against 1,023 tons in 1861 and 834 in 1860 Tin Plates.—The demand is good, especially for coke plates, but prices have not advanced in the same proportion as that of tin. The quantity shipped to all parts was about 90,000 boxes, against 102,400 boxes in the same month 1862. Lead was dull last month, although of favourite brands there is no alteration in price; in other descriptions, sellers are inclined to give way. In Spanish there have been no transactions lately. Spelter continues very dull at £18 on the spot. The stock here is 4,161 tons, against 4,933 tons 1st April, last year.

EXPORT OF BULLION TO CHINA, &c.

FREIGHTS AND CHARTERS.

Outward freights remain unaltered. Vessels for China are in request also for other ports at last rates. Homeward freights are quoted firm at 75s. from Singapore, and 80s. for Manila.

Current Rates of Freight for Vessels on the Berth:—To Amoy: 50s. to 60s. measurement, 60s. weight; Kanagawa: 60s. measurement, 80s. weight. To Shanghai: 30s. measurement, 50s. weight. To Hankow: 60s. To Hong Kong: 25s. to 30s. measurement, 40s. weight. To Manila and Labuan: 50s. weight or measurement. To Singapore: 30s. weight or measurement. Penang: 35s. to 40s. Batavia: 40s. weight, 30s. to 40s. measurement. To Bankok: 60s. weight or measurement.

The quotations for coal and iron from the North are as follows:—For Hong Kong: £41. 10s. and £1. 17s. 6d. For Shanghai: £51. 10s. and £2. 10s. For Manila, £1. 12s. to £1. 12s. 6d. For the Philippine Islands, Penay, or Zebu, £2. For Singapore, £27 and £1. 8s. For Penang, £24. For Galle, £27 and £1. 10s. These rates are from the Wear or Tyne, and Newport, Cardiff, or Swansea, respectively.

The Admiralty have offered the following Government stores for tender, viz., 21 tons victualling stores, 2 tons heavy targets, &c., and 3 tons oils and paints, from the River Thames for Hong Kong.

CASUALTIES.

The Weymouth, Norris, which sailed from London 24th inst. for Shanghai, had to put back to Gravesend the same day with loss of fore and main yards, having been in collision, but proceeded next day.

New York, March 16, the Game Cock, Jayne, which arrived here March 14, from Shanghai, reports having passed several boxes which looked like tea chests, March 4, in lat. 27 N., long. 69 W.

The Economie Visser, from Marseilles, for Hong Kong, put into Gibraltar March 23 with loss of fore and main topmasts, jib-boom, &c., afterwards she lost her anchors, and was towed further into the Bay till others were supplied.

The Freia (Dan. ship), Sorensen, from Java to Amsterdam, with sugar, put into the Mauritius Feb. 15, leaky, having experienced a heavy cross sea in lat. 25 S., long. 66 E., she had discharged her cargo and would be obliged to go into dry dock.

The Ethereal (Brit. ship), Duncan, from Singapore, with a general cargo, anchored at the Bell Buoy, (Mauritius), Feb. 10, with planks round the stern ports started, and some cargo thrown overboard, having been struck by a sea in a hurricane Feb. 6, in lat. 19 S., long. 70 E., which lasted four days; on the 11th, she was obliged on account of bad weather to slip 75 fathoms of chain and an anchor, and put to sea, and throw overboard about 100 tons of cargo; on the 15th she returned to the Mauritius.

Off ASCENSION.—Feb. 24, Schelde (Dutch barq.), from Padang for Amsterdam.

At MADEIRA.—March 22, Amoy, Chinese gunboat, from Falmouth.

At St. VINCENT, C. V.—March 16, Fowkien (str.), Johnson, from New York for Hong Kong.

At. St. HELENA.—Feb. 20, John O'Gaunt, Stanton, from Galle, and sailed, 21, for New York.

At TABLE BAY. Jan. 28, Voltigeur, Scharmberg, from Newcastle, and sailed, Feb. 1, for Hong Hong; Feb. 7, Teviot, Jones, from Colombo, and sailed, 9, for London; 1, Sydpolen, Gjertz, sailed for Batavia; 14, Clan Alpine, Bolton, sailed for Hong Kong; 17, Peiho, Ohlsen, sailed for Anjer.

Off TABLE BAY.—Feb. 20, Louisa, from Colombo.

At NATAL.—Jan. 17, Bob Tail Nag, Atkins, sailed for China.

At MAURITIUS.—Feb. 10, Marie Anais, De Venancourt, sailed for Galle; March 1, Reward, Bidder, sailed for Singapore.

LAUNCH OF THE P. AND O. STEAMER "RANGOON."—A splendid iron screw steamship, named the *Rangoon*, intended for the Peninsular and Oriental Steam Navigation Company, was launched from the ship-building yard of Messrs. Samuda, at Blackwall; but, unfortunately, in attempting to bring her up, she took ground on the opposite (Kent) side, on the 4th inst. The *Rangoon*, which is nearly 3,000 tons burthen, left the slip in the most easy style, and all seemed fair for a most successful launch. It would appear, however, that on entering her future element she acquired such an impetus that she went ashore. Several powerful steamtugs got hold of her, and by their united power endeavoured to haul her off, but to no purpose, and as the tide began to fall it was evident that her floating could not then be accomplished. On the tide receding gangs of labourers were employed in cutting away a channel for her, and on the following morning she floated, without having sustained any material injury. The P. and O. Company's new steamer *Carnatic* has arrived in Southampton docks. The new steamer *Poonah* is appointed to leave on the 20th inst.

THE CARGO BOATS FOR THE YANG-TSE.—We noticed lately the building of a fleet of iron boats under the superintendence of Captain Maxton. Four of the larger vessels, named the *Sparrow*, *Swallow*, *Robin*, and *Raven*, are of 170 tons register, schooner-rigged, and have sailed for Shanghai. The remaining fourteen are now in course of shipment, in pieces, per *Osprey*, and another vessel to follow. These boats are, we understand, for Messrs. Russell and Co., and intended as cargo boats on the Yang-tse, to be towed by steam power.

The bark *Constance*, lately despatched by Messrs. Holmes, Knevitt and Holmes, is intended to trade on the coast of China, and is owned by Messrs. Ellissen and Co. She is commanded by Captain Risden, late chief officer of the *Ballarat*.

The steamer *Fo-hien*, which will be found in our shipping list as having sailed for China, is intended as a tug-boat for the Foo chow river. She has been despatched by Captain Dring. A steamer of the same name has also been despatched from New York.

AUSTRALIA and NEW ZEALAND.—The most reliable intelligence from these colonies is given in the AUSTRALIAN and NEW ZEALAND GAZETTE, published every Saturday, price 6d., free by post.

London: F. ALGAR, 11, Clement's-lane, City.

THE CANADIAN NEWS and BRITISH COLUMBIAN INTELLIGENCER gives the latest intelligence from all parts of Canada and the new Gold Fields, also Original Correspondence from Canada, &c Price, post free, 5d.

London: F. ALGAR, 11, Clement's-lane, City.

HOLLOWAY'S OINTMENT AND PILLS.—Indisputable remedies for bad legs, old wounds, sores, and ulcers, if used according to directions given with them; there is no wound, bag leg, ulcerous sore, or bad breasts, however obstinate or long standing, but will yield to their healing and curative properties. Numbers of persons who have been patients in several of the large hospitals, and under the care of eminent surgeons, without deriving the slightest benefit, have been thoroughly cured by Holloway's Ointment and Pills. For glandular swellings, tumours, scurvy, and diseases of the skin, there is no medicine that can be used with so good an effect. In fact in the worst forms of disease, dependent upon the condition of the blood, these medicines are irresistible.

THE JAPAN HERALD (the only Journal published in Japan) is rendered interesting to the general reader by the usual leaders and discussions on passing events, by its local intelligence, and by frequent notices of the People, their Government, Laws, Literature, and Manufactures, and of the natural productions of the country; whilst the Merchant and Trader will find his interests consulted by a carefully compiled statement of Exports of the two staples, Silk and Tea, of the current seasons, showing the comparisons with the same time last year—also by authentic Market Reports of Imports and Exports, with the usual Shipping List of Arrivals and Departures, in Harbour, &c.

Published Weekly—Price 25 dollars per annum.

Files of this Paper may be seen at the following Offices in London, where orders for subscriptions and advertisements will be received, viz.:—LONDON and CHINA TELEGRAPH, George-yard, Lombard-street; Mr. F. Algar Newspaper Agency Office, 11, Clement's-lane; and Mr. George Street, 30, Cornhill, or such orders may be sent direct to the Proprietors of the *Japan Herald*, Yokuhama, Japan.

OPPOSITE THE POLYTECHNIC INSTITUTION

Cholera, Dysentery, Diarrhœa, Ague, Fevers &c.

BEWARE of SPURIOUS and DANGEROUS COMPOUNDS, Sold in Imitation of

DR J. COLLIS BROWNE'S CHLORODYNE.

Certain dishonest and unprincipled Chemists piratically apply this name to worthless compounds—a name invented and applied by Dr. J. C. Browne, M.R.C.S. (on Army Medical Staff), to his great discovery, which is so extraordinarily curative in the above diseases.

As a proof of its efficacy, a few extracts from numerous testimonials by physicians and surgeons are given:—

From A. MONTGOMERY, Esq., late Inspector of Hospitals, Bombay.

Chlorodyne is a most valuable remedy in neuralgia, asthma, and dysentery. To it I fairly owe my restoration to health after eighteen months' severe suffering, and when all other medicines had failed.

DR. JAS. CAMPBELL,
Surgeon, R.N., H.B.M. Consulate.
Bangkok, Siam.

"Make up for me 400 half-ounce bottles of Dr. J Collis Browne's Chlorodyne. You will be surprised at such an extensive order from this part of the world, but much experience in its employment has led me to entertain a high opinion of its curative properties in various diseases."

Sold only in bottles, at 2s. 9d. and 4s. 6d., by the Sole Agent and Manufacturer, J. T. DAVENPORT, 33, Great Russell-street, Bloomsbury-square, London; and professional testimonials enclosed. None genuine without the words "Dr. J. Collis Browne's Chlorodyne" engraved on the Government stamp.

W. HARDING,
SAILMAKER,
VICTORIA, HONG KONG.

SEA FRONTAGE.

AT

HONG KONG.

FOR SALE.—IMPORTANT and VALUABLE BUSINESS PREMISES on the Harbour of "Victoria, Hong Kong," situate near the centre of the City, having Extensive Frontage (of upward of 250 feet each) to the "Praya or Wharf" and "Queen's Road," by nearly an equal depth, comprising Marine Lots No. 65 and 65A, upward of 62,000 square feet area, held by lease from the Crown for a Term of 999 Years from October, 1844, at an annual ground rent of £160 per acre, and will be SOLD by PUBLIC AUCTION at Hong Kong the first week in June next; and possession given on completion of the purchase not later than Midsummer, 1863. A portion of the purchase money can remain on mortgage if required.

This desirable property offers to the Merchant or Public Company a most eligible building site, bounded by Public thoroughfares, suitable for the erection of warehouses with extensive vaults (the latter partially completed); or the whole of the buildings at present erected could be demolished, and a large Steam Boat Depôt, Tea Hong, or Mercantile Offices erected in their stead, with the material (100,000 cubic feet of hewn granite) now on the land; or to suit persons with smaller pretensions, the land might be divided into two pieces. There is sufficien, depth of water for ships close in shore; moorings already laid down, and a stone Jettie or Public landing in front.

"Victoria" is a Free Port, offering special advantages to the Merchant seeking an Insurable Depôt for his goods; it is convenient to the Great Marts and disturbed Provinces of China, quite safe from "Rebel" and "Imperial" attack and the Port where the teeming Traders and Mercantile Marine from those Marts and Provinces carry on a peaceable thriving trade, similar to that yearly developed between "Singapore" and "The Eastern Archipelago."—Further particulars may be had of the Auctioneer, "Victoria Exchange," Queen's-road, Hong Kong.

TELEGRAPHIC COMMUNICATION BETWEEN ALEXANDRIA AND ENGLAND And the Continent generally.

MR. E. ST. JOHN FAIRMAN, MERCHANT, ALEXANDRIA, EGYPT, will undertake to receive and Forward Telegrams, &c., &c., for accoun of Firms abroad

MACKINTOSH BALFOUR, General Manager.

DR. CURTIS'S MEDICAL WORK, "MANHOOD."
An Essay on Nervous and Generative Diseases.

The 140th Thousand, with numerous plates in a sealed envelope, price Half-a-Dollar,

MANHOOD: the CAUSE and CURE of PREMATURE DECLINE IN MAN, with plain directions for perfect restoration to health and vigour being a Medical Essay on Nervous and Generative Diseases, their Prevention and Cure, with the Author's experience in the Treatment of the various Disqualifications of Marriage—whether resulting from Youthful Abuse, the Follies of Maturity, the Effects of Climate or Infection. The result of Twenty-five Years' successful practice. By Dr. J. L. CURTIS, 15, Albemarle-street, Piccadilly, London.

Consultations, Ten till Three and Six till Eight.

REVIEWS OF THE WORK.

"We feel no hesitation in saying, that there is no member of society by whom the book will not be found useful—whether such person hold the relation of a Parent, Preceptor, or Clergyman."—Sun, Evening Paper.

"Dr. Curtis has conferred a great boon by publishing this little work, in which is described the sources of those diseases which produce decline in youth, or more frequently premature old age."—Daily Telegraph, March 27, 1863.

Dr. CURTIS may be consulted, as usual, either by letter or personally, at his residence, as above. Patients in INDIA CHINA, and the COLONIES can be cured by correspondence only, and have their medicines sent with secrecy and despatch. The efficacy and harmless nature of the remedies employed by Dr. CURTIS, having been demonstrated by the most complete success during a practice extending over a period of Twenty-five Years, nervous sufferers of every class have a perfect guarantee that the utmost skill and experience will be made available in the treatment of their cases.

LIFE DEPARTMENT.

(REDUCED RATES FOR THE EAST INDIES AND CHINA.)

The Directors of this Company beg to announce that they have adopted a new System of Rates for the East Indies and China, considerably lower than those now charged by this or—they believe—any other Company, but differing from the old system in respect that no reduction takes place on the insured returning to Europe or proceeding to any other part of the world for which no extra premium is charged.

According to this method, the insured, instead of being subjected to a heavy extra premium during the years of his residence in the Tropics, has the option of throwing the same over the whole currency of his Insurance, by paying an unchanging rate which, it will be seen, is very little higher than the home one.

The following are Specimens of the New Rates:—

EAST INDIES AND CHINA.

ANNUAL PREMIUM FOR THE INSURANCE OF £100.

(Payable during the entire currency of the Policy.)

Age.	Without Profits.	With Profits.	Age.	Without Profits.	With Profits

BOMBAY and ADEN—Overland, 12th and 27th.

CHINA, SINGAPORE, and EASTERN SEAS—Overland, 4th and 20th.

AUSTRALIA and MAURITIUS—Overland, 20th.

INDIA, CHINA, and AUSTRALIA—Via Cape of Good Hope, Clipper Ships, weekly.

Prospectuses, with through rate to 500 places, free on application.

G. W WHEATLEY and Co. (late Waghorn), 150, Leadenhall-street, E.C.; CHAPLAIN s, Regent-circus, W., and 23, Regent-street, S.W.

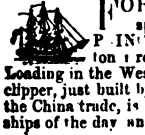
INDIA and CHINA.—New Overland Steam Communication.—French Mail Steam Ships.—Services Maritimes des Messageries Impériales.—On the 19th of every month, a FRENCH MAIL STEAMER will be despatched from Marseilles, at 2 P.M., for ALEXANDRIA, corresponding with another steamer from Suez to India and China. Passengers will be booked and cargo received for conveyance to the following ports:—Messina, Alexandria, Aden, Point de Galle (Ceylon), Pondicherry, Madras, Calcutta, Singapore, Saigon, and Hong Kong. In addition to the foregoing, the November steamer will receive passengers and cargo for Shanghai.

For Passage, Freight, and general information, apply to R. W. and H. HORNE, 4, Moorgate-street, London; G. H. FLETCHER and Co., 11, Covent-garden, Liverpool; and at No. 28, Rue Notre Dame des Victoires, Paris; 7, Place des Terreaux, Lyons; 1, Place Royale, Marseilles; 36, Quai de Bacalan, Bordeaux; or to Messrs. SMITH and Co., Rotterdam.

SHANGHAI Direct, to follow the Ballarat, the magnificent clipper ship MIRAGE, A 1 ten years, 718 tons register, JOHN ROBERTS, Commander; loading in the East India Docks. This splendid vessel has made some of the fastest passages on record, and having a large portion of her cargo engaged, will be quickly despatched.

For Freight or Passage apply to the owners, Messrs. EWING and Co., 11, Leadenhall-street, E.C.; or to GELLATLY, HANKEY and SEWELL, 27, Leadenhall-street, E.C.

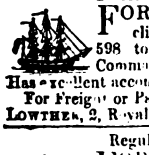
Will be quickly Despatched.



FOR SHANGHAI, Direct, the splendid new British-built clipper ship PRINCESS OF WALES, A 1, 10 years, 461 ton s register, J. BARRON, Commmander. Loading in the West India Docks. This beautiful new clipper, just built by Mr. Vaux at Harwich, especially for the China trade, is expected to prove one of the fastest ships of the day and is worthy the inspection of shippers and passengers.

HOLMES, KNEVITT and HOLMES, Sun-court, Cornhill, London, E.C.

To follow the "GARRAWALT."



FOR SHANGHAI, the fine new clipper ship OSPRAY, A 1 ten years; 598 ton s register; NATHAN ANDREW, Commander; lying in the East India Docks. Has excellent accommodation for passengers.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packet Ship.

FOR HONG KONG and WHAMPOA, the celebrated clipper-built ship MARY ANN WILSON, A 1 fourteen years, 944 tons register, JOHN H. SMITH, Commander, lying in the London Docks. This ship has a full poop, with superior accommodation for passengers, and is well known for her rapid passages.

For Freight or Passage apply to PHILLIPPS, SHAW, and LOWTHER, 2, Royal Exchange-buildings, E.C.

Regular Line of Packets.

FOR BATAVIA, the Fine Fast-sailing barque WILLIAM SIMPSON, A 1, thirteen years, 396 tons per register, coppered and copper-fastened throughout. DAVID NAPIER, Commander. Lying in the St Katharine Dock. Has superior accommodation for passengers.

For Freight or Passage apply to the owners, THORNTON and WEBB, Old Swan Wharf; or to RANGEL, WOOLLETT and Co., 1, Lime-street-square.

With immediate despatch.

To sail positively 1st May; last loading day 26th inst.

FOR SHANGHAI DIRECT, the celebrated Aberdeen-built clipper QUEEN OF NATIONS (belonging to Messrs. George Thompson, jun., and Co.), A 1 fourteen years; 846 tons register; THOS. MITCHELL, Commander; loading in the East India Docks. This beautiful clipper ship has magnificent accommodation for passengers, and offers the best opportunity to shippers.

For Freight or Passage apply to the OWNERS; or to W. O. YOUNG, Newman's-court, 74, Cornhill, E.C.

SHANGHAI DIRECT, to follow the QUEEN OF NATIONS, with immediate despatch.—The splendid Aberdeen-built clipper MARQUIS of ARGYLE (built by Messrs. Walter Hood and Co. expressly for the China trade) A 1 eleven years; 515 tons register; R. BELL WOOD, Commander; to load in the St. Katharine's Docks, offers the best opportunity to shippers and magnificent accommodation for passengers.

For Freight or Passage apply to W. O. YOUNG, Newman's-court, 74, Cornhill.

FOR SHANGHAI Direct (to sail punctually on the 12th May, last shipping day 11th), the well-known Aberdeen clipper CISSY, A 1 ten years, 649 tons register, ROBERT SPENCER, Commander; London Docks. This ship has good accommodation for passengers.

For Freight or Passage apply to TEMPERLEYS, CARTER, and DARKE, 3, White Lion-court, Cornhill, E.C.; or to KILLICK, MARTIN, and Co., 29, Nicholas-lane, Lombard-street, E.C.

SINGAPORE direct, warranted first ship, the splendid fast-sailing clipper ASCENDANT, A 1 13 years, 517 tons register, C. COCKBURN, Commander; loading in the St. Katharine Docks. Has superior accommodation for passengers.

Apply to A. WRIGHT and Co., 19, St. Helen's place; or to DOUGLAS and MILLS, No. 23, Billiter-street, E.C.

With Quick Despatch.—Having a large portion of her Cargo Engaged.

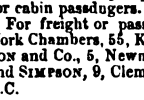
FOR HONG KONG and WHAMPOA, the well-known clipper ship LAUREL, A 1 13 years, (belonging to Messrs. John Willis and Son), 638 tons register, loading in the East India Docks.

ELLIS, WILLIS, and FICKLING, 132, Leadenhall-street, E.C.

To follow the CHARLOTTE ANN with despatch.

FOR COLOMBO, Direct, the fast-sailing clipper barque, REGIA, A 1, ten years, 417 tons per register, ROBERT DAVIS, Commander. Loading in the West India Docks. This excellent clipper was built under special survey in 1863. Shippers are requested to inspect the vessel, as it is evident from her beautiful model that she must make a rapid passage. Has good accommodation for cabin passdugers.

For freight or passage apply to JOHN WILLIAMSON, York Chambers, 55, King-street, Manchester; to ROBERTSON and Co., 5, Newman's-court, Cornhill; or to STUART and SIMPSON, 9, Clement's-lane, Lombard-street, London, E.C.



ROBERTSON and CO. will despatch the following first-class VESSELS to their respective destinations. They are well adapted for their several trades, and are confidently recommended to their friends:—

Destination.	Ships.	Docks	To Sail.
Shanghai	Speedy ...	W.I.D.	April 20.
Shanghai	Cymbeline ...	W.I.D.	May 5.
Amoy & Foo-chow-Foo	Vibilia... ...	W.I.D.	With des.

List of Passengers.

PASSENGERS INWARD.

By this mail to Marseilles, per Valetta, arrived 25th April.—From Hong Kong: Capt. Fitzgibbon, Messrs. Stokes, How. Egerton, and Watson, Rev. Mr. Smith. From Singapore: Mr. Thurkon. To Southampton, per Ripon, expected to arrive 1st May.—From Hong Kong: Capt. Burton, Lieuts. Walcott and Gardiner, Messrs. W. Masler, H. Paterson, W. Alexander, P. Fleming, and J. Stephens, Asst. surg. Maher, Capts. G. Roberts and Haslewood, Master Soames, Lieut.-col. Thomas, Capt. R. Cairns, W. Hinton. From Singapore: Mrs. Velge, child, and European female servant, Capt. Evans, Mr. Watson, Capt Scherk J. F. Campbell. From Ceylon: Dr. and Miss Shipton, Mr. De Livera, Mr. and Mrs. Dalziel, four children, and native female servant, Messrs. Johnson and Oliver.

Per Bengal to Suez, arrived 15th April.—From Galle: Mr. C. Pearson. From Hong Kong: Mr. Appert. From Singapore: Messrs. Liebert and Van Hort, and one deck passenger. To Alexandria from Hong Kong: Col. Forrester and servant, and Mr. P. Ehlers.

By last Bombay mail, per Massilia, arrived at Marseilles 19th April.—From Singapore: Mr. and Mrs. McClelland. To Southampton, per Pera, arrived 25th April.—From Hong Kong: Mr. C. Scott.

PASSENGERS OUTWARD.

By this mail, per Poonah, 20th April, from Southampton.—To Shanghai: Mr. H. Lewis, Commander S. Moriarty, Mr. Beazley, Mr. Mackenzie's groom. To Hong Kong: Messrs. S. Douglas, W. D. Caldwell, C. Deane, J. M. Lloyd, R.N., E. K. Barnes, R.N., J. Morris, R.N. To Penang: Capt. and Mrs. Robson. To Ceylon: Messrs. A. Cayley and W. D. Grey. To Calcutta: Mr. A. M. Ross, Rev. Mr. Clough, Lieut. H. and Mrs. Campbell. Mr. F. Leisk, Mr. and Mrs. Morse and infant, Miss Murray, Miss Jones, W. D. Jones, Louisa Kennoy, Mary Ann Kennoy, C. P. Murray, Matthew Crawford, Lieut. Algar, Capt. E. Howard, Henry Coster. To Madras: Mr., Mrs., and Miss Cadell, Mrs. Chambers, Miss Stoddart, Miss Moorat, Mr. W. A. Porter, Mr. R. Gallardyce. To Alexandria and back: Mr. Price and son, Mr. H. Walton. From Gibraltar.—To Hong Kong: Deputy-Assist. Com.-Gen. Mercer. From Alexandria.—To Hong Kong: Mr. Teickman. From Suez.—To Ceylon: Mr. M. H. Thomas.

From Marseilles per Massilia, to leave April 29.—To Shanghai: Mr. Howie. To Hong Kong: Mr. W. Cryder. To Singapore: Mr. J. Murray. To Calcutta: Mr. and Mrs. Strong, Mr. McDonell, Ensign F. Fane, Major-General Garvock, Capt. Hon. C. Chetwynd, Lieut. Sanderson. To Madras: Mr. C. Austin.

Per P. and O. steamer, May 4, from Southampton.—To Hong Kong: Mr. C. A. Roetzschke, Staff Assistant Surgeon Clapp. To Singapore: Mr. and Mrs. De Wind, Mr. Kelso. To Ceylon: Miss Tait. From Gibraltar to Hong Kong: Governor Amaral and lady. From Marseilles, May 12, to Hong Kong: Mr. and Mrs. Maclean, Mr. Myburgh, Mr. Dring. To Shanghai: Mr. Arthur Ilbert.

Per P. and O. steamer 20th May, from Southampton.—To Singapore: Mr. K. R. B. Robertson. From Marseilles, 28th May.—To Hong Kong: Mr. G. Wallis, Mr. W. Parizot. Per French mail steamer Labourdonnais, from Marseilles, 19th April.—To Galle: Mr. Forster, Mr. Henry Scott.

Summary of News from the Far East.

ANOTHER REPULSE OF THE IMPERIALISTS AT SHAOU-HING.

The rebel victory at Tai-tsan on the 15th February, has been succeeded by another victory at Shaou-hing (more properly Shaou-hsing), ninety miles from Ningpo, which took place on the 20th February. This is unfortunately the second repulse which the Imperial disciplined troops have met with before Shaou-hsing; in the first attempt to take the city, General Lebrethon, it will be remembered, was killed by the bursting of a gun, and the troops under his command became disheartened in consequence. On this occasion General Tardif, his successor, was also killed, by the fire of his own men as he was leading the assault. For a second time, too, the assault was impeded by the want of proper means for crossing a moat that surrounded the city—the first time being at Tai-tsan. It continues to be noticed that the rebels seem well supplied with European arms of the newest pattern. Captain Dew and Lieutenant Tinling, from H.M.'s ship *Encounter*, were present at the second attack upon Shaou-hsing, in the capacity, it is said, of spectators. Lieutenant Tinling received a wound in the head, which has proved fatal; he died in Ningpo a day or two after receiving it. Not long ago he had been promoted for gallantry at Ningpo. Captain Dew and he were both absent from duty on the unhappy occasion, and the event will probably put an end to British officers travelling beyond a radius of thirty miles.

The special correspondent of the *North China Herald*, who accompanied the expedition, writes:—"The whole country through which we passed between Ningpo and Shoau-hsing is richly cultivated, and, in many parts, very beautiful. On the 17th February, we slept in a large Chungmaou town near a very celebrated monastery, in which is a large statue of Buddha, some twenty-feet high, cut out of solid rock. It was a great mistake on General Tardif's part, and much against Captain Dew's wish, to take the men into this place, as the consequence was that they were all dispersed looting on the following day; and it was only after much trouble that they could be got to move forward against Shaou-hsing. When they did so, at least 500 boats followed, each soldier having his own private *san-pan* containing, and ready for more *loot*. Many of the officers were almost as bad as the men, drinking and smoking, and taking hardly any care to maintain discipline among their men. On the morning of the 18th we arrived before the walls of Shaou-hsing, and during the night got our 68-pounder in position, without much molestation. On the morning of the 19th fire was opened from it and also from the French howitzers; but the practice of the latter was bad. That of the mortars was moderate, but the 68th quickly made one of the finest breaches I have seen. So much of the earthwork was knocked down that it could easily be walked up, and the necessity for scaling ladders was avoided. The fire from the walls during this time was heavy and well-directed; and wounded were being constantly carried to the rear. A good hospital had, however, been got ready, with beds and plenty of straw, under the superintendence of the Bishop of Ningpo, and they were made tolerably comfortable. At noon the drum from the European company beat the advance, the trumpets took up the order, and all was made ready for the assault. It was just at this time that General Tardif was knocked

Digitized by Google

over, he was carried to the hospital and treated with every care by a medical gentleman who accompanied the force, but his case was hopeless. The ball had smashed the back of the head, and the brain was protruding. Paralysis almost immediately supervened, but he survived ten hours, though the greater part of the time in a state of delirium. The assault was made almost immediately he was wounded, but it is thought his loss dispirited the Chinese. There was also some bungling about the boats at the creek, so that only a few got across, and none of the Chinese would follow. Colonel Corpier got about half way up the breach, but was knocked back by a brick.

"The *Chung-maous* kept up a most infernal fire, and over a hundred men were wounded; more than half of the European company and half the officers, including two of Ward's; and finally the attempt was obliged to be given up. Notwithstanding the number of wounded, the killed were very few—I think not more than ten, of whom two were Europeans. It is surprising what a number were wounded in the neck; in others the shoulder blade was completely smashed, and some were shot through the lungs. The bullets used by the rebels were principally of the needle pattern. I think the total loss was about 110—viz., ten killed, thirty wounded dangerously, and seventy more or less severely. Among the latter is Mr. Tinling, fourth Lieutenant of the *Encounter*, who has had a bullet extracted from his head. This is a tolerably full bill for a few hours' work, and shows that rebel fighting is not quite so pleasant and easy an amusement as, in some quarters, it is considered.

"At present we are awaiting the arrival of a French officer to succeed Tardif in command of the force; and, in the meantime are making a sap and throwing up fortifications under Captain Dew's superintendence. Several 32-pounders are also expected, and on their arrival the city has to fall. Everything is going on well, save that the rebels have got in our rear, where they are burning diligently. The officers are rather troublesome. I cannot call them French, for they consist of almost every nation under the sun—American, English, French, Dutch, Portuguese, Italians, and Negroes. They are given to drinking, and it is difficult to persuade them that work, or even superintendence, is better for their constitutions. However, it is only a question of more guns, and Shaou-hsing must fall. You see I am very confident, notwithstanding that we were beaten in our two first attempts."

JAPAN.

The telegraphic news that "military hostilities" had commenced in Japan is not confirmed by this mail. It is stated, however, that the Japanese Government is endeavouring to bring its army to a high state of effectiveness. The object of Admiral Kuper's expedition to Japan has not transpired; but it is rumoured that he is commissioned to demand a large fine (£125,000, according to the *China Mail*) for Mr. Richardson's murder. Another journal states that if this indemnity is refused, he will bombard the seaport towns "until further notice.'

CHINA.

PEKING.

Prince Kung seems to be as active as ever in reforming the general administration of the Empire. The Viceroy who was, a month ago, appointed to succeed Laou at Canton, has been called to Peking to receive, it is supposed, instructions of a personal kind as to the Imperial policy with regard to foreigners.

TIEN-TSIN.

As reported in our last issue, the ice on the Peiho had broken up unusually early this season. It is now said that the ice broke up at Taku, on the 2nd of February—the earliest time known since the location of foreigners in North-China. The latest advices from this port are to the 21st Feb.; up to which date remarkably fine weather prevailed. Throughout the winter season generally it was also mild; and very little sickness occurred either at Taku or Tien-tsin. A formidable band of marauders has appeared in the country to the westward of Tien-tsin—the distance they are off is stated to be from 30 to 100 miles, the latter supposed to be nearest the mark. At all events their proximity to the place was considered by the British military authorities so threatening that the detachment of the 67th regiment, quartered at Taku Forts, had been ordered up to Tien-tsin; and it was reported that Captain Coney of that corps, who has been employed in drilling the Chinese, was about to march out against the enemy with two battalions of the disciplined force. These marauders who are disturbing the province of Pe-cho-li are said to be local banditti, and not to have any connection with the Taipings.

The formation of the Chinese Hospital at Tien-tsin, it will be remembered, was proposed by some of the medical officers to Brigadier-General Staveley, C.B., who appointed a committee for the purpose of reporting upon the practicability of establishing an hospital and dispensary for the benefit of the sick paupers at Tien-tsin. This was recommended by the committee, and the hospital was established in January, 1861, under the superintendence of Surgeon Lamprey, of the 67th, who had kindly volunteered his services. A subscription list was circulated, which was liberally responded to, and the institution was in operation for seventeen months, during which period the sum of $1,445.25 was expended. The want felt by the Chinese population since the departure of the British troops from Tient-sin has induced the foreign community at that port to endeavour to establish a similar institution; the progress of which, we hope to learn, will be equally successful.

SHANGHAI.

Regulations with regard to Russian commerce on the Yang-tse have been published by order of Colonel de Ballusick, Minister Resident of Russia, at Peking. The several clauses of these regulations are precisely the same as those acceded to by the English and American ministers, with the following *addendum*, relating to the overland trade of Russia:—

"Remark. By Art X. of the Regulations for the overland route, Russian merchants carrying Chinese produce through Tien-tsin to Russia, pay at Tien-tsin the Coast-trade Duty (half duty) for such produce. Should, therefore, a Russian merchant have already paid on such produce the full and half duty at the port of shipment, he will, if exporting it to Tien-tsin, receive from the Customs at the port of payment a drawback (*tsun-piao*) for the recovery of the half duty.

On the recent treaty with the King of Burmah, the *North China Herald* writes:—"The only step gained appears to be the recognition of a Commercial Agent of the British Government at the Court of Mandalay; while, to obtain this concession, we have sacrificed our frontier dues and yet allowed the King to retain his. If this be the case, it is not surprising that the strong objection His Majesty has hitherto manifested to the conclusion of a treaty should have been overcome. The King is friendlily disposed towards foreigners; but, even if Colonel Phayre succeed in concluding a treaty containing provisions favourable to the extension of British commerce and protection of British traders, it is doubtful whether the King will be able to give it effect. Although, nominally, he is absolute, his actual executive strength is little. Like all Asiatic potentates, he is surrounded by a network of intrigue, which renders it difficult, if not impossible, for him to arrive at a correct idea of the state of affairs in his dominions. The dynasty is effete, and even the people appear to be on the decline. The population is slowly diminishing—not from effeminacy on the part of the people, for they are stalwart and strong; but from the singular fact that the majority of the children die before they attain the age of maturity. The results most likely to ensue on this treaty are collisions between the natives and foreign traders, and complications, consequent thereon, between the two Governments. Travellers who have visited even the capital of Burmah are few; but they agree in characterising the country as one of the most beautiful and fertile in the world. Under the present oppressive and exclusive rule, development of its riches, either mineral or agricultural, is impossible; but under that of England, it would become one of the finest countries in the world. We fear it will not be till that result is brought about, that free communication will be opened through the country, or any traffic of importance established with the south-western provinces of China across its frontier."

On the sale of the *Jinkee* steamer, belonging to Messrs. Gibb, Livingstone and Co., to the Japanese Government, Capt. J. G. Milton was presented with a very handsome gold watch as a mark of esteem and respect by the officers and engineers of the *Jinkee*.

HANKOW.

From this port we learn that the Yang-tse has begun to rise with greater rapidity than usual. It commenced on the 11th of February, and up to the 1st of March had risen about nine feet.

The native authorities at Hankow are said to be badly disposed towards foreigners; the unfortunate course taken by H.M.'s Consul at that port in ordering the gunboat *Havoc* to

Digitized by Google

use force in settling a dispute about transit dues has not improved matters.

AMOY.

The second annual report of the Chinese Hospital at Amoy, under the care of Dr. Carnegie, has been published. The report gives the average number of patients attending the hospital on dispensing days at forty, and adds that they are of the labouring class; the higher classes of the Chinese having not yet learned to appreciate the advantages of foreign medical skill. The number of patients entered on the register during the year is given at 1,356, or, with outdoor patients, a total attendance of 5,160. Cases are adduced, also, to show the beneficial results of the hospital as a missionary institution. The hospital begins operations this year with a large balance of fund in hand.

HONG KONG.

The *China Mail* has an article entitled "Hong Kong an Asylum for Pirates," in which it asserts "Pirates come here to refit after having had a brush with some tougher customer than usual; they come for stores of food and ammunition, to convert their captured craft into fresh privateers, or perhaps to sell those craft for hard cash. No matter what they want, whether to buy, sell, victual, or refit, here they are welcome; no papers are asked or given; no one says to them, "What doest thou?" In their own ports, the strictness with which all vessels' papers are examined and made out is to them most objectionable—it renders their occupation dangerous and disreputable; but Hong Kong happily affords them a grateful asylum, where they can anchor beside the vessels they intend to capture; where they can sell the vessels when captured; and where there is rarely a Lieutenant Tucker of the *Bustard* to mar their genial mirth. Why English policy should have begun by eccentric attempts to extirpate pirates in the China Seas, and should now have settled down into admitting piratical craft into Hong Kong harbour, is a deep mystery. Why we should demand papers from the vessels of every nation excepting the only one that supplies pirate craft in considerable numbers is to the ordinary mind an impenetrable secret."

The colonial surgeon's report on the health of the colony contains the following passages:—

"So satisfactory has the health of the colony been during the past year, that but for the fact of the occurrence of a similar state of matters during each of the three years immediately preceding, it might well be considered exceptional in its character; it is to be hoped that a permanent improvement in the sanitary condition of Hong Kong has been the result of the many sanitary reforms that have taken place.

"Situated on the very edge of the tropics, it is not to be expected that its sanitary condition can ever be equal to that of a well-regulated European town, added to which the continual intercourse with the main land of China and neighbouring countries, where no attention is paid to sanitary regulations, must expose it to epidemics of contagious disease. It is not, therefore, remarkable to find cases of small-pox occurring both in spring and autumn, more especially when it is remembered that the Chinese are in the habit of employing inoculation in a most reckless manner, and which indeed they prefer to the safer and milder practice of vaccination. Small-pox became a perfect scourge in the north of China last spring, and at the same time cholera was reported as raging at Singapore, Saigon, and Manila—in a short time it appeared in Shanghai, and in the towns further north, where it produced great havoc, and ultimately visited Japan. For a time our colony continued quite free from the disease, although cases were reported as occurring as near us as Macao and Whampoa. The Government most judiciously appointed a health officer to board every vessel arriving in the harbour, and at the same time erected a quarantine station on the small island adjoining Green Island. To this station three vessels infected with small-pox were ordered.

"At most two or three isolated cases of cholera occurred in the colony, of which two proved fatal in the Seaman's Hospital. But one of our institutions, viz., the gaol, proved an exception to the general immunity, for there an epidemic of the disease in its most malignant form broke out on the 17th of October, continuing for three weeks, during which time twenty-five cases occurred, principally among the long sentence men. The European prisoners, who were then occupying the new buildings, suffered at the same time from an epidemic of acute dysentery, which fortunately in no case had a fatal result."

The American ship *Sea Serpent* reached Hong Kong from San Francisco on the 7th March, the day after the French mail steamer *Alphée* from Suez, bringing New York advices of January the 22nd, while those from the French mail only came down to the 2nd of that month. Up to the closing of the mail nothing had reached Hong Kong by way of Europe of so late a date.

CANTON.

A long correspondence appears in the papers between Mr. D. Poonjabhoy, the Customs authorities, and the British Consulate at Canton. It seems, according to the *China Mail*, that a Chinaman sold a quantity of fire-crackers to Mr. D. Poonjabhoy, paid duty upon them by weight at the Customs in Canton, and proceeded to Whampoa in order to put them on board ship. On reaching Whampoa, however, he found that the vessel he was in quest of had filled up, and could take in no more cargo; he accordingly brought back the fire-crackers to Canton, and re-entered them at the Customs in due form. The correspondence then shows that a re-weighing of the goods proved that the first weighing must have been inaccurate, or that fraud must have been perpetrated; the Customs, at any rate, quietly confiscated the goods. Assuming that the facts given in the letters of Mr. D. Poonjabhoy are correct, it appears that the idea of fraud is morally inadmissible. Mr. D. Poonjabhoy concludes his correspondence with H.M.'s Consul as follows:—"I will now review the working of the present case. The 150 boxes fire crackers were seized and privately offered for sale. I interfered in their behalf, and you heard my statements, and these I presume must have had some weight as you stopped the sale. Attempts are made at compromise; and while the matter is under discussion, Mr. Markwick, of the Custom House, assures the Chinese that they will be restored as soon as your order to that effect is given. You revert to the question of ownership, and under plea of the goods being native-owned, abandon the protection of the general interest, and they are immediately and privately sold at half their value. The result now confirms the views and opinions I have before expressed, and I shall appeal to the public to aid in making good the loss which has been so wantonly and vexatiously entailed, and adopt such other measures as shall seem fit to me in obtaining fuller satisfaction.—I remain, Sir, your most obedient humble servant."

COCHIN-CHINA.

The loss of the American ship *Holspur* is reported on the Paracels. The owner of the American barque *Nagasaki* bound from Saigon to Singapore, writes, near Cape St. James, 7th March:—"Yesterday the first mate and seven men from the American ship *Hotspur*, Captain Bennett, came alongside; he reports the ship lost on the Paracels February 19th, the captain and eighteen men were in the long boat, the mate ands even men in another. The second mate and seven men in the third boat. All kept company until the 25th February; that night the mate lost sight of the other two boats. Seeing nothing at daylight he made for the land, the weather then became bad; at evening they landed on the Cochin China coast and were received in a very kind manner by the natives; who gave them a house to live in and plenty to eat; in fact, were very kind. In the Captain's boat were Mrs. Dr. Abbe, her little girl, six years old, and her son four years old with a Chinese female servant, Mrs. Eastlake with her little son and also Chinese female servant, and Mr. Eaton, passengers in the ship. The mate, Mr. Sayard, and his men are now with me to go to Singapore; he states that Captain Bennett had been on shore near Turonne, but not liking the look of the people (although they did them no harm) he went to sea, and told the mate that they would run down in hope to meet some vessel. When the mate lost sight of the captain's boat, they were thirty miles from land; and, as the mate states that after he got on shore it became very bad weather, blowing a gale of wind for three days, I am afraid the captain's and second mate's boats were lost. The ship was from Hong Kong, bound to New York with tea and cotton. The mate, since the evening of the 25th February, landed every evening on the coast, and was most kindly treated by the natives. Admiral Bonard, on the report of the loss being handed to him, ordered the *Cosmos* to proceed in search of the missing boats, which she did on the morning of 8th March. H.I.M.S. *Forben* left Saigon on the 6th for Hue, and the Messageries steamer *Alphe* left on the 1st March for Hong Kong—both these vessels would in all probability pass in the track of the missing boats."

In a Saigon market report, dated the 3rd March, we find the following intelligence:—"Reinforcements having lately arrived from Shanghai and Manila as well as direct from France, Go-cong has been taken without almost any resistance on the part of the Annamese, who, on approach of the troops, retreated and evacuated the place. Stacks of grain there are reported to consist chiefly of paddy, but we trust that, notwithstanding, the opening of this district will have a beneficial influence on our rice market."

BORNEO.

Sir James Brooke, who went down to Sarawak in the *Coquette*, will resume there the Supreme Government during the absence of Rajah Muda in Europe. The financial returns

Digitized by Google

of the Rajah's kingdom were most satisfactory during the past year; the revenue has reached the amount of £23,000, with every prospect of a still further increase.

SIAM.

At the Palace there has been much gaiety in connection with the ceremony of shaving the tuft of a young Prince, a ceremony of some importance in Siam. A vast procession of nobles, soldiers, with their bands, and children of all nations, is in attendance, gaily clad. The Prince, covered with gold ornaments, and apparently uncomfortable under their weight, is carried on a Supat chair, accompanied by music, and conducted to the presence of the King, by whom he is led to the hall, where the ashes of his progenitors are deposited. Here the Prince performs acts of adoration for three days, on the fourth he is shaven. This ceremony is performed when the Prince attains the age of thirteen. On this occasion there were three Princes borne upon chairs.

On the 9th March, His Majesty the King of Siam applied the candle to the pile that was to consume the remains of the late Phya Pesan. The funeral ceremonies, associated with the burning of the bodies of the high nobility of Siam, are of a very costly and ostentatious character. The building of the Temple in which the burning took place occupied some three months, and much credit is due to the superintendent for his taste in producing so elegant an edifice. The ceremony lasted about six days, and the concourse of people night and day was immense, and was said to be quite as large as any fair in England.

MALACCA STRAITS.

SINGAPORE.

The *Straits' Times* contains an article extending over several columns, on the P. and O. Company, in which it criticises the manner in which the business of the company is conducted, and asserts that the monopoly exercised by it is extremely prejudicial. The opening paragraph will serve to show the *animus* of the article:—

"The Peninsular and Oriental Steam Navigation Company has up to the present time enjoyed a monopoly of the richest trade in the world. It has yearly received magnificent sums for the mail services of India, China, and Australia. It has carried at enormous freights the richest products of all these countries, and has possessed a passenger trade which must of itself bring a princely revenue; and yet, strange to say, the dividends paid by the company to the shareholders have seldom exceeded ten per cent. per annum; for the last twelve months the dividend only amounted to seven per cent. Had the profits of the company to be divided over an exceedingly large capital, the small dividends could be easily understood. But the total capital and liabilities only amount to three millions sterling, of which amount nearly one million is made up of the liabilities, which must bear a very much smaller rate of interest than the declared dividend. And these remarkably small dividends, when contrasted with the enormous property of the company in the East, and the gigantic character of its traffic, have led to a very searching examination of the company's affairs by the public. In Bombay, it is the all-absorbing topic of the day, and the facts that have been elicited are sufficiently startling to merit the serious consideration of the thinking mercantile public all over the East."

The British steamer *Chanticleer*, Captain Brown, from Glasgow on the 14th of November last, arrived at Singapore on the 14th of March and sailed for China on the 19th.

The British steamer *Clan Alpine*, Captain Bolton, from Glasgow on the 1st of January last, having called at St. Vincent, the Cape, and Point de Galle, arrived on the 16th of March, and sailed for Hong Kong on the 17th.

The American steamer *Shanse*, Captain Curwen, sailed for Hong Kong on the evening of the 18th of March.

News has been received of the total loss of the Dutch barque *Pertinax*, which was wrecked on the "Helen Bank," on the 26th of January. A schooner from Singapore saved ten men from the wreck, after being in the boats without food or clothing for ninety-six hours. Twenty-three men perished in the waves.

Another matter that has occupied public attention is the proposal to build public bungalows on Gunong Poulai, a hill of about 2,000 feet high, on the Johore Peninsula, and which could, when a road of some sixteen miles is cut through the jungle, be reached in nine hours from Singapore. From the height of the hill, the temperature is delightfully cool, and the project, if carried out, would be a great boon to Singapore.

CEYLON.

The prospects of the cotton crop are unusually promising. The *Colombo Observer* writes:—"There can be no doubt that this season's out-turn will show a large balance over any other previously; on no side do we hear the usual grumbling that so often disturbed our equanimity, about this or that estate giving so many thousand cwts. less than the estimate—of the destruction by bug, and, except in solitary cases, of loss from any other cause. There is reason to believe therefore that that very discontented individual, the Ceylon coffee planter, is this year satisfied with his crop. And though its shipment may be extended over an unusual period of time, the coffee is here and must find its way out at one time or other. Our readers who are not directly interested in coffee (a small minority) may feel surprised at our generally dwelling so lengthily on the minutest details connected with this article; but if they think for a moment on our position as a colony, this feeling must soon be dissipated. Ceylon and coffee may be looked upon, in one respect, as synonymous terms. We mean, that Ceylon would be nothing without coffee; and, though not exactly reciprocatory, coffee is everything to Ceylon. Except for Galle being the great steam port of the East, the artery for so many branches of communication—this island might be unknown to any of our countrymen, but the few officials administering the Government, were it not for the coffee enterprise. Certain it is that this alone has attracted British capital to our shores, has carried hither the thew and sinew of the sister isles to exercise that capital, and has rendered this such an advanced and prosperous colony in every way. The prospects of the coming coffee crop are exceedingly good; blossoms have come and gone very satisfactorily; and what with the present high prices, and the low exports likely to be afforded by Brazil and Java, our planters are expecting a continued run of prosperity.

The organisation requisite for the construction of the railroad is progressing. Already 1,000 men are engaged in the work.

The health of the country generally is good—if we except the prevalence of small pox in the Pettah of Colombo. Such a wet season as that which, by the last accounts, is now passing away, has not been known in Ceylon for several years.

According to the *Colombo Observer*, the result of the pearl fishery this year is likely to be much below, not only the anticipations, but also the estimate. "The revenue," says the writer, "derived from the pearl fishery is of a precarious and uncertain nature. Some unexpected and unforeseen circumstances very often bring a prosperous fishery to an abrupt termination. In estimating, therefore, the revenue from this source the Government have always been exceedingly moderate in their expectations. We find, however, that in the estimate of this year the amount fixed by the Colonial Secretary is £54,800, which, we think, is quite unprecedented. True, the prospects were such as might induce the least sanguine to consider this estimate founded on excellent grounds. Indeed, from what we heard at one time of the banks and samples of oysters, the realisation of a windfall of from £80,000 to £100,000 seemed not at all improbable. Since the commencement of the fishery, however, a more sober view of things was forced upon our attention, and half of the the above large sum, or £50,000, was looked upon as an outside figure for the return. We have now reason to fear that not more than £35,000 or £38,000 will be realised."

The same journal writes:—"The memorandum of the arrivals and departures of coolies during the month of February, discloses the rather alarming deficiency of 5,070 less arrivals than departures, the difference being increased to 6,700 if we include the figures for January. We must remember, however, that is the season of the year, after crop, when the coolies do return to their country, to come over again between the months of May and September. We also see it stated that there is an unusually large crop of rice on the coast of India this season, which would of course, operate as a great inducement to the coolies to remain at home, and, therefore, prove most disastrous to Ceylon. It will not do for us, selfishly, to wish that misfortunes may befall our neighbours, or their crops of rice, across the water; but certain it is that the question of our labourers being able to subsist in their own country with cheap and abundant food, is fraught with the gravest consequences to our coffee-planting operations. We have on record the opinion of an experienced planter, who lately left the island, and who went so far as to say that the continued prosperity of Ceylon hinged entirely on the one question of labour. "In twenty or thirty years," says this by no means sanguine gentleman, of our prospects,—"Ceylon will be used up or at a standstill. The soil is nothing—manure can only pay on flat estates; for it is not the expense of the manure but of its application, as labour is the great bugbear. Get labour and you can manure, you can have a railway, you can do anything; but there never has been a superabundance of this commodity in the country, and on its hinges alone the

Digitized by Google

prosperity of the colony. Wait until a year of plenty in Southern India comes to pass—one with plenty of rice—and Ceylon coffee planters may shut the doors of their stores and depart for a more favourable destination ! Ceylon stands, not because of its own merits, but because of the forbearance of others."

Several changes are to take place shortly in the Civil Service. Foremost among them is the approaching departure from the island, on leave, of Mr. John Bailey, Assistant Colonial Secretary, whose post it is reported will be occupied during his absence by Mr. Templer, District Judge of Caltura.

Mr. Curgenven, of Avishavella, also proceeds to England shortly on leave, and it is said that Mr. Caulfeild will act for him ; Mr. Childers being his *locum tenens*, and Mr. MacCarthy acting Private Secretary to his Excellency the Governor. It is also said that Captain Fisher is to be the Chief Justice's Private Secretary ; but there is no word as yet of Mr. Dalziel's successor.

Births, Marriages, and Deaths.

(Announcements for Subscribers are made free of charge.)

BIRTHS.

ASKEY—On the 21st ult., at Colombo, the wife of Mr. Henry Askey, Clerk Colonial Secretary's Office, of a daughter.

BUSH—On the 12th Feb., at Bangkok, Siam, the wife of John Bush, Esq., Harbour Master and Master Attendant, of a son.

HUTCHINSON—On the 20th ult., at Slave Island, Colombo, the wife of Mr. Edward Hutchinson, late of Madras, of a son.

JANSZ—On the 22nd ult, at Colombo, the wife of Mr. A. W. Jansz, of the Ceylon Telegraph Departm nt, of a daughter.

LAFABER—On the 19th ult, at Cottanchina, Colombo, the wife of Mr J. D. Lafaber, of a daughter.

MARRIAGES.

LICHFIELD—SMALE.—On the 12th ult., at St. John's Cathedral, Hong Kong, by the Rev. J. J. Irwin, Colonial Chaplain, assisted by the Rev. G. Wylde, Military Chaplain, Edwin Litchfield, Deputy-Assistant Commissary General, to Marian Jacks n, eldest daughter of the Honourable John Smale, Esq, H.M.'s Attorney-General for Hong Kong. No card sent.

LOBSCHEID—VON BIEBERSTEIN.—On the 24th Feb., at the Berlin Missionary Chapel, Hong Kong, by the Rev. R. Lechler, the Rev. W. Lobscheid, to Bertha Rogalla von Bieberstein, second daughter of Chr. Rogalla von Bieberstein, Major in the Royal Prussian Army in Posen.

DEATHS.

DE MOIDREY—On the 22nd February, from a gunshot wound before Shou-hing-foo, Monsro Tardif de Moidrey, Captain in the Artillery Service of H.I.M. the Emperor of the French, and Commander-in-Chief of the French contingent of Disciplined Chinese, engaged with their Allies of the British Navy and Shanghai Free-booters in subduing the rebellion in China.

HARDING—On the 31st December, 1862, at Guildford, Jane Harding, wife of Mr James Harding, Harbour Master of Freemantle, Swan River.

MCLEOD—While skirmishing with his company of Disciplined Chinese assaulting the city of Tat-seang, Captain W. Duncan McLeod, native of Scotland.

MCCARTEE—While skirmishing with his company of Disciplined Chinese assaulting the city of Tat-seang, Captain McCartee, of Ireland.

MURRAY—On the 26th February, at Sung-kiang, from a gunshot wound at the assault on Tat-seang, Captain Neal Murray, formerly Governor of Honolulu goal.

TINLING—On the 5th ult., at Ningpo, from the effect of a wound received before the wall of Shau Shing, Lieut. Tinling, of H.M.S. *Encounter*.

COMMERCIAL REPORT.

CHINA EXPORTS.

TEA.—Macao : The stock last reported of 1,500 half-chests remains untouched with the exception of about 200 half-chests of the better kind of Tysham Congou now going forward per *Psyche* on Chinese account.

CANTON.—The settlements of Congou have continued on a fair scale since the date of last report, and have been principally of medium to good blackish leaf and Pekoe flowered classes. Prices have been somewhat irregular, several chops having been taken in barter against manufactures, but except in one or two instances the tendency of rates has been slightly upwards—say 7 mace to 1 tael for the better kinds since the opening of the market upon the resumption of business after the holidays. The settlements of Scented Teas have been upon a fair scale, and the market is now rather firmer in consequence, but the desire to quit old stock ere the new teas come in, will check any upward tendency which may be manifested. Small settlements of Canton Gunpowder and Country Greens for the English market are reported and complete the fortnight's transactions. The settlements of the fortnight are reported as under :—Congou, 20 chops, say 8 chops Honahams, at 20 to 37½ taels ; 1 do. Ningchow, at 27 taels ; 11 do. Oopack, at 25½ to 31½ taels. Scented Teas, 3,000 boxes Caper, at 14 to 16 taels for common to fair ; 18 to 23 taels for middling to good ; and 25 taels for fine. 15,000 boxes ordinary Pekoe, at 16½ to 20 taels for common to fair ; 22 to 25 taels middling to good ; and 27 taels for fine. Canton Greens, 2,000 boxes Gunpowder, at 14 to 23 taels for common to good. Country Greens, 3 chops or 1,700 half-chests, at 39 to 42 taels. The total settlements of Congou for the present season amount to 237 chops, besides 6 do. contract teas. The unsold stock is 41 chops. The stock of Country Greens is 16,300 packages new and 1,900 do. old. Of Oolongs, there are 4,000 half-chests. Of Flowery Pekoe, 400 chests ; of other kinds the quantity on the market is uncertain.

SHANGHAI.—Black : There are no settlements to report during the past fortnight. The stock is composed of very common kinds, which are held for such extreme rates that no purchasers can be found. They have no receipts from Hankow, and the market has been exceedingly quiet, though a little more activity was caused by late advices from the home market. Hohows, com. lines, are quoted 19 to 20 taels ; Oonams, 20½ to 22. The settlements of the fortnight are restricted to 810 chests, making the total for the season to date 273,300 chests, against 194,500 chests at corresponding period last season. The remaining stock on the market is reported at 2,000 chests Congou, and 1,800 do. Fowery Pekoe. Green : Fine teas are becoming scarcer, and rates are generally well sustained both here and Kewkiang. A few chops have been settled on this market at a small decline, but they were Pingsuey and medium country teas. Common Country and Japan kinds meet with no inquiry, and are almost entirely neglected. We quote :—Gunpowders, 34 to 53 taels ; Imperial, 32 to 44 ; Young Hyson, 25 to 43 ; Hyson 34 to 60 ; Twankay, 18 to 27. The settlements for the fortnight are reported at 1,447 packages Pingsuey, and 7,735 do. Fuchau and Moyune, making the total settlements of the season to date 262,800 packages, against 202,700 do. at corresponding period of last season. The stock on the market is computed at 16,000 packages—say 2,000 Shanghai packed, 2,000 Pingsuey, 10,000 Fuchau and Moyune, and 2,000 Japan.

FOOCHOW.—Business continued suspended for some few days after the new year's festivities were over, but the market at length opened with such a degree of briskness that Congous advanced fully one tael on rates previously ruling. The supplies from the country having ceased for the present, the stock has become small. In other kinds than Congou, the transactions have been insignificant. The following are the settlements reported since the resumption of business. Congous : 7,600 chests and 10,200 half-chests, do., at 5½ to 14 tls. for dusty and low to fair com., and 15 to 22 tls. for good com. to flavoury. Flowery Pekoe : 150 chests at 19 tls. Oolong : 5,700 half-chests at 12½ to 16 tls. Scented : (dust) 1,300 boxes at 9 tls. The stock on the market is stated at 7,100 chests Congou ; 1,400 chests Flowery Pekoe ; 2,500 half-chests Oolong ; and 1,000 boxes Scented Tea. The supply this season (to date) of Congou has been 604,000 chests, against 550,000 chests at same period last season ;—of Oolong, 211,000 half-chests against 205,000 ditto.

Digitized by Google

HANKOW.—There are 7 chops inferior Congou still on the market, which no one cares to buy. The total settlements of the season amount to 480 chops Congou, of which 90 were contract teas.

KEWKIANG.—The advices from that port are to the 2nd March. The operations of one American house have caused considerable activity in the tea market since its reopening, the settlements for the last few days amounting to nearly 7,000 packages. In common teas a decline of nearly a tael has taken place, but fine teas still command full rates, though there is an easier tone in the market generally. Supplies from the country continue to arrive very slowly, and a considerable amount of tea has gone forward to Shanghai on native account, so that the stock is reduced to 44,000 packages, mostly common tea.

AMOY.—A fair demand has continued throughout the past month, an advance of fully one dollar per picul having been established on Oolongs and Ankois, the former kind having commanded so much attention that the market is nearly swept of it, Ankois being in pretty fair supply. The few Congous remaining are common and Amoy packed. The settlements of the month are reported as under:—Oolongs 9,500 half-chests at $15 to $17½ for inferior and common cargo and $18½ to $20½ for fair; Ankois 1,700 half-chests at $7 to $10½; Congous 800 half-chests common, Amoy packed at $8 to $16; Plain Orange Pekoe 600 half-chests at $10 to $14; Plain Capers 1,400 boxes at $7 to $8.50 for common to fair. The stock remaining on the market is thus stated:—Oolongs and Ankois 7,300 half-chests; Congou 350 do.; Plain Orange Pekoe 1,100 do.; Caper 1,090 boxes. The supplies of the season to date are thus given: Oolong and Ankois, 140,000 packages this season, against 99,000 packages last; Congous, 24,500 half-chests this season, against 21,700 half-chests last; Plain Orange Pekoe, 15,000 packages this season, against 11,500 packages last; Capers, 21,700 boxes this season, against 11,100 boxes last.

NAGASAKI.—Prices remain without change, kept up probably by the value of the dollar. Supplies large, consisting of best inferior descriptions. Medium kinds have been demanded of late.

YOKUHAMA.—Markets inactive; holders inclined to take lower rates, there being but little inquiry. Stocks are large, and may be placed as under:—Ordinary, 1,000 piculs, to $1 to 3; good do., 1,000 piculs, to $4 to 6; common, 1,500 piculs, to $8 to 12; good do., 1,000 piculs, to $14 to 20; medium, 1,500 piculs, $21 to 28; fine, 1,500 piculs, to $29 to 32. Exports from June, 1862:—To London, 1,191,859 lbs.; to America, 790,232 lbs.; to Hong Kong, 95,300 lbs.; to Shanghai, 970,245 lbs.

RAW SILK.—Shanghai: The high prices and continued firmness of the dealers have checked operations, and the purchases since last mail are estimated at only 1,000 bales. Silks which had been withheld from the markets for several months, have during the past fortnight been shown, and a portion of them found buyers; their superiority as compared with recent arrivals being very apparent. Prices are firm at last quotations. The receipts from up country are reported at 500 bales, and there have been no arrivals from Japan. The settlements of the fortnight are reported at 1,000 bales, against 2,500 corresponding fortnight of last year, and 2,102 the year before. The total settlements of the present season to date amount to 61,000 bales, against 59,500 same period last season, and 73 600 same period the season before. The present unsold stock is 2,500 bales, against 7,000 bales and 6,000 bales respectively at those corresponding periods. Tsatlees, No. 1, tls. 480 to 490; 2, 455 to 470; 3, 435 to 450. Market, 3, 420 to 430; 4, 405 to 415; 5 and com., 380 to 400. Taysaams, No. 1, 405 to 415; 2, 375 to 395; 3, 345 to 365; 4, 5, and com., 310 to 340. Youenfa, No. 1, 430 to 450; 2, 400 to 420; 3, 375 to 395; 4 and com., 360 to 370. Hainings, 360 to 440. Sewhings, mid. to inferior, 300 to 320.

NAGASIKI.—Stocks very small, chiefly of Tagagoma, held $410; No. 2 Mashta has been sold within the last few days to $420, and Earir Tazima at $380.

DRUGS, &c.—Cassia Lignea: Sales 750 piculs at $15.50 to 15.75; stock 1,000 piculs, held at $16. Cassia Buds: Sales 15 piculs at $45; no stock. Cassia Oil: Sales 5 piculs at $190, stock 25 piculs. Aniseed Oil: Sales 25 piculs at $440, stock 100 piculs. Star Aniseed: Sales 50 piculs at $19, stock 200 piculs. Galangal Root: Sales 120 piculs at $3.20 to 3.50, stock 350 piculs. Gall Nuts: Sales 17 piculs, $11, no stock. Ginger Preserves: $2.70 to 3 for best. Vermilion $36.

COTTON.

HONG KONG.—Prices of Shanghai and Ningpo staples were firm in the early part of the fortnight, and some four to five thousand bales changed hands, but since the arrival of the late intelligence from England, communicating a fall in the Liverpool market, and a vague rumour which the judgment of people causes some importance to be attached to of a contemplated mediation of France and England in the American quarrel, the market has become very unsteady, and rates have fallen nearly one dollar. The present quotations are:—Shanghai, $20 to $20½; Ningpo, 21¼ to 21½; Japan, 20 to 23. Stock unsold fully 20,000 bales. Canton: The market continues very quiet, and no sales have transpired during the fortnight. Quotations are nominally as follows:—Bombay, 14*t* 4*m* to 16*t* 2*m*; Madras, 15*t* to 16*t* 5*m*; Bengal, 14*t* to 15*t* 5*m*; Shanghai and Ningpo, 14*t* 5*m* to 15*t* 5*m*. The stock in the pack houses consists of 560 bales Bombay, 185 bales Bengal, and 13,000 bales Shanghai. Shanghai: The article is still scarce, and has advanced nearly 5 mace per picul. The only settlements of the fortnight reported are 3,000 bales for shipment to England at 13 taels. There have been no exports to Great Britain since the date of last report, but upwards of 7,000 bales have been sent down to Hong Kong. The arrivals from the country are small, and the stock is very light. The capacity of the market for supply cannot be said to have been fairly tested, because hard cash has to be sent up the country to purchase, and there has not been time to make the necessary arrangements, since the opening of business after the new year holidays. Amoy: Of Bombay staple there have been no sales. The rate remains nominally $16 to $16½, and the stock 700 bales. Shanghai staple has advanced nearly one dollar, although supplies have been pretty free, and stock fully 3,000 bales. The sales of the month from foreign hands amount to 1,000 bales at $18.75 to $19.25. Holders are very firm, and require an advance.

CHINA IMPORTS.

HONG KONG.

COTTON YARN.—The sales reported in this market during the fortnight amount to 339 bales, at about the rates previously quoted. In Canton, 190 bales have found purchasers, at prices which show an advance of $1 per picul upon the lower numbers, and $2 per picul upon the better qualities.

GREY SHIRTINGS.—Some 6,000 pieces have changed hands here, and from Canton settlements of 9,400 pieces are reported, principally in barter for tea.

WHITE SHIRTINGS.—The settlements of these goods in this colony show a considerable falling off, as compared with those reported on the 28th ultimo, amounting to only 3,050 pieces, taken without material change in value. In Canton the sales are put at 1,000 pieces, at about previous rates.

T-CLOTHS.—About 6,800 pieces of these goods have been sold here, in addition to which some 6,000 pieces of damaged goods have been moved off at auction.

AMERICAN DRILLS.—1,000 pieces of thirty yards reported as sold in Hong Kong at the annexed quotations.

WHITE SPOTTED SHIRTINGS, DYED DO., BROCADES WHITE AND COLOURED.—Of the first-mentioned, 750 pieces have changed hands during the fortnight, at a slight advance upon the rates previously current. Brocades have also met with fair inquiry, and the sales of the fortnight are put at 350 pieces of white, and 800 of coloured. In Canton these goods are not in any demand

CHINTZES AND HANDKERCHIEFS.—The sales of the fortnight amount to 1,550 and 1,000 dozens respectively, prices continuing much as formerly quoted.

RAW COTTON shows some decline in value, as compared with the prices obtainable at the date of last report. The business transacted has also been somewhat restricted, and the total settlements advised only aggregate 5,500 bales of Shanghai staple. Neither are any transactions to be reported from Canton, stocks there having been reduced only to the extent of about 1,000 bales of Bombay Cotton forwarded to this colony, probably for shipment to England.

WOOLLENS.—Spanish Stripes, Medium Cloths, Ladies and Habit Cloths—The sale of Spanish Stripes reported here are are limited to 142 pieces of Scarlet; while in Canton, the settlements advised are put at 48 pieces, without change in value.

LONG ELLS have met with fair inquiry, as, in addition to about 600 pieces of sea-damaged goods disposed of by publie sales, 1,200 pieces have been settled. In Canton these goods are dull of sale, and the slight inquiry noticed in last circular seems to have ceased for the present.

CAMLETS.—780 pieces of those goods, of English manufacture, have changed hands here; in Canton there is nothing doing.

LASTINGS continue in fair inquiry in Hong Kong, at a shade better prices than those previously quoted, and the sales of the fortnight are put at 600 pieces.

METALS.—Iron, flat, &c., remain much as before, the sales in this colony being limited to 2,600 piculs of nail rod, and 84 of hoop. In Canton, where a slight advance had taken place in nail rod, the sales are put at 800 piculs, and 550 piculs of hoop, the latter description being likewise saleable on rather better terms.

LEAD.—The sales of Lead in Hong Kong are put at about 800 piculs, and in Canton at 1,400 piculs, where an advance of 10 cents has been established.

TIN.—120 slabs sold in Hong Kong constitute the business of the fortnight.

TIN PLATES.—200 boxes have been sold here; and in Canton, where an advance of 30 cents is obtainable, 100 boxes have changed hands.

SHIPPING INTELLIGENCE.

ARRIVED.

At SHANGHAI.—From Liverpool: Feb. 24, Barlochau, Northern Light. From Shields: 24, Laertes. From Newcastle: 24, Maggie Leslie. From Cardiff: 25, Burg-Buckwitz. From Newport: 26, Anne Porter.

At HONG KONG.—From London: March 13, Star of China.

At BATAVIA.—From England: March 3, Johannes Martinus. From Shields: Feb. 17, Zeverver; 23, Kandanghauer. From Amsterdam: Feb. 27, Prins Mauritz. From Rotterdam: Feb. 23, Henr. Ger Susanna. From Hamburg: March 3, Stella.

At SINGAPORE.—From London: March 4, Herluf Trolle; 16, Semper Fidelis; 16, Winden; 18, Wandrahm. From Hamburg: March 12, Vonopone; 13, Caroline. From Glasgow: March 14, Chanticleer; 18, Clan Alpine. From Bordeaux: March 5, Lieutenant Bellot.

SAILED.

From SHANGHAI—For London: March 4, Egean. For New York: Feb. 27, Behring. For Sydney, March 5, Star of Peace.

From FOO-CHOW-FOO.—For Falmouth, Feb. 25, Albertine, Algernon, Glendover, Geologist.

From HONG KONG.—For London, March 3, Minerva; 13, Rachael. For Liverpool: March 14, Foam.

From BATAVIA.—For England, Feb. 19 (st.), Snake. For Holland: Feb. 22, Vernuiging; 26, Zaanstroom.

From MANILA.—For Liverpool: Lady Head. For San Francisco: Ratler. For Cork: Caprera. For Boston: Danube. For Sydney: Schab Jehan.

From SINGAPORE.—For Bordeaux: March 7, Singapore. For Liverpool: Feb. 28, Ceylon.

LOADING.

At SHANGHAI.—For London: Martaban, Leichardt, Vision, Southern Cross, Egean. For Liverpool: Caldera, Acapleo, Thames, Charlotta, Cylone.

At FOO-CHOW-FOO.—For London: Merse, Albuvin, Ariel.

Digitized by Google

At HONG KONG.—For Liverpool: Cumberland, Rajah of Sarawak.
At CANTON and MACOA.—For London: Margaret, Mitchell, Peterborough, Landerdale, Psyche.
At SINGAPORE.—For Liverpool: Ariadne, Isabella, Violet, West. For London: Bonito. For Hamburg: Revere. For New York: Jupiter. For Falmouth: Jannie Adelie.

FREIGHTS AND CHARTERS.

SHANGHAI.

Very little is doing, either for Great Britain or the United States. Tonnage is scarce and wanted in Japan, but little is doing for that quarter. Vessels are wanted to proceed to Newchwang and Cheefoo for pulse and bean cake, and liberal rates are being offered. To Tientsin there is little doing, owing to the alarming advices thence being discouraging to trade. To Foochow and back the prices have fallen, owing to the monsoon changing and making native craft available. There is a good coast business doing, although the scarcity of cotton makes employment to the Southern ports rather scarce. The current rates of freight are as follow:—To Great Britain, £3. 15s. to £4 for tea and cotton; to New York, $16 for tea; to Nagasaki, $4 per 40 feet and 25 cents per picul. to Kanagawa, $5 per ton and 25 cents per picul; to Tientsin, 6 to 7 taels per ton; to Hankow, 7 to 8 taels per ton. To Foochow, $4 per ton, and 15 cents per picul. To Amoy and Hong Kong, $4 per ton, and $1 per picul bale of cotton.

AMOY.

At the beginning of the month freights were very dull, but immediately after the new year a good demand sprung up at about the previous rates, and there is at the present moment no great amount of disengaged tonnage in harbour, several vessels having left for the South in ballast. Charters reported are as follows:—Sawa, 4,800 pls. for 3 months, at per month, $1,300; Farvel, 5,000 pls. to Siam and back, 25, $3,500; Wodan, 5,000 pls. for 4 months, at per month, $1,280; Helene, 2,800 pls. for 6 months, at per month, $710; Felicie, 5,000 pls. for 4 months, at per month, 1,200; Adventure, 5,500 pls. to Saigon and back, 30, $3,500; Roska, 5,000 pls. for 4 months, at per month, $1,175; Golden Gate, 9,000 pls. to Bankok and back, 35, $4,800; Britain's Pride, 3,000 pls. to Takow and Ningpo, 15, $1,300; Douglas, 6,000 pls. to Singapore, 25, $1,200; Rubicon, 5,200 pls. to T. sui Ningpo and back, 30, $3 000; Active, 3,000 pls. to Ningpo and back, 30, $1.75; Altona, 120 tons meast., Takow and back, 13, $600; St. Helena, 189 do., Singapore, S'ry, and Sourabaya, $2,200; Amoy Trader, 2 0 0 pls. to Takow and back, 15, $600; Elbe do., 118 tons meast., Ningpo and back, 30, $1,000; Russalka, 130 do., for 4 to 5 months, per month, $570; Glencoe, 3,600 pls. to load rice at 37½ per picul; Nancy, — do., for Shanghai, 37½ per pls.

JAPAN.

NAGASAKI.—To Shanghai, $3: Hong Kong, $5; London, £4. 10s. Nominal.

YOKOHAMA.—To London, 50 feet £4. 10s.; Silk, £5. 10s. per ton. To Shanghai, 40 feet, $6.00; Silk, per picul $4 per steamer; per sailing vessel, 40 feet $4.00; Silk, per picul, $2½.

HONG KONG.

There is for the moment a lull in the demand for vessels for England, owing to the disinclination to ship cotton, and to the exhaustion of the export season. For California and Australia a good demand for large vessels exists, both emigrants and cargo offering freely. For the British West Indies ships are wanted to take hired emigrants. For Havana with coolies high rates would be paid, but ships cannot be obtained. For rice charters small vessels are wanted. A good business is being done upon the coast, especially by steamers.

Rajah of Sarawak, British ship, 423 tons, on the berth for Liverpool to load cotton, at current rates (£4 per ton).

Lauderdale, British ship, 851 tons, on the berth at Whampoa for London, at current rates (£4 per ton).

Elizabeth Kimball, American ship, 1,000 tons, on the berth from San Francisco, at current rates ($8 per ton).

Buena Vista, American ship, 547 tons, from Hong Kong to San Francisco, $10,500 in full.

Ringleader, American ship, 1,156 tons, $15,000 in full from Hong Kong to San Francisco.

Ganges, British ship, 820 tons, from Whampoa to Demarara with emigrants £28 per head, find firing and provisions.

Mercedes, Chil. ship, 623 tons, from Macao to Havanah with coolies, $75 per head, ship find water only.

Rosella, British barque, 283 tons, hence to Ningpo, 52½ cents per picul.

Cæsar, British barque, 306 tons, hence to Ningpo, 50 cents per picul; if ordered to Shanghai, 10 cents extra.

Rona, British steamer, 784 tons, from Whampoa to Tien-tsin, to call at the intermediate ports, $20,000 in full.

Viola, British steamer, 683 tons, hence to Chefoo and back, calling at the intermediate ports both ways, $25,000 in full.

Heversham, British barque, 486 tons, on the berth for Kanagawa, current rates ($8 per ton).

Omar Pasha, British ship, 819 tons, hence to Melbourne, £3,500 in full; if sent from there to Sydney, £200 extra.

SINGAPORE.

Is in good demand, and for country employment brings higher freights. Rates to England are unchanged, being still £3. 5s. per ton for gambier, sago flour, tin, and other dead weight, and £4. 10s. per ton for pepper, pearl sago, gutta percha, and similar light freight. The former is very scarce, but the latter is plentiful. The Isabella is a full ship for London, and the Violet and West, for the same port, are well on with their loading. The Ariadne has a considerable portion of a cargo engaged for Liverpool. The Jupiter loads to Falmouth for orders at £3. 5s. per ton for dead weight, and £4. 5s. per ton for light freight. The Wandraham 702 tons) goes *via* Penang to New York at £3. 15s. per ton all round. Nothing has been done in rice port charters. £3. 10s. per ton has been offered for American vessels, and £4 per ton open charter for neutral flags.

BATAVIA.]

For Great Britain, £3.

MANILA.

There are no transactions for the United Kingdom to report; an offer of £3. 10s. per ton for unclayed sugar to Liverpool has been made, and refused by the only disengaged vessel in port,

PASSED STRAITS OF SUNDA.

From China to England and Continent: Feb. 17, Antipodes Radnagore, Spirit of the North, Rapido, Brinley Hill, Robert Henderson, Gresham; 19, Gorilla, Zealandia, Queen of the North, Burman; 25, Oriental. From England and Continent to Singapore: Feb 28, Wandrohm. From Singapore to England: Feb. 17, St. Sans Pareil; 19, Crescent City; From Manila to Cork: Feb. 14, Italia, to Boston; 24, Aurora, to London, Commodore. From Batavia to England: 19, St. Snake.

CASUALTIES.

SHANGHAI.

We regret to have to announce the loss of the iron bark Pertinax on the "Helen Bank," and the loss of thirty-two souls, including the captain and his wife and child. The Pertinax was from Macassar, *via* Batavia. On the 25th January, the lat. by observation showed the vessel to be in 2.23 N. and long. 133.00 E., running at the rate of 4½ knots. On the following morning at five o'clock breakers were reported on the lee bow and ahead. The vessel was immediately tacked, but the foreyard having been hauled round, the ship would not come up to the wind, and consequently drifted against the reef. Everything that could be done was done for the safety of the ship, but all efforts proved fruitless. The position of "Helen Bank," as marked down in Wilson's (late Norie's) chart, and corrected up to 1862, is twenty-five miles out of its true position. It is laid down in lat. 2.55 N., and long. 131.42 E., but its true position, by good and reliable observation, is in lat. 3.10 N., and long. 132.10 E.

HONG KONG.

The P. and O. steamer Aden arrived off the harbour on the 2nd Mar. at about one, and sent a boat in to report, at 5 A.M. on 28th February, that when twenty miles south of Chapel Island, near Amoy, she had lost her screw, and was consequently obliged to return to this port under sail. The shaft has broken close to the inner stern port. It was blowing heavily at the time, and the ship pitched considerably. The Cadiz was sent out at 8 A.M. that day, and soon returned with the Aden in tow. She proceeded to Whampoa on the 4th March, and in four days the old shaft was taken out, and a new one substituted. She returned to Hong Kong on the 10th, and left for the southern stations on the 12th.

VESSELS SOLD.

The steamer City of Hankow has been sold to the Japanese, and the steamer Victoria also, for $53,000. Hamburg schooner Sophia Fredericka was sold by auction and brought $2,850,75. Messrs. Thos. Hunt and Co.'s new steamer, now being discharged from the N. B. Palmer in Whampoa, will be called the Tommy Hunt. The Kumsing steamer, built at Whampoa, has had a satisfactory trial trip. The ship Celestial Breeze, of Calcutta, having been condemned, has been sold at auction for the sum of $4,400, and bought by Mr. Douglas Lapriak. She is now being converted into a receiving ship. H.M.S. Ringdove, and convict hulk Royal Saxon, are now in Lamont's dock undergoing repairs.

Parliamentary Intelligence.

HOUSE OF COMMONS.

THE BUDGET.

(April 16th.) The CHANCELLOR of the EXCHEQUER made his annual financial statement. He prefaced it by remarking that the last few years had been years of unusual pressure upon our resources, and by adverting to the rapid growth of the expenditure, which, from the financial year 1858-9 to that of 1860-1, had augmented £8,178,000, and the average expenditure in the four years 1859 to 1863 had been £71,595,000, the expenditure of the year 1858-9 being £64,664.000. Deducting from the expenditure such items as the interest of the National Debt and the charge for the collection of the revenue, the ratio of increase in what he termed the national expenditure was still greater. All he could say, he added, on the part of the Government, was that, in proposing the outlay of these vast sums, he did not think they outran the general state of public opinion and public conviction; on the contrary, he thought they fell somewhat short of what public opinion would have sanctioned. The expenditure of the country had, however, thereby been kept in a state of tension, that tension being increased by the accompanying remission of taxation. After adverting to the condition of the manufacturing districts in Lancashire and to the distress of Ireland, the operation of which special causes, he observed, deprived the revenue of the country of a very large sum, he proceeded to compare the estimated amount of the expenditure of the last year with the actual amount, showing a diminution of £59,302,—and the estimated revenue with the actual produce,—showing an excess of £583,000. In comparing the general revenue of last year with that of the year immediately preceding it, he pointed out the disturbing effects of the miscellaneous receipts, consisting of items which were scarcely revenue at all, depending upon fiscal arrangements, and which should, he said, be deducted from the statement of revenue. Making these deductions, the real relative revenue in the last two years would be £66,985,000 in 1861-2, and £67,790,000 in 1862-3, showing an increase of £805,000 in the latter year. He then stated the estimated amount of expenditure and revenue for the current year. The difference between these estimates was a surplus of revenue over the charges of £3,741,000. Before stating the mode in which it was proposed to deal with this surplus, he specified certain additions to the revenue. He proposed to equalise the duty on chicory and coffee, and to place upon an equal footing certain taxes upon licences, removing anomalies therein, and the withdrawal of an exemption under the income-tax acts of corporate trust property and charitable endowments. These additional taxes would

Digitized by Google

amount to £133,000 a-year, raising the estimated surplus to £3,874,000. He then stated the manner in which it was proposed to apply this amount in the remission of taxation. He proposed, he said, to repeal the petty charges upon mercantile transactions, including the stamp upon bills of lading. With respect to the minor incomes now liable to income-tax, the limit at which the full tax should attach had been fixed by Mr. Pitt at £200 a-year. Since then the limit had been carried down to £150 and to £100. The Government proposed to meet the claims of equitable justice by retaining the limit of £100 as the taxable point, reducing the rate of the tax at the several stages of £100, £125, £150, and £175. With regard to the tea and sugar duties, it appeared to the Government, he said, that whatever they did, they ought not to divide the reduction into two parts; it therefore became a question between tea and sugar. There were, he said, some secondary considerations in favour of tea which, however, obviously could not decide the question. Our direct pecuniary interest in China, our military establishments there, our interest in developing our commerce with that country were certainly important national considerations, but they could hardly be held to turn the scale in a question like this. He then compared the arguments for and against the claims of each, observing that the question of the sugar duties was one of great complexity, and that the most important argument in favour of tea was that the present duty was more than 100 per cent. on the value of the article, whereas the duty on sugar was only half the value. Moreover, by reducing the duty on tea, a more considerable reduction would be made in the price to the consumer than by a similar operation upon sugar. The proposal of the Government was, therefore, to reduce the duty on tea to 1s. the pound, and that the reduction should take effect immediately after the resolution had been adopted by the House.—Mr. Gladstone then spoke as follows with regard to the probable results of this important change: "We shall propose to grant that duty till the 1st of August, 1864. I must not presume to say that the duty on sugar can be reduced next year or in any particular year; but we may hope that the tea and sugar duties may be considered together with respect to the question of a permanent duty or an annual one; and it will be most convenient, therefore, that we should not review the tea duty beyond the period I have named. No ill effect can happen in consequence of this arrangement, because the trade will understand, that if this proposal is sanctioned by the House, it is adopted as a final one, so far as we can presume to look forward into the future. The financial result of this change will be as follows:—In the year 1862-3 there were consumed 77,500,000 lbs. of tea, which paid a duty of £5,490,000. In 1863-4 if there were no change in the law, we should estimate the consumption at 79,636,000 lbs., the duty on which would be £5,640,000. The loss of 5d. per lb., would be £1,659.000. But we think we may reasonably venture to assume that there would be an increased consumption, even in the present state of the country, equal to 6,000,000 lbs., in the first year after the reduction. The duty on that would be £300 000. The loss, therefore, on the full twelve months, would be £1,359,000; but from that a sum of £59,000 may be deducted on account of a small portion of the year which will have elapsed before the change comes into operation. We reckon upon a net loss of £1,300,000 as the price of this great boon to the community. Now my hon. friend the member for Lancaster (Mr. Gregson) mistrusting, perhaps, the intelligence and understanding of the committee, at the close of his campaign, upon the termination of which I cordially congratulate him, has been good enough to construct for me two packets—[Here the right hon. gentleman held up a small packet in each hand, to the amusement of the committee, and amidst great laughter]—one of them labelled, 'a pennyworth of tea with the duty at 1s. a pound;' the other labelled, 'a pennyworth of tea with the duty at 1s. 5d. a pound.' I will only submit these packets to the notice of the house. It is, however, really a matter of very considerable importance, because it sometimes happens that when duties of this kind are reduced, a portion of the profits goes into the pockets of the dealer. But here my hon. friend, who is a man of the highest character and honour, having the confidence of the whole mercantile world, has bound himself personally to the proposition that a man who buys under the new duty will have the same increase over the man who has bought under the old duty, as is represented by the large packet in my right hand over the small packet I hold in my left." Mr. Gladstone then proposed a reduction of 2d. in the pound in the general rate of income-tax. The result of these remissions would be a loss of revenue to the following amount:—

The small charges	£143,000
Minor Income-tax	300,000
Tea Duty	1,300,000
The general rate of Income-tax	1,600,000
	£3,343,000

The surplus of revenue being £3,874,000, and the loss by remission of taxation £3,343,000, there still remained a surplus of £531,000, which the Government did not propose to part with, and he appealed to the committees to support them in retaining this amount in their hands. Mr. Gladstone, in conclusion, took a comprehensive view of the effects of our recent fiscal measures upon the trade of the country, pointing to and dwelling with great satisfaction upon the result of our new commercial relations with France, which had more than made up for the falling-off in our trade with the United States of America. He moved certain resolutions to give effect to the proposed changes. The statement underwent a series of desultory criticisms, after which the resolutions were ultimately agreed to, and ordered to be reported.

THE WAR IN CHINA.

(17th.) Colonel SYKES asked the Under-Secretary of State for Foreign Affairs whether the bodies of the officers, British subjects, attached to Ward's Chinese levies, and killed at the attack upon Tai-tsan were recovered; whether it was true, as stated in the Shanghai newspapers, that two pieces of Her Majesty's ordnance were lost at the attack upon Tai tsan which were lent by General Staveley to Ward's levies; and whether officers of Her Majesty's 31st and 67th Foot, of the Marine Light Infantry, and an officer of the Royal Engineers, were present at the attack upon Tai-tsan, which is beyond the thirty-mile radius from Shanghai.—Mr. LAYARD could not give a full answer to the questions of his hon. and gallant friend. It was only that morning he received an account of what took place, and that account consisted chiefly of articles from Shanghai newspapers. An attack appeared to have been made by Ward's levies upon a walled town on the borders of the thirty-mile radius. It was made by the authority of Chinese officers, and against the urgent advice of General Staveley, who, however, allowed Captain Holland to accompany the force, fearing some disaster might arise. Captain Holland was the only officer actually in Her Majesty's service who accompanied the force. He had no information as to the recovery of the bodies of British officers; and, though two guns appear to have been lost, they did not belong to Her Majesty, nor were they lent to Ward's levies by General Staveley.

THE ATTACK UPON TRINGANU.

(21st.) Sir J. HAY asked the Secretary to the Admiralty if he would lay upon the table of the House the report of the attack upon Tringanu by her Majesty's ship *Scout*, on the 11th November, 1862, and asked the Secretary of State for India if he would lay upon the table of the House any correspondence from the Governor of Singapore, or the Government of India on this subject; and asked the Under Secretary of State for Foreign Affairs if he would lay before the House the papers containing a correspondence from the Government of Siam and Sir R. Schomburgh on the same subject.—Sir C. WOOD said that when the papers were complete there would be no objection to lay them on the table. Further papers were expected from India, and it was considered that it would not be right to lay a portion of them on the table.

THE TEA DUTIES.

(23rd.) The resolution for the reduction of the duty on tea from 1s. 5d. to 1s., to take effect from the 25th of April, 1863, to the 1st of August, 1864, having been put, Sir S. NORTHCOTE wished to know whether the attention of the Chancellor of the Exchequer had been called to the complaint of certain tea-dealers, who alleged that the right hon. gentleman had in some former speech laid down the principle that it would be convenient for the tea duties to run from July to July. They alleged that sufficient notice had not been given to them, that they had supposed from this statement of the right hon. gentleman that there was no occasion to diminish their stocks, and that they were taken by surprise by his present rapid proceeding. He did not express any opinion on the subject himself, but he wished to know whether the right hon. gentleman admitted there had been any breach of faith on his part in the matter.—The CHANCELLOR of the EXCHEQUER said that the usual and uniform course had been followed. He repudiated any imputation of having given a pledge on this subject, having been engaged at the very time in proposing the remission of a multitude of Customs' duties, to take effect immediately. To give any drawback to the tea dealers would be to prejudice the claims of the consumer and the revenue without any adequate reason.—Mr. GREGSON said that the stocks of the dealers in tea were never so low as at the present moment. The dealers had prepared themselves for the proposed change.—Mr. D. GRIFFITH was sorry to see, by the resolution, that the 1s. duty would cease in August, 1864. He did not suppose that any Chancellor of the Exchequer would propose to go back to the high duty, but why limit the term? It would leave the door open so as to allow the Chancellor of the Exchequer to be tempted, if some emergency occurred, to reimpose the high duty.—The CHANCELLOR of the EXCHEQUER said the 1s. duty was proposed as a defined settlement, so to speak, of this question. The term of August, 1864, had been fixed as the period for considering whether this should be kept as an annual duty. The House might then consider the duty on tea in connection with that on sugar.—The resolution was then agreed to.

Spirit of the Press.

ANGLO-CHINESE OFFICERS.

The very arguments which are employed to justify the expedition of Captain Osborn constitute the strongest case against it. It might be wrong and inconsistent on our part to assist the Tartar Empire to put down a powerful rebel, but it would be an enterprise of a limited character, one fairly within the scope of our power, and involving no responsibilities which could not be readily foreseen. That, however, is not a description which does even the most imperfect justice to the magnitude of the enterprise undertaken by Captain Osborn. We are told that the Government of China has broken, not only from a decay in its military power, but from too conclusive a reliance upon moral teachings as a mode of influencing the people. How vessels of war and a liberal exhibition of Armstrong guns can cure the latter defect is not apparent. It would seem rather to call for a State Church, or some institution of the sort. But that is merely by the way; we have not undertaken to prescribe for the diseases of the Chinese Empire. What is material for our purpose is to observe that the language to which we are referring describes in no obscure or indirect way the complete collapse of a system of polity, if not of a form of civilisation. What idea can those who talk so glibly of the feats which our Jack tars are about to perform have of the real magnitude of such a catastrophe? It means rottenness and unsoundness in every part of society; it means want of national coherence, and incapacity for the fulfilment of the functions of national and social life. That being so, it is about as hopeful a task to restore it to soundness and health, by putting down a rebellion here, and slaughtering a few robbers there, as it would be to cure a man whose blood was unsound by healing the superficial sores which are but the signs and consequences of his disease. It reads almost like a joke when a writer solemnly talks of introducing steam and the electric telegraph amongst a people in this condition, as if he really believed that they were specifics for such disorganisation and such absence of all vital power as now afflicts the Chinese Empire. To any one who seriously considers the matter, it must be obvious that nothing can cure the evils of such a state of things without the establishment, as a preliminary, of a strong central government, and its maintenance in full vigour for a considerable number of years. When we have conquered Nanking, opened the Yang-tse, and cleared the rivers and coasts of the present generation of pirates, it will either be found that our work is still incomplete, and that our assistance is required in

Digitized by Google

other and more important matters, or, on the other hand, that the burthen of gratitude already weighs too heavily on the Chinese Emperor, and that he is only too eager to get rid of us, and allow things to fall gradually back into their old state. In the one case, we should be entangled directly in the Government of a vast country; in the other, we should find ourselves regarded with a suspicion and distrust which would augur ill for the maintenance of friendly relations. Of course it will be alleged that England as a nation has nothing whatever to do with Captain Osborn and his proceedings—that he has now become an officer in the Chinese service, and that his proceedings are henceforth nothing to us. But those who talk thus are the dupes of words. English officers playing a great part in the pacification and administration of a foreign country, with the sanction of our own Government, and under the eye of our ambassador, must implicate the country in their proceedings. It is because we see the danger thus looming in the distance; because we are sensible, not only of the difficulties of the task which would be thrown upon us, but of the jealousies and, possibly, quarrels with other European nations in which such interference as we dread might involve us,—that we have always regarded with the greatest disapprobation the expedition of Captain Osborn and his companions. If, as seems to be the case, we are now hopelessly committed to it, there is, at at least, some satisfaction in discharging oneself of any share of responsibility for so ill-considered a scheme.—*Manchester Daily Examiner.*

OUR PROSPECTS IN JAPAN.

It is no news that our relations with our new allies of Japan have for some time past been in an unsatisfactory state. That singular kingdom appears to be undergoing an internal revolution, of which there is no denying we are in great measure the cause. Foreigners have never been welcome among that singular race, and it appears that the more they become acquainted with us the less they like us. And now the last mail brings us the intelligence that Admiral Kuper, with a strong squadron o' the fleet on the China station, has gone northward to protect the life and property of the British residents in the island. It is a very right and proper step; and we have nothing but praise to bestow on that gallant officer for the zeal and promptitude he has manifested on the occasion. But we confess to a little alarm on seeing the strength of the demonstration he is about to make. A single vessel is generally considered enough for such purposes, but here we have a powerful squadron employed on the duty, and that, too, under the special command of the Admiral himself. Is he going to enforce the treaty? He has certainly taken a much stronger force with him than it required to make it. It may be necessary, but the people of England ought to know. If we are going to fight for the enforcement of the treaty stipulations let us do it with our eyes open. Let us have the credit of sanctioning a war of which we must at any rate pay the expense. And when we get the information, and before we make up our minds, perhaps it will be well to ask, what gain we have derived by the treaty that we are to fight for? Our honour is a different thing; we cannot submit to insult; but let it be clearly shown that indignities have been put upon us. And, as for our interests, it will be well that we should insist upon knowing what we have gained by the treaty. That treaty has now been in existence for some time—long enough surely for us to test its value. Let us be told, then, who has been benefited by it apart from the merchant-adventurers at Shanghai? We confess that we shall be surprised and gratified to learn that as many ships have arrived in England direct from Japan since the treaty was ratified as will pay the expenses of the embassy from the profits of their cargoes.—*Standard.*

Continental Intelligence.

FRANCE.

The *Nord* announces the arrival in France of the Prince and Princess of Wales for the middle of May. They are to be received at the Palace of Fontainebleau, where the Court will be established at that period. The Empress went to Fontainebleau last week in order to examine the preparations which are being made at the Palace.

The *Moniteur* publishes the full text of the treaty of friendship and commerce concluded between France and Madagascar, on the 12th September, 1862. A special stipulation accords the same advantages to all nations as to France. The ports of Madagascar are to be thrown open to the world, and customs duties entirely abolished.

The Times Paris correspondent writes:—"The Emperor has, I am informed, all but made up his mind to recall Marshal Pelissier from his post of Governor-General of Algeria. The reasons for this measure are not very clear. They do not, it appears, entirely relate to his management of that dependency. The officer who would have a fair chance of taking his place is General Cousin Montauban, Count of Palikao, who commanded the French troops in China. General Montauban has spent several years in Africa, and is said to be an excellent officer; but whether the choice is one that would be popular in the army is another question. His nomination would be considered a sort of satisfaction for the opposition his dotation encountered last year in the Legislative Corps."

In the preamble to the *projet de loi* relative to the supplementary credits for the different branches of the public service for 1863, and which has been presented to the Legislative Body, there is given some information on the distribution of the army. The corps of occupation at Rome, for instance, amounts at the present moment to 16,300 men. The troops detached to China and Cochin China are 2,000. The expeditionary force in Mexico numbers 34,000 *French* soldiers. The general effective strength of the army will not exceed 420,000 men, and of the 52,000 men employed at present beyond the territory (not including the army of Africa, which amounts to 57,539 men), 32,000 will be taken from the normal effective of 400,000, which will not be exceeded by more than 20,000 men. The increase of expenditure resulting from the occupation of Rome, or from that of Cochin China, may be estimated pretty accurately. This cannot be done, however, as regards Mexico. The sum required for this special service during the second half of the present year will so depend on the events that are passing in Mexico at this moment that, as the Commission of the Budget observes, any calculation must necessarily be uncertain. But one of the Government journals remarks that "owing to the order and economy in the arrangement of the ordinary expenditure, the normal proceeds of the public revenue will cover the increase in the extraordinary expenditure which proceeds this year from the Mexican expedition."

At a dinner lately given by the principal inhabitants of Algiers to M. Forcade La Roquette, who is now making a tour in the colony as Government Commissioner, several remarkable speeches were made. In proposing the Emperor's health the Duke of Malakoff observed that some years ago the Sovereign whose health he proposed, speaking of the hardy colonists of Algeria, styled them the pioneers of civilisation, and promised that the protection of the mother country should never be wanting to them. He added that the Emperor's sentiments had not changed; now, as then, he desired equal justice and equal protection for all without distinction of origin or race. He proclaimed Algeria French territory for ever. Now, as then, the Emperor desired to see Algeria great and strong by the elevation of the natives to the dignity of free men, and by the progressive development of European colonization. In drinking to the health of Marshal Pelissier, Duke of Malakoff, M. Forcade La Roquette recapitulated in eloquent language the colonial advantages already obtained. He showed that the colonists supported themselves by the co-operation of the natives. Trade might be extended freely from the borders of the Mediterranean to the limits of the Desert. The native population accepted French domination, founded on the respect of its rights and of its religion, and it profited by the security for which it was indebted to the French Government, as a blessing which it had never before enjoyed.

The French Government, convinced of the advantage to be derived from planting the large tracts of mountain land so long waste, have encouraged the owners of these lands to undertake the work by grants of money. Their efforts have been eminently successful, as it appears by official returns that nearly 30,000 acres were planted last year. The oak, the larch, and the pine are the trees which are found to succeed best. Houses for drying the seed of forest trees and nurseries have been established by the Government to satisfy the demands of the planters. The Government have now six drying-houses, and it is calculated that these establishments can supply annually from 15,000 to 20,000 kilogrammes of seed—a quantity sufficient to sow 5,000 acres. 473 nurseries were established in 1861, and 359 were added to them in 1862, capable of producing 40,000,000 plants. These nurseries are spread over the immense surface which it is proposed to plant. Many of them, situated near the large towns, are so admirably managed that they may compete with the most celebrated private establishments. Nothing, in fact, has been neglected to encourage the planting of the waste mountain lands, and annual conferences have been organised for this purpose among all the agents appointed by the Government.

On the 20th inst., the Emperor Napoleon completed his fifty-fifth year.

HOLLAND.

(FROM OUR OWN CORRESPONDENT.)

AMSTERDAM, April 22.

As soon as the Second Chamber of the States-General meet after their Easter vacation the Colonial Minister will move the reading of the Bill he has laid on the table of the House for the appropriation of the surplus of the colonial revenue, and also the colonial budget for this year.

A letter from Harderwyk states that a detachment of supplementary troops, consisting of 125 men under the command of

Digitized by Google

Captain A. P. Weber, of the East India Artillery, who is returning to duty from leave of absence to this country, and accompanied by the lieutenants of the E. I. Infantry, M. Harbach and J. C. van der Bos, are under orders to march from the Colonial Recruiting Depot at Harderwyk on the 2nd of May to Nieuwe Deep, where they will embark on board the chartered transport *Staatsraad van Eeyck*, Capt. F. de Winter, for Java.

The Colonial Minister calls the attention of speculative capitalists in this country to two advertisements published in the *Java Courant* of the 7th and 28th of January last, the first of which eminates from the Resident of Kedirie inviting tenders for taking on a lease of twenty years the whole or part of an area of 400 bouws of waste lands situate in the district of Warsedjayeng in the Regency of Berbek (Residency of Kedirie). The second is published by the Governor of Celebes and its dependencies, inviting similar tenders for twenty years' leases for 200 bouws of waste lands in the northern district and known by name of Batoe Bassie; the bouw computed at five hundred square roods of Rhenish measure.

Major W. A. van Rees, a pensioned officer of the Indian Army, and formerly Aide-de-camp of General Duke Bernhard, of Saxe-Weimar, has just published a very interesting account of his experiences in the East under the title of "Recollections of the Career of an Indian Officer," 2 vols., 8 vo. with plates (Visser and van Santen, the Hague and Leyden). The work, which gives a very good description of life in Netherlands India, has become already exceedingly popular.

Accounts from the Island of St. Martin state that the slave-owners are indignant at the low amount of compensation offered them for the emancipation of their slaves. On the 10th of March the Governor published a proclamation calling on the slave-owners to state whether they would receive their indemnity in cash or bills of exchange on the Home Government. At a special meeting of the parties interested the following resolutions were unanimously agreed to:—

1. To refrain from stating whether they will accept the alms tendered by the law in lieu of an equitable compensation for their slaves in cash or bills, as they consider themselves entitled to a compensation commensurate to the other colonies, and therefore reserve to themselves the right of future action.

2. To deliver to his Honour the Governor a duplicate of this resolution for his information.

The following twenty-eight first-class vessels have been chartered by the Netherlands Trading Company, to load cargoes of produce in Netherlands India to this country:—

Ship.	Captain	Port of Discharge.
Kykduin	R. C. Dekker ..	Amsterdam.
Graaf van Heyden-Reinestein	B. H. Boer ..	do.
Stad Assen	H. J. Haverbult ..	do.
Gebroeders	C. de Groot ..	do.
Willemina en Clara	C. Abrahamsz ..	do.
Gov.-Gen. Duymaer van Twist	C. E. Hoeksma ..	do.
Catharina Maria	D. van Amerongen ..	do.
Anna	J. Bok	do.
Luconia	J. Admiraal, jun. ..	do.
Konink Nederl Yacht Club	F. L. Zack	do.
Duiveland	J. G. Marcussen ..	do.
Azia	F. Molendaar	do.
Wilhelmina Johanna ..	L. P. Andersen ...	do.
Minister Van Hall	A. de Haas	do.
Schoonderloo	S. R. Otto	do.
Pieter Schoenmakers ..	J. J. van Varelen ..	do.
Cornelis Wernard Edouard	J. Bakker ..	Rotterdam
Loevesteyn	C. J. Hulshoff ..	do.
Catharina Wilhelmina ..	J. O. Kluin ..	do.
President van Ryckevorsel	J. Vermey ..	do.
Jan Daniel	A. K. Zweede ..	do.
Bulgersteyn	G. Geerlong ..	do.
Hugo Grotius	F. Vogelsang ..	do.
Commissaris des Konings van der Heim ..	J. van Zanten ..	do.
Boni	J. W. Moller ..	Dordrecht

Jeannette and Cornelia ..	A. Romeyn ..	do.
Noordster	J. Luteyn ..	Middelburg
Heilige Liduina	A. van Brink ..	Schiedam

The Netherlands Trading Company, on the part of the Colonial Department, invites tenders for a long list of articles required for the service in Netherlands India, among which are the following:—15,000 kilogrammes of salt meat; 1,720 pair of iron hinges; 28,500 kil. of rod and hoop iron; 16,400 kil. of flexible nails, and tinned and zinc do.; 1,100 kil. of zinc in rolled plates; 284 iron money chests; 2,200 pieces of gold and silver cord for shoulder-straps; and 100,000 coffee bags.

Among the numerous presents lately made to the Colonial Military Asylum, at Bronbeck, are files of the *Batavia Handelsblad* and the *Java Bode*, with the intimation from their proprietors that they will be regularly transmitted by the overland mail in future.

A letter from Berlin states that Mr. L. Kniffler, merchant at Nagasaki, has been appointed Consul at that port for the King of Prussia.

The building of H.N.M.'s first-class paddle-wheel steamship *Watergeus*, at the Royal Dockyards in this city, is now so far advanced that her launch may be expected to take place next month. The contract for making her steam engines has been taken by Messrs. Paul van Vlissingen and Dudok van Heel, of this city, for the sum of 213,482 florins. Those gentlemen have also just signed a contract with the naval department for a sea-water distilling apparatus, for the new screw corvette *Bommelerwaard*, of ten guns, for the sum of 9,410fl.

H. N. M.'s screw corvette *Soembing*, lately returned from the E. I. station under the command of Lieut. J. N. Slegt, has been paid off at Nieuwe Deep, and put out of commission.

During the year 1862 the number of foreign soldiers who completed their term of military service in Netherlands India, and were returned to the Colonial Depot at Harderwyk, amounted to 223. During the first quarter of the present year the number received was 66, of whom 30 were Swiss, 16 Germans, 12 Belgians, 5 French, 2 Italians, and 1 Dane. After receiving their discharge they were furnished with passports, and sent on to their respective homes.

PERSONAL.—Mr. N. M. Klein, formerly tobacco contractor in Java, has received the Royal licence to accept and wear the insignia of Knight of the Legion of Honour, conferred on him by H.M. the Emperor of the French.

Mons. A. F. de Pina has been recognised as Consul for France, at Padang.

Died at the Hague, Mr. J. S. Lotsy, formerly Burgomaster of Dordrecht, ex-member of the Second and subsequently of the First Chamber of the States-General, for some time Minister of the Naval Department, and since March, 1861, Minister of State without Portefeuille.

H.M. the King of Hanover has sent the insignia of the Guelphic order to Count von Bentheim, Resident in Netherlands India.

The King has nominated the following gentlemen to be Knights of the Order of the Netherlands Lion: P. F. Uhlenbeck, pensioned Captain-Lieutenant of the Sedentary navy in Netherlands India; H. A. Seeyn Parve, formerly Assistant-Resident of Ledok, in the residency of Bagelen, now Resident of Tapanolie; M. H. Hollman, Assistant-Resident of Ledok; P. F. Woesthoff, controller of the first class in the department of revenue and culture in Java; and A. J. W. van Delden, formerly superior officer of the Civil Service in the department of the Secretary-General of Netherlands India, now merchant at Batavia.

Mr. L. K. Turk, chief engineer and director of the ship-building department at the Royal dockyard at Vlissingen, has received from the Duke of Nassau the cross of a Knight-Commander of the Order of Adolphus.

Her Catholic Majesty the Queen of Spain has invested H.R.H. the Prince of Orange with the insignia of the Order of the Golden Fleece.

Captain-Lieut. G. P. Mossel, commandant of the second class screw corvette *Citadel of Antwerp*, 14 guns, now on the East India station, has received the Royal permission to accept and wear the ingisnia of Knight Commander of the Order of the Tower and Sword, conferred on him by the King of Portugal.

Lieut. O. M. de Munnick, R.N., hitherto serving in the Eastern Archipelago, has been permitted at his own request to quit the navy.

PASSENGERS INWARD.

Per *Batavier*, Capt. Pfeiffer, at Rotterdam, from Batavia. Mr. and Mrs. Bosschart and four children.

PASSENGERS OUTWARDS.

Per *Noach*, Capt. Wierickx, from Amsterdam to Batavia; Mr. and Mrs. J. W. Abbink, Miss J. M. Abbink, Capt. Severin, E. I. Army, wife, and child, Miss A. Holland, Miss M. Nietzell, Mr. A. Burger, and Mr. A. van Oosterzee.

Per *Amalia Augusta*, Capt. de Veer, from Rotterdam to Batavia; Mr. Oliver and family, Miss J. L. Thilenius-Kruythoff, and Mr. Ketting.

Per *Maria Catharina*, Capt. Kluit, from Rotterdam to Japan; Mr. Schelfhout.

COMMERCIAL.

COFFEE.—Holders of parcels bought at the Company's last sale are remarkably firm, and demand a whole cent profit, which in some cases has been submitted to by needy purchasers for the execution of unlimited orders, but, in general, buyers are reluctant to do business at the present high rates. The sales were, therefore, but moderate. In private trade goods, several transactions are reported, among which are 1,000 bags of Java, ex *Cornelis Wernard Edward*, at 45½ to 46 cents, 1,000 bags of Java, ex same ship, with 1,400 bags of macassar, ex *Eduard and Marie*, at 44½ c., 750 bags of pamanoekan, ex *Crystal Palace*, at 46½ c., and 880 bags of Java, ex *Gebroeders*, at 46 and 46½ c.

Digitized by Google

SUGAR.—Great activity prevails in this market both for raw and refined, as an alteration is made in the Russian tariff by which crushed sugars—which were hitherto prohibited—may be imported into that country at a very low duty. The business done since last mail has been very considerable at rising prices. The advance may be stated at 2½ to 3 fl., or at least ten per cent. The purchases of refined goods, chiefly for delivery in June or July, amount to four millions of kilogr., or 4,000 tons, so that the trade to the Baltic will be very lively this summer, unless the political complications of the present moment lead eventually to another war with Russia, and of course a blockade of the Baltic ports. The Dutch Trading Company have announced 71,600 kranjangs of Java sugar for sale at Rotterdam on the 12th of May. The company's May sales in previous years were as follows:—

1862 ..	66,000 kranjangs.	1857 ..	100,799 kranjangs.
1861 ..	63,461 „	1856 ..	78,642 „
1860 ..	88,711 „	1855 ..	56,482 „
1859 ..	70,895 „	1854 ..	57,218 „
1858 ..	84,762 „	1853 ..	59,818 „

RICE.—1,990 bags of uncleaned Java table rice, ex *Cornelis Gips*, have been sold at 12½ fl. The market is firm. An improved demand for cleaned rice has sprung up, but the actual business done was limited, as holders demand such very high prices.

SPICES are dull of sale, though values remain unchanged. Last week there was a considerable demand for soy, and higher prices were easily obtained. The article is now quiet, and purchases might be effected on easier terms.

TOBACCO.—The market for Java is firm, with a fair amount of business. Amongst the sales were 136 bales X ex *Edward and Marie*, and 200 bales P K ex *Elizabeth Susanne*, both by tender and at secret prices. The following are advertised for public sale on the 30th inst.: 735 bales Java TR, 286 do. VR, WJG, and Goebok, 1,243 do. KL/HBVH, and KB. The present stock of Java is 3,835 bales.

TIN.—Banca has remained pretty stationary at 77 fl., though the market is not so firm at present, and purchases might be made at 76½ fl.

RATTANS continue in favour, and prices rule firm. Among the sales are 3,240 bundles ex *Three Bells*, 4,631 bundles ex *Susanna Elizabeth*, 5,415 bundles ex *Samuel*, and 8,300 bundles ex *Robert Small*, all for home consumption, and 1,400 bundles ex *Santa Rosa*, for exportation.

INDIGO calm, in expectation of the Company's sale on the 29th inst., which will include the 200 piculs of Java arrived per *Alm lo* since the first announcement. The following are the quantities that will be brought to the hammer: 1,728 quarter chests (1,332 piculs) at Amsterdam, and 1,389 do. do. (1,188 piculs) at Rotterdam.

DRUGS.—Camphor, both refined and raw, is in more request, and full prices are easily obtained. Of Cassia Fistula, 782 packages ex *India*, have been sold at satisfactory prices.

THE SULTAN'S VISIT TO EGYPT.—*The Times* writes:—"No Sultan has visited Egypt since Selim I. conquered the country in 1517, and some old-fashioned Moslems think it so wonderful that the representative of the Prophet should leave his capital that they believe the end of the world is coming, and have made their wills, forgetting how useless such a proceeding would be if their forebodings came true. It is much to the credit of Sultan Abdul Aziz that he should have conceived the idea of such a voyage. The late Sultan on one or two occasions did actually visit some of the islands of the Archipelago, but to set foot in a remote province, to confront its hereditary ruler, and to assert his rights where for so many years another family has appeared to reign supreme, requires something more than the energy which usually belongs to an Ottoman Sultan. Ever since the family of Mehemet Ali rose to greatness in Egypt there has been a kind of rivalry between Cairo and Constantinople. The former has represented the willing and eager acceptance of European civilisation, the other a slow and niggardly acquiescence in it. All the Frankish improvements which the Turks have been forced to adopt may be seen in more vigorous development on the banks of the Nile. Such a man as the late Sultan would probably have shrunk from contact with an energy and a civilization superior to that which he was accustomed to at home; but his more active brother has thought it advantageous to inspect and inquire for himself. He has, with resolution unusual in his family, determined to rival the activity of the Egyptian family; and as the late Pasha of Egypt visited Europe last year, and received a welcome wherever he went, the Sultan thinks he cannot support his high rank better than by giving signs of a similar activity, and visiting first the most famous province of his dominions. His Highness has no cause to repent of his resolution. As a political measure, the visit to Egypt appears to have been quite successful. The Sultan has, according to all accounts, startled and overawed the Egyptians by his presence. A generation has grown up which knows no other family than that of Mehemit Ali, and which has been disposed to think that there was nothing higher than they upon the earth. Pasha after Pasha has been installed, and the consent of Constantinople has been so necessarily given to the investiture that people almost forgot there was a real ruler on the banks of the Bosphorous, and that Ibrahim Pasha or Said Pasha only shone by a borrowed light. If it had been the design of the Sultan to dissipate these ideas, he could not have done better than to present himself in the midst of the people. Though he kept himself quite within his strict rights, and came only as a guest of the Viceroy, studiously declaring that he would exercise no kind of power, yet the impression on the mind of the Egyptian community, both Frank and native, has been remarkable. The Europeans looked upon the Sultan as a mere nominal ruler, incapable, even if he were willing, of interfering in any way; while the Egyptians themselves merely thought of him with the vague respect that men feel towards greatness with which they have nothing to do. By landing in Egypt, and thus forcing the descendant of his father's great rival to stand before him with folded hands and downcast look, the Sultan has gained a great moral victory, which will wonderfully maintain his importance in the eyes of Orientals."

SIR JOHN BOWRING is (says the *Devon Weekly Times*) appointed by the Government as one of the envoys to attend the approaching conference at Paris with reference to the postal system; especially with reference to the postage of newspapers. All the large Continental nations will be represented at this conference.

CONVEYANCE OF TROOPS TO THE EAST.—A correspondent of *The Times* writes:—"The authorities having decided to send to India five battalions of infantry this season, it would be as well to point out how much cheaper it would be to the Indian Government to send out these troops in steam transports to Alexandria, thence to Suez by rail, and on by steamers to the several Presidencies the regiments are bound to. There are men-of-war now in commission at home available, but if that is considered objectionable there are some five or six transports laid up in Portsmouth harbour which could soon be made ready for sea, and there are some 3,000 naval seamen (ten-years' men) who are idling their time in the various receiving ships in this port, and who might be thus usefully employed. The objection raised during the mutiny to sending regiments to India by the overland route was the difficulty of being able to procure steamers to take on troops from Suez to their destination. Now-a-days there are men-of-war, Peninsular and Oriental Company's steamers, besides steamships belonging to private firms in the Indian Seas, which might easily be engaged for this duty. The voyage to India would in this case occupy from a month to six weeks, instead of four months, and the troops would arrive in India not only in better condition, but the Government could make use of their services on shore for the period they would occupy in going round the Cape in sailing ships. There is time now, if steps be taken immediately, to engage steamers to be ready at Suez to convey the troops to India; and the food, which is the chief expense, could be sent for the whole journey from England. There is no doubt of the feasibility of this plan, for the French have for the last two years invariably sent their reliefs to Cochin China by this route."

DR. CAMPBELL AND THE "SATURDAY REVIEW."—The proprietors of the *Saturday Review* having applied for a new trial in the action where a jury found that they had libelled Dr. Campbell, of the *British Ensign*, the Court, after hearing Mr. Bovill's application, decided that the verdict of the jury was one that ought not to be disturbed, and accordingly refused the rule. There is no doubt that Dr. Campbell's scheme of 'converting the lost millions of the land of China" by showering *British Standards* and *Ensigns* upon these islands was a fair subject of criticism. The only question was whether the critic did not exceed the limits permitted by law. Not satisfied with ridiculing Dr. Campbell's scheme, the Reviewers plainly intimated that the reverend gentleman had published a list of fictitious subscribers in order to induce other persons to follow their imaginary example. In other words, it was hinted that Dr. Campbell was a swindler, and had managed, by false pretences, to obtain a considerable sum of money.

SALE OF CHINESE CURIOSITIES, &c.—On the 16th, an auction of rare articles of *vertu* from China was held at Messrs Debenham, Storr, and Sons' great mart, in Covent-garden. The following lots realised high prices:—Lot 112, a set of appointments for a joss house of ancient Chinese enamel, 13½ guineas; two other sets, lots 113 and 116, fetched respectively £11. 11s. and £15. 15s.; lot 115, a pair of Chinese enamel jardinières, 15½ guineas; lot 117, a pair of ditto vases, £34. 13s.; lots 118 and 119, two pair of ditto basins together, £28. 17s. 6d.; lot 121, a superb oblong incense burner of the first description of ancient Chinese enamel, £42; lot 122, a truly magnificent font, 30 inches in diameter, of Chinese enamel, enriched with decorations, with pierced cover of metal guilt, and on carved black wood stand, four feet in height, and a very rare specimen, £94. 10s.; lots 123 and 124, a pair of ancient Chinese enamel bells together, £87. 5s.; lot 126, a pair of noble Japanese bronze lamps, 54 inches high, £7; lot 167, a pair of very rare jade screens, carved frames, Chinese characters and landscapes, 16½ guineas; lot 184, a pair of Dresden china vases, £42; lot 232, a set of three large Oriental jars and covers, and two beakers, £37; lot 243, a set of Indian jars, 30½ guineas; lot 250, a gilt clock, with three Cupids, inlaid with Sèvres China plaques and dial, £21.

THE ANTIQUITY OF MAN.—A crowded meeting of the Ethnological Society took place on the 14th, the attraction being a paper "On the Antiquity of Man," by Mr. J. Crawfurd, the President. The author objected to the recent work of Sir Charles Lyell, in respect to certain branches of the subject on which he had bestowed special attention. He stated at once his own conviction that the presence of man on the earth had an antiquity far beyond the usual estimate, and that there was no question as to his having been the contemporary of the fossil elephants, lions, and rhinoceroses. Mr. Crawfurd declared his conviction that there is no shadow of evidence for the unity of the human race, and none for any having undergone any appreciable change of form. If 1,000, or 4,000, or 10,000, or 100,000 years, supposing the last to be the age of the skeletons of the Belgian race contemporary with the Mammoth, have yielded no differences from the present European type, it is, he believes, reasonable to consider that multiplying any of these sums by a million of years would yield nothing but the same cipher.

DR. MACGOWAN'S EXPEDITION.—Evidence of the progress of Dr. Macgowan's proposed expedition for the exploration of Eastern Asia, is afforded by the following resolution, passed by the Legislature of Rhode Island:—"Resolved: That the scientific and industrial explorations of the unknown parts of Eastern Asia, proposed by Dr. D. J. Macgowan, and elucidated by him to the members of the General Assembly of this State, merits, in the opinion of the General Assembly, the attention of the General Government." We also learn that the Connecticut Academy of Science and Art has appointed a committee, of which Prof. Silliman is chairman, to memorialise Congress in behalf of the exploring project proposed by Dr. Macgowan.

AN American paper says that there is only one Irish Mormon in the Mormon territory. He has nine wives and forty-seven children.

AT a late sale of autographs in Paris a ray of yellow paper was sold for 500f. It was a note written and signed by Martin Luther, and dated 1531.

THE exports of cotton goods from France to England were greater in 1862 than in 1861, while the imports of cotton goods from England into France remained stationary.

LONDON, MONDAY, APRIL 27, 1863.

HONG KONG CURRENCY.

In our issue of 27th March last, we gave a general outline of the decided benefit to the community of Hong Kong likely to result from the proposed alteration in the currency of that colony. Since then we have received several communications on the subject, chiefly relating to the fact that the "mils" are to be pierced for the purpose of "stringing"—a very great boon, and which only requires that the limit of tender be extended to $5, as recommended by Mr. J. J. MACKENZIE, to make the measure work with the utmost smoothness. We are sorry, however, to find that an impression seems further to prevail that we assumed the Imperial "cash" and the "mil" to have been assimilated in intrinsic value. We cannot see how such an interpretation can be assigned to what we then said, the more so that we specially designated the "mil" as simply a token, circulating *within* the colony, and, as a necessary consequence, only recognisable beyond its limits by special agreement to that effect. But we still think that for the purpose of facilitating its universal use in the colony, the Imperial cash actually circulating there should, if possible, be called in, and its further importation from the mainland forbidden under a penalty, so as to make the new currency the *only* legal tender for any transaction. We may add, while on the subject, that the new currency will be ready for transmission in about four or five weeks at farthest—the cent and 10 cent pieces having been struck at the Royal Mint, the mils at Birmingham.

OUR POSITION IN JAPAN.

DESPITE the revolution in Poland, the election of a King for Greece, and the perplexities which spring out of the civil war in America, we question whether our FOREIGN MINISTER has had for some time past any difficulty to contend with equal to that which springs out of our relations with Japan. The news received by the last mail that the British Legation at Yedo had been blown up with gunpowder was so eminently consistent with the previous conduct of the Japanese that the intelligence excited little surprise in this country. By the same mail we were informed that Admiral KUPER had sailed for Japan, and we have since learnt by telegram that military hostilities have commenced. Thus, at the very time when Earl RUSSELL is making large, and, let us hope, adequate demands on the Government for the murder of Mr. RICHARDSON, we have more than one additional proof of the hatred with which foreigners are regarded. Sir RUTHERFORD ALCOCK, in depicting our position in Japan, declares that trade has been hampered, life menaced, and national rights violated, with impunity. This is not all. Not only does every foreigner in Japan live there in imminent peril of his life, not only has it been found impossible to gain more than a pecuniary compensation for injuries received, but we have actually made large concessions to the Japanese Government at a grievous loss to ourselves; and although in return for yielding some of the most important points in the treaty, we only required that its other conditions should be strictly carried out, even this reasonable demand has not been complied with, and Eastern cunning and duplicity have gained the day.

This success is, of course, but temporary; we can afford to be patient—even magnanimous, but there are limits to forbearance, and it seems to us we have but the choice of two evils, namely, to leave Japan altogether, or to prepare for prompt and vigorous action. No doubt the value of our commerce with that country is in a great measure prospective. At present neither our export nor import trade is large enough to possess a national importance. But there are other than strictly commercial reasons why England, having once obtained a treaty with Japan, should enforce the articles of that treaty, and should maintain her hold in the country. Within the last few years Japan, sorely against her will, has been compelled to hold intercourse on equal terms with other European nations. That, in the end, this intercourse will produce good fruit cannot be doubted, for only thus can this strange people be brought within the influence of Christian civilisation and Christian faith. We do not say that it is England's duty, come what may, to remain in Japan simply because, from her hands, the seeds of moral and spiritual life may be scattered over the country. Neither our national character, nor the genius of our religion, allow us to attempt any kind of evangelisation by force. If we retain our position in Japan, our reasons for doing so must be based on other considerations. France has a mission, and in order to proclaim it she resorts oftentimes to annexation or bloodshed. England, too, has a mission, but it does not tempt her to a crusade. Our argument, then, for retaining what we have won in Japan is not founded on any lofty but Utopian scheme of proselytism, although we may ardently hope that the "glad tidings of great joy" will yet be proclaimed to the Japanese by English tongues, and that the events now pending will lead to that glorious result. We are content, however, just now to urge the simple fact, that our political position in the Far East will not permit us to withdraw from the empire. Such an act could not fail to prove detrimental to our interests in China, for it would be regarded as a sign of weakness, and power is the only national attribute which the Chinaman thoroughly understands and respects. Moreover, if we were to withdraw from Japan, other nations would immediately occupy the position which we had resigned. Russia has long been striving to gain a predominance in the Japanese seas, and hopes, as has been stated in a magazine published under Imperial patronage, by establishing her mercantile and military fleets in the Pacific to be in a condition to take part "in the "solution of those universal questions which now exclusively "concern England and France." The passage is quoted in the present number of the *Edinburgh Review*, and the writer, after mentioning that the occupation of Tsusima by the Russians was prevented by Admiral HOPE, remarks that the mutual jealousies of the maritime States of Europe secure the territorial independence of Japan. Sir RUTHERFORD ALCOCK even goes so far as to say that there can be little doubt Japan would become a portion of the Russian empire at no distant date, if other European Powers retired. We must remember, too, that if England were to withdraw France would inevitably step in and annex after her peculiar fashion, and thus we should find our policy in the Far East thwarted or obstructed by two great maritime powers.

It follows, then, that we cannot withdraw from Japan. The great question therefore is—How can we maintain our position there with honour and safety? The writer in the *Edinburgh Review*, while arguing that it "would be for the "advantage of England to withdraw altogether from the "scene of so much bloodshed and intrigue,"—thinks that if this cannot be done it will be our true policy "to support the "authority of the TYCOON, and to maintain his rights, in opposition to the alleged sovereignty of the MIKADO "and the armed resistance of the Daimios." There never was a more outrageous proposition. Indeed, every lesson we have been learning from events in Japan during the last twelvemonths points to an opposite conclusion. We have been taught the weakness of the TYCOON, and that weakness has been alleged as an excuse whenever complaints have been made of the perils to which Europeans are subject. Moreover, the whole conduct of the TYCOON and of the Council of State has displayed a systematic insincerity. Duplicity from first to last has marked their intercourse with Europeans, and the one object they have in view is to return to their former state of isolation. But if, on the contrary, as we have recently been taught, the chief authority in the country is wielded by the MIKADO, it is to him we must look for the due ratification of our Treaty rights. And since the difficulties of our position may be increased by the large concessions we have made, it is imperative that we should demand the equivalent, which Earl RUSSELL has stated Her MAJESTY'S Government will expect and require, viz., the strict execution of every remaining

Digitized by Google

point in the Treaty. If, however, we cannot obtain the satisfaction we require from the MIKADO, there would seem to be no alternative but war, an ultimatum which we sincerely trust will not be thrust upon us. Yet it seems as if the Daimios were preparing for such a contingency, for we learn that they are making frequent purchases of steamers and ammunition. There would be no glory in such a contest, and it is clear, as we have before stated, that the interests of our trade alone are not sufficient to justify it. Might it not be possible, if we are compelled to act on the offensive, to adopt a middle course, and to occupy some point on the coast, so that if we lost our trade with Japan we might still maintain our position in the Japanese waters? We do not forget that SATSUMA remains unpunished, and that he owns Kagosima and the Loochow Islands.

THE BUDGET.

A BUDGET speech by Mr. GLADSTONE generally presents two very discrepant features, which he has not always been so happy as on the present occasion in blending into a harmonious whole. There is the solid foundation and first story of hard facts and figures, upon which is erected the airy superstructure of rhetoric, just relieved here and there by a dash of humour, but usually strongly leavened by a captious tinkering spirit of detail, which is more frequently irritating than beneficial. In the Budget, however, presented on the 16th inst., he has been singularly successful in pleasing every class—so much so that the more solid of the two Conservative financiers, Sir STAFFORD NORTHCOTE, took an early opportunity of saying that, so far as his party was concerned, there was no intention of gainsaying Mr. GLADSTONE'S estimates. It may be, too, that the saddening influence of the loss of Sir G. C. LEWIS may have had its effect in tempering the exuberance of our CHANCELLOR'S diction. Had all been smooth sailing, what an exultation there would have been over a surplus that admitted of the reduction of the Income-tax to its normal limit, at the expense of the remission of barely one-third of one of the heaviest duties still permitted to disgrace the Statute Book! On the other hand, inspired by having lost the only rival near his throne in the lamented Chancellor of the Exchequer of 1855, Mr. GLADSTONE never before was so straightforward, or so free from that petty meddling spirit which the leading journal dignifies with the name of "experimental statesmanship." It had hardly been a GLADSTONIAN Budget, were there not a few of these small rills accruing from sources hitherto untapped, but on the present occasion these minor details, which afford such an ample scope for rhetoric, were all marked by justice and common-sense, and an unexpected candour in withdrawing obnoxious imposts of trifling amount, which his "experimental statesmanship" of two years since had devised.

It will, perhaps, tend to simplify the Budget to the general reader, if we first of all state in a debtor and creditor form the chief items of Revenue and Expenditure, as they would have been, if the taxation remained unchanged. Adopting this plan we find as the

ESTIMATED YIELD OF TAXES.

Customs	£24,180,000	
Excise	17,600,000	
Income-tax	10,500,000	
Stamps	9,000,000	
Post-office	3,800,000	
Taxes	3,160,000	
China Indemnity	450,000	
Crown Lands	300,000	
Miscellaneous	2,500,000	
Total Revenue		£71,490,000

ESTIMATED EXPENDITURE.

Funded and Unfunded Debt	£26,330,000	
Army Estimates	15,060,000	
Navy Estimates	10,736,000	
Collection of Revenue	4,721,000	
Consolidated Fund	1,940,000	
Miscellaneous	8,962,000	
		£67,749,000
Excess of Revenue over Expenditure		£3,741,000

After the cheers had subsided that greeted this agreeable announcement, Mr. GLADSTONE justified one or two items, one interesting enough to our readers, who may have asked themselves how the China indemnity had mounted so high—more than double what it was last year. This he explained by the fact that an amount of £192,000 had been paid to China merchants on account of their claims, which, as there is no corresponding deduction from the receipts of the present year, must be passed to the debit of that account, and is accordingly taken credit for on the revenue account. He then went on to point out how certain anomalies gradually sprang up, which it behoved a practical statesman to get rid of whenever he had a surplus,—some assuming the form of remissions of justly due taxation, others of downright unfair exemption, others,—not very numerous we dare say,—where remission was imperatively called for. Tobacco, as our readers will remember, has already been legislated for in this spirit, and the next on the list, chicory, was, by a vote of the House taken the same night to save the release next day of the stock in bond at the old rates, now put upon a par with coffee (26s. 6d. chicory, 27s. coffee, if foreign grown, and 24s. 4d. if home grown), so that our friends in Ceylon and Java do not benefit this year by the surplus; though we cannot go with Mr. GLADSTONE when he says that because coffee is taxed lighter than tea, he would therefore be endangering a considerable revenue by lowering the duties on it. Considering that the distress in Lancashire has told in a notable degree upon the consumption of spirits (estimated to yield £10,000,000, instead of which the excise return showed only £9,394,000, though there never was so little illicit distilling), we think Mr. GLADSTONE might legislate that all cheaper and more wholesome beverages should be encouraged, to fill up the vacuum. However, we may hope in course of time that coffee will share in the general reduction. The CHANCELLOR then trenched upon a delicate theme, considering how completely club life rules the House of Commons. These palaces are no longer to be exempted from the necessity of taking out a spirit license, Mr. GLADSTONE disdaining to answer the sophistry that, as the clubs belong to the members, such an impost is analogous in principle to taxing a private man for the liquors he consumes in his own house. This argument is defective in logic, but independently even of that, it is one of those cases where even logic must give way to sentiment; as, though he will probably not get £20,000 a-year more by such a tax, yet the bare fact that no wretched demagogue can henceforth excite an ignorant mob with accusations of class legislation in favour of the rich in this direction, amply justifies Mr. GLADSTONE in removing an obnoxious and invidious distinction. In like manner all persons taking out a spirit license for the purpose of getting a beer license at a lower rate, and then dropping the former, will now be compelled to take out fresh beer licenses at the higher rate. Carrier's carts are to please the omnibus interest, (who say these humble rivals carry passengers at more than four miles an hour), to pay one-half the duty of omnibuses. The 5 per cent. railway-tax on all passenger trains, except excursion trains, is to be commuted to 3½, with no exceptions—a salutary change, which may tend to check the ever-growing dimensions of the excursion traffic, and so possibly diminish the hecatomb of victims annually massacred. Charitable legacies in Ireland are to be no longer exempt, and charities and corporations are henceforth to pay Income-tax; a wise rule, considering that almost every such institution is endowed with testamentary funds only, *i.e.*, with money that a man cannot take with him into the other world, and which, therefore should pay Income-tax like any other source of income. These various items, it is estimated, will raise the revenue by £133,000 additional, so that the absolute surplus for the year 1863-1864, may be assumed at £3,874,000. In announcing that he proposed in consequence, first of all, to reduce the Income-tax by 2d. in the pound, Mr. GLADSTONE gave a brief but most interesting sketch of the history of the tax since its re-imposition in 1842, through all its fluctuations, till it has now reverted to its original standard of 7d., but with certain new features imparted to it so far as regards small incomes. Those from £200 downwards to £100, are to be entitled to deduct £60 for maintenance, and pay duty only on the remainder, so that a man with £100 per annum pays only on £40, with £140 on £80, with £200 on £140. We believe the relief would be just as well as great, were it extended to incomes as high as £400, but it is satisfactory that at last the principle involved has been to a limited extent recognised.

Mr. GLADSTONE then jocosely remarked that he was prepared to offer up on the altar of the commerce of his country certain offspring of his own, viz.: the penny stamp on all warrants for delivery, and of 1s. 6d. on all bills of lading outwards. Something more is sacrificed here than his self-love, for he mentioned that they had realised £191,000 per annum, but on the whole, considering what a constant source of worry and annoyance they have proved, it was as well to let them go.

Having thus, as he phrased it, got the pick-axe into the fabric of surplus, it did not take long to bring the whole to the

Digitized by Google

ground. It was pretty well-known that the question lay between the lowering of the duty on tea *or* on sugar, and considerable curiosity was manifested to know which interest was to reap the benefit, not a few persons believing he would coquet with both, and seek to conciliate the sugar-growers as well as the China trade, by partially lowering the duties on each. In our issue of the 10th ult., we took occasion to express our views as to the advisability of confining the reduction to one only, if it were found impossible to do full justice to both, and we expressed a hope that tea might prove to be the recipient of the contemplated boon. We are glad to inform our readers that such is the case. The tea duty is reduced at once to 1s., but in so doing Mr. GLADSTONE took occasion emphatically to warn his hearers that the remission was only for *one year*, so that parties importing largely have fair warning to complete their consignments on or before 31st July, 1864, and further, he begged it to be distinctly understood that this reduction to 1s. duty must, so far as Government could see, *be regarded as a final measure.* This important measure implies a loss to the revenue of £1,359,000, but the CHANCELLOR seems to share in a measure our own sanguine anticipations as to the probable wiping out of even this large deficiency in a few years, by the great stimulus imparted by so large a reduction, even with the Damocles' sword of a re-imposition at 1st August, 1864, impending over the trade. As to the gain to the public, the CHANCELLOR of the EXCHEQUER is of course entitled to make merry over the quaint device of Mr. GREGSON, M.P. for Lancaster, for making apparent to all the effect of the reduction in the shape of two packages, each representing one pennyworth of tea, one at a duty of 1s. 5d., the other at 1s. But the comparison was useful, for as the difference in size would at least equal another large cup of tea on a pennyworth's consumption, it is probable that the extra quantity drunk would imply a corresponding increase in the consumption of sugar. People will not of course drink more tea for the mere purpose of "swilling in" the reckless quantities which so disgusted Mr. TONY VELLER; but among the classes who chiefly consume tea, and with whom economy is an object, there is little doubt that a very considerable increase of quantity, rather than improvement of quality, will be the result, to the corresponding benefit of the sugar duties, which Mr. GLADSTONE hopes to reduce and equalise at some remote period on this side the Greek Kalends.

After allowing for all these deductions, amounting to £3,343,000, there still remains a surplus of £531,000, which Mr. GLADSTONE proposes to retain in the hands of Government, so that, as the net revenue—deducting, that is, the item of Miscellaneous, which indeed ought to stand Miscellaneous Receipts—has for four years past increased pretty steadily £805,000 per annum, he ought to have next year an available surplus of at least £1,350,000, not reckoning any improvement that may accrue from the cessation of hostilities in America, a good crop to replace three years' bad harvests in Ireland (where the destitution is something terrible, and another exodus has begun), and the certainty of a constantly increasing trade with France. Such are the wonderfully elastic resources of England, which, notwithstanding the overthrow of her chief manufacture, and an expenditure of £8,000,000 on the Chinese war, can still go on reducing taxation, and increasing net revenue. We congratulate our constituents on the honourable recognition China has obtained in this Budget, widely different from the Budgets of other days.

SHANGHAI GAS WORKS.

WE noticed in our last the gasworks for Hong Kong and Singapore. We have now to announce that a private company has been formed for the purpose of establishing gas works at Shanghai. The capital is £40,000, and the proprietary is composed of gentlemen who are residen both in London and Shanghai. Specifications have been issued, and tenders demanded for the construction of the works, which are to be of first-class character, both as to material and construction. Some idea of the intended extent of the works may be formed from the fact that the meter is to be made capable of passing 10,000 cubic feet per hour; that the requisite amount of gas will be supplied by twenty-five clay retorts and ten iron retorts; that the gasholder will be sixty feet external diameter, and twenty feet nine inches in height, so arranged as to afford a lift of twenty feet, whilst the length of the cast iron pipes, exclusive of sockets, will be 17,065 yards. One of Beale's exhausters is to be provided for the meter; also a four-horse pressure engine, with strap and pully for driving the exhaustor, and supplying water to the works. The roof over the retort-house will be fifty-one feet span from the centre of the columns, and sixty feet in lengthh, the principals and rafters being of T-iron, and the covering of corrugated galvanized iron plates. The specification stipulates for 450 lamp posts and lanterns, the former having a height of nine feet six inches from the base to the lantern frame, the whole of strong wrought iron. As soon as the respective tenders are sent in for the supply of material, no time will be lost by the members of the proprietary in London in securing its shipment. The designs, as prepared, show great geometrical beauty, and appear to involve the latest improved adaptations. Extraordinary care has been taken to ensure excellence of material and the best welding; and the iron employed before leaving the foundry or the rolling mill is to be protected from the action of the atmosphere by a coating of oil. The present enterprise is in the hands of gentlemen connected with, or well acquainted with, the wants of the European residents in Shanghai.

THE COURIER ROUTE FROM SIBERIA TO PEKING.—Intelligence has been received from Mr. Grant, of the organisation of this Service, and messages were despatched on the 25th inst., which are expected to reach Peking in 20 days. From Tien-tsin they will be conveyed by steamer to Shanghai in four days.

Literature.

We are glad to see that Mr. Summers' "Handbook of the Chinese Language" is now published. It is the first manual for students of this difficult language published in this country. Everybody who visits China ought to know something of the language spoken there. The objection which has always been raised is the difficulty of acquiring it without laborious study, which few have the heart to give to it after a day's toil in a climate like that of China. But, as Sir William Hamilton observes, "the most difficult matter becomes easy when properly explained," and Mr. Summers, with his experience in teaching at King's College, has had opportunity enough to digest what he acquired in China, and to state his information plainly. There will, indeed, always be knotty points about such a subtle language as Chinese. But it appears that most of the difficulties have been touched upon in this book, and we have no hesitation in recommending it to those who cannot avail themselves of the professor's living voice. We hope to give a more critical notice of this work in due course. We are glad, also, to announce that Professor Summers is about to edit a monthly magazine, entitled "The Chinese and Japanese Repository." It is intended to supply the place of the "Chinese Repository" which, after an existence of twenty years, was brought to a close about eleven years ago. The prospectus of this new undertaking does all honour to that most valuable work, but points out at the same time that its range, necessarily narrow then, will be widely extended. The magazine will be published in London at the commencement of each month in time for the mail to China *viâ* Southampton, and we need scarcely say that the success of the undertaking will greatly depend upon the support which may be given it by the merchants of China.

We observe in the list of bankrupts the publishing firm of Messrs. Saunders, Otley, and Co., proprietors of the late *Oriental Budget*, and East India agents.

COURT OF EXCHEQUER.

OAKELEY V. KNIGHT.

This case, which it will be remembered refers to an agreement between plaintiff and defendant, by which the defendant, Captain Knight, agreed to pay plaintiff £200 for five years, for travelling and other expenses of his son, who was to go as companion to plaintiff on a journey through India, China, South America, &c. The two set out, on March 4th, 1856; but it appears that plaintiff left India January, 1858, on return to England, leaving defendant's son at Ceylon. The plaintiff intended his absence should be of short duration, and accordingly continued to furnish certain means to defendant's son, and to give directions as to the course of travel he should take, so far as to direct him to go to Hong Kong, there to meet plaintiff on his return. Finally a letter arrived at Hong Kong from plaintiff who was in England putting an end to the joint expedition, and certain letters of credit in favour of defendant's son, were thereupon cancelled. The question was, when did the agreement terminate in effect and was there no set-off of the claim of £198 made by plaintiff for the nine months during which he was absent from defendant's son, up to the time when the agreement was declared by his letter to be terminated. For

Digitized by Google

the defendant it was contended that, inasmuch as the travel of five years was determined before the expiration of that time, the defendant was not liable to pay after the actual period when it had been put an end to. He had only agreed to pay during the term of the joint travel; and had been put to great expense in bringing his son to England.

Their Lordships took time to consider judgment.

Naval and Military.

THE CHINESE NAVY.

The iron-screw steam gun vessel Tien Sien, Com. Nicholas, which left Plymouth for China, calling at Falmouth, returned in the afternoon to her former moorings in Barnpool.

The Keangsoo, at Southampton, is progressing rapidly, and although the contractors are after time, every effort is being made by the engineers to make up for their past delay. She ought to have been delivered on the 31st March, but her engines cannot possibly be ready before the 30th April.

Commander Charles Stuart Forbes, Royal Navy, has taken up his commission as a captain in the force, with the sanction of the Lords Commissioners of the Admiralty.

The Thule, screw schooner, was spoken off Cape Ortegal by the Hotspur, Captain Toynbee. The Thule was making fair progress against the southerly gales which appear to have prevailed in the Atlantic throughout the past winter.

By letters received from the gunboat Amoy, dated Madeira, 23rd March, we learn that she reached that port after a severe and stormy passage of seventeen days from Falmouth. She sprung her foremast off Lisbon, but fished it at sea so efficiently, that Commander Salwey was enabled to prosecute his voyage to the Cape and Singapore. The accident arose from one of her weather rigging dead-eyes carrying away; in other respects the Amoy made excellent weather in a very heavy sea, and her officers and men speak in the highest terms of their little vessel. The Amoy left Madeira on the 24th March for the Cape, all well.

The following officers have been appointed to the Kwang-tung, paddle despatch-vessel:—Commander Allen Young, R.N.R.; Senior Lieutenant Charles Burlton, R.N.; Lieutenant Charles Guy; Sub-Lieutenant William Penny, a son of the distinguished Arctic explorer; Assistant-Surgeon Frederick Woodman, M.D.; Engineer (in charge), Thomas Newberry, Indian Navy; Engineers, W. H. Cooke and J. A. Cartlidge; and Carpenter, Mr. W. Fookes. The Kwang-tung is an improved Nemesis. The Kwang-tung mounts a heavy 68-pounder and a 32 pounder Whitworth on pivots, as well as a due proportion of 32-pounder broadside guns, and her crew consists of 75 seamen and marines. The centre section of this vessel, as well as in the Tien-tsin, likewise built by Messrs. Laird, is plated with iron to the thickness of two inches, so as to be proof against spherical shell. The Kwang-tung has a ram bow, and is fortified below water for running down piratical junks. She will average ten knots speed, and is brig rigged.

The Curacoa screw frigate has been commissioned at Portsmouth to carry the pennant of Captain Sir W. Wiseman, as Commodore of the second class on the Australian station.

Capt. J. C. Caffin, C.B., has been appointed a Naval Aide-de-Camp to the Queen, vice Capt. Seymour, promoted to be a Rear-Admiral; Capt. Sir W. Hoste has been appointed a Naval Aide-de-Camp to the Queen, vice Capt. Wellesley, C.B., promoted to be a Rear-Admiral; Capt. T. P. Thompson has been selected to receive the good service pension vacant by the promotion of Capt. Hutton to be a Rear-Admiral; Capt. R. Harris is to receive the good service pension placed at the disposal of the First Lord of the Admiralty by the promotion of Capt. W. H. Hall, C.B., to be a Rear-Admiral.

Rear-Admiral R. Smart, K.H., has been appointed Commander-in-Chief in the Mediterranean, vice Vice-Admiral Sir W. F. Martin, K.C.B., whose period of service has expired.

The Leander, 2,760 tons, 400-horse power, lately attached to the 1st division of the Chatham steam reserve, has been commissioned at the Nore by Capt. Thomas Harvey (January 31, 1848), late of the Colossus, 80, 400-horse power, for service on the Pacific station. The Leander was formerly one of the fastest 50-gun sailing frigates in the service, and about three years since was cut asunder, lengthened thirty feet amidships, and converted into a screw steamer. She is now one of the smartest frigates of her class in the British navy. The armament of the Leander has been reduced to thirty-five guns, like that of the Euryalus, flagship of Rear-Admiral A. L. Kuper, C.B., Commander-in-Chief in the East Indies. The Leander has been fitted with additional cabins to accommodate a Commodore and his Staff. She will probably relieve the Topaze, 39, 600-horse power, bearing the flag of Commodore the Hon. J. W. S. Spencer, senior officer on the southern division of the Pacific station.

About 6,000 shot and shell, intended to serve the 110-pounder Armstrong guns, at Bombay, were embarked in barges from Woolwich Arsenal for shipment on board the iron steamship Sarah Sands, now loading in the London Docks. The missiles are all packed separately in canvas bags, in order to preserve the lead coating from damage during the course of transport.

The surviving officers and crew of Her Majesty's ship Orpheus arrived on board Her Majesty's ship Victory, at Portsmouth, by the Peninsular and Oriental Mail Company's mail steamship Ellora, having come by the overland route. A subscription is being raised for the relief of the families of the lost.

The Adjutant-General, Sir J. Yorke Scarlett, has issued a circular memorandum, dated the Horse Guards, April 1, in which his Royal Highness the Field-Marshal Commanding in-Chief directs:—

"That all regiments of the Infantry of the Line at home and in the colonies (with the exception of those in New Zealand, Australia, China, and Ceylon, and the battalions under orders for India) shall be divided as follows, viz.:—10 service companies, 3 field officers, 10 captains, 11 lieutenants, 9 ensigns, 5 staff, 48 sergeants (exclusive of schoolmaster), 21 drummers and buglers, 40 corporals, and 640 privates; 2 depot companies, 2 captains, 3 lieutenants, 1 ensign, 10 sergeants, 4 drummers and buglers, 10 corporals, and 110 privates. Total, 800 corporals and privates. The regiments in the West Indies and Bermuda, viz.:—The 1st battalions of the 14th and 21st, and 39th Regiment, have an additional assistant-surgeon. Highland regiments have a pipe major and 5 pipers, in addition to their establishment. The regiments in New Zealand, Australia, China, and Ceylon, viz.:—1st battalion 12th Foot, 2nd battalions 14th and 18th Foot, 31st, 40th, 50th, 67th, 70th, and 99th Regiments, are to be thus distributed:—10 service companies, 3 field officers, 10 captains, 11 lieutenants, 9 ensigns, staff 6, 48 sergeants (exclusive of schoolmaster), 21 drummers and buglers, 40 corporals, and 730 privates; 2 depot companies, 2 captains, 3 lieutenants, 1 ensign, 10 sergeants, 4 drummers and buglers, 10 corporals, and 120 privates: total, 900 corporals and privates."

A return issued from the War-office shows the number of men serving in Canada to be 11.818 (including a colonial corps of 978), in New Zealand, 5,538, and at the Cape of Good Hope and Natal, 4,719 (including a colonial corps of 870).

London Gazette.

—o—

Colonial-Office.—Notice is given that the Colonial Secretary has appointed the agents general for Crown Colonies in London, Penrose Goodchild Julyan, Esq., and William Charles Sargeaunt, Esq., in pursuance of an ordinance for raising £1,000,000 sterling on debentures for the construction of a railway from Colombo to Kandy, jointly to sign the debentures to be issued on behalf of the Government of Ceylon, and to pay the principal and interest of said debentures as they shall become due.

The Silkworm in France.—M. Guérin-Méneville, at a late sitting of the Société d'Acclimatation, gave an account of the results obtained in various parts of France from the endeavours to overcome the baneful effects of the disease of the silkworm. It appears from this account that all the attempts to find a specific against this disease have signally failed; but that most practical men are now of opinion that the disorder is owing to the blight which has attacked the mulberry tree in various districts. It is now certain that breeds brought from places where the disease of the silkworm does not exist yield a good crop the first year in the infected districts, but cannot be propagated, their eggs being tainted like those of the diseased worms. Hence breeders are obliged every year to import eggs from foreign countries, when they can find healthy ones, which becomes daily more difficult. Nevertheless, from the experiment made with great care, it would seem that eggs obtained from diseased silkworms will produce a breed exempt from the disease in a country where the latter has not yet broken out. The acclimatisation of the silkworm, which feeds on the Ailanthus, or Japan varnish tree, is progressing favourably both in France and in other parts of Europe. The Palma Christi silkworm has succeeded admirably at La Plate. That which feeds on the oak has failed in France for the present, but it is likely to succeed this year in Holland, eggs having been brought over from Japan by M. Pompe Van Meert der Woort. This silkworm is called "Ya-ma-mi" by the Japanese. The silk it yields is made into very strong stuff, which never changes its colour, but which, on the other hand, takes no dye. This silk, as many of our readers are aware, is a monopoly of the Japanese Government, and is not allowed to be an article of trade.

A letter from Paris to Rome costs a franc, while one from Paris to China costs 80 centimes, making China nearer to civilisation by 20 centimes than Rome.

COMMERCIAL POSTSCRIPT.

City, Monday Afternoon.

The silk market has been rather unsettled during the past fortnight, the tone often varying from day to day, according to the views taken by some of the leading buyers. At one moment there was a considerable business done in Japans but the demand did not continue, the nature of the advices from the continent being always unsatisfactory. During the last few days the market has been very quiet, still the leading brokers show some disposition to fix silk. Deliveries, 1st to 25th inclusive, China, 3,897; Japan, 1,153: total, 5,050.

Arrivals not included in the Tables.—April 23, Off the Wight, from Batavia for Amsterdam, Wassenaar; 25, at Liverpool from Manila, Skylark; 23, at Queenstown from Manila, War Hawk; at Brouwershaven from Pasaroeang, Mary Goddard; at Liverpool for Ningpo, Mencius; at Queenstown from Manila, Caribon, Shaftesbury; Off Kinsale from Shanghai, Wm. Fairbairn.

Departures.—April 24, from Pill for Shanghai, Jupiter; from Sunderland for Shanghai, Elizabeth Dawson; 23, from Off Dungeness for Singapore, Zes Guzusters; from Off Dover for Macassar, Formosa.

Laid-on at London, for Hong Kong and Canton, Tamerlane; for Batavia and Sourabaya, Johanna Oluffa.

At Liverpool, for Shanghai, Rifle.

Spoken.—Nova Zembla, Sourabaya to Rotterdam, April 3, 34 N., 39 W.; Paradise (barque), Manila to Falmouth, Feb. 21, 30 S, 36 E.; Java (French ship), Batavia to Bordeaux, Feb. 28, 36 S., 22 E.; Shand (ship), Manila to Falmouth, March 13, 16 S., 6 W.; Spero (Dutch barque), Sourabaya to Rotterdam, March 21, on the line 22 W.; Revely, Singapore to London, Feb. 24, 34 S., 33 E.; Spanker, Singapore to the Clyde, March 16, 6 S., 16 W.; Cissy, Colombo to London, March 16, 6 S., 16 W.; Skimmer of the Waves, Shanghai to London, March 18, 3 S., 18 W.; Eerstelling, Sourabaya to Rotterdam, March 27, 5 N., 30 W.; Nonvora (?), Shanghai to London, April 5, 37 N., 43 W.; Ocean Mail, London to Shanghai, March 6, 2 N., 23 W.

Casualties.—The Juanpore, King, which arrived at Liverpool on the 24th of April from Shanghai, had been in contact the previous day, off Blackwater Light, with the Elizaheth, schooner, from Newport to Waterford, which sank with the master and two boys. The mate and one seaman were saved.

Monetary and Commercial.

CITY, SATURDAY, APRIL 25.

THE BUDGET.

This event came off on the 16th inst., and has given quite an average satisfaction. The full expectations of those in the China trade have been realised by reducing the duty on tea from 1s. 5d. to 1s., as it was generally expected that sugar would have some reduction, and tea only 3d. per lb. Full details of the Budget will be found in another column.

At the meeting of the shareholders of the Oriental Bank Corporation a dividend of 5 per cent., and a bonus of 3 per cent., were declared, making a total distribution of 15 per cent. for the year 1862. The chairman, Mr. H. G. Gordon, mentioned that the deposits show a considerable increase. The insurance fund has suffered some diminution, owing to unavoidable causes. The business generally is increasing, although there are now upwards of twenty competitors. He added that the bank had sustained no loss by the opium frauds.

At the meeting of the Agra Bank, on the 11th inst., the report, which will be found amongst our advertisements, was unanimously adopted. The Hong Kong opium loss was, of course, the chief topic, and a more vexatious swindle could not fall into the hands of restless shareholders. A few comments were made by Mr. Morland, who was reminded, however, that it was not for the general interests of the bank that the directors should circularise, and otherwise keep such a matter before the public. For our part, we think the great source of consolation is that, by the prudence of the directors, they have a reserve fund and profits capable of swallowing such losses in one year. Altogether, the bank's affairs appear to us to be administered with more vigour and ability than ten years ago. The *prestige* of the establishment, both in public estimation and on the Stock Exchange, bids fair to place it as the first Oriental banking undertaking. The £50 shares are quoted at £100.

A prospectus has been issued of the Commercial Navigation Company of India, with a capital of £300,000 in shares of £50. The object is to carry on steam operations on the Ganges, and for that purpose provisional arrangements have been made with the East India Steam Navigation Company for the purchase of their vessels—a steamer and two barges—on payment of £15,000 in cash and £43,000 in stock, which is not to be entitled to dividends until in some one year ten per cent. shall have been paid upon the ordinary shares. The steamer in question is stated to be the only one on the Ganges of sufficiently light draught to reach Allahabad during the dry season, and from its success others are now to be built by the company on similar principles.

The Agents-general for Crown colonies invite tenders, to be opened on the 6th of May, for Ceylon Government Six per Cent. Debentures, to the extent of £250,000, being the first instalment of a loan of £1,000,000, authorised by the Colonial Legislature to be raised for the construction of a railway from Colombo to Kandy. It is pointed out that the public revenue of Ceylon has for many years past exceeded the expenditure, and up to the present date the colony has contracted no public debt, with the exception of a small loan of £100,000, which was borrowed in 1861 to pay off the shareholders of the late Ceylon Railway Company. Further particulars will be found in the advertisement.

The Ottoman Loan of 1863 has been submitted. It is for a sum of £6,000,000, in 300,000 bonds of 500f. each (£20) repayable in 23½ years by half-yearly drawings, of which the first will take place in November next. Before the loan was scarcely out in the market it commanded both here and in Paris 2 to 2½ prem. The terms on which it is floated are comparatively satisfactory, looking to the amount required for interest and the sinking fund, 12,000,000f., while the revenues pledged exceed 64,000,000f.

The biddings for 45,00,000 rupees (£450,000) in bills on India took place at the Bank of England. The amount allotted was only 3,14,000 rupees (£14,000), in the following proportions, viz.:—To Calcutta, 14,20,000 rupees; to Bombay, 16,00,000 rupees; and to Madras, 1,20,000 rupees. The declared minimum price was 1s. 11 1/16d. per rupee on Calcutta, and 1s. 11¾d. on Bombay and Madras, being ¼d. lower than the minimum rates for some months past. The applications within the limits were for about 57 lacs (£570,000). Tenders on Calcutta and Madras receive in full; those on Bombay at 2s. receive about 43 per cent., and all above that price in full.

A general meeting of the British India Steam Navigation Company, Limited (late Burmah), is called for the 28th inst., when a dividend is to be declared.

Great regret was expressed in the City at the announcement of the death of Sir George C. Lewis. Apart from the high and honourable character of the deceased, his statesmanlike capacity, and the especial ability which he displayed when he occupied the post of Chancellor of the Exchequer, had obtained for him general respect.

In the absence of demand for India the bar silver by the steamer *Tasmania* was sold to-day for the Continent at 5s. 1d. per ounce, showing a fall of ¼d. compared with the price obtained for the supply by the previous packet. The cause of the flatness of the silver market has previously been explained.

The accounts from the several manufacturing districts are not unfavourable, and there are some few localities where comparative briskness prevails, but particularly in the wool trade of Bradford, the armour plate and general steel and heavy branches of Sheffield, and in the cloth halls of Leeds. The home lace business of Nottingham is also rather more active, and the markets of Birmingham, Dundee, Halifax, and Manchester, although still rather quiet, are steady in their general character. From Huddersfield, Leicester, and Newcastle, the reports indicate a want of animation in the staple trades of these towns.

A call of £5 is to be paid by the 6th of May on the shares in the Bank of Hindustan, China, and Japan (Limited). No progress has been announced in amalgamating this bank with the Central India since our last. A manager has been advertised for China.

Hon. Mr. Walker has arrived from Washington, and it is reported will negotiate a Federal loan in London and Paris.

A meeting was held yesterday of the creditors of Messrs. Saunders, Otley, and Co., publishers and East India army agents, when the liabilities were stated at about £17,000, with assets estimated to produce 10s. or 11s. in the pound. A committee was appointed to investigate the estate.

The amount of bullion by the P. and O. Co.'s steamer *Poonah* from Southampton on the 20th inst. was—In gold: To Madras, £2,797. In silver: To Madras, £2,352; to Penang, £700; to Singapore, £62,050; to Hong Kong, £119,528; to Foochow-Foo, £1,500; to Shanghai, £88,097. Total in gold, £2,797; in silver, £274,227.

ARTICLES OF IMPORT.

TEA.—The most important feature in our market during the fortnight has been the settlement of the duty question, by the reduction so long promised to 1s. per lb., and which comes into operation to-day, and cannot fail to give a great stimulus to consumption. There was a large amount of business done previous to the 16th inst., at higher prices for all kinds, but since the announcement of the reduction there has been less excitement, the large public sales progress having occupied the atten-

Digitized by Google

tion of the trade, who have also been very busy with the large clearances which will be made to-day, but our market is very firm. Low and dusty kinds of Congou to fair common have sold at an advance of ½d. to 1d. per lb.; good common we quote 1s. 1½d. to 1s. 2d. per lb.; flavoury kinds of tea up to 1s. 7d. per lb. show a rise of fully 1d. per lb. Fair to good Hohows, Ningchows, and Moning and Wopak kinds have sold to some extent at an advance of 1d. per lb. Good Kaisows have been in moderate demand at rather higher prices. The decline in fine to finest Monings and Wopaks has been fully recovered, and they are now saleable at prices equal to the highest point of the market. Fine to finest Kaisows fully maintain former extreme value. Tayshan kinds have sold ½d. to 1d. per lb. dearer. Common Oolongs are difficult of sale, but good and fine have sold rather more freely at 1d. per lb. advance. In Souchongs not much business has been done. Flowery Pekoes remain much as before. Common to fair Scented Capers have sold rather higher; fine of Canton make are inquired for, but Foo-chow sorts are difficult of sale. Foo-chow kinds of Scented Orange Pekoe have sold about 1d. per lb. dearer; also good to fine Canton kinds. Uncoloured Japans continue saleable at former prices. Assam and Cachar kinds have sold freely at advancing rates at the last public sale. In green teas there is not much to notice. Common Young Hysons remain difficult of sale, but fair to good and fine Imperials and Gunpowders have sold freely at higher prices. Hysons also continue in demand. Canton made teas show no material change. The public sales, which commenced on the 21st inst., are still in progress, and are passing without spirit. They comprised 39,511 packages, of which 3,620 packages were Assam and Indian teas, and 4,095 packages were printed without reserve.

SUGAR.—A healthy tone prevails in the market at the close, and the bulk of the parcels in auction has been taken off at the following rates:—5,701 bags Penang, good middling to fine fine brown, 31s. 6d. to 33s. 6d.; low to good middling yellow, 34s. to 36s. 6d.; good yellow grocery, 37s. to 38s. 6d.; 576 bags good middling yellow Gurpattah Bengal were bought in at 35s. 6d. to 36s.; likewise, 1,500 bags dark grainy Madras at 30s. 6d.; and 5,548 bags ordinary old clayed Manila at 32s. 6d.; and also 22,700 bags clayed Manila, which met low bids, and were brought in at 32s. 6d. to 33s. 6d.; 511 bags native Madras, at auction, sold steadily: good brown to low yellow, 31s. 6d. to 32s. 6d.—one lot 33s. 6d.: 3,000 bags Madras Jaggery are reported privately at 27s. to 27s. 6d. The following are our quotations:—Bengal: Crystalized, 24s. to 27s. 6d.; Benares, 22s. 6d. to 28s.; date, 19s. 6d. to 26s.; ordinary to fine brown, 14s. to 19s. 6d. Penang: Grey and white, 24s. 6d. to 26s.; brown and yellow, 16s. to 24s. Madras: Grocery, 21s. 6d. to 27s.; native, 15s. to 19s.; jaggery, 14s to 15s. Siam and China: White, 22s. 6d. to 28s.; brown and yellow, 14s. 6d. to 22s. Manila, clayed, 18s. 6d. to 20s. 6d.; Muscovade, 15s. to 16s. 6d.: Java, grey and white, 24s. to 27s. 6d.; brown and yellow, 15s. 6d. to 24s.; Havana, white, 31s. to 34s.; brown and yellow, 17s. 6d. to 27s.; Bahia, grey and white 20s. 6d. to 25s. 6d.; brown, 16s. 6d. to 20s. 6d.; Pernam and Paraiba, white, 21s. 6d. to 27s.; brown and yellow, 16s. 6d. to 21s.; Foreign, Muscovade, low to fine grocery, 21s. to 31s.; brown, 17s. 6d. to 21s. The total landings of sugar from all parts from Dec. 27th to April 23rd amounted to £59,330 tons, against 45,340 tons in the previous corresponding period. The stock on hand on the 18th inst. was 65,390 tons.

COFFEE.—A good demand has continued to prevail. Ceylon: In public sale, 666 casks, 486 barrels and bags plantation went off freely as follows:—Fine ordinary to low middling, 84s. 6d. to 89s.; middling to good middling, 90s. to 94s. 6d. 346 casks, 3,483 bags native, were also chiefly realised at the extreme value—small, 72s. to 73s.; good ordinary, 74s. to 74s. 6d.; superior, 75s. to 77s.; fine picked, 78s. 6d. to 82s.; garblings, 69s. 6d. Mocha: Rather dearer; 803 packages fair to good clean garbled being taken with spirit at 95s. to 97s. East India: At auction, 1,723 bags Singapore found ready buyers; common mixed, 65s. 6d. to 67s.; good even mixed, 76s. to 77s. 6d.; bold, 79s. 6d. to 81s. 6d. Foreign: The supplies of floating cargoes being on a somewhat increased scale, there has been less inclination to purchase, and no sales are reported, while on the spot business is precluded by the small quantity on offer. The following are our quotations:—Mocha, ungarbled 60s. to 78s.; garbled, com. to good 80s. to 96s.; fine 97s. to 104s.; Ceylon, native, good ordinary to fine 72s. 6d. to 76s.; ordinary 68s. to 71s. 6d.; plantation, ordinary to fine ordinary 73s. to 85s. 6d.; fine ordinary to middling 86s. to 91s.; good middling to fine 91s. 6d. to 100s.; Java 68s. to 92s.; Singapore, ordinary and good ordinary 58s. to 75s.; Sumatra and Padang 57s. to 74s.; Madras and Tillicherry, 72s. to 100s.; Malabar and Mysore, good ordinary 74s. to 76s.; fine ordinary to fine 77s. to 101s. The total amount of landings from December 27th to April 18th was 9,440 tons, against 6,900 in the same previous corresponding period. The stock on hand on the 18th inst. was 7,970 tons.
